I have done blind A/B testing. WAV or FLAC always beats AAC, at any bitrate. AAC+ SBR, the flavor used for digital radio, is even more annoying due to false triggering of the pink noise pumper and the total lack of any sense of space. A typical 78 RPM analog record has more ambience.

I do all my entertainment radiolistening via web unless I'm somewhere without wireless broadband or listening to the AM radio. I find the vast majority of FM radio stations unlistenable due to the extreme dynamics processing.

Have you tried other lossless codecs like Monkey, mp3-HD, Mp4 ALS?

The one that seems most promising is mp3-HD as it's compatible with older players. I've heard some weird stuff with Money, but it may be me. ALS sounds solid, but I think you need a player that can handle it.

I think Vorbis has a lossless system as well, but I could be wrong.

You do realize that most radio stations are using compressed digital formats for their programming, and have for some time. I believe the most prevalent is OGG/Vorbis, though some do use WAV or high bitrate mp3. "DJ's" anymore sit in front of a computer monitor and read off a list prepared by the PM or equivalent. Lucky ones even get to point and click on the tracks they want to play. Union shops are insane: all the "DJ" does is talk, the board is run by an engineer and all music selection is done by the PM. In some stations, the entire broadcast day is lined out in advance, and the FCC log is printed out at the beginning of the day. I miss the old days of radio.

That may be why everyone says HD Radio sound so good. Maybe it actually
only sounds good because the "analog" broadcast is really no such thing.
I've never listened to HD on a home system with a high end amplifier and
speakers, only in a vehicle where it's so much better than analog FM
that the reaction I get from the spousal unit when we're on an HD
station is "is that a CD you're playing?"

757. [RAC-Bulletin] RAC Bulletin 2010-09-14E - Industry Canada Authorizes Commercial Activity on 2-metre and 70 cm bands

Newsgroup: rec.radio.amateur.misc
Date: 2010-09-11 01:26:16 UTC

RAC Bulletin 2010-09-14E
2010-09-10

Industry Canada advised both RAC and RAQI on Friday, Sept 10, 2010 that their Montreal office had authorized a number of 430 to 450 MHz frequencies and a single VHF frequency on 145.555 mHz. According to IC, frequencies were chosen to avoid known amateur repeater channels. These frequencies in the 70 cm and 2m amateur bands were temporarily authorized to support communications for many European entrants of a cycling event to be held on Quebec City and Montreal on Sept 10 and Sept 12 respectively. This type of authorized intrusion by Industry Canada of non-amateur communications in amateur spectrum is highly unusual and is a matter of great concern to Radio Amateurs of Canada. RAC will be taking the matter up with Industry Canada officials. RAC will be interested in knowing if actual interference has been caused to amateur communications; please report any observations to regulatory@rac.ca

How right you are.

Back when AM was king and AM stations had REAL PROGRAMS,
locally-produced, not sent down the line from a studio in
god-only-knows where with canned music. And back before the days of

"talk radio." I don't know when was the last time I even tuned to the AM band.

And now, the FM bands are being invaded by wackjobs -- half the FM stations in my area are "christian" radio and the rightwing hate jocks are invading FM territory.

On the other hand, I recently discovered Sirius satellite radio where I can listen to the Willie Nelson channel 24/7 for real music.

If there is any difference at all between the different lossless formats
then someone is lying and they're not really lossless.

I'd be very surprised if a lossless version of MP3 could be made compatible
with all old MP3 players.
For one thing lossless audio files are big and there's no guarantee that an
old player can read data from its memory fast enough. But I'm doubtful it
can really be done at all. They may be able to create an improved high bit
rate MP3 that they think they can get away with calling lossless when it
isn't.

There has been "talk radio" all my life, but it was much more limited and
had a better, more balanced sort of talk. My personal favorite was Ira Blue
on KGO, second I guess was Herb Jepko on KSL. KSL only had talk at night, I
think KGO had it 24/7, or close to it, they used to bill themselves as
"People to People Radio 81."

SARL NEWS - SUNDAY 12 SEPTEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

Hennie Smit, ZS6ASS, from Vanderbijlpark became silent key on Tuesday 7 September 2010. He leaves his wife, daughter and two sons. Our sincere condolences to his family and friends.

(PAUSE)

In the news today:

CLOSING DATE FOR RAE OCTOBER 2010 ENTRIES

RADIO TECHNOLOGY IN ACTION ON SATURDAY PROMISES TO BE A BLAST

SUBSCRIPTION REMINDER

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

CLOSING DATE FOR RAE OCTOBER 2010 ENTRIES

Please remember that entries for the October 2010 RAE close on 24 September 2010. When you submit your RAE entries, please check that you have completed the following documentation: 1) RAE Application form (remember to indicate your examination centre and a choice of three call signs). 2) Proof of payment. 3) Copy of ID document. 4) Fully completed ICASA application form. (If you are unsure of any details on the form please refer to the example application form which can be obtained on the Radio Amateur Examination portion of the SARL Web.) 5) A completed HF assessment. 6) A completed SARL membership application form (optional but recommended).

Failure to submit any of the above documentation could disqualify you from sitting the RAE examination.

Should you have any queries, please contact Mariska at the SARL on email: admin@sarl.org.za or alternately you can phone the office on 011 675 2393.

No late entries will be accepted.

RADIO TECHNOLOGY IN ACTION ON SATURDAY PROMISES TO BE A BLAST

You cannot afford to miss the SARL Technology in Action 2010 to be held on Saturday 18 September at the National Amateur Radio Centre in Gauteng.

Dr Robin Drennan, Executive Director of the National Research Foundation, will deliver the opening address and inaugurate the real-time space weather display that is being installed in collaboration with the Hermanus Magnetic Observatory. The hardware has been donated by Acer South Africa.

As in the past, the RTA lectures are presented in such a way that they will cater for the interests of people from a wide range of backgrounds. You will learn about digital signal processing and how to enhance signals and bring them out of the noise. Space weather is another fascinating subject and for the first time you will be able to see real-time space weather updates. A look at the CPUT satellite project, the 85 years of Amateur Radio in South Africa and how to build direction-finding gear will provide great insights into these activities. You can also learn more about D-Star, the latest amateur radio digital communication system, and try out the system.

Another interesting feature is the display and demonstration of the re-engineered beacon project, which will soon be rolled out.

The full programme can be downloaded from www.sarl.org.za; click on RTA and follow the links. If you would like a copy in your mailbox, send an email to rta@sarl.org.za with RTA in the subject line. The cost to attend the RTA is R50, which includes refreshment and lunchtime snacks. You can prepay for the RTA attendance or pay at the door. Every entry ticket has a lucky number, which goes into the draw for the attendance prizes sponsored by RS Components and Microchip. Find all the details on www.sarl.org.za and select RTA from the left-hand menu.

A new ARRL book, "PIC Programming for Beginners", will also go on sale at the RTA by the South African Amateur Radio Development Trust. For more detail of how to order this and other books, go to www.amateurradio.org.za/books.

SUBSCRIPTION REMINDER

If you have not paid your SARL subscription, do it this weekend. If you mislaid your invoice or reminder call Mariska on Monday morning at 011 675-2393 for assistance.

INCREASES IN LICENCE FEES

The copy of the Government Gazette announcing the increase in license fees by ICASA is available on the member pages of the SARL web at www.sarl.org.za. Click on members only at top right hand of the home page and enter your PIN.

TAKE YOUR HAND-HELD TO WORK DAY

The annual SARL "take your hand-held to work day" will be held on Friday 1 October 2010. Show your colleagues what amateur radio is all about. For those retired and at home, come on the local repeaters and participate in spreading the story of Amateur Radio. Connect via Echolink or IRLP and make it a bumper activity.

What about getting one of your colleagues to take a picture of your activity? There will be some nice prizes up for grabs. Listen to SARLNEWS next week for more details.

ON THE AIR: AMATEUR RADIO TO CELEBRATE BONAIRE BECOMING A DXCC ENTITY

On the air, the upcoming Bonaire DXpedition by a combined Dutch and American operating team plans to use the large antenna farm of Radio Netherlands. This will deliver to the world a truly whopping signal between 10 and 24 October when they activate the island for the first time after it becomes a new DXCC entity.

Bonaire is currently part of the Netherlands Antilles, which are scheduled to be dissolved as a unified political entity on 10 October. The five islands of the former Netherlands Antilles will each attain a new constitutional status within the Kingdom of the Netherlands, thus creating several new DXCC entities.

To commemorate the event, this group of dedicated radio amateurs will take to the High Frequency airwaves using the giant Radio Netherlands antenna system constructed on the island back in 1969. As of Tuesday, 7 September, a large shipment of equipment has been loaded into a sea container in Miami, Florida. The shipment consists of Yagi antennas, masts, amplifiers, coax, band pass filters, tuners and a wide variety of accessories. It was expected to set sail for Bonaire on Friday, 10 September.

You can keep track of the planning for the Bonaire DXpedition and vicariously join in on the festivities online at the operations website. Its home in cyberspace is www.bonaire2010.com. Thanks to Newsline and QRZ for this story.

CONTEST NEWS

The provisional results for two SARL Contest have been released.

SARL YL Sprint. Fifteen logs were received, made up of ten logs from YLs and five logs non-YLs. There were more YLs active in the Sprint, but not all of them sent in logs.

The winner of the bouquet of flowers comes from the Western Cape, Corinna Carstens, ZS1CC. Congratulations Corinna!

1st Collette Rundle, ZS2CR, 240 points 2nd Bridgette van der Rede, ZS3V, 193 points 3rd Heather Holland, ZS6YE, 140 points

SARL HF Phone Contest. Twenty two single operator logs, two multi-operator logs and one check log were received for the HF Phone contest.

Multi-operator 1st West Rand ARC, ZS6WR, 162 points 2nd Oakdale ARC, ZS1OAK, 102 points

Single operator 1st Jan Botha, ZS4JAN, 226 points 2nd Gary Potgieter, ZS5NK, 184 points 3rd Danie Mans, ZS3D, 144 points

The committee is doing a final check on the logs and the final results will be published in HF Happenings. The Spring QRP Sprint, which would have been on the air this afternoon, has been moved to Sunday 23 October 2010.

The SARL VHF/UHF Contest will be run from 10:00 UTC on Saturday 18 September to 10:00 UTC on Sunday 19 September.

The SARL Heritage Day Sprint will be on the air on Friday 24 September. Clubs are encouraged to set up stations at various heritage sites around the country.

The 5th SARL Club 80 metre contest will be run on Wednesday evening 29 September. This will be a digimodes contest.

CLUB NEWS

During the weekend of 18-19 September 2010, OTL Club is planning to take part in the VHF/BHF Competition. The club will be located on Steenkampsberg, between Lydenburg and Roossenekal. OTL is also planning to install a repeater on Mariepskop over the weekend of 24-25 September 2010. The frequency will be 145,712 5 MHz. The repeater will also be linked to the Long Tom repeater to hopefully give coverage in the Kruger Park on 2 m on a frequency of 145,637 5 as well as all the other repeaters of OTL Club. Please stand by for a test on this repeater.

The Centurion Radio Amateur Club will commence with CW classes on Monday 20 September 2010. The classes will start at 19:30 for about an hour, Mondays to Thursdays, on the Centurion Radio Amateur Club repeater, frequency 145,775 MHz. All are welcome. Certificates for 5, 8 and 12 wpm will be issued. For further information, contact Jimmy, ZS6APS, on 012 653 2025.

The Overberg Amateur Radio Club will be hosting a special event station at the Hermanus Primary School on 25 September coinciding with the Whales and Wheels festival.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The earth-facing side of the sun is blank, and there are no large sunspots. Old Sunspot region 1 100 is now set to return and is hiding on the eastern limb. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. With the change of season, 15 m is also starting to show signs of life. Conditions to India will be good from the late afternoon until after sunset. During sunset, it will be good towards Europe. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. 15 m openings to Brazil and South America are possible during the afternoons.

For the CW and digital enthusiasts, 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the workhorse for contacts around the country with 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 September - RTA symposium in Gauteng; 18/19 September - VHF/UHF competition; 20 September - Morsekode classes by ZS6APS starts on 145,775 repeater in Pretoria; 24 September - Heritage day sprint 24 September - Enrolments for October RAE close; 25 September - Launch of HABEX at Klerksdorp. 25 September - Special event station at Hermanus Primary School; 29 September - SARL 80 m digimodes club competition; 30 September - Closing date for entries for Phase 1 of the Innovation project;

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN, and edited by Hester van der Walt.

Thank you for listening, 73.

/EX

I've tried it and it works. Full compatibility and lossless quality.

It's a free download for the encoder, the player & the plug-ins (I use
Winamp and believe there may be plug-ins for other players).

Try it, you may be surprised.

I listen to KGO because it's live and local and if something happens the
on-duty news person will interrupt the regularly scheduled programming.

I need to amend that. I just tried an mp3HD song on a cheap mp3 player
(Sylvania SMPK 2062) and it couldn't play. Then again it only holds 2GB so
putting the track on was only a test it failed.

Otherwise on most Windows players it works (most because I can't say I've
used them all and I haven't tried them on my Mac yet).

What is the difference between these two, which causes the "-Contest"
version to be about half the price of the "standard" version?

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 12th September 2010

IRTS Morse testing at North Cork Radio Group Rally.

Morse testing can be made available if required, at the upcoming North Cork Radio Group Rally on 19th September. Anyone wishing to sit a morse test should contact Ger McNamara EI4GXB on 087 2532512 or ei4gxb /at/ gmail.com

---

Closing Date for Theory Examination

It is now less than one week to the 17th of September which is the closing date for applications to sit the next theory examination for an Amateur Station Licence. The next exam will be held on Wednesday the 6th of October at 2 p.m. in the ComReg Offices in Dublin.

For further information on the application procedure, exam fees and other details see 'Theory Examination' in the 'Information' section of the IRTS website atwww.irts.ie

---

Pakistan Donations

In recent bulletin's we have ran an appeal headed by Conor O'Neill from AREN in relation to seeing equipment and or donations to send to our counterparts in Pakistan to provide much needed communication after the flood disaster.

Conon would like to thank the following for their kind and generous donations. EI2KA, EI3AL, EI7IG, EI4JN, EI7HO, EI2CA, South East Communications & IRTS

Details of how equipment is being used in the relief effort can be found on www.pakhams.com

---

DAR Theory Classes

Anyone interested in attending Theory Classes at Dundalk Amateur Radio Scoiety Please contact Tony EI4DIB at ei4dib /at/ ei7dar.com or via text to 086 4066660

EI2RCR Repeater

The South Eastern Amateur Radio Group's repeater EI2RCR on the Ridge of Capard is still off air and the club are hoping to have in back in the not too distant future. We will keep you posted as soon as any progress is made.

APRS email List

John EI7IG hosts an email list any experimenters interested in APRS. This is a low-volume list for further details please contact John EI7IG directly for details.

Rallies

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1933 Car Windscreen Wipers first made compulsory in Australia. 1936 Last known Tasmanian Tiger dies in Hobart Zoo, Tasmania.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-September, through Sunday, 12th-September there were 213 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5N, 5R, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VP2M, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Eddie, VK4AN, will once again be active as 3D2A from Navua Village on Viti Levu Island (OC-016) between October 27th and November 14th. Activity will be on 160-10 meters including 30/17/12 meters, using CW, SSB, RTTY and PSK31. He will use a Flex-5000A radio with a laptop

into DX88 vertical, 3-element tri-band beam and a sloper for 160/80/40m. QSL via VK4AN. Aisea, 3D2AA, will join Eddie and be active in the CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry.

8Q, MALDIVES. Steve, M0XVT, will be active as 8Q7SB from Komandoo Island, Lhaviyani Atoll (AS-013), between now and September 18th. Activity will be on 20/17 meters using a FT-817 and Yo-Yo antenna. All QSLs are to be sent via the Bureau to M0XVT.

A SUPERIOR GRIDS EXPEDITION WRAP-UP (And the OPDX Web Page is once again updated!). OPDX's Webmaster John, K8YSE's, month long excursion around Lake Superior and points north came to an end on September 8th. He left on August 3rd, and his travel distance was slightly over 5000 miles, working in 32 grids on 168 satellite passes and made over 2000 QSOs. John plans to write an article for one of the magazines about his operation and camping trip around the lake, so be looking for it. Before John left he stated that he would try to keep the OPDX bulletins updated on the Web page, "if" he had access to WiFi. He was only able to find access once during his trip through the wilderness.

AFRICAN TOUR. Sigi, DL7DF, will once again lead a crew of operators for "two" (not just one) DXpeditions to Africa. The team of operators will operate from:
Rwanda (9X) - As 9X0SP between October 26th and November 2nd
Burundi (9U) - As 9U0A between November 2-11th.
Operators mentioned are: Wolf/DL4WK, Sigi/DL7DF, Rolf/DL7VEE and Frank/DL7UFR. Pilot station for this DXpedition is Bernd/DF3CB. Activity will be on 160-10 meters using CW, SSB and the Digital modes. They plan to have several stations on the air with one station exclusively dedicated to RTTY, PSK31 and SSTV. They will use 3 transceivers (3 x K2), 2 x XV600, 1 x TY900, 2 x 18m lowband vertical, a vertical for 40m, verticals for 30m, Spiderbeam for 20/17/15/12/10m and some beverage antennas. QSL via DL7DF, direct or by the German DARC QSL Bureau. For more details and updates, visit: http://www.dl7df.com/9x_9u/index.html

C5, THE GAMBIA (Update). Members of the Czech and Slovak OM0C Contest Crew have announced another DXpedition to The Gambia to take place between November 17-30. They will be using renewed callsigns from their previous DXpedition, C50C or C52C used in The Gambia 2007, the greatest Slovak expedition of its kind ever. The special callsign C5A will be reserved for the CQWW DX CW Contest as a Multi-Multi entry. The team members of The Gambia 2010 DXpedition are: Rich OK8WW/OM2TW, Jiri/OK1RI, Joe/OM5AW, Norbert/OM6NM, Roman/OM2RA, Jiri/OK1DO, Lada/OK1DIX, Petr/OK1FFU and Vlada/OK1NY. Activity will be on 160-10 meters using CW and SSB. The Gambia 2010 DXpedition will use various transceivers from Elecraft and Kenwood. They will set up 6 full time stations that can be used simulta-neously in order to take advantage of all band openings. Most of the time they will use 4 stations only. The whole set up of 6 stations will be used during the CQWW CW Contest only. QSL Manager is Brani, OM2FY. QSL by the Bureau or direct to: Branislav Daras, P.O.Box 6, SK-820 08 Bratislava 28, Slovak Republic. For more details and updates, visit

their Web at: http://www.om0c.com/?Gambia_2010_-_C5A

C9, MOZAMBIQUE (Update). Operators David/GI4FUM (C91DJ), Gilli/GI8MIV (C91MV), Tony/G4LDL (C91DL), Glynys/G8KWD (C91KW), Dave/ZS6AVM (C91AV), Toni/ZS6GF (C91GF) and Daniel/ZS6JR (C91JR) will be active from the coastal resort of Bilene between October 15-31st. The group plans to be active in the "Jamboree on the Air" (October 16-17th) using the callsign C91MS (Mozambique Scouts). Also included in the activities is an entry in the CQWW DX SSB Contest (October 30-31st) using the callsign C91WW. Outside of these two events, operators will uses their own individual callsigns. Most of the activity will be on SSB, although they may be able to do some CW, PSK31 and RTTY. QSL routes were not announced yet. For updates, visit: http://www.3da0ss.net

CY0, SABLE ISLAND (Update). Randy, N0TG, reports: "With only six weeks remaining (October 21-29th), the team has assembled most everything and shipped it to Halifax. Gary, VE1RGB, is organizing everything for its final destination. The Home page for our Web site has been updated to conveniently display the DXpedition's frequencies and QSL information."
The CY0 DXpedition's Web site is at: http://www.CY0dxpedition.com

DX0, SPRATLY ISLANDS (Update). Chris, VK3FY, Team Leader/Public Affairs Person of DX0DX, reports the following on September 6th (edited):
"DXpedition Team Leader, Chris Dimitrijevic, VK3FY and DU8/VK3FY, has announced that Earth-Moon-Earth (EME) contacts are planned as part of the DX0DX activation of The Spratlys.
Also advised is latest external funding support that has been confirmed for the DXpedition that will involve some 30 radio amateurs in three teams on Thitu Island, January 6-24th, 2011.
In the latest news, experienced EME contester and DXpeditioner, Colin Brown, GM0RLZ, will be active on both 6m and 2m.
Chris VK3FY said, 'We are delighted to have Colin, GM0RLZ, join DX0DX so it can be propagated by bouncing signals off the lunar surface. He has filled a vacancy on DXpedition Team 2 (January 6-15th) and has the role of coordinating any requests for moon-rise and moon-set contact attempts.'
The equipment proposed is an ICOM IC-9100 transceiver, OM2006 6m amplifier, Commander 2m amplifier, with antennas being a 6M7 for 6m and 2M9 on 2m, both by M2inc.
Chris, VK3FY, said all other plans for the DXpedition are continuing satisfactorily, and with 120 days to go, there's a lot of work yet to be done.
He said, 'Support for DX0DX is growing steadily and thank you to those who have already given financially or in other ways towards this major undertaking.'
The Team acknowledges funding it has from NCDXF, EUDXF, CDXC (Chiltern DX Club), East Iowa DX Association, GMDX Group, Western Washington DX Club W7DX and the Helenic Amateur Radio Association of Australia.
Other financial support has been received from individual radio amateurs Brad/WA6JJB, Paul/N6PSE, Marc/DO4DXA, Maurice/N4LZ, Vic/W4VIC, Ken/N5TY, Allan/VK2CA, Paul/VK2HV, Scotty/KG9Z, Clay/K7HC, Mitch/DJ0QN, Neill/K4ESE, Doyl/AB4IQ, William/K3WA. Billy/W3EL, Hans/SM0IMJ, Robert/W0ZT, Albert/

N8NN, Tom/N6AJR, Patricia/K7EIE, John/G3LZQ, and Tony/VK3VTH.
Support DX0DX: http://www.dx0dx.net/2010/05/callsign-name.html
The corporate sponsors to date are: ACOM International, Ham Radio Outlet, Heil Sound, ICOM America, ICOM Australia, Kabayan Online Grocery, M2 antenna systems, microHAM, Mosley, OM-Power, QRO Communications, Rohn Products, SteppIR, Spiderbeam, THAMWAY Corp, The RF Connection, Titanex and WX0B Array Systems.
Support has also been given by the IARU Region 3 member society Philippine
Amateur Radio Association (PARA), DXWORLD, The Daily DX and ClubLog.
- Jim Linton VK3PC, Public Affairs DX0DX."
For more details about the 2011 January DX0DX DXpedition to Thitu Island in the Spratlys, visit: http://www.dx0dx.net.au

DX MAGAZINE'S MOST WANTED SURVEY. It is that time again to participate in DX Magazine's annual "Most Wanted Survey". The 2010 survey is now being taken through October 15th. Carl, N4AA, editor of "QRZ DX" and "The DX Magazine" <http://www.dxpub.com/> reports that the survey form is available at: http://www.dxpub.com/dx_survey2010.html
PLEASE NOTE: Carl states, "THIS IS NOT - REPEAT NOT - A COMPLETE LIST OF ALL DXCC COUNTRIES. However, if you need something that is not on the list, you may add it at the bottom of the survey form in the "Additions and Comments" box. Please pass the word to your DXer friends that the survey is up and running and will be there until OCTOBER 15th. The over-all top 100 will be posted on the Web site around January 15th, 2011."

DX-CODE OF CONDUCT. Robert, ST2AR/S53R, from Sudan, writes to OPDX and its reader about something that needs to be addressed as much as reporting a new one. It's about the operating ethics and practices. He states, "A while ago a group of amateurs, DX-expeditioners, FOC members, etc.. (W6SJ, G3SXW, ON4WW, G3PTJ, ON4UN, N7NG, ZL2IFB, myself) have started to talk about the poor operating practices that are rather widespread today, especially when a rare one shows up on the bands. We have come up with a DX-Code that sets some basic but very important guidelines on how to best use your station and operating skills when trying to score a new one. The code is published at: http://dx-code.org
We frankly thought it was time we all start addressing the ever growing problem of misbehavior on the amateur bands. Making amateurs aware of the problem and guide them on how to contribute to the cause, should be a good way forward. I am writing to you to seek your support on the above efforts."
Robert suggests to look at the following Web page and learn more about how to operate and best use your operating skills to make it into the DX log, in away that is both efficient and follows the ethical standards of operating on the amateur bands. So please visit and become a supporter of the "DX-Code of Conduct" Web page at: http://dx-code.org

E2E, THAILAND (Update). Charly, HS0ZCW/K4VUD, informs OPDX: "The Radio Amateur Society of Thailand (RAST) has received permission from the radio governing body of Thailand to utilize the special callsign of E2E for use in any contest. There is no expiration. RAST will share the callsign with its members on a rotational basis. QSL to HS0AC, the

OTHER RAST valid callsign."

EA8, CANARY ISLANDS. Operators Al/DJ5AA and Bernd/DL2DXA will be active as EA8/homecall from La Palma (AF-004, WLOTA 1648) between now and September 24th. Activity will be holiday style on 80-10 meters. They will also try to activate one or two lighthouses: Fuencaliente (ARLHS CAI-037, CAI-083) or Punta del Muro (ARLHS CAI-036). These activations will only be QRP using battery power. QSL via their home callsigns, by the Bureau or direct.

I1, SOUTH SHETLAND ISLANDS. The "Worldwide Antarctic Program" (WAP) Web page is reporting (edited): "To commemorate the 35th anniversary of the Italian Explorer Renato Cepparo, a group of Italian students led by Prof. Geol. Julius Fabbri from the city of Trieste will leave next Dec. 2010 for a 'Didactic Project' in the South Shetland Islands (AN-010) following the 1976 trip of Renato Cepparo at the first Italian Giacomo Bove Camp (WAP ITA-02) set by Cepparo's Expedition at Italia Valley, Ezcurra inlet, Admiralty Bay on King George Island. The plan is to activate the old callsign I1SR (same as the 1976 Cepparo's Expedition) and place a commemorative plaque on the same place where Cepparo set the Giacomo Bove Camp and do some ecological studies, connected to the didactic program of the students. A Web site will be set up shortly at:
http://www.adriantartica.it
More information and updates will be published at the WAP Web site in due course." Gianni, I1HYW, is expected to show a presentation on the whole project during the next DCI-WAP meeting (to be held at Mondovi, Italy on Sept. 19th). For the unedited press release and pictures of the Giacomo Bove Camp, see:
http://www.waponline.it/NewsInformation/tabid/178/Default.aspx

IOTA NEWS.....
EU-008. Operators Simon/M0VKY, Brian/G0JKY, Drew/G7DMO and Graham/2E0VPT will be active as MS0RSD from the Isle of Skye (Grid Loc IO67tl, WAB NG45) between June 4-11th, 2011. Activity will be on 80-10 meters using mainly SSB and PSK31. They will also be on 2 meters SSB on a Tuesday evening in the UKAC Contest. QSL via M0RSD, by the Bureau or direct. Log will be uploaded to eQSL.

EU-028. Guenter, DL3NBI, will be active as IA5/DL3NBI from Giglio Island (IIA GR-002, MIA MI-036, WLOTA 0564, WW Loc. JN52KI) in the Toscana Region Group between September 12-20th. QSL via his home callsign.

EU-028. Claudio, IZ0KRC, will be active as IA5/homecall from Giglio Island (IIA GR-002, MIA MI-036, WLOTA 0564, WW Loc. JN52KI), in the Province of Grosseto. Activity will be holiday style on the HF bands, as well as 6 meters, using SSB and RTTY. QSL via his home callsign, direct or by the Bureau. Visit his Web site at: http://iz0krc.jimdo.com

EU-038. Marcel, PD5MVH, will be active as PD5MVH/p on Schiermonnikoog Island (WLOTA L-2175) between September 13-25th. He will be on holiday. Activity will be on 40/20/10/2 meters using SSB. QSL via his home callsign, direct or by the Bureau. SWL cards are welcome.

EU-038. Roland, DL1EAL, will be active as PA/DL1EAL from Texel Island (WLOTA LH 0043) between now and September 23rd. Activity will be "holiday style" on 80-10 meters using 100 watts and dipoles. QSL via his home callsign, by the Bureau, direct, LoTW or eQSL.

EU-057. Andreas, DL2AGB, will be active as DL2AGB/p from Ruegen Island (GIA O-007) between September 12-16th. QSL via his home call-sign.

EU-088. Bernd, DL8AAV, will be active as OZ0AV from Laeso Island (DIA NK-003, WLOTA 2820) from September 13-24th. Activity will be on all HF bands, mainly SSB and CW. QSL via his home callsign, Bureau is preferred, or via eQSL.

EU-125. Reiner, DK4VY, will be active as OZ/DK4VY/p from Fanoe Island (DIA NS-002) between September 12-17th. Activity will be holiday style on 80-10 meters using SSB, RTTY, PSK and possibly CW, with 100 watts into a long-wire and G5RV. QSL via his home callsign, by the Bureau or direct.

OC-172. (UPDATE) Craig, VK4LDX, informs OPDX that he will be active as VK4LDX/P from Fitzroy Island between October 16-22nd. This IOTA hasn't been on the air since 2003. He will be on the island with his wife, so his activity will be holiday style. Craig will be running 100 watts into verticals and/or dipoles for 40/20/15 meters, using SSB, PSK31 and RTTY. He will have a beachside cabin and will be setting up the antennas right on the beach. QSL info is available on QRZ.com and please visit the following Blog page for regular updates at:
http://vk4ldxoc172.blogspot.com

OC-295. (Update) Operators John/9M6XRO, Steve/9M6DXX, 9W6AMC, Lee/9W6LEE and Gordon/G3USR plan to activate the rare IOTA island of Pulau Sebatik between September 24-27th. Activity will be on 80-10 meters, but with an emphasis on 40-15 meters. They will have two stations on the air with amplifiers using a HexBeam and verticals located directly above the sea water. Callsigns will be 9M6XRO/P on CW and 9M6DXX/P on SSB, and they hope to have both stations on the air during all the major openings to Europe and North America. OC-295 has only been claimed by 14.2% of IOTA participants having been activated just once before in July 2006. QSL both callsigns via M0URX, direct, by the Bureau, or LoTW. For more details and for a link to M0URX's online QSL request form for both direct and Bureau cards, go to:
http://www.m0urx.com/sebatik.html

OC-133. (Update) Operators John/9M6XRO, Steve/9M6DXX and Gordon/G3USR, will be active as 9M6XRO/p, 9M6DXX/p and 9M6/G3USR, respectively, from Labuan Island between October 5-8th, and possibly between 0000-0200z October 9th. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. They will have two stations with amplifiers on the air using a Hexbeam, verticals and a 160m Inverted-L very close to the ocean. QSL 9M6XRO/p and 9M6DXX/p via M0URX, and 9M6/G3USR via his home callsign.

ITUpSAT1 FIRST YEAR IN ORBIT CELEBRATION (Special Certification Activity). The TAMSAT announced that the first Turkish built satellite, a CubeSat, the ITUpSAT1, will complete its first year in orbit on September 23rd, 2010. They would like to commemorate this very special day. As a token of remembrance for this day, everybody who tracks ITUpSAT1 and records its beacon signal on September 23rd and 24th, will be awarded with a "ITUpSAT1's First Year Celebration" certificate. Everybody who wants to participate in this activity has to send their beacon recordings and observation data to the Web address given below by filling in the form therein. After the verification of the ITUpSAT1 tracking records, the commemoration certificate will be sent to the senders E-mail address. Also one lucky participant, selected randomly among the participants, will be invited to visit ITU UUBF SSDTL and its facilities. They would like to thank everybody in advance for their support and participation in this special event. ITU Space Systems Design and Testing Laboratory (SSDTL): http://usl.itu.edu.tr/tr/index.php
First Year Celebration ITUpSAT1 record E-mail address:
http://usl.itu.edu.tr/en/takip-formu
Note: All visit costs, except the interstate or intercity travel, of the randomly selected person will be covered by SSDTL for maxiumum of (2) days.
For more information, see: http://www.tamsat.org.tr
--- or E-mail--
bilgi@tamsat.org.tr

IZ8, ITALY (Lighthouse Op). Oreste, IZ8EDJ, will activate the Agropoli Lighthouse (ARLHS ITA-185, WAIL CA-019) during the a lighthouse special event on September 26th. For more details, see the following Web page at: http://www.strangeradioteam.com

JW, SVALBARD. Lars, SM4TUV, will be active as JW8XSA between September 14-22nd. Activity will be limited to his spare time, but he will try to be on 30 meters using PSK31. QSL via his home callsign. ADDED REMINDER (from OPDX.972): After this operation, Lars will be working for The Norwegian Polar Institute in the Antarctica starting November 2010. He will remain at the Norwegian Polar Research Station Troll, on Dronning Maud Land, until December 2011. Look for him to be active as 3Y8XSA.

KH6BZF PROPAGATION FORECAST/REPORT (For September 13-19th)....

0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

K6, UNITED STATES (Special Event). Mark, KM6HB, for the 6th straight year will operate as special event station, K6P, between September 17-19th. Activity is to commemorate "National POW-MIA Recognition Day". Suggested SSB frequencies are: 3785, 7250, 14253 and 18150 kHz (+/- QRM). QSL will be a 2 part picture card. QSL via KM6HB: Mark McMullen, P.O. Box 27271, Santa Ana, California 92799, USA.

MJ, JERSEY (EU-013). Craig, K3PLV, will be active as MJ/K3PLV between September 14&#65533;22nd. Activity will be on 160&#65533;10 meters using CW, SSB and RTTY. QSL via his home callsign, direct or by the Bureau.

MJ & MU, JERSEY AND GUERNSEY. Kasimir, DL2SBY, informs OPDX that he will be active from the Channel Islands during the following dates:
October 7-9th: From Jersey as MJ/DL2SBY
October 9-16th: From Guernsey as MU/DL2SBY
Activity will be on 80-10 meters using CW, SSB and RTTY. There will be some activity on 6 and 2 meters. He states his equipment will be a TS2000 and FT900AT, using a ACOM 1010 amp into a HF9V antenna. He will have a yagi for 6m and 2m. QSL via his home callsign, by the Bureau or direct (see QRZ.com).

NETHERLANDS ANTILLES WILL BREAK-UP (It's Official - Dutch Antilles sign declaration reforming their status). "Radio Netherlands Worldwide" reports: "Delegations from the Dutch Antilles signed a declaration today (September 9th) in 'The Hague' today reforming the status of these five former Dutch island colonies in the Caribbean.
As of 10 October 2010, the Dutch Antilles will cease to exist as a country. Curacao and St. Maarten will become separate countries within the Kingdom of the Netherlands, while Bonaire, Saba and St. Eustatius will become special Dutch municipalities. Aruba already had a separate status. The ceremony was attended by Prince Willem-Alexander and Deputy Kingdom Relations Minister Ank Bijleveld and caretaker Prime Minister Jan Peter Balkenende.
The prime minister called the declaration 'a new chapter'. The intensive process which has taken five years is supposed to give the larger islands more autonomy." (From the RNW Web page at:
<http://www.rnw.nl/english/bulletin/dutch-antilles-sign-declaration-reformin
g-their-status>)

So What Does This Mean For DXer? Just another step closer for new DXCC entities. Now that it is official that the Netherlands Antilles will be dissolving, "maybe" we will hear something from the DXCC desk before the

date October 10th. Remember, to be added to the "DXCC List" as a "Political Entity", it must meet one or more of the following criteria:
A) The entity is a UN Member State.
B) The entity has been assigned a ITU callsign prefix block.
C) The entity must be listed on either the "U.S. Department of State" or the United Nation's list of "non self-governing territories."
As we have seen in the past, it is not a new one until the DXCC says so....

PC75, THE NETHERLANDS (WFF Op). Fred, PA0FAW, will be active as PC75HV from the "Hoge Veluwe" National Park (FF-PA-005) between October 1-28th. Activity will be on mostly CW and the Digital modes but with some SSB. QSL via PA0FAW, direct, by the Bureau or e-QSL (SWLs are OK). Fred is an ISWL Member, so if worked or heard, can be counted for the ISWL Monitor Award.

PJ2, NETHERLANDS ANTILLES. Geoff, W0CG, will be active once again as PJ2DX from the PJ2T Signal Point Station on Curacao (SA-006, WLOTA LH-0942) between now and September 23rd. Activity will be on all HF bands. QSL via W0CG direct or via N9AG for a Bureau QSL.

PJ2, NETHERLANDS ANTILLES. Operators Rich/K3RWN, Larry/AB3ER, Steve/KB3EYY, Bob/KG3F and Bob/K3RMB will activate PJ2S during the CQWW DX RTTY Contest (September 25-26th). Operations will take place from the PJ2T Signal Point Station on Curacao (SA-006, WLOTA LH-0942). QSL via K3MJW or LoTW.

PJ6, NETHERLANDS ANTILLES (Update). Two teams, comprised mostly of members of the Southeastern DX Club (SEDXC), will operate from the Island of Saba (NA-145, Grid Square is FK87) over a two week period beginning October 9th and ceasing operations on October 22nd. The operators mentioned are:
Week 1 (October 9-15th): Dave/K4SSU, Bob/K4UEE, Ralph/K0IR, Don/N4HH, Bill/N4NX, Steve/VE7CT, Chaz/W4GKF, and Gregg/W6IZT

Week 2 (October 16-22nd): Bob/K4UEE, Tim/K5AC, Wey/K8EAB, Wayne/KU4V, Hal/N4GG, Gordon/N4LR, Steve/VE7CT and Ralph/VE7XF

The frequencies for this operation is not published yet. The reason given: "Since there will be several DXpedition operations on the air from the area, we expect that all will coordinate before the fact to minimize interference. We expect to publish our frequencies before we are QRV."
QSL info is as follows:
They intend to upload logs frequently from the island directly to LoTW.
If you want a QSL card, they are available three ways:
* OQRS DIRECT
* OQRS BUREAU
* DIRECT MAIL WITH 44¢ SASE/$$$/IRC(S)
-- But please, use only ONE of the ways to save us a lot of extra work. Should you choose to QSL directly to N4NX via direct mail, send your QSO information and SASE to: Saba DXpedition 2010, Bill N4NX, 355 Westerhall Court, Atlanta GA 30328-1233

For more info/details and updates, please visit the "Activiating Saba 2010" Web page at: http://www.saba2010.com

PJ7, ST. MAARTEN (Update). Operators Joe/W8GEX and Craig/K9CT the co-leaders for the upcoming St. Maarten DXpedition (NA-105) are pleased to announce that they have been granted permission to use PJ7E for their 10 day operation scheduled to begin on October 10th. All indications are that St. Maarten will become a "New One." The team is looking forward to working everyone. Plans for the operation are going just fine. Their container with all the equipment will be leaving port soon.

QSL A51A via direct to: P.O.Box 8, Ooiso, Kanagawa 259-0111, JAPAN. Also, QSL by the Bureau to: JA1TRC. Activity took place this past week between September 7-12th. Operators were: JA1TRC, JJ1LIB and JH1AJT.

Toshi, JA1ELY, announced this past week that as of September 1st, addresses for JA stations which are JARL members can be found at the new "JARL Member Search" Web site at: https://www.jarl.com/jarlorjp/security/loginsrchuni.php

PX8J & PX8L QSL STATUS. Ciro, PY7ZY, reports that the QSL cards for PX8J and PX8L are now being processed. The first batch will go out on September 15th, and then on September 30th, all of QSLs received will be sent. Also, starting on September 15th, you can check the progress of your QSL on: http://www.px8j.com
Any problem, please contact Ciro, PY7ZY at: xavier.py7zy@gmail.com

NEED A QSL MANAGER? Kire, Z33BMW, is volunteering his services as a QSL Manager to any DX stations in the world. If you are interested in having a QSL Manager, contact Kire via his E-mail address at: z33bmw@yahoo.com

QSLS VIA LoTW: None reported this week!

QSLS RECEIVED VIA MAIL: 8Q7DV, 9U4T, A92IO, MU0FAL, OV1CDX, OZ1CTK, TL0A, UK8FF, V48M, VP8DMH, YV5ESN, ZS10WCS, ZS8M and ZX8W

QSLS RECEIVED VIA THE BUREAU: None reported this week!

S9, SAO TOME & PRINCIPE. Operators Ulli/DD2ML, Jurgen/DF1AL, Klaus-Dieter/DK1AX, Rene/DL2JRM, Rolf/DL7VEE, Sid/DM2AYO and Harry/DM5TI are planning for DXpedition to take place next year between February 3-17th. Callsign will be S9DX and activity will be on 160-6 meters using CW, SSB and RTTY. QSL via DL1RTL. A Web page is currently under construction at: http://s9dx.hkmann.de

SPECIAL EVENT (Highway to a DX Party!). The Citrus Belt Amateur Radio Club of San Bernardino, California, will host (probably one of the most fun special event activities) the 11th annual "Route 66 On The Air" special event between September 11-19th. The purpose of this event is to offer amateur radio operators a fun way to "Relive the Ride" of their own memories of Route 66, and to celebrate the highway's 84th anniversary. The U.S. Highway 66 established in 1926, was the first major improved highway to link the west coast with the nations heartland. Through stories, songs, and TV shows, the highway came to symbolize the spirit of the freedom of the open road, inspiring many to see America. Look for the following 20 stations (three are rovers) operating in or around the major cities along the old "Route 66" from Santa Monica, California, to Chicago, Illinois:

Stations	City	Club
W6A	Santa Monica, CA	Westside Amateur Radio Club
W6B	Los Angeles, CA	Westside Amateur Radio Club
W6C	San Bernardino, CA	Citrus Belt Amateur Radio Club
W6D	Victorville, CA	Victor Valley Amateur Radio Club
W6E	Barstow, CA	Barstow Amateur Radio Club
W6F	Kingman, AZ	Hualapai Amateur Radio Club
W6G	Flagstaff, AZ	Northern Arizona DX Association
W6H	Albuquerque, NM	New Mexico Amateur Radio Alliance
W6I	Amarillo, TX	Chapter 141, QCWA
W6J	Elk City, OK	Western Oklahoma Amateur Radio Club
W6K	Oklahoma City, OK	W6K Oklahoma City
W6L	Tulsa, OK	Tulsa Amateur Radio Club
W6M	Riverton, KS	Valley Center Amateur Radio Club
W6N	Joplin, MO	Joplin Amateur Radio Club
W6O	Lebanon, MO	Lebanon Amateur Radio Club
W6P	St. Louis, MO	St. Louis Amateur Radio Club
W6Q	Chicago, IL	Six Meter Club of Chicago

ROVER STATIONS

W6R ROVER 1 Harry S. Rouse & Steve Hammer
W6S ROVER 2 Glen Kesselring
W6T ROVER 3 Northern Arizona DX Association

Special event stations are expected to be found in the vicinity of the
following frequencies. (Look for digital modes in the standard band segments
for such mode) All frequencies +/- QRM:
CW - 3533, 7033, 10110, 14033, 18080, 21033, 24900, 28033 and 50033 kHz
SSB - 3866, 7266, 14266, 18164, 21366, 24966, 28466 and 50166 kHz
Digi - 3580, 7070, 10140, 14070, 18100, 21070, 24920 and 28120 kHz
R66 MOBILE Operations - Any amateurs operating while actually driving
along Route 66 during the special event period are encouraged to
take part in "Route 66 On The Air", by using the designation
"mobile 66" for SSB or "/m66" for CW after their callsigns. All
other amateur radio operators are welcome to contact these mobile
operators.
REPEATERS - Some of the participating clubs will also be operating this
event from their local VHF/UHF repeaters. Check the ARRL repeater
guide for possible repeater frequencies, if your in the local area.

Each participating club will issue their own QSL card commemorating
this event. QSL information is available on the Web at:
http://www.w6jbt.org/Route66OTAEvent/General%20Pages/QSL%20Information.htm
For more details about the event and the certificate that is available,
please visit the "Route 66 OTA Site" at:
http://www.w6jbt.org/Route66OTAEvent/Index.htm

T8, PALAU. Nob, JA1FMZ, will be active as T88OM from the Island of Palau
(OC-009) between October 27th and November 1st. Activity will be holiday
style on 20-10 meters using SSB, but he also plans to participate in
the CQWW DX SSB Contest (October 30-31st). QSL via his home callsign,
direct (see QRZ.com), LoTW or e-QSL. Visit his Blog page at:
http://DXvacation.com

TC6, TURKEY (Lighthouse Op). Members of TCSWAT (TC Special Wireless
Activity Team) and GITRAD, in collaboration with Coastal Safety Admin-
istration, will activate Civa Burnu Lighthouse (ARLHS TUR-002) in the
Samsun area for the first time during the weekend of September 25-26th.
The callsign will be TC6CLH. Activity will be on all HF bands, but mostly
on 40 and 20 meters. QSL by the Bureau or via TA1HZ, but please read the
info on the TCSWAT Web site: http://www.tcswat.org
TCSWAT does QSL 100%, so you do not need to send any direct requests.
The TCSWAT sends out all the cards to the countries' QSL Bureaus during
the Friedrichshafen Messe at the end of June and at the of beginning
of January. Please be patient and let your country's QSL Bureau do the
work for you! For details about the Lighthouse, see:
http://www.qrz.com/db/TC6CLH

TS7, TUNISIA (Update/IOTA Op). An Italian team of operators will activate
the Tunisian Islands of Plane (AF-091) and Kuriat (AF-092) as TS7TI and
TS7TI/p between September 13-23rd. Operations will be from the fixed base
at Raf Raf and Monastir using the club stations 3V8ST, 3V8SA and 3V8SQ.

Operators mentioned are: Alfredo/IK7JWX, Leopoldo/I8LWL, Simon/IZ7ATN, Paolo/IK7UXW, and Ivo/9A3A (CW op). Activity will be on all bands HF, WHF, VHF and 6m, using CW, SSB, PSK31 and RTTY. During their activity they will also activate some wanted WFF/VFF and lighthouse reference numbers, and the most wanted grid square JM57 as well as other grid squares. They are currently seeking sponsors/supporters for this DX-pedition. QSL Manager is I8LWL. For updated news and a online log, go to: http://www.i8lwl.it

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX), Keiichiro/JA7GYP (V63T) and Masahiko/JA7EPO (V63EPO) will be active from Pohnpei Island (OC-010) between October 29th and November 4th. Activity will be on all bands and modes. QSL via their home callsigns. The group will also be an entry in the CQWW DX SSB Contest(October 30-31st) as V6B. QSL via JA7HMZ.

VP9, BERMUDA. Les, N1SV, will be operating as VP9/N1SV from Bermuda (NA-005) this year for the CQWW DX SSB Contest (October 30-31st). He informs OPDX, "I may also be on the air the day before the contest as well". QSL via his home callsign.

XV, VIETNAM. After his African tour (see above), Sigi, DL7DF, will be on holiday with his XYL Sabine on Phu Quoc Island (AS-128) between November 26th and December 6th. Activity will be on 160-10 meters using CW, SSB, RTTY, PSK31 and SSTV. Sigi's equipment will consists of a transceivers K2, a XV600, some lowband verticals and dipoles, a HF9V, and some beverage antennas. QSL via DL7DF, direct or by the German DARC QSL Bureau.

YN, NICARAGUA. Jeff, N6GQ, will be active as YN2AA from Grenada, Nicaragua, between October 27th and November 1st. Activity will be on 160-10 meters and will include the CQWW DX SSB Contest (October 30-31st). Jeff tells OPDX that he will be using a K3 radio and 1 KW amp into the following antennas: a Tribander, 2 element 40m beam, wires and beverages for 80/160m. QSL via NN3W, by the Bureau or direct. U.S. stations, please send SASE; DX stations, please send SAE with GS or IRC. Bureau service will take time. Logs will also be uploaded to LoTW.

Z2, ZIMBABWE. Bob, AC7GP, will be active as Z2/AC7GP between September 30th and November 1st, while visiting his son in Harare. Activity will take place mainly between Monday through Friday. Operations will be on SSB, RTTY and PSK31, using 100 watts into simple dipole antennas. Bob does plan to be in the CQWW DX SSB Contest (October 30-31st). QSL via his home callsign.

Subject: Special Event Station CG3MUG

"Thunder Bay MCTS Centre (Canadian Coast Guard Radio Station) proudly
celebrates 100 years of radio service. Built by the Canadian Marconi
Company, in the fall of 1910, the new "wireless" station, MUG Port
Arthur, was the first and only Canadian Great Lakes Marconi station
ever built. In 1912, following the success of MUG, the Canadian
government built a chain of marine radio stations from Port Arthur
down to Kingston, Ontario. In 1913, the Marconi station was rebuilt,
and assigned its current government callsign of "VBA". The "V"
denotes a Canadian station, "B" is for the Great Lakes, and the "A"
was given for its historic position as the first.

During themonth of November 2010, the Centre's Hams will be
operating special event station CG3MUG, to celebrate our 100th
birthday. The regular Amateur Radio callsign is VE3VBA. There will be
several options for Amateur Radio Stations and SWL'ers to obtain a
special 100th anniversary CG3MUG QSL card (a certificate may also be
designed). As we get closer to the event, and make the final
preparations, we will update the CG3MUG listing on the QRZ.com
website. VHF and HF operation via CW, PSK, RTTY, SSB, FM, VoIP
(CQ100) and perhaps other digital data modes, on the Amateur Radio
bands. The email address for this special event station is:
<mailto:cg3mug@yahoo.ca> cg3mug@yahoo.ca.

For more information, please visit: <http://my.tbaytel.net/va3rom>
http://my.tbaytel.net/va3rom."

Thank you.

73,

Robert, VA3ROM
Lori, VE3VAI

> What is the difference between these two, which causes the "-Contest"
> version to be about half the price of the "standard" version?

The "plain" FTDX-9000 actually has a lot more stuff built in,
including a cool display that seems to function as the DMU. Seems
that Yeasu has continued to add to their FTDX-9000 lineup in a very
confusing way.

So there are three differant rigs on Yeasu's website now with the 9000
series..

FTDX-9000 - With TFTP Display With many options you can add...
FTDX-9000 Contest - Without the TFTP Display built in
FTDX-9000D - With TFTP Display DELUX version (Fully Loaded.)

In addtion to this, they now offer a 400W SSB version of the above...

All very fine rigs, if one can afford them. Not to start a fight, I
personally feel the FT-2000 is quite enough of a rig for most folk but
I suppose there are those who feel the "extras" in this line are worth
it. If you don't mind stepping out of the Yeasu name, My personal
choice would be the K3 from Elecraft as the best value for the money.
I'd be proud to own any of the above, if I had the money.. :)

Greetings,

The Westcumb ARC here in Amherst NS has been granted the callsign VC1J
for the special event station of 65th Anniversary of the United
Nations and UNESCO. We will be working the special event station from
the Joggins Fossil Cliffs which became a UNESCO site last year. We
will be on the air Sunday October 24th on different modes. A special
event QSL card will be available.

If you can put this on the website and promote it, we would greatly
appreciated. If there is anything else you need, please let me know.
Thanks,

RAC Bulletin 2010-015E - New RAC HQ Appointments
2010-09-14

RAC Office Update

I am pleased to announce that Chris Wiesner, VA3SM has assumed the position of Office Co-ordinator and Dave Parks, VE3AV/VA2LGQ, is continuing in his role as Membership Administrator. Chris is full-time while Dave is part-time. Offices hours are Monday to Friday from 10:00 to 16:00 Eastern Time and the telephone number is 613-244-4367 or toll-free 877-273-8304.

Our treasurer has also engaged the part-time services of Lyne Lamothe-Phillips as bookkeeper.

With these changes we look forward to offering improving service to Canadian Amateurs in general and our members in particular.

Geoff Bawden, VE4BAW

President
Radio Amateurs of Canada

****
The ARRL Contest Update

Published by the American Radio Relay League
****

September 15, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Learn Machine Language - CQ WW RTTY Contest
- Four Corners of QSO Parties - WA, SC, CT, TX
- Caribbean Country Conniptions
- You've Got Plaque!
- CQ WW RTTY How-To
- Mystery Photo Answer
- Liquid Signal Squirter
- Tip Top Prop by NZ4O
- WRTC Returns To North America

NEW HF OPERATORS - THINGS TO DO

One of the largest RTTY contests takes place on Sep 25-26 - the CQ WW RTTY Contest. With participation growing rapidly, this would be a good one to try. There are also four state QSO parties (CT, WA, SC, TX) in the works. Fall HF propagation is getting better and better every day!

BULLETINS

If the email log robot is rejecting your submission for the ARRL September VHF Contest, the ARRL ISP's spam filter was flagging log submissions as spam, adding "Possible UCE" to the email subject line. This caused the rejection because the robot expects to see a call sign (and only a call sign) in the subject. A fix by the ISP has been requested, but if you are still unable to submit your log, email ARRL Contest Branch Manager KX9X (kx9x@arrl.org) for assistance.

Similarly, there was a problem with the Hornucopia Web-to-Cabrillo Web page <http://b4h.net/cabforms/> for CW Sprint submissions for about 12 hours after the contest. This has been fixed, so try to resubmit if you had trouble the first time or email your log to cwsprint@ncjweb.com directly. Check the Logs Received page <http://www.ncjweb.com/cwsprintlogs.php> if you're not sure if your log was accepted - the deadline is this coming Sunday. (Thanks, Tree N6TR)

BUSTED QSOS

Apparently another golden issue last time!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

September 18-19

- ARRL 10 GHz Cumulative Contest
- Connecticut QSO Party
- Scandinavian Activity Contest--CW
- CIS DX Contest--Digital
- South Carolina QSO Party
- Washington State Salmon Run
- Feld-Hell Monthly Sprint
- QCWA Fall QSO Party
- North American Sprint--Phone
- Classic Exchange--Phone
- BARTG Sprint 75--Digital
- Fall VHF Sprint (Sep 20)

September 25-26

- CQ WW RTTY Contest
- Texas QSO Party
- Fall VHF Sprint (Sep 28)
- Fall QRP Homebrewer Sprint--CW (Sep 28)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The DX world is buzzing about the upcoming change of status for several Caribbean entities that will be formerly known as the Netherland Antilles beginning Oct 10th - Curacao, Bonaire, Saba, St Eustasius, and Sint Maarten. Watch the DX bulletins (ARRL DX Bulletin <http://www.arrl.org/w1aw>, Daily DX <http://www.dailydx.com/>, QRZ DX <http://www.dxpub.com/>, OP DX Bulletin <http://www.papays.com/opdx.html>, and others) for the latest word on changes in award status. Oh, and then make sure you have the latest CTY country file <http://www.country-files.com/cty/> so your logging software counts all of your multipliers correctly!

The Northern California Contest Club is having a party and you're all invited! This year marks 40 years of excellence in amateur radio contesting for NCCC and to share our excitement, we're having a special on-air celebration. It's the NCCC 40th Anniversary Party <http://www.nccc.cc/40th> -- a two week event taking place from September 18 to October 1, 2010, and open to all amateurs worldwide. Check out the Web site for details about special calls and awards. (Thanks, Chris N6WM)

The New York QSO Party <http://www.nyqp.org/rules.php> has instituted a new entry class for operators that have received their Amateur Radio ticket since January 1, 2007. The Rookie Operator Award will feature a

NYQP plaque to the operator with the best NYQP score for 2010. (Thanks, Rick W1TY/W2RTY)

RW2L has kindly provided a guide to the new Russian prefixes on his QRZ.com page <http://www.qrz.com/db/rw2l>. UA6 and UA7 with the same initial suffix letter indicate the same location. For example, any UA7A** is now just the same as UA6A**. The same holds true for UA3/5 and UA8/9. UA2/3 is the same with the exception being that calls with a '2' in the prefix and F or K beginning the suffix are Kaliningrad. (Thanks, Larry N7DF, Dave NN1N, and Doug K1DG)

Answering a similar question from China, Dave KH2/N2NL sends this breakdown of Chinese license classes and privileges:

5th class: SWL only
4th class: BG, BH, BI, 15 W PEP above 29.2 MHz
3rd class: BH, BH, BI, 25 W PEP but not 30, 20, 17, 12 meters
2nd class: BD, 100 W PEP on all bands
1st class: BA, 1 kW PEP all bands

While you are contemplating the possibility of adding all those 3rd-class Chinese call signs to your log, as noted on the ARRL's license total Web site <http://www.arrl.org/fcc-license-counts> it's also time to start that radio club pool as to when the 700,000th US ham license will be issued! Not bad for a "dying" hobby.

Who invented what when and what did it lead to? This map of modern science <http://crispian-jago.blogspot.com/2010/08/modern-science-map.html> begins in the 15th century and winds its way through the ways of wonder all the way to the present day. Another connection between disparate domains involves one of contesting's favorite DX multipliers - Ascension Island ZD8 and terraforming on Mars as described in this online article <http://www.bbc.co.uk/news/science-environment-11137903> from "the Beeb", the BBC.

Roger K8RI discovered this useful emergency services Web site <http://www.wirelessestimator.com/emergency>. Enter an address and the site identifies the emergency resources available in your area, such as hospitals and fire houses, and routes to/from a work site for each service. While nobody expects an accident (or the Spanish Inquisition <http://en.wikipedia.org/wiki/The_Spanish_Inquisition_%28Monty_Python%29>, for that matter) during a work party, this could be very handy information to have on hand.

A recent Slashdot article <http://tech.slashdot.org/comments.pl?sid=10/09/09/032206> notes that the Defense Advanced Research Projects Agency (DARPA) will begin looking for technology that will "let wireless communications work through the most extreme interference by developing advanced interference suppression and avoidance technologies." They should try it during ham radio phone contests!

"The Good Old Times" issue of the Contest Club Finland's PileUP! journal has been released. The 68-page journal (plus an appendix from 1976) is a downloadable PDF file <http://www.helsinki.fi/%7Ekorpela/PU/PU.html>. A total of 28 hams contributed in the talkoo-spirit with the oldest material going back to 1948. (Thanks, Ilkka OH1WZ)

The Lost Island DX Society is sponsoring the first annual Talk Like A Pirate Radio-Sport Contest <http://fi-ni-report.blogspot.com/> to coincide with the annual Talk Like A Pirate Day, September 19. While it sounds a little barmey in the crumpet, don't be a knot-brained dabberlack and heave hearty! (A right and proper thankee to Randy K5ZD)

Web Site of the Week - As noted in this ARRL Web story <http://www.arrl.org/news/sponsor-a-plaque-for-arrl-sweepstakes>, a number of Sweepstakes plaques remain unsponsored. While the ARRL is grateful to Icom America <http://www.icomamerica.com/> for covering the costs of delivering all unsponsored plaques, Sweepstakes Manager, Dan K1TO, says, "I am encouraging all of Sweepstakes' many friends to consider sponsoring a plaque in their Division, for an unsponsored "overall" plaque, or even in creating their own custom plaque for a special result. Plaques can be sponsored in honor of a deserving individual, as well. What better way to remember a Silent Key or honor exceptional service?" Sponsoring a plaque is simple. Select one of the unsponsored plaques <http://www.arrl.org/plaques-and-certificates> (click "Available Plaques To Sponsor") or define a special plaque. Then contact ARRL Contest Branch Manager, Sean Kutzko KX9X at mailto:contest@arrl.org or 860-594-0232. Sponsoring a plaque costs $75 - the ARRL will take care of ordering and shipping the plaque to the winner.

WORD TO THE WISE

Gigabyte - I used a sentence that I never expected to use the other day - "My mom needs another gigabyte of RAM"

==> SIGHTS AND SOUNDS

The next in the series of PVRC Webinars <http://www.pvrc.org/webinar/webinars.htm> is "A Look at the CQ WW RTTY Contest" with the contest director, Ed Muns, W0YK on Sunday, September 19 at 19:00 UTC. Register <https://www2.gotomeeting.com/%20register/460874371> first or view the Webinar later from the archives. (Thanks, Ken K4ZW)

Randy K5ZD has posted a WRTC-2010 presentation file to his Web site <http://www.k5zd.com/articles/index.html> - follow the link under Other Articles. The file is 33 Mbyte and may take some time to download. Randy is also the Co-Chair of WRTC-2014 as described in the Conversation section.

>From Spaceweather <http://spaceweather.com/>, you can watch the spectacular September 8th eruption of sunspot 1105 and learn about the excellent opportunities to watch a fly-over of the International Space

Station and the USAF X-37B space plane. Find out when to elevate your gaze on the Simple Flybys <http://simpleflybys.com/> or Heavens-Above <http://www.heavens-above.com/> Web sites.

==> RESULTS AND RECORDS

The meaning of the inscrutable photo in the last issue? Well, there are five chairs and one is empty. Both N7MQ and KB7HDX are named Mark. That makes the sequence, left to right, space-mark-mark-mark-mark. Baudot enthusiasts will recognize that as the BEL character - ring-a-ding-ding! Each Mark holds a pear and there are four, so that would be...(drumroll, please)...even parity. Thanks to Mark and Mark for assisting with the shenanigans and to N2NL for the photo editing and combining.

There are a few updates to the ARRL DX Phone writeup article <http://www.arrl.org/contest-results-articles> - the Top Ten multi-single score for T46A was omitted in the QST table and is properly noted on-line. A corrupted W/VE SOA Top Ten table has also been repaired thanks to the sharp eye of readers.

Radio-sport.net has published a story <http://www.radio-sport.net/cqww09cw_dq.htm> on the numerous stations disqualified from the 2009 CQ World-Wide CW DX contest. This follows a report of DQs in the SSB WW portion of the contest, as well. Reader reaction is solidly in favor of the more aggressive and public DQ stance by the CQ WW Committee. (Thanks, Steve N2IC)

How do you turn a pumpkin into a vegetable? Throw it up in the air and it comes down squash! Since contesters appreciate smashing records, you'll be pleased to learn that the one-mile barrier for pumpkin-flinging <http://www.washingtonpost.com/wp-dyn/content/article/2010/09/10/AR2010091004705.html> has finally fallen.

OPERATING TIP

Note that CQ WW Contest <http://cq-amateur-radio.com/cq_contests/cq_ww_dx_contest/index_cq_ww_dx_contest.html> log due dates have been moved up this year - Nov 21st for the SSB contest and Dec 21st for the CW contest. Don't be surprised!

==> TECHNICAL TOPICS AND INFORMATION

Scott N7SS wonders about this new liquid antenna technology <http://www.youtube.com/watch?v=9tIZUhu21sQ>, "Would you need to point it upwind or downwind when underway? I suppose rain would detune your antenna. I'm envisioning a ship with 80 of these antennas driven by a dedicated diesel pump arcing over the side as it steams along." You could operate and water the garden at the same time! (Also thanks to Mark K6UFO)

Bob W5OV gives reliable advice on packing something like a radio in a way that it cannot get damaged during shipping. "This usually requires double-boxing and lots of extra bubble-pack and/or styrofoam peanuts. The final shipping carton should be 2 to 3x the size of the radio if you want to insure that it does not get damaged. When you ship something like radio equipment, think of it literally being dropped hard to the ground from several feet in elevation. This will happen to it on its journey." When receiving such a package, if there is any evidence of the box being dropped, be sure to note that when signing for receipt and then take pictures as the box is unwrapped to help with a claim in case of damage.

Les N1LF sends word of the beta release of a major update to the WSJT <http://www.physics.princeton.edu/pulsar/K1JT/wsjt.html> weak-signal communications software suite from K1JT. There are two new modes, FSK441 is enhanced, and the user interface is improved, among other changes. The details can be found in the WSJT 9.0 Supplement to User's Guide <http://physics.princeton.edu/pulsar/K1JT/WSJT_9.0_Supplement.pdf>.

Despite my editorial in the last issue, I want to let you know that there is a place for politics in ham radio! Corrugated plastic yard signs make terrific building material for small projects - the material is sturdy, cuts easily with a utility knife, can be "drilled" with a scratch awl, and as well all know, it's fairly UV-resistant. Wait until the election is over before "harvesting" your crop, but do your part to clean up afterwards!

There is more than one use for an infra-red remote control and the August 2010 Design News "Gadget Freak" column "IR Remote Control Toggles Appliances <http://www.designnews.com/GadgetFreak>" shows how. You can turn on and off four individual relay circuits with this project and I'm sure the enterprising readers of this newsletter can do more than that!

Fred K1VR recommends this article by John Bisset on grounding <http://radioworld.com/article/104986> -- the right way! The article shows how and why grounds for lightning protection should always be welded or Cad-welded because of the high currents involved.

Screw heads and terminal blocks exposed to the weather need protection. Jon W4ABC recommends Electroshield <http://www.affordablequalitylighting.com/docs/electroshield.html> or UV-resistant Krylon <http://www.krylon.com/products/uvresistant_clear/> coatings as having provided years of corrosion resistance.

Gene AD3F has some good advice about assembling antenna elements with multiple rivets in a single junction. "When you assemble the elements, put all...pop rivets into the holes before you pop any of them with the tool. If you insert one at a time and pop it, the last one might be difficult to insert." Also, when cleaning an element joint with a scrubbing pad, use separate pads for cleaning and applying anti-oxidation compound. If you use a single pad, dirt from the initial

cleaning will be reapplied with the compound.

Technical Web Site of the Week - Thomas NZ4O's great propagation Web site <http://www.wcflunatall.com/nz4o5.htm> continues to evolve. Make sure this one is on your list of bookmarked sites to visit. (Thanks, Craig K1QX)

==> CONVERSATION

WRTC-2014 Returns to North America

It has been quite a while since the last North American WRTC - 1996 in San Francisco. I remember contesters overflowing a somewhat-overwhelmed Motel 6 south of San Francisco, stations spread out around the Bay Area, parties hosted by our JA friends and the soon-to-be-hosts from S5, and discovering that the sprinkler system automatically activated at 2 AM even if there was a lawn party going on! Following the designation by the WRTC Sanctioning Committee of the New England team as the hosts of WRTC-2014, the event will have made an 18-year journey between the hemispheres, north and south, east and west. Welcome home! I yield the floor to WRTC-2014 Chairman, Doug K1DG...73, Ward N0AX

On behalf of the New England WRTC Organizing Committee, I would like to thank the WRTC Sanctioning Committee for awarding us hosting rights to WRTC2014. We consider this a great honor, and will work hard to make the event enjoyable and memorable for everyone involved. The Russian group that hosted WRTC2010 this year set a new standard for competition fairness and we hope to follow in their path of continuous improvement.

We are working hard to get fully organized, with the initial activities of finalizing Team Selection criteria, launching our Web site <http://www.wrtc2014.org/> and WRTC-2014 email reflector, and completing the incorporation formalities over the next few weeks. We will keep everyone informed on our progress.

One issue that has been raised by several people is whether the upcoming 2010 CQWW SSB and CW contests will count as qualifying events. The answer is YES! CQWW is the biggest contest, with the most participation and the most competition. It will carry the same level of importance in team selection as it did for WRTC2010. Category factors will be similar to those used for WRTC2010 (i.e., single-operator scores are weighted higher than multi-op scores, etc.).

The full Team Selection details, including point values for each contest, category factors, number of teams per continent etc. are still in development but will probably end up very similar to the WRTC2010 rules (which were very similar to the WRTC2006 rules). We will announce them as soon as they are finalized.

The New England WRTC2014 Organizing Committee is a newly-formed independent organization, and not part of any existing organization, national society, or club. We are counting on a lot of volunteers to help us with their talents and resources, primarily in the New England

region (W1 call area, including Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont). We welcome financial support from contesters and clubs worldwide, and have some interesting sponsorship programs planned. Stay tuned.

So once more, thanks on behalf of the entire organization, and we'll see you all on the air or in person here in New England in 2014!

73,

Doug K1DG
Chairman, WRTC2014, Inc.
on behalf of WRTC2014 co-Chair K5ZD and Directors K1AR, K1KI, K1RX, K1TO, WC1M, N2NT, KM3T, N6TR and the 40+ Committee volunteers

==> CONTESTS

15 September through 28 September

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Connecticut QSO Party--Phone,CW,Digital, from Sep 18, 0000Z to Sep 18, 2359Z. Bands (MHz): 3.5-28. Frequencies: See Web site. Exchange: RS(T) and CT county or S/P/C. Logs due: 30 days. Rules <http://www.ctqp.org/>

Scandinavian Activity Contest--CW, from Sep 18, 1200Z to Sep 19, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Oct 19. Rules <http://www.sk3bg.se/contest/sacnsc.htm>

CIS DX Contest--Digital, from Sep 18, 1200Z to Sep 19, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and CIS area code or serial. Logs due: 30 days. Rules <http://www.cisdx.srars.org/cisdxc.pdf>

South Carolina QSO Party--Phone,CW,Digital, from Sep 18, 1300Z to Sep 19, 2100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW--1.805, 50 kHz above band edge; Phone--1.845, 3.86, 7.261, 14.27, 21.37, 28.37. Exchange: RS(T) and county or S/P/C. Logs due: Oct 20. Rules <http://w4cae.org/>

Washington State Salmon Run--Phone,CW,Digital, from Sep 18, 1600Z to Sep 19, 2400Z. Bands (MHz): 1.8-28, 50, Frequencies: See Web site. Exchange: RS(T) and county or S/P/C. Logs due: Oct 31. Rules <http://www.wwdxc.org/>

Feld-Hell Monthly Sprint--Digital, from Sep 18, 1600Z to Sep 18, 1800Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Feld-Hell member nr or age. Rules <http://www.feldhellclub.org/>

QCWA Fall QSO Party--Phone,CW,Digital, from Sep 18, 1800Z to Sep 19, 1800Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, year lic'd, name,

chptr or S/P/C. Logs due: 30 days. Rules
<http://www.qcwa.org/qso-party.htm>

North American Sprint--Phone, from Sep 19, 0000Z to Sep 19, 0400Z.
Bands (MHz): 3.5-14. Exchange: Call signs, serial, name, and state.
Logs due: 7 days. Rules <http://www.ncjweb.com/sprintrules.php>

Classic Exchange--Phone, from Sep 19, 1300Z to Sep 20, 0700Z. Bands
(MHz): 1.8-28, 50,144, Frequencies: SSB--1.885, 3.87, 7.28, 14.27,
21.37, 28.39; AM--1.89, 3.88, 7.16, 7.29, 14.286, 21.42, 29.0.
Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules
<http://www.classicexchange.org/>

BARTG Sprint 75--Digital, from Sep 19, 1700Z to Sep 19, 2100Z. Bands
(MHz): 3.5-28. Exchange: Serial. Logs due: Nov 1. Rules
<http://www.bartg.org.uk/>

CQ WW RTTY Contest--Digital, from Sep 25, 0000Z to Sep 26, 2400Z. Bands
(MHz): 3.5-28. Exchange: RST, CQ zone and State/VE area (US/VE). Logs
due: Nov 1. Rules <http://www.cqwwrtty.com/>

Texas QSO Party--Phone,CW,Digital, from Sep 25, 1400Z to Sep 26, 0200Z
and Sep 27, 1400Z to Sep 27, 2000Z. Bands (MHz): 1.8-28, 50,144,
Frequencies: Multiple operating periods, CW--20 to 50 kHz above band
edge; Phone--25 kHz above edge of General segment. Exchange: RS(T),
county or S/P/C. Logs due: Oct 31. Rules <http://www.txqp.net/>

Fall QRP Homebrewer Sprint--CW, from Sep 28, 0000Z to Sep 28, 0400Z.
Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 30
days. Rules <http://www.njqrp.org/>

VHF+ CONTESTS

ARRL 10 GHz Cumulative Contest--Phone,CW,Digital, from Sep 18, 6 AM to
Sep 19, 12 Mid. Bands (MHz): 10G+. Exchange: 6-char grid locator. Logs
due: Oct 19. Rules <http://www.arrl.org/contests>

South Carolina QSO Party--Phone,CW,Digital, from Sep 18, 1300Z to Sep
19, 2100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW--1.805, 50 kHz
above band edge; Phone--1.845, 3.86, 7.261, 14.27, 21.37, 28.37.
Exchange: RS(T) and county or S/P/C. Logs due: Oct 20. Rules
<http://w4cae.org/>

Washington State Salmon Run--Phone,CW,Digital, from Sep 18, 1600Z to
Sep 19, 2400Z. Bands (MHz): 1.8-28, 50, Frequencies: See Web site.
Exchange: RS(T) and county or S/P/C. Logs due: Oct 31. Rules
<http://www.wwdxc.org/>

QCWA Fall QSO Party--Phone,CW,Digital, from Sep 18, 1800Z to Sep 19,
1800Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, year lic'd, name,
chptr or S/P/C. Logs due: 30 days. Rules
<http://www.qcwa.org/qso-party.htm>

Classic Exchange--Phone, from Sep 19, 1300Z to Sep 20, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies: SSB--1.885, 3.87, 7.28, 14.27, 21.37, 28.39; AM--1.89, 3.88, 7.16, 7.29, 14.286, 21.42, 29.0. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

Fall VHF Sprint--Phone,CW,Digital, from Sep 20, 7 PM to Sep 20, 11 PM. Bands (MHz): 144. Exchange: 4-digit grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

Texas QSO Party--Phone,CW,Digital, from Sep 25, 1400Z to Sep 26, 0200Z and Sep 27, 1400Z to Sep 27, 2000Z. Bands (MHz): 1.8-28, 50,144, Frequencies: Multiple operating periods, CW--20 to 50 kHz above band edge; Phone--25 kHz above edge of General segment. Exchange: RS(T), county or S/P/C. Logs due: Oct 31. Rules <http://www.txqp.net/>

Fall VHF Sprint--Phone,CW,Digital, from Sep 28, 7 PM to Sep 28, 11 PM. Bands (MHz): 222. Exchange: 4-digit grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-09-16
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page:
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** VHF-DATABASE at MMMonVHF (http://www.mmmonvhf.de/dbase.php) **

Time to time it will be necessary to remember about regular updates
to the VHF-DATABASE at MMMonVHF. At begin of october we plan to
spread a new issue of our VHF-DATABASE to all DX-Cluster (and USER
which what it). So please be so kind and UPDATE IT NOW SOON! LOGIN
at MMMonVHF and follow the link to your Account > than click on
"VHF-DATABASE Update" and click on the INFO Button left side of
the Call (mostly only YOUR CALL or YOUR Expeditions calls) you
wants to change... Click on the EDIT Button (lower end of the page)
if something to change and edit the datasentence. After you have
finished your changes PLEASE do not forget to click on SAVE! Your
data will be reviewed by the Team and released to the VHF-DATABASE
as soon as possible! You will receive a confirmation E-mail when
your data is online available at MMMonVHF! The DX-Cluster will get
those updated Files only one time a year! Info or changes of OTHER
than your own Call or your Expedition Calls as well welcome. In
such a case please do use the Contact Form
http://www.mmmonvhf.de/kontact.php and pass us the
CALL you want to edit as well... Files like CALL3.txt will be
availble for free to everybody from your account and daily fresh!
To get into CALL3.txt you need to have one of the keywords (WSJT
MS or EME) at your datasentence activated!

** HF, 6m and 2m activity from the Channel Islands **

I would like to inform that I will be QRV from the Channel Islands. 07 October - 09 October from Jersey as MJ/DL2SBY - 09 October - 16 October from Guernsey as MU/DL2SBY - My equipment will be: TRX TS2000 / FT900AT Amplifier ACOM 1010 Antenna HF9V / Yagi for 6m + 2m - Activity on 80-10m on SSB/CW/RTTY some activity on 6m + 2m Hope to meet you Bernie and many others !
SOURCE: Kasimir DL2SBY via Bill, NG3K DX-News

** M/TA3J from various locations in England on HF and 6m **

Berkin, TA3J will be active as M/TA3J from various locations in England (EU-005, WLOTA 1841) from 9-20 September 2010. QRV on 160-6m, including the newer bands, using SSB and FM. QSL via his home call, direct or bureau.
SOURCE: [OPDX Bulletin] via ICPO Bulletin (02-10 September 2010)

** Activities from Paul, M3KBU, on HF and 2m **

Paul, M3KBU (RAFARS No. 4712) will be active on 18 September 2010 as homecall/p from RAF Compton Bassett, Wiltshire, England (IOTA EU-005, WLOTA 1841). First opened as an air base in World War I, RAF Yatesbury continued operations in the interwar years before again taking on a major role in World War II. From 1936 onwards, RAF Yatesbury and RAF Compton Bassett were major Radio and Radar

Training Schools. QRV on 80, 40, 20, 2m. QSL via home call, direct or bureau.
Paul will hit the airwaves again as homecall/p on 19 September 2010, this time from RAF Yatesbury, Wiltshire, England (IOTA EU-005, WLOTA 1841). First opened as an air base in World War I, RAF Yatesbury continued operations in the interwar years before again taking on a major role in World War II. From 1936 onwards, RAF Yatesbury and RAF Compton Bassett were major Radio and Radar Training Schools, RAF Townsend a satellite landing ground and RAF Cherhill was 27 Group Headquarters Technical Training Command. It is the oldest air base in the whole of Europe and is the only air base in the world that is still is such good condition. Activity will be on the 80, 40, 20 and 2 metre bands. This operation also coincides with the 'Battle of Britain' celebrations. QSL via home call, direct or bureau.
SOURCE: [RAFARS] via ICPO Bulletin (02-10 September 2010)

** Activity from Schiermonnikoog Island (EU-038) **

Marcel, PD5MVH plans to be active 13-26 September 2010 as homecall/p from Schiermonnikoog Island (EU-038, WLOTA L-2175). QRV on 40, 20, 10 and 2 metre SSB. QSL via his home call, direct or by the burau. SWL cards are welcome.
SOURCE: [F5OGG] via ICPO Bulletin (09-17 September 2010)

** PD6MILL qrv from the De Eendracht windmill **

Jelle, PD5JFK and Bernard, PD7BZ will be active as PD6MILL from the De Eendracht windmill on 16-20 September 2010. QRV on SSB and digital modes on 40, 20 and 10 metres and on 2 metre FM. All QSOs will be confirmed automatically via the bureau and eQSL. Direct cards should be sent to PD7BZ.
SOURCE: [ARRL DX News] via ICPO Bulletin (09-17 September 2010)

** Island of Giglio (JN52) Activity on HF and 50 MHz **

Look for Claudio, IZ0KRC to be active 10-20 September 2010 as IA5/homecall from the island of Giglio (IOTA EU-028, IIA GR-002, MIA MI-036, WLOTA 0564, WW Loc. JN52KI), Province of Grosseto. He will be QRV holiday style on the HF bands, plus 6 metres, using SSB and RTTY. QSL via home call, direct or bureau.
Website: iz0krc.jimdo.com/
SOURCE: [rsgbiota.org] via ICPO Bulletin (09-17 September 2010)

** Holiday activity from Turkey on HF and 50 MHz **

Bernhard,DJ5MN, and his family also spend their holidays in Turkey from Sep 7-17. He is working as TA4/DJ5MN from Belek and maybe also as TA1/DJ5MN from Istanbul (for two days). Bernhards works with 100 watts and a fullsize vertical mainly in CW on 80m-6m and if there is enough space also on 160m. Ben will try to respond to all sked requests. QSLs via bureau to his homecall

** Special event station CG3MUG **

"Thunder Bay MCTS Centre (Canadian Coast Guard Radio Station)
proudly celebrates 100 years of radio service. Built by the
Canadian Marconi Company, in the fall of 1910, the new "wireless"
station, MUG Port Arthur, was the first and only Canadian Great
Lakes Marconi station ever built. In 1912, following the success
of MUG, the Canadian government built a chain of marine radio
stations from Port Arthur down to Kingston, Ontario. In 1913,
the Marconi station was rebuilt, and assigned its current
government callsign of "VBA". The "V" denotes a Canadian station,
"B" is for the Great Lakes, and the "A" was given for its
historic position as the first. During the month of November 2010,
the Centre's Hams will be operating special event station CG3MUG
to celebrate our 100th birthday. The regular Amateur Radio
callsign is VE3VBA. There will be several options for Amateur
Radio Stations and SWL'ers to obtain a special 100th anniversary
CG3MUG QSL card (a certificate may also be designed). As we get
closer to the event, and make the final preparations, we will
update the CG3MUG listing on the QRZ.com website. VHF and HF
operation via CW, PSK, RTTY, SSB, FM, VoIP (CQ100) and perhaps
other digital data modes, on the Amateur Radio bands. The email
address for this special event station is: cg3mug@yahoo.ca.
For more information, please visit: http://my.tbaytel.net/va3rom.

** Netherlands Antilles, PJ2. **

"New DXCC operations on Curacao starting 10-10-10. As many of you
know by now, the Netherlands Antilles will likely be dissolved as
a country on October 10, 2010. Several new DXCC entities will
result from this change including the addition of the island of
Curacao (PJ2) as a new DXCC entity separate from Bonaire (PJ4).

Since this will meet the criteria for a new DXCC entity, we expect
all operations to be accepted as of 10/10/10. While ARRL approval
is not 100% guaranteed, and may not be officially announced until
all DXCC requirements are documented, plans are in place to mount
several operations from the Signal Point super-station, PJ2T on
Curacao beginning on day one. The first operation runs from Oct 10
until Oct 18 with a group led by K8ND. They will be followed
closely by a team of nine operators from the U.S. and Germany who
will be there through November 2nd including a M/M entry in the
CQWW SSB contest. We will be using both PJ2/homecall and PJ2T
during the 3-week run. We will be on all bands before the contest,
including 6 meters, running CW, SSB and RTTY. Considering the
number of simultaneous new entity operations, frequencies will be
selected to avoid interference. The GAREC conference is being held
on Curacao October 11-12th, and we will be opening the PJ2T
station to any of the participating amateurs from around the world
who wish to operate in their free time before or after the
conference. The station will also be open to any local Curacao
amateurs who wish to operate from Signal Point during the post
10-10-10 week. These will not be sponsored expeditions nor are
donations being solicited. The operators involved are covering all
costs. QSL as instructed on QRZ.com"

WIANEWS FOR WEEK COMMENCING SEP 19 2010.

We report on a major development that has occurred to the VK100WIA Super
Springtime in Perth stay tuned for that one!

The centenary publicity blitz rolls on

Summerland A.R.C. "Dawn Patrol" 30th Anniversary

Sunraysia Radio Group agm at Mildura Workingman's Club see's keynote speaker
Jim Linton VK3PC

Tex wants to buy a tower for Lyn

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING SEPTEMBER 19 2010

The centenary publicity blitz rolls on

A key feature of the Centenary of Organised Amateur Radio in Australia has
been the wonderful, and unprecedented level of media publicity being
achieved by participating WIA affiliated clubs.

This began in May with the WIA Centenary Convention in Canberra resulting
in interviews and reports on all of the national capital's radio stations,
and a photograph plus story in the Canberra Times newspaper.

Since then the media coverage has continued with further stories and interviews on television, radio and newspapers.

This week we have not one, but two segments that appeared on ABC radio.

The first is from Northern Tasmania. Let's have a listen to the Cradle Coast Amateur Radio Club President, David Spicer VK7EX, the interviewer is Elaine Harris.

(Play VK7EX_ABC_Radio - ends: Very happy 100th birthday)

It was quite a lengthy interview in which David VK7EX also gave a plug for the Foundation Licence, discussed home building of amateur radio equipment, and provided club contact details.

Now we tune into 612 ABC Brisbane with announcer Warren Boland talking to Lockyer Valley Radio and Electronics Club spokesman, Alan Shannon VK4SN.

(Play VK4SN_ABC_Radio - ends: Thank you kindly)

And of course, that was only part of a segment that went for 11 minutes.

It covered many aspects of amateur radio and left listeners with Alan's contact telephone number and scored a listing on the ABC radio website.

Well done to both the Cradle Coast Amateur Radio Club, and the Lockyer Valley Radio and Electronics Club.

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

What a great weekend last weekend operating the WIA Centenary Commemorative Call-sign VK100WIA.

12 TREC members set up the station at Lake Tinaroo on the Atherton Tablelands and were on air at 0001 z on Saturday. We made our first contact within the first few minutes of calling CQ VK100WIA.

We made a total of 354 contacts into every VK state and territory and also many into international stations. Given the rather ordinary band conditions we were very pleased with our efforts and it was a great pleasure to make VK100WIA available to the ham community.

Well done guys, more in QNEWS later..

Centenary celebration award activity

Just over 100 WIA Centenary Award Certificates have been issued.

VK3 radio amateurs account for 40% of them and that is more than twice those so far claimed by their VK2 counterparts.

The other call areas are VK5 (13), VK4 (12), VK6 (5) VK7 (4), VK8 (2) and VK1 (1).

It is expected that the Western Australia figure will be boosted by VK100WIA being operated in Perth for nine days this month.

Quite clearly this limited time award has become the first for many Foundation Licensees with 12 having claimed it so far.

For details on the award rules check out wia.org.au

WIA National Field Day
Tune Into the World - Amateur Radio Gets People Talking

Are you interested in putting something back into amateur radio? Want to do something positive to promote it to the general public?

If you answered yes to both those questions then why not join together with two of your radio amateur friends and take part of the inaugural event to outreach to the public and show amateur radio in action.

All it needs is a minimum of three people, a portable amateur radio station set up in a public space such as a shopping area, park or wherever, the use of the WIA available posters, and take part in the ?Tune Into the World - Amateur Radio Gets People Talking?.

Individuals and groups are invited to register for the event that happens across the nation on Saturday the 23rd of October. Only five week's to go.

The Adelaide Hills Amateur Radio Society will be setting up at the Eden Hills Primary School, Victoria's Scout Radio and Electronics Service Unit has chosen the Kangaroo Ground Memorial Tower in Melbourne's north-east, while Amateur Radio Victoria will be at the Point Gellibrand Coastal Heritage Park, Williamstown.
Western Australia's Peel Amateur Radio Group has identified the Rotunda on Mandurah Foreshore, as its spot to go portable.

Thank you to those 4 clubs for making an early commitment to the event.

Check out the National Field Day rules, learn about the available resources to make your participation look professional, and to register online, visit the WIA website and its WIA Centenary section

The Super Springtime in VK6 is now even bigger

Tomorrow, Monday the 20th of September the special callsign for the Centenary of Organised Amateur Radio in Australia VK100WIA goes on air from the Royal Perth Showgrounds.

As previously announced, seven Western Australian amateur radio groups have collaborated to pool their resources and give the centenary celebration a real kick long both at the Perth Show and from Wireless Hill.

WICEN Western Australia has it from the 20th to the 22nd of September, then to follow was the Western Australian Repeater Group, and the West Australian VHF Group operates from the Wireless Hill Museum on Wednesday the 29th, Thursday the 30th and Friday the 1st of October.

But here's a big new development. Just hours ago the Super Springtime was expanded, it won't be nine days but a whopping 12 days straight.

The Scout Communication and Technology Team, which was already an enthusiastic part of the Super Springtime, now joins the VK100WIA roster for the 23rd to the 25th of September.

The strong collaborative spirit being shown in the West is likely to see 2,500 contacts added to the VK100WIA online log over 12 days.

Whether it is via amateur satellite, D-Star, HF, VHF and UHF, the world will indeed be listening for VK100WIA from Perth and its surrounds. Do give the now Super, Super Springtime support by making a contact

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

This is Michael Owen VK3KI, with two items from the WIA Board meeting of 4 and 5 September.

Vice President Ewan Mcleod VK4ERM requested to be relieved of his duties as Vice-President because of the pressure of other commitments.

The Board accepted Ewan's resignation as Vice-President with regret, thanking him for his contribution. The directors were pleased he was able to continue as a director.

The Board appointed Phil Wait VK2ASD as Vice-President.

Phil has been a director since the restructure of the WIA in May 2004, and is well known as a joint author of the Foundation Licence Manual and for his valuable work for the WIA, particularly in relation to BPL and standards.

The other item is that the Board considered the date and venue for the next AGM weekend.

Suggestions for a venue had been invited and a number of the State Advisory Committees had been consulted.

>From many comments at different times, and particularly at the Canberra Centenary weekend, it seems obvious that many people prefer the location to be at least interesting in itself, and not a capital city.

It is also clear that many people appreciate early advice as to date and venue, so that they can plan a break around the WIA weekend

In fixing a date, the Board took into account the notice requirements in respect of the AGM as well as the dates of other activities, such as the Dayton hamvention.

The weekend chosen was the 27-29 May 2011.

The venue chosen was Darwin.

The directors were much influenced by the proposal submitted by Peter Blackadder VK8HPB on behalf of the Darwin Amateur Radio Club. The club has made its name

around Region 3 as a result of the very well remembered IARU Region 3 Conference held in Darwin in 2000 and the legendary hospitality of the club and the Darwin amateurs.

This is very much an early advance notice, and further details will be released as soon as possible. In the meantime, just to give us an idea of the interest in this very different suggestion, if you are thinking of coming, do let our secretary Geoff Atkinson know, without any commitment.

secretary@wia.org.au

HAMS ACROSS AUSTRALIA.

Changes to the RFDS HF network in WA taking affect 1st October.
http://www.vks737.on.net/pdfs/RFDSmediarel.pdf

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

Next Sunday will be the September Trash and Treasure event at the VK2WI Dural site.

Major items on offer are to be found on the Amateur Radio NSW web site www.arnsw.org.au on the Disposal page.

The event starts 10 am.

Also available during the morning are all grades of exam assessments. Please register your interest by a phone call to the ARNSW office 02 9651 1490 or the Secretary's mobile 0400 445 829.

The usual sausage sizzle will be available for lunch. ...

In the afternoon the Radio Home Brew and Experimenters Group have their meeting.

The next meeting of the ARNSW Radio homebrew and Experimenters Group will be Sunday the 26th of September. The venue is the usual location - at the ARNSW broadcast site, 63 Quarry Road Dural. The time, about 1pm, after the Trash and Treasure has packed up.

This month the audience is in for a treat. Bob Mutton VK2ZRM will be giving a talk and demonstrating his homebrewed HF amplifier - 600 Watts - fully solid state. No tetrodes or triodes here, just 4 large, but not very expensive FETs and a 60V power supply. So if you want to homebrew a big amplifier for yourself, but have been scared of high voltages, then this could be the project for you.

There will also be some information about some smaller and less ambitious solid state amplifiers, so anyone attending is encouraged to bring along a USB memory stick for information.

As well as the talk on the big amplifier, the meeting will also start with the usual "show and tell" segment, where members of the audience demonstrate their latest piece of equipment that they have been working on.

All interested amateurs and short wave listeners are invited to come along and join in. Sunday the 26th of September at the Dural Transmitter site.

VK3
web service:- http://www.amateurradio.com.au/news/

Tex wants to buy a tower for Lyn

On OC-227 Sweers Island, they certainly have their priorities in order .

Lyn VK4SWE has been promised a 12 to 15 metre high tilt over tower with mounting plate for rotator and suitable to take the Hygain TH3 Junior Tribander as a birthday pressie by hubby Tex.

Only problem is, Tex has not been able to source the tower at an affordable price, taking into account the cost of freight to Karumba then shipping across the Southern Gulf of Carpentaria to Sweers Island!

If you know the whereabouts of a tower suitable for Lyns birthday pressie, get in touch with Tex on email info@sweers.com.au

I'm Geoff Emery, VK4ZPP and I've been thinking - about getting the job done.

The amateur radio calendar is rather full in this part of the world and our club resources are being suitably stretched. In other words, we are having to find the balance of activity that suits our individual members and their needs and interests as well as provide the combined activity that makes club life

interesting.

The Amateur's Creed stresses that the radio amateur enjoys a balanced life; the radio amateur is available to serve the community but should never forget the responsibilities of home and family.

Like any other organisation, whether work or play, it does mean that up to a third of people may be unavailable at any one time due to health, holidays and other commitments.

When we plan our club activities we have to accept this reality and utilise our manpower resources accordingly. Far better to gently push the boundaries with a willing core of people than over plan and have to cancel activities on the day because of non-attendance. Our radio club should be a place of satisfaction and enjoyment not an source of stress and frustration.

I'm Geoff Emery and that's what I think....how about you?

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

What a great weekend last weekend operating the WIA Centenary Commemorative Call-sign VK100WIA.

The station consisted of an Icom 706 Mk2 G fed into a 3 element tri-band yagi mounted on the TREC mobile tower at 10 metres. Above this we had a 12 element 2 metre yagi.
Station was powered by a battery bank charged by solar panels.
Operators were recharged by hot coffee, cold fizzy drinks and great company.

We made a total of 354 contacts into every VK state and territory and also many into international stations. Thanks to all those who sometimes had to persevere with the inevitable dog-piles from time to time. Unfortunately we could not access the Cairns repeater to allow operation on IRLP. We were aware that some stations were trying to get us there. It was really encouraging to hear so many foundation licensees taking part. Again, well done guys.

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

With the RACQ Technology Challenge over, the Maryborough Electronics and Radio Group are finishing the paperwork for that event and this week getting on with getting the word out on the Wide Bay Mini Hamfest on Saturday 9th October, next.

In conjunction with hosting the operations of VK100WIA, over that weekend, MERG will be utilising the club station VK4MB equipment to publicly demonstrate the hobby from the Scout Hall, Ariadne Street, Maryborough.

A roster of stations operating VK100WIA is being compiled for the hours outside the hamfest and MERG hopes to activate as many bands as possible.

As was said prior to the Gootchie Mini Hamfest, "got to hurry - so much to do and so little time to do it".

For MERG, I'm Geoff, VK4ZPP.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF with news from the Redcliffe AR Club.

The club conducts Tech Talks on the third Monday of each month and upcoming talks include in September Kevin VK4UH - Expedition to Norfolk Island, October Peter VK4EA Codan NGT radio and modem and in November Peter VK4XPJ, Test instruments in radio repairs.

Club Nets
The club conducts its nets as follows, Sunday 7pm - 2m repeater 146.926, Sunday 7.45pm HF - 3.618 +/- QRM, Wednesday 7.30pm Trivia 438.325, (91.5 CTCSS)

It was a special night last Monday when club president, David, VK4DC presented Charles, VK4BTC with the club's highest award, the Peter Garrison shield for his work over the last 12 months in helping the club in building including the caravan modifications and equipment repairs.

In reply, Charles reported that some additional material has been received so the caravan is ready for additional installations and repairs. He also said that BOAT HARBOUR MARINE has donated VHF antenna, hatched stainless bolts resins & paint. The caravan will have a plaque acknowledging the support of this & other businesses that have helped with the setup of the caravan.

VK4FKEN reported to the meeting that David,VK4ICE, had donated a DSP speaker to the club to help with the floor noise that was experienced during the recent VK100WIA competition. David has been a strong and regular supporter of our Club with antennas & other gear to the value of many hundreds of dollars and club members were asked to support David in return.

VK100WIA - 100 years of amateur radio. The club made 372 contacts during this event & is proud of its contribution to this great initiative. To date over 15,000 contacts have been made around Australia. A special thanks to VK4DJH, VK4FKEN, VK4YJV, VK4FLAE & others, who spent many numbers of hours making these contacts for this event.

JOTA. 16/17 October. Peter VK4TAA reported that Glen VK4FZ & Andy VK4KY now have all the kits ready & we are now looking to confirm the members attending over the weekend to assign to the different activities. The club needs the assistance of other amateurs in the Brisbane area to help out this special day. Whether you can attend for the whole weekend, a day or perhaps only a few hours contact Peter VK4TAA for further information.

So until next time, for the Redcliffe club, I'm Ray VK4CF.

Cradle Coast Amateur Radio Club (CCARC)
Members are advised that the next meeting of the Cradle Coast Amateur Radio Club will be held on Saturday, September 25th, 1.30pm at the Penguin Lions club rooms, 19 Ironcliff road, Penguin.

Cradle Coast Amateur Radio Club has a new WIA assessor.
Keith Winkler VK7KW has upgraded his status from Learning Facilitator to WIA Assessor. He will still be the club Learning Organiser and a point of contact for licensing needs.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Beijing clamps down on radio hams

The Government backed English-language daily the Global Times reports on a crackdown on users of unlicensed radio transmitters.

The article, inappropriately titled "Bureau cracks down on radio hams", labels both commercial and hobby users as "Radio Amateurs".

It appears that users of radio transmitters with a power output of half a watt or greater will have to register. In the case of commercial users registration is with the Beijing Radio Administration Bureau and for what are described as non-commercial users with the "Beijing Wireless Sports Association" where it says the simple registration procedure will involve taking an Amateur Radio test.

It is suspected that the article got the name of the association wrong and was referring to the Chinese Radio Sports Association.

Read the Global Times article Bureau cracks down on radio hams
http://www.globaltimes.cn/www/english/metro-beijing/update/top-news/2010-09/572427.html

TAKE YOUR HAND-HELD TO WORK DAY
It is time again in South Africa for their annual SARL "take your hand-held to work day" Friday 1 October 2010. This is where they show work colleagues what amateur radio is all about.

Industry Canada advised both RAC and RAQI on Friday, Sept 10, 2010 that their Montreal office had authorized a number of 430 to 450 MHz frequencies and a single VHF frequency on 145.555 MHz.

According to IC, frequencies were chosen to avoid known amateur repeater channels.

These frequencies in the 70 cm and 2m amateur bands were temporarily authorized to support communications for many European entrants of a cycling event held on Quebec City and Montreal last weekend, the weekend after RAC received advice!

This type of authorized intrusion by Industry Canada of non-amateur communications in amateur spectrum is highly unusual and is a matter of great concern to Radio Amateurs of Canada.

RAC will be taking the matter up with Industry Canada officials.

(Norm Rashleigh, VE3LC Vice President, Industrial Liaison RAC)

OPERATIONAL NEWS -

The Oceania Dx Contest, Australia's Premier international contest, is coming up on the first two weekends of October- the SSB first and then CW.

This year slight changes to the rules mean its a very interesting contest for teams to enter-

The category of Multiple operators One transmitter means that anyone with a staion and an ESKY can enter with some mates..as only one tranmitter is allowed there is no need for flash filters just get on air and have fun..

The other new category is 2 transmitter - again this is an easy category to set-up, but you will need to check-out band and antenna placement to have maximum effect -

Remember to have fun in the contest

(Trent VK4TI)

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

Summerland A.R.C. "Dawn Patrol" 30th Anniversary

Are you a HF Early Bird?
If so try listening at 6;30am eastern standard time on 3.600 MHz.
Listen for VK2SRC "Dawn Patrol" particularly this 30th anniversary during the week 20 to 24 September.

The Japan Amateur Radio League now provides the member search site at www.jarl.com
There, you can search Japanese station call sign(s) and find out whether you can send your QSL to the searched station(s) via JARL QSL bureau or not.

The Westcumb ARC in Nova Scotia has been granted the callsign V C 1 J for the special event station of 65th Anniversary of the United Nations and UNESCO.
Station will be working from the Joggins Fossil Cliffs which became a UNESCO site last year, on the air Sunday October 24th on many different modes.

A special event QSL card will be available.

(Jim Langille VE1JBL President: Westcumb Amateur Radio Club)

Special Event Station CG3MUG

Thunder Bay M.C.T.S. Centre (A Canadian Coast Guard Radio Station) proudly celebrates 100 years of radio service. Built by the Canadian Marconi Company,

in the fall of 1910.

This (then) new "wireless" station, MUG Port Arthur, was the first and only Canadian Great Lakes Marconi station ever built.

In 1912, following the success of MUG, the Canadian government built a chain of marine radio stations from Port Arthur down to Kingston, Ontario.

In 1913, the Marconi station was rebuilt and assigned its current government callsign of "VBA".
The "V" denotes a Canadian station, "B" is for the Great Lakes, and the "A" was given for its historic position as the first.

During the month of November 2010, the Centre's Hams will be operating special event station C G 3 M U G to celebrate their 100th birthday.

The regular Amateur Radio callsign is VE3VBA.

The email address for this special event station is:
cg3mug@yahoo.ca

A successful ARISS contact between students in West Australia and the
ISS took place last Tuesday evening 14 Sept.

The linkup was done from the grounds of Curtain University in Perth
with the University of Western Australia assisting as well.

The event was unique as astronaut Andy Thomas was present at the university
while his wife astronaut Shannon Walker on the ISS answered the 16 questions
that the students put to her.

Andy even got a chance to have a brief word to his wife.

The linkup was telebridged through the ARISS telebridge station in
Argentina operated by Luis LU8YY and Daniel LU5YBR. Martin VK6MJ along
with Pete Wheeler assisted with setting up in Perth with Tony VK5ZAI
setting up and moderating the linkup. The event was also fed to both
Echolink and IRLP by John AG9D in Montgomery IL. USA.

The next Australian school scheduled for an ARISS contact will be Carine
Primary School , also in Western Australia. The school is busy
preparing at present for this event which is scheduled to take place October

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Clean up continues after New Zealand's big earthquake

The massive recovery operation continues after the 7.1 magnitude earthquake that hit Christchurch at 4.36am on Saturday 4 September, leaving a damage bill of NZ$4billion and injured a few people.

The Amateur Radio Emergency Communications (AREC) members have played a role and continue to do so.

AREC Assistant National Director, Geoff Chapman ZL3PX said the Christchurch AREC Communications Bus ZK9EAC, and Comms Vehicle ZK9EAD went into action.

They were deployed for three days in the initial recovery phase of the disaster in conjunction with the military.

AREC also provided communications for the volunteer clean-up teams.
The Christchurch City Civil Defence permanent radio communication systems were unaffected but AREC stepped in to provide operators.

The AREC North Canterbury Section provided operators from day one for the Civil Defence Emergency Managment Communications at various locations.

This included emergency operation and welfare centres. This support provided by radio amateurs is continuing with over 235 duty hours so far involving about a dozen operators.

A major part of the recovery and welfare effort is the provision of psychological services for many traumatised people, affected not due to the big quake but also the un-nerving hundreds of after-shocks.

(IARU Region 3 Disaster Communications Committee Chairman, Jim Linton VK3PC with support from AREC Assistant National Director Geoff Chapman ZL3PX and others)

The 2010 Global Amateur Radio Emergency Communications Conference (GAREC) -- supported by the ARRL, the IARU and all three IARU Regions is scheduled for October 11-12 in Curacao.

With its theme of Learning through Practicing, this year's conference is an opportunity for emergency communicators to discuss recent events, discover technical solutions to problems and how to cooperate with professional partners. One of the highlights of the 2010 conference will be an actual EmComm exercise during the conference, exploring how information sharing across borders can be improved.

==> + PUBLIC SERVICE: GET READY FOR THE 2010 SIMULATED EMERGENCY TEST
```

The 2010 ARRL Simulated Emergency Test is just around the corner and ARRL Field Organization leaders are planning an event that will actively involve members of the Amateur Radio Emergency Service ®, the Radio Amateur Civil Emergency Service, the ARRL National Traffic System and many other related groups that prepare for and respond to emergencies. Public service and emergency response agencies and organizations in your community, ARRL Section Leaders and/or local and state officials will also be invited to participate. You, too, are invited to be a part of this annual tune-up for emergency response. Read more here <http://www.arrl.org/news/get-ready-for-the-2010-simulated-emergency-test>.

```
==> + AMATEUR RADIO IN THE CLASSROOM: QST ARTICLE SPARKS NEW UNIVERSITY
PROGRAM

It all started with the June 2009 issue of QST. Larry Barr, K5WLF --
Planetarium Manager at Tarleton State University in Stephenville, Texas
```

-- was reading QST when he came across an article about exploring the basics of radio astronomy through a homebrew, easy-to-construct radio telescope. The article -- written by ARRL Education and Technology Program Coordinator Mark Spencer, WA8SME -- showed how to turn an everyday satellite TV dish antenna into an instrument that can be used to not only broaden horizons and expand the understanding of our universe, but to marry the magic of Amateur Radio and astronomy.

Barr quickly got to thinking. He showed the article to his supervisor, Dr Shaukat Goderya, the Director of the Astronomy Education and Research Program at TSU. Barr and Goderya began brainstorming on how they could do something like that in the department. And thus began the latest research program in radio astronomy for the Tarleton Observatory. Read more here <http://www.arrl.org/news/em-qst-em-article-sparks-new-university-program>.

==> + REGULATORY: NEW YORK JUDGE DECLARES AMATEUR RADIO IS NOT A CELL PHONE

In many states and localities, it is illegal to talk on a cell phone (without a hands-free device) while behind the wheel. Doing so can result in a ticket and possibly a large fine. But on May 30, 2010, when a New York ham was talking on his mobile rig, he didn't think he was doing anything wrong. He wasn't, of course, but the New York State Police officer who pulled him over and cited him with a $100 fine didn't quite see it that way. Steve Bozak, WB2IQU, of Clifton Park, told the ARRL that when he was pulled over while driving to Troy -- about 16 miles away -- he assured the officer that he was not speaking on a cell phone, but on his Amateur Radio handheld transceiver. According to Bozak, the officer said "it was all the same to him." So Bozak -- with the assistance of his attorney, ARRL Volunteer Counsel (VC <http://www.arrl.org/volunteer-counsel-program>) Jeremy Rase, KC2JRD -- decided to fight the ticket in court. Read more here <http://www.arrl.org/news/new-york-judge-declares-amateur-radio-is-not-a-cell-phone>.

==> ON THE AIR: SPONSOR A PLAQUE FOR ARRL SWEEPSTAKES

When your dentist says you have plaque, that's bad. But when the ARRL November Sweepstakes contest results say you have a plaque, that's a cause for celebration! Plaques for Division and overall contest winners are an important part of the Sweepstakes tradition -- both for the winners and the plaque sponsors. The ARRL Sweepstakes depends on the generosity of plaque sponsors who honor both the winners and their sponsoring organizations. Read more here <http://www.arrl.org/news/sponsor-a-plaque-for-arrl-sweepstakes>.

==> + ON THE AIR: USA TO HOST 2014 WORLD RADIOSPORT TEAM CHAMPIONSHIP

In 1986, Ted Turner -- in reaction to the political troubles surrounding the Olympic Games of the 1980s -- created an international sports competition that he called the Goodwill Games. The first Games

were held in Moscow with more than 3000 athletes from 79 countries competing. Four years later, the Games moved to Seattle, Washington and it was at those Games that the first-ever World Radiosport Team Championship (WRTC) took place.

Besides athletics, the Goodwill Games focused on areas of cultural exchange, arts and other unique subjects, one of these being Amateur Radio -- and WRTC was born. Radio amateurs from around the world gathered in Seattle for an Olympic-style event, joining in competition and camaraderie. In 1996, WRTC moved to San Francisco, then Slovenia in 2000, Finland in 2002, Brazil in 2006 and Russia in 2010. Now 18 years later, WRTC returns to the USA. Read more here <http://www.arrl.org/news/usa-to-host-2014-world-radiosport-team-championship>.

==> ON THE WEB: INTERACT WITH OTHER ARRL MEMBERS -- ADD YOUR PROFILE TO THE WEB SITE

Do you want to find an old ham buddy or Elmer? Is the Jim Smith you knew as a kid the one in Kansas or the one in Oregon? How about interacting with other ARRL members who share your ham radio interests? Or maybe you're just looking for someone to connect with who is also just getting into the digital modes.

One of the features on the new ARRL Web site is Member Profile. You can post a list of your favorite Amateur Radio activities, as well as a description of how you got involved with Amateur Radio here. How your profile appears is under your control -- you can make your full profile available to all other ARRL members, or you can choose to hide certain information.

Adding your profile to the Member Directory allows your fellow ARRL members to connect with you outside of the ham bands. For example, you can then search for others who share your passion for DXing, contesting or EmComm.

Adding your profile is simple: Log in to the ARRL Web site, click on "Edit your Profile" link and select the "Edit Profile" screen.

You'll find the Permissions area just below the Profile Information section. You'll need to opt-in in order for your profile to be seen on the Web site.

==> + SOLAR UPDATE

Tad "Spread their wild hues to the sultry Sun <http://www.humanitiesweb.org/human.php?ID=3749&a=p&p=c&s=l>" Cook, K7RA, reports: The average daily sunspot numbers this week dropped nearly 23 points to 15.6, and geomagnetic indices were quiet. The average daily solar flux was 78.1, but the latest prediction from US Air Force and NOAA calls for rising solar flux values. The September 16-22 projection has solar flux values at 83, 85, 86, 86, 87, 88 and 88, which is well above last week's average. Solar flux hasn't been to

88 or higher since August 7 (90.5), and before that July 21 (89.1). The same forecast shows the planetary A index for the same period at 8, 8, 7, 5, 5, 15 and 15, indicating rising geomagnetic activity along with the increased solar activity. Geophysical Institute Prague predicts quiet to unsettled conditions September 17, quiet September 18-19, quiet to unsettled September 20 and unsettled conditions September 21-23. The autumnal equinox occurs Wednesday, September 22 at 11:09 PM EDT (0309 UTC on September 23). With the northern and southern hemispheres bathed in equal amounts of light, expect better worldwide HF propagation, although solar activity continues at a low level which does not support an MUF into the higher frequencies over most paths. Look for more information on the ARRL Web site on Friday, September 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Clare's June <http://www.humanitiesweb.org/human.php?ID=3749&a=p&p=c&s=l>.

==> + SILENT KEY: ARRL HONORARY VICE PRESIDENT HUGH TURNBULL, W3ABC (SK)

ARRL Honorary Vice President Hugh Turnbull, W3ABC, of Silver Spring, Maryland, died September 14 at age 93. Turnbull served the League as Atlantic Division Vice Director (1980-1982) and Director (1982-1996). The ARRL Board named him Vice President in 1996 and Honorary Vice President in 2000. Upon hearing of his death, ARRL President Kay Craigie, N3KN -- who served as Atlantic Division Vice Director during Turnbull's tenure as Director -- said: "Hugh's life was devoted to serving his country and Amateur Radio. Many times I heard him say that each of us should 'give something back' to ham radio. He was my first mentor in ARRL leadership, and it was my good fortune to have his example to learn from." Read more here <http://www.arrl.org/news/arrl-honorary-vice-president-hugh-turnbull-w3abc-sk>.

==> SUPPORT ARRL: ARRL TO AGAIN PARTICIPATE IN COMBINED FEDERAL CAMPAIGN

For the ninth year running, the US Office of Personnel Management has designated the ARRL to participate in the 2010 Combined Federal Campaign (CFC). This campaign for federal government civilian employees, US Postal Service workers and members of the military has generated almost $140,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support ARRL's effort to represent its members and all radio amateurs. Read more here <http://www.arrl.org/news/2010-marks-ninth-year-for-arrl-participation-in-combined-federal-campaign>.

==> THIS WEEK ON THE RADIO

And I'm not about to argue with you.. However I have found that people
fall into one of three categories when it comes to stuff like this....

Those with more dollars than sense

Those with more sense than dollars (Appears you land here)

Those with dang few cents. (added for PUN effect)

Of course back when I was in group 1, I measured the place where I was
going to put a radio. Looked at several radios, and decided the Kenwood
TS-2000 would fit in the spot just fine. Yes, that is how I choose my
main radio,, with a ruler.

GB2RS NEWS

Sunday 19th September 2010

The news headlines

Deadline for RSGB Board & Regional elections approaching

ARRL to attend the National Hamfest

Places available on DXpedition to Skye

There is still time to apply for the vacancies on the RSGB board and RSGB Regional Council. There is one vacancy for the RSGB Board and five vacancies for the Regional Council - Regions 1, 2, 4, 6 and 12. Members of the Society who wish to stand for the Regional Council and serve as a regional manager must reside in the relevant region and be prepared to play an active part in the region and as a member of the Regional Council. This commitment includes attending a minimum of six Regional Council meetings per annum. You must have been a corporate member of the RSGB for at least two years and need to obtain the nominations and supporting signatures of at least five, but no more than 10, corporate members in good standing and residing in the region in which the candidate is standing. Requests for election papers should be forwarded to Michelina Gramson, PA to the General Manager. Telephone 01234 832 700 or e-mail GM.Dept@rsgb.org.uk. The closing date for the receipt of election papers is 1 October 2010.

The RSGB is delighted to announce that the ARRL will be attending the National Hamfest at the Newark and Nottingham Show Ground on 1 and 2 October. This is the first time that the ARRL have made the trip to a UK event for many years. Latest news on other traders, lectures and activities can be found in the October issue of RadCom, which will be with Members before 27 September. You can also find more information on the website at www.nationalhamfest.org.uk.

Between 1 and 4 October, Stirling District Amateur Radio Society will be taking a trip to the Isle of Skye for a weekend of radio and fun. Main operating days will be 2 and 3 October. The group are planning to operate three stations on the bands between 10m and 160m as well as 6m and 2m. At the moment there are still four spaces available in the bunkhouse. If anyone would be interested in joining the crew, please contact Jonathan Bowes, MM0OKG or John McGowan, GM0FSV via the main club website www.gm6nx.com, where you can also find for more details.

Listen out for clubs and individual amateurs taking part in Transmission 2010 the annual competition for British Wireless for the Blind Fund. BWBF is a registered charity providing specially adapted radios and audio equipment on free permanent loan to registered blind and partially-sighted people in need in the UK. More details on www.blind.org.uk.

Bangor and District Amateur Radio Society is running a Foundation licence course on 16 and 17 October. Anyone interested in taking the course should contact Mike, GI4XSF on 028 4277 2383.

The RSGB EMC Committee has now totally refreshed the RSGB website pages covering EMC matters. The new information contained in the pages should be of practical help to anyone experiencing interference on the amateur bands, or causing interference to nearby electronic equipment. Just as importantly, the site now contains a survey questionnaire to capture information about the extent of interference to amateur band reception. Please, if you are experiencing regular local interference to your reception, report it on the short questionnaire available under the ``I am experiencing interference'' pages. This will enable the RSGB to build a creditable database of interference cases, which will help in its discussions with Ofcom

And now for the details of rallies and events for the coming week.

Today, Sunday 19 September, the Great Northern Hamfest will take place at the Metrodome Leisure Centre, Queens Road, Barnsley, S71 1AN. Opening time is 11am. There will be trade stands, an RSGB bookstall, special interest groups but please note there is no Bring and Buy. There are a limited number of tables available at a reduced price for individual amateurs wishing to sell their surplus equipment. Details from Ernie, G4LUE on 01226 716339.

On Sunday 26 September, the Holsworthy Amateur Radio Rally will take place in the Holsworthy Community Centre, Victoria Hill, Holsworthy EX22 6JD. Details from Roger Williams on 07773 983 691.

Also on Sunday 26 September, a garage sale of 50 years of amateur radio history will take place. This is the sale of the estate of G3IOZ and the venue is close to junction 4 of the M40 in High Wycombe. Details from Larry, G4GZG by e-mail to g4gzg@yahoo.com.

Now for the news of special events

Glasgow and Clyde RAYNET group will be operational today, 19 September, under the group callsign GM0RAY to raise funds for the British Wireless for the Blind during the Transmission weekend. The group will be transmitting from Carman Hill, which is located south of Loch Lomond above the town of Alexandria. Operation will be on 80, 40, 20 and 17m as well as the 2m band. For further information contact Paul Lucas on 0776 827 1736.

Cray Valley Radio Society, operating as GB2BF, will be taking part in British Wireless for the Blind Fund's Transmission 2010 event over the

weekend of the 18 and 19 September. The club will be operating from the Margaret McMillan House field study centre near the summit of Wrotham Hill in Kent, which is locator JO01DH, and will be active on the HF bands as well as 2 and 4m. Further details may be found at www.cvrs.org.

Galashiels and District ARS will be operating GB0WRH from Whitrope Siding, south of Hawick in the Scottish Borders on the old Waverley Route. Operation is for Railways on the Air weekend on 25 and 26 September.

Members of the Ripon and District Amateur Radio Society will be operating from the North Yorkshire Vintage Machinery Rally based at Scorton near Catterick, North Yorkshire on 25 and 26 September. They will be using the callsign GB6VMR and will be active on HF and VHF.

Ofcom has issued the special call sign GB100H for use by the Polish Scout Amateur Radio Club to celebrate the founding of the Polish Scout Movement. It will be on the air from various locations until the end of the year. More information can be found at www.g0zhp.org.

Monkwearmouth Train Museum in Sunderland will be activated by the North East Special Event Group using the callsign GB4MSM. The Museum is located in North Bridge Street, Sunderland SR5 1AP and operation will be on 6m, 2m and 70cm. On Saturday the station will be open from 10am to 5pm and on Sunday from 2 to 5pm.

GB2JB will be operated from time to time on 2m throughout September by the Brigg Amateur Radio Club to commemorate the birth of Jack Binns. He was the radio officer on various ships including the RMS Republic, which was in collision with the SS Florida in fog in January 1909. His constant CW May Day messages for help resulted in all 1600 passengers being rescued before the ship went down.

And now the HF DX news compiled from 425 DX News and other sources

For the week starting 18th September, members of Sands Contest Group and Workington Radio Club along with Brendon Minish, EI6IZ will be visiting the Isle of Arran off the coast of south western Scotland, operating under the callsign MS0SCG. They plan to operate on VHF, HF, SSB, CW and data modes. The location is IOTA island number EU123 and SCOTIA island number CS14. For more information and an up to date blog on the event, please check out the group's website at www.m0scg.org.uk.

The Middlesex DX Group will be active on the Isle of Mull, IOTA reference EU-008, from 18 to 24 September using the callsign GB2MUL. They plan to be active on HF as well as 2, 4 and 6m. For further details check out the website at www.dxcc.co.uk.

The Dengie Hundred Amateur Radio Society from Essex will be running its regular DXpedition to the Isle of Skye, which is IOTA reference EU-008 from 18 to 24 September. The station will be using the regional variant

of the club callsign GS0UTT/P and operation will be on all bands from 160m through to 6m, using SSB, PSK31 and CW. Operation will not be at fixed times but the station will be on most daytimes and evenings.

Now the contest news

On 21 September the UHF Activity Contest takes place between 1900 and 2130UTC. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

The following day, 22 September, it's the 80m Club Sprint from 1900 to 2030UTC. Using CW, the exchange is serial number and name.

The RTTY leg of the CQWW DX Contests takes place for the entire 48 hours of 25 and 26 September. Exchange a signal report and CQ Zone, Britain being Zone 14, and expect to work some rare countries. There are numerous entry categories.

On 28 September it's the 50MHz Activity Contest from 1900 and 2130. Using all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 6th the 12th of September, compiled by Neil Clarke, G0CAS on the 13th of September.

The latest smoothed sunspot numbers are available and are for December 2009, January and February 2010 and are 8.3, 9.3 and 10.6 respectively.

The solar disc had spots visible every day except for the 9th and the 10th, which were spotless. There was some activity from the backside of the Sun where several CMEs were observed. Solar activity increased to low on the 6th and the 8th when a small C class solar flare took place on both days. These had no little effect on propagation. The remaining days saw solar activity was very low. Solar flux levels declined from 80 units on the 6th to 74 by the 9th, after which increased again to 78 by the 12th. The average was 77 units. The 90 day solar flux average on the 12th was the same level as last week at 78 units. X-ray flux levels also declined slightly around midweek and the average was B1 units. Geomagnetic activity started at just unsettled levels with the Ap index of 10 units by the 8th. Activity then declined to very quiet levels with the Ap index of only one unit on the 11th and the 12th. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase to 510 kilometres per second on the 7th but then gradually decline to 300 kilometres per second by the 12th. Particle densities increased to 15 particles per cubic centimetre on the 7th, otherwise, densities were low everyday. Bz varied no more than minus and plus 6 nanoTeslas throughout the period.

And now the solar forecast. This week the quiet side of the Sun is expected to be rotating into view. Solar activity could be low at first but then decline to very low levels later in the week. Solar flux levels are expected to decline and be in the 70's by next weekend. For the next couple of days geomagnetic activity could be unsettled due to a

recurring coronal hole. However, by midweek activity should decline and become quiet for the remainder of the week. MUFs during daylight hours at equal latitudes should be about 22MHz for the south and 19MHz for the north. Darkness hour lows should be around 10MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 16MHz. The best time to try this path will be between 0800 and 1100 hours UTC. On the long path both the MUF and the optimum working frequencies will be about 3MHz lower and the best time for the path will centre around 0800 UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 20 September Gloucester Amateur Radio & Electronics Society is operating HF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 20 September South Birmingham Radio Society has a committee meeting. Contact Don, on 0121 458 1603.

On Monday 20 September Welland Valley Amateur Radio Society is having a QRP and Top Band operating night. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Monday 20 September Wythall Radio Club continues its Advanced course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 21 September Loughborough & District Amateur Radio Club is judging the ZN414 project. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 21 September Telford & District Amateur Radio Society is having a microwave FM demo by G8VZT. Contact Mike, G3JKX, on 01952 299 677.

On Tuesday 21 and Saturday 25 September Wythall Radio Club is having a homebrew evening. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 22 September Bolsover Amateur Radio Society has Colin's quiz. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 22 and Saturday 25 September Lincoln Short-Wave Club is putting G5FZ on the air and doing jobs around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 22 September Midland Amateur Radio Society has an open meeting, ragchew and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 22 September South Notts Amateur Radio Club is having a video night. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Friday 24 September Coventry Amateur Radio Society is holding a VHF/UHF radio workshop. Contact John, G8SEQ, on 07958 777363.

On Friday 24 September South Birmingham Radio Society is having a construction evening and ragchew. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND

On Monday 20 September Angel of the North Amateur Radio Club is having a report on the rally and discussing future projects. All welcome. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 20 September Scarborough Amateur Radio Society is having a talk by M0GAP on signal generators of yesteryear. Contact Jerry Scarr, G6LBL, on 01751 476601.

On Monday 20 September Sheffield Amateur Radio Club is having a talk by G3PHO on the history of Sheffield Amateur Radio Club. For more information contact Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 21 September Chester & District Amateur Radio Society is holding a surplus equipment sale. Details from Barbara Green on 07957 870770.

On Tuesday 21 September Morecambe Bay Amateur Radio Society is having a social evening. For more information contact Martin Hazel, M0ZIF, on 01524 581381.

On Tuesday 21 September Otley Amateur Radio Society has a shack night. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 22 September Hornsea Amateur Radio Club is taking part in the 80m Club CW Sprint. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 23 September South Manchester Radio and Computer Club is having a talk on analysing antenna analysers by Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 23 September Wakefield & District Radio Society has a curry night at the Aagrah, Barnsley Road, 7.30 for 8. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 24 September East Cleveland Amateur Radio Club is having a a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 25 September Wakefield & District Radio Society continues its Foundation course. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR NORTHERN IRELAND

Bangor and District Amateur Radio Society is running a Foundation licence course on 16 and 17 October. Anyone interested in taking the course should contact Mike, GI4XSF on 028 4277 2383.

NEWS FOR SCOTLAND

On Tuesday 21 September Livingston & District Amateur Radio Society is having a club evening. Contact Norman, on 07740 946192.

On Wednesday 22 September Lothians Radio Society is visiting the Museum of Communication, Burntisland. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Wednesday 22 September Paisley YMCA Amateur Radio Club is having training. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Wednesday 22 September West of Scotland Amateur Radio Society is running construction projects and licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 23 September Aberdeen Amateur Radio Society is having a talk. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 24 September Cockenzie & Port Seton Amateur Radio Club is holding a 144MHz DF hunt, meeting in the Old Ship Inn car park east. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 24 September West of Scotland Amateur Radio Society is having presentations, guest speakers, a raffle and a quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Monday 20 September Basingstoke Amateur Radio Club is having a talk on 3D TV by Noel, G8GTZ. Details from Clive, G4ODM, on 01256 326050.

On Monday 20 September Braintree & District Amateur Radio Society is having a talk on astronomy by Mike Adcock, G8DJO. For more information contact John, M5AJB, on 01787 460 947.

On Monday 20 September Burnham Beeches Radio Club is having a talk on CW by G3XTT. Contact Dave, G4XDU, on 01628 625 720.

On Monday 20 September East Kent Radio Society is having an operating evening. Contact Karl Davies, M1DFM, on 01227 710120.

On Monday 20 September Surrey Radio Contact Club is having a fix-it and natter night. More information from Ray, G4FFY, on 01732 357474.

On Tuesday 21 September Andover Radio Amateurs Club is having a video evening.. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 21 September Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 21 September Bromley & District Amateur Radio Society is looking at radio astronomy. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 21 September Edgware & District Radio Society is operating 40m for the Edgware Activity Period. More information from Mike, G4RNW, on 0208 950 0658.

On Tuesday 21 September Verulam Amateur Radio Club is having a club night and preparing for the club's 50th anniversary. Details from Ralph, on 01923 265572.

On Wednesday 22 September Chesham & District Amateur Radio Society is on the air. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 22 September Darenth Valley Radio Society Radio is on the air and having a natter night. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 22 September Edgware & District Radio Society is operating 10m for the Edgware Activity Period. More information from Mike, G4RNW, on 0208 950 0658.

On Wednesday 22 September Farnborough & District Radio Society is visiting Martin Lynch. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 22 September Hastings Electronics and Radio Club is having a demo of Baird TV by John Saunders, M1BAI. Details from Gordon, on 01424 431 909.

On Wednesday 22 September Newbury & District Amateur Radio Society is having a talk on the history of Bletchley Park by Ray, G4FON. Details from Rob, G3LMW, on 01635 862737.

On Wednesday 22 September Norfolk Amateur Radio Club is having an informal, construction, workshop and Bright Sparks evening. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 22 September Worthing & District Amateur Radio Club is taking part in the 80m CW Sprint contest. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 23 September Echelford Amateur Radio Society is having a natter night, bring & buy and CW practice. Contact John, G4GSC, on 01784 451898.

On Thursday 23 September Edgware & District Radio Society is having a talk by Steve, G0PQB entitled I have a good idea. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 23 September Lowestoft & District Amateur Radio Club is having a club night at the shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 23 September Reading & District Amateur Radio Club is having a talk on WSPR by Dave Rumens, G4BOO and Dick Fitch, M0POQ. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 23 September Shefford & District Amateur Radio Society is having a talk on Baldock Radio Station by Dez Watson. Details from David, G8UOD, on 01234 742 757.

On Friday 24 September Bittern DX Group commences its weekend event operating GB2NNR, North Norfolk Railway, for Railways on the Air. Details from Linda, G0AJJ, on 01692 404154.

On Friday 24 September Edgware & District Radio Society is operating 80m for the Edgware Activity Period. More information from Mike, G4RNW, on 0208 950 0658.

On Friday 24 September Itchen Valley Amateur Radio Club is having a club night. Contact Charlie, M0WYM, on 02380 439560.

On Friday 24 September Loughton & Epping Forest Amateur Radio Society is having a talk entitled and now the shipping forecast by Marc Litchman, G0TOC. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 24 September Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 24 September Radio Society of Harrow is having a twinned club visit from G/ F6KRK. More information from Linda, G7RJL, on 0208 386 8586.

On Friday 24 September Waterlooville Amateur Radio Club is having a talk on the Police Helicopter Service. Details from Rich, G4IBW, on 02392 680852.

On Friday 24 September Wimbledon & District Amateur Radio Society is having a talk on Radio Susy by John Stockley, G8MNY. Contact Jim, M0CON, on 020 8874 7456.

On Saturday 25 September Gorleston Amateur Radio Society is having a lunch time meeting at the Short Blue Hotel, Gorleston. Contact David, G3OEP, on 01493 662 323.

On Saturday 25 September Loughton & Epping Forest Amateur Radio Society commences its weekend annual autumn get-together at Aylmers Farm, Old Harlow. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Saturday 25 September Verulam Amateur Radio Club commences its weekend event taking part in the CQ WWW RTTY contest. Details from Ralph, on 01923 265572.

On Sunday 26 September Bittern DX Group is planning for October meetings. Details from Linda, G0AJJ, on 01692 404154.

On Sunday 26 September Chelmsford Amateur Radio Society is attending Science and Discovery Day at Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Sunday 26 September East Kent Radio Society is visiting the sound mirror at Denge. Details from Karl Davies, M1DFM, 01227 710120.

NEWS FOR THE SOUTH WEST

On Monday 20 September Appledore & District Amateur Radio Club is having a talk by G4HXK entitled secret codes - an enigma? Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Tuesday 21 September West Devon Radio Club is having a guide to second hand radio purchasing by Zoli Ritter, M0ZOL and Jules Cuddy, M1AGY. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 22 September Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 22 September Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 23 September South Bristol Amateur Radio Club is having stories from Lundy by the Lundy Group. Contact Len, G4RZY, on 01275 834 282.

On Thursday 23 September Yeovil Amateur Radio Club is having a crystal set practical evening. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 24 September North Bristol Amateur Radio Club is having a skittles match. Details from Dick on 01454 218362.

NEWS FOR WALES

On Monday 20 September Dragon Amateur Radio Club is having a talk on fuel cells by Stan Hulme, GW3SRM. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Monday 20 September Llanelli Amateur Radio Society is having a DVD night. Contact Craig, MW0MXT, on 01269 840292.

On Tuesday 21 September Wrexham Amateur Radio Society is having a DVD night. Details from Glyn, MW0BNB, on the web at www.wrexham-ars.co.uk.

On Friday 24 September Newport Amateur Radio Society is on the air using GB4RC for the Ryder cup. Contact Ross Clare, GW3NWS on 01633 880146.

On Saturday 25 September Meirion Amateur Radio Society commences its weekend event running GB0WHR for Railways on the Air. Contact John, MW0VTK, on 07772 720099 for more information.

786. from W2YDW - GOOD! - - Phase Coherence is the reason for the binding attractive force in ALL the 4 fundamental forces, Proof of this is in the following:

GOOD! - - Phase Coherence is the reason for the binding attractive force in ALL the 4 fundamental forces, Proof of this is in the following:

Our space is built up by the average amount elements are out of phase with each other.

Repulsive forces are generated between elements that are out of phase more than this average.

While elements more in phase, than this average (phase coherence), produce attractive forces.

http://www.amperefitz.com/phase.coherence.htm

SARL NEWS - SUNDAY 19 SEPTEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret we announce that on 9 September, the key of Johan Koster, ZS3JMK, and that of Rennie van Rensburg, ZS6REN, on 12 September, became silent. Our sincerest condolences go to their wives, children, other family and friends.

(PAUSE)

In the news today:

THE SARL CREATES AN ENGLISH - AFRIKAANS GLOSSARY

AMATEUR RADIO MIRROR INTERNATIONAL NOW ON FM IN NEW ZEALAND

TAKE-YOUR-HANDHELD-TO-WORK-DAY

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

THE SARL CREATES AN ENGLISH - AFRIKAANS GLOSSARY

At a meeting of the Editors of SARL News, it was decided to create an English - Afrikaans glossary which will also be available on the Web. The list will primarily focus on the translation of English technical terms into Afrikaans. The SARL News's Web page will also include guidelines on how to submit news items for inclusion in the SARL's news bulletins. The new pages are expected to become available in the next few weeks. Contributions to the English - Afrikaans glossary are invited and should be sent to armi@sarl.org.za.

AMATEUR RADIO MIRROR INTERNATIONAL NOW ON FM IN NEW ZEALAND

>From this week Amateur Radio Mirror International will be on the air weekly in Tawa, a suburb of Wellington, in New Zealand. WorldFM will broadcast the programme at 16:00 on Tuesdays and 21:00 on Thursdays, local NZ time (that's 04:00 UTC and 09:00 UTC, until they switch to summer time). WorldFM can be heard on 88,2 MHz. The station is also streamed on the Internet at www.worldfm.co.nz.

TAKE-YOUR-HANDHELD-TO-WORK-DAY

As announced last week, Friday 1 October is "Take-you-handheld-to-work-day". The idea is to demonstrate the magic of amateur radio to your colleagues during your tea- and lunch breaks. A new brochure about amateur radio is being edited and will be available for download from the Web before the event.

To make the "Take-your-handheld-to-work-day" successful, it is important for radio amateurs who are retired, or who work from home, to create lots of activity on your local repeaters.

The SARL has also linked a photo competition to the event entitled "Amateur-radio-in-action". Take your camera to work and ask one of your colleagues to snap the activity. Then, after the event, e-mail a high-resolution picture to armi@sarl.org.za with a short description. All entries will be entered into a lucky draw for a new ARRL book, "Basic Antenna - understanding practical antennas and design". The closing date for your Amateur-radio-in-action photographs is 15 October 2010.

NEW EUROPEAN SYSTEM ISSUES WARNINGS OF SOLAR STORMS

Researchers at the University of Bradford in the United Kingdom report that a new method of predicting solar storms, that could help to avoid widespread power and communications blackouts, has been developed.

Up to now, solar weather prediction has been done by experts looking at 2D-satellite images of the sun, and then assessing the likelihood of future activity. A team from the Centre for Visual Computing has now created the first online automated prediction system, using 3D-images generated from the Solar and Heliospheric Observatory (or SOHO) satellite.

Already in use by both NASA and the European Space Agency, the Bradford Automated Solar Activity Prediction system (also known as ASAP) identifies and classifies sunspots and then feeds this information through a model which can predict the likelihood of solar flares. The system is able to accurately predict a solar flare six hours in advance. The team is now working to achieve a similar accuracy for the prediction of major solar eruptions in the near future.

Solar storms are the releasing of huge amounts of hot gas and magnetic forces from the surface of the sun into space at around a million miles per hour. The next major solar storms are expected in 2012 - 2013 as part of the sun's 11-year weather cycle. An US National Academy of Sciences report, published in 2008, estimates that confidence in modern

electronics and satellite communications means that a major storm could cause twenty times more economic damage than Hurricane Katrina.

Although major solar eruptions and coronal mass ejections normally take several days to reach the earth, the largest recorded, in 1859, took only 18 hours. Solar flares, which can also cause significant disruption to communications systems, take just a few minutes. Because of this, advance warning is of vital importance, to enable steps to be taken to avoid the worst effects of such solar activity. (With thanks to Newsline.)

COMPETITION NEWS

RESULTS OF THE ZS6JVT HF 40 m YOUTH SPRING COMPETITION

The group above 26 years:

1. ZS1OB - Neels van Eeden 2. ZS2EC -Theunis Potgieter 3. ZS2J - Derek Stuart.

Younger than 25:

1. ZU6JAN - Jan Smit 2. ZS6JPC - Philip Cronje 3. ZU6GG - Gideon Grobler 4. ZU6GVS - Gerdie van Staden

Your certificates will be sent to you via e-mail shortly.

The winner of the lucky draw is Jan Smit, ZU6JAN. Congratulations Jan.

Here are the results of the Boland Amateur Radio Club 40 m sprint:

Highest points achieved:

1. ZS2A - 121

2. ZS4JAN - 77

3. ZS1CF - 63

Highest points per division:

1. ZS1CF - 63

2. ZS2A - 121

4. ZS4JAN - 77

5. ZS5C - 17

6. ZS6APT - 49

The Pretoria Amateur Radio Club, ZS6PTA, is participating in the SARL VHF/UHF contest from Gemsbokberg. Look for them at grid locator KG42RM. ZS6PTA will also participate in the upcoming SARL Heritage Day Sprint from Fort Skanskop, KG44CF.

CLUB NEWS

The Highway Amateur Radio Club invites all radio amateurs and interested parties to join them at 11:30 on 25 September for their swopshop. The venue is at the home of John Fielding, ZS5J, at St. Andries Street, Monteseel. If you do not know the venue, talk-in will be available on 145,600 MHz via the Alverstone repeater. Tables will be available to display your items and braai facilities will also be available. We hope to see many of you there on the day.

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 2 October at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is most welcome. For more information, contact Phillip, ZS6PVT, on 083 267 3835.

The Pretoria Amateur Radio Club has elected their new committee for 2010/2011:

Chairman - Pierre Holtzhausen, ZS6PJH Vice Chairman - Almero du Pisani, ZS6LDP Secretaries - Richard Peer, ZS6UK, and Graham Reid, ZR6GJR Treasurer - Richard Peer, ZS6UK SARL Liaison - Pierre Holtzhausen, ZS6PJH Rally Coordinator - Johan de Bruyn, ZS6JHB Contest Co-ordinator - Pieter Human, ZS6PA Technical matters and repeater maintenance - Craig Symington, ZS6RH Web Co-ordinator- Graham Reid, ZR6GJR Social Co-ordinator - Willie Greyling, ZR6WGR, and Doreen de Bruyn, ZR6DDB Training Co-ordinator (co-opted) - Fritz Sutherland, ZS6ASF Flea markets - Almero du Pisani, ZS6LDP Public Relations Officers - Willie Greyling, ZR6WGR, and Almero du Pisani, ZS6LDP

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that solar activity is still at low levels. Sunspot 1106 persists in the southern hemisphere, but remains fairly quiet. The new Sunspot, 1108, is crackling with B- and C class solar flares and some exciting HF openings can be expected during the week. The effective sunspot number is expected to be less than 25 for the coming week.

20 m will provide the best opportunities for DX; followed by 15 m. Conditions to India will be good from the late afternoon till after sunset. During the afternoon conditions will be good towards Europe on 15 m, followed by good 20 m openings. Contacts with the USA are still challenging. Contacts with Australia and New Zeeland are possible at sunrise on 20 m and on 40 m after sunset. 15 m openings to Brazil and South America are possible during the afternoons. With good 15 and 20 m openings, 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the workhorse for contacts around the country with 30 m also being very functional for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons, as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today, 18 - 19 September - SARL VHF/UHF competition; 20 September - Morse code classes by ZS6APS start at 19:30 on the 145,775 MHz repeater in Pretoria; 24 September - Heritage day sprint; 24 September - Enrolments for the October RAE close; 25 September - Launch of HABEX at the Klerksdorp aerodrome; 25 September - Special event station at Hermanus Primary School to coincide with the Whales and Wheels Festival; 25 September - the Highway ARC Swopshop 11:30 at the QTH of John Fielding, ZS5JF; directions on 145,600 MHz; 29 September - SARL 80 m digimodes club competition; 30 September - Closing date for entries for Phase 1 of the Innovation project; 1 October - Take-your-handheld-to-work-day; 2 October - West Rand ARC flea market at the club house in Weltevreden Park. Contact Phillip, ZS6PVT on 083 267 3835.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN, The bulletin editor was Jannie, ZR6PHD.

Thank you for listening, 73.

/EX

You will notice that Category 3 only referred to money. So you'd be a 3.
NO cents (Sense does not matter when you have no cents to spend)

By the way, that's where I fall for the next couple years too.

Debby Says...

Call For Council and Presidential Nominations

In the next issue of Break In, the Returning Officer Evan Sayer has called for nominations for Council and Presidential elections. If your branch has someone who you feel would and could represent not only your local branch, but the region on Council, please send your nominations addressed to the "Returning Officer" before the end of December.

Nomination forms can be obtained from me here at HQ.

No Subscription Rebates After 30 November 2010

A reminder that subscription rebates are $15 and in order to be eligible for this rebate you must pay on or before 30 November 2010.

Talk soon...Debby ZL2TDM

AREC Report From CHRISTCHURCH & NORTH CANTERBURY SECTIONS OF AREC

Christchurch Earthquake 4-SEPT-2010 @ 4.36AM

Updated Saturday 11th September 2010

A substantial earthquake struck Christchurch in the early hours of Saturday, after the initial shock (7.1) as to what had happened AREC operators came on the air to establish communications firstly amongst themselves just to see who had suffered what.

Their first port of call was the immediate needs of ones family to make sure that all was secure and OK, neighbours met neighbours for the first time in many cases, being dark and without power one could not see the extent of the damage.

AREC Base Stations came on the air to monitor nominated frequencies then called in check-in stations. Our local VHF repeaters were on reduced output power as they were on back-up power systems, the audible beep on the tail of the main Christchurch repeater let operators know what its status was, operators were advised of only essential use of the system to conserve battery life.

Communication Systems Operating

Christchurch City Civil Defence permanent radio communication systems were unaffected even though the CDHQ was in the process of being relocated from the old premises to the new City Councils building, this was established in the alternative CDHQ in the Art Gallery.

Early on no Area HQ's or Service Centres were activated, as existing communication systems were available. Later on one or two were activated for a short time for Refuge centres. At no stage were any requests for technical assistance.

Many of the FM/AM broadcast stations went off the air for various time periods then came back on with all the usual DJ hype.

After the initial shock both the standard telephone and cellular systems became overloaded but after pleas from the media people soon realized what they were doing, most of these networks stayed intact and operational on back up power despite several cellular towers leaning.

Credit must go to the high engineering standard of these systems.

Communication Systems used by AREC

All local VHF repeaters remained fully operational,

CHCH 705, Mt Herbert 725, Mt Grey 675 used for chit chat, Cass Peak 5625

UHF National System although the Christchurch port was turned off to conserve battery life

VHF Simplex 146.475 146.575 for local chit chat

HF 3900 5320/5395 7100 USB Monitored.

Christchurch AREC Comms vehicle (ZK9EAC Civilian Bus) all the above. Used in the Recovery Phase in conjunction with the Military for 3days.

Christchurch AREC Comms vehicle (ZK9EAD Diahatsu)

SAR VHF Handhelds (ES Band simplex)

The North Canterbury Section were involved with CDEM Comms since the quake last Saturday by providing operators at Waimak EOC (Rangiora), Kaiapoi Welfare Centre(Initially at Kaiapoi North School now at the Kaiapoi Rugby Football Club), Pines-Kairaki Welfare Centre (Pines Beach hall). They have been rested over the weekend, except that two operators have set up an extra base at the Kaiapoi Community Centre for the NZ Army. Everyone will be back on duty Monday. To Date they have completed over 235 duty hours a total of 11 operators involved.

The North Canty AREC Section has the township of Kaipoi in its area which was badly hit also Communications here are on established permanent radio networks for Civil defence.

Just a few statistics from Sat 4th to Sat 11th there have been 388 seismic shocks recorded ranging from 3.0 to 5.4. Sat 4th 93 Sun 5th 98 Mon 6th 80 Tue 7th 47 Wed 8th 40 Thurs 9th 19 Fri 10th 11

Aftershocks are still being felt throughout Canterbury on an hourly basis and it is wearying to say the least

North Canterbury AREC Operators

Colin ZL3COL, Rob ZL3RO, Don ZL3DMC, Tony ZL3HAM, Denise ZL3HI, Bev ZL3OV, Barrie ZL3UC, David ZL3AI and Geoff ZL3QR.

Plus ever forgiving XYL's

CHCH AREC Operators

Dudley ZL3GG Section Leader, Jeni ZL3TCG, Barry ZL3ACU, Barry ZL3TNQ, Jeremy ZL3RT, Gareth ZL3VP Area Manager, Geoff ZL3PX, Alan ZL3GX, David ZL2IC, Richard ZL4FZ, Steve ZL2UCX, Rob ZL3RX and Greg ZL3IX.

Plus ever forgiving XYL,s If I have missed someones name please let me know

Get on the Optical Bus

IBM's light-powered links overcome the greatest speed bump in
supercomputing: interconnect bandwidth

Sad but true: About three-quarters of the time, your computer processor is doing nothing more than waiting for dataï¿½the cybernetic equivalent of twiddling one's thumbs. It doesn't matter whether you've got the latest processor, surrounded it with high-speed RAM, or lovingly hot-rodded your system with the latest in liquid cooling. Your speed is primarily set not by the processing power you have but by the connections that stand between that processor and the data it needs.

The problem is that data transfer is accomplished by the movement of an electronic signal along old-fashioned copper wiresï¿½the same basic phenomenon that a century and a half ago carried news of the U.S. Civil War over telegraph lines. It's time we saw the lightï¿½literallyï¿½and stopped shackling ourselves to electrons moving along copper conductors....

More HF Sprint Contests After Requests From Participants

Following the running of another successful Waitakere Sprint contests some participants have requested additional sprint contests be held during the year. Papakura Radio Club who have organised the Waitakere Sprint for the past three years are adding the following Sprint Contests to the Contest Calendar. November will be the Papakura Sprint, February the Summer Sprint and in May the Tasman Sprint series so the calendar will look like this.

Name Waitakere Sprint Contests
Phone Last Saturday night in July
CW First Saturday night in August

Name Papakura Sprint Contests
Phone First Saturday night in November
CW Second Saturday night in November

Name Summer Sprint Contests
Phone First Saturday night in February
CW Second Saturday night in February

Name Tasman Sprint Contests
Phone Second Saturday night in May
CW Third Saturday night in May

All sprints will run under the same rules and are open to all Australian, New Zealand and Pacific Island stations.

Operators are to record as many contacts as possible from within the total group of participating stations.

Each sprint is just one hour duration 9.00 ï¿½ 10.00 UTC

One categoryï¿½ no weighting or jugglingï¿½ the high score wins.

Certificates issued to top 6 places.

The results will also be sorted into callsign prefix areas of operating for area comparison showing highest VK1,2,3,4,5,6,7,8 and ZL1,2,3,4 etc.

Full rules will be provided for each Sprint and be added to the Papakura Radio Clubs web siteï¿½ search ï¿½ZL1VKï¿½.

If you would like notice of a forthcoming sprint emailed to yourself, send an email to prc@ihug.co.nz with ï¿½sprintsï¿½ in the subject line.

Online Radio Course From DoC (Department of Conservation)

This course is not a detailed technical course but an excellent introduction to the practical use of radio equipment used in communication.

The course relates to the frequencies and equipment used by DoC.

A person, after studying the courses, would be well versed in the practical use of radio equipment.

The course is made up of four modules:

* Module 1 - describes the principles of VHF radio

* Module 2 - covers the use of handheld radios

* Module 3 - explains how to use mobile and base radios

* Module 4 - describes how to set up portable repeater units.

The course is designed for people who use DOCï¿½s radio network, including:
DOC staff, Volunteers, Members of community groups and contractors.

This course is free and online at:

http://tinyurl.com/29xnb3e

Extractions from the course would be valuable for people taking amateur
radio classes.

Frequencies From The Doug Gorman Memorial Frequency Measuring Contest

Here are the five frequencies for the NZART Doug Gorman Memorial Frequency Measuring Contest.

Calibration Frequency: 3895.000000 kHz

Frequency 1: 3899.942011 kHz

Frequency 2: 3890.100100 kHz

Frequency 3: 3897.099785 kHz

Frequency 4: 3893.599292 kHz

Frequency 5: 3894.351144 kHz

There is still some more work to do before provisional results for competitors can be published. Stay 'tuned'.

John ZL4JY

Shifting the decimal point from the values given above we get:

3899942.011 Hz or 3899942011 mHz

3890100.100 Hz or 3890100100 mHz

3897099.785 Hz or 3897099785 mHz

3893599.292 Hz or 3893599292 mHz

3894351.144 Hz or 3894351144 mHz

where mHz is millihertz. Yes the frequencies are given to one-thousand-part of a hertz.(ED)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th-September, through Sunday, 19th-September there were 211 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V6, V8, VE, VK, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZL7, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or to IZ8CCW. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

4J, AZERBAIJAN (Contest and WFF Op). Members of the "Safari DX Activators Club of Azerbaijan" will be activating two different Nature Reserves between September 20th and October 3rd. The operators/participants are representatives of the countries of Latvia, Russia and Azerbaijan. There will be two different teams, callsigns and QSL routes:

4K3FF Team - Activity from the Natural Reserve "Turyanchay" (4JFF-014, see http://www.qrz.com/db/4K3FF/1284621334) between September 20th and October 3rd. Activity will be on 40/20 meters using CW, SSB and RTTY. Operators mentioned are: Yuris/YL7A, Natig/4J5T, Boris/4K4K and Leonid/4J8VHF. Operation is valid for the AzeDA (Azerbaijan Districts Award; index of territory - AH). The team will be equipped with Elecraft K3 transceiver plus a 200w amps and 40m Loop antenna. Also, look for Yuris, YL7A, to be in the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/Single-Band (40m)/Low-Power entry. QSL all activity via YL7A direct.

4J0WFF Team - Activity from the Natural Reserve "Ag Gel" (4JFF-001, see http://www.qrz.com/db/4J0WFF/1284620268) between September 25-27th. Activity will be on 40/20 meters using CW, SSB and PSK31. Operators mentioned are: Sergey/RA6FPL (4K3FPL), Vladimir/RL7KT (4K3QQA), Natig/4J5T, Boris/4K4K, Alexander/ 4J7WMF, Serge/4J5A and Igor/4K6OF. Operation is valid for the AzeDA (Azerbaijan Districts Award; index of territory - AI. The team will be equipped with a UW3DI transceiver plus a 200w amp and a 40m Loop and Inverted-V antennas. QSL via 4J5T: Parvana Hasanova Fornati, 12584 Eden Court Ct, Apple Valley, MN 55124, USA.

5H, TANZANIA. Pat, W8FV, will be returning to Mwanza and will be active as 5H9PD between October 2-30th. Activity will probably be on 40-10 meters, depending on propagation, mostly CW with maybe some PSK31. There may be some 80 meters. QSL via his home callsign.

5R, MADAGASCAR (5R8X and Low Bands). Jarmo, OH2BN, sent out the following press release on September 14th (edited): "The group of Martti/OH2BH, Pertti/OH2PM, Veijo/ OH6KN, Antti/OH7EA and Juha/ OH8NC will escape the Nordic ice and snow to provide you with a 5R8 on the low bands and a Zone 39 multiplier.
Their destination will be Antananarivo, the Republic of Madagascar, and the callsign 5R8X will hit the bands from October 26th-November 10th, including the CQWW DX SSB Contest (October 30-31st). OH2PM and OH6KN will dedicate their efforts to 160m and 80m.
This activity is primarily targeted to satisfy the global demands on the low bands. The team will be using a large field and a setup of vertical antennas on all low bands. WARC activity will also be provided.
The 5R8X team will be using lightweight K3 radios by Elecraft and appreciate their support and cooperation.
This operation will be conducted in cooperation with Ake, 5R8FU.
More details to follow shortly."

5V7, TOGO (Update). The Italian DXpedition team to Togo (that takes place between October 10-23th) announced some new QSL info this past week. For the upcoming operation, the Bureau service will now also be used. The Bureau QSL manager will be G6BMY. To manage QSLs via the Bureau, the Global QSL Service will be used through G6BMY. So, if you want to send your request of confirmation via the Bureau, send it to G6BMY. If you want to send your request of confirmation via direct, send it to I2YSB. They also announced that a OQRS (Online QSL Request System) will be used on their Web page to request direct QSLs without the need to send yours at: http://win.i2ysb.com/qsl_request/default.asp
Remember, the official forum of the DXpedition is now open at: http://www.hamradioweb.org/forums/forumdisplay.php?fR (registration needed to send message, not needed to read only).
For more info about the DXpedition, visit the official Web site at: http://www.i2ysb.com

6V, SENEGAL (Update). Enrico, IK2FIL, will be active as 6V7X from Le Calao during the last two weeks in September. Main activity will be for the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/All-Band entry. Operations will be on 80-10 meters. Outside of the contest, Enrico will be on 30 meters RTTY only after 2100z because he is on holiday. All QSOs will be confirmed automatically via the Bureau, LoTW and eQSL. Direct requests should be mailed to IK2FIL (QRZ.com). For more details/update and a log search, visit his Web page at: http://6v7x.jimdo.com

BX5, TAIWAN (AS-020). Jimmy, BX5AA, from Changhua City, Taiwan (WLOTA 0022), will be active during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA, direct (see QRZ.com). Visit his Web page at: http://blog.yam.com/bx5aa

CG3, CANADA (Special Event). Operators of the Canadian Coast Guard Station/VBA (VE3VBA) will activate the special callsign CG3MUG during the month of November. Activity is to celebrate the 100th anniversary of "Thunder Bay MCTS Centre (Canadian Coast Guard Radio Station)" located at the western end of Lake Superior. They plan to be active on VHF and HF bands using CW, SSB, PSK, RTTY and FM, as well as VoIP (CQ100) and perhaps other Digital modes. There will be several options for amateur radio stations and SWLers to obtain a special 100th anniversary CG3MUG QSL card (a certificate may also be designed). As it gets closer to the event, and they make the final preparations, they will update the CG3MUG listing on the QRZ.com.

CR3/CT9, MADEIRA ISLANDS. German operators Walter/DJ6QT, Peter/DJ6XV, Horst/DK1QH, Dieter/DK4QT, Hans/DL1YFF and Thomas /DL6LK will be active as CR3L during the CQWW DX RTTY Contest (September 25-26th) as a Multi-? entry. QSL via DJ6QT. Operators will probably be active as CT9/homecall before and after the contest.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
ZS8M • Prince Edward & Marion Island (Current operation)

If you've had cards rejected for this operation send an E-mail to dxcc@arrl.org for an update to your DXCC account. Please refer to your LoTW account or the live daily listings for confirmation that an update has been done.

DX MARATHON (Update). John, K9EL, DX Marathon Administrator, reported on September 17th: "Just a few months left to build your country count for the 2010 DX Marathon sponsored by CQ Magazine. In addition to the two plaques for the winner in each category, attractive certificates are awarded for the top score per country, top score per single mode submission, top score per single band submission and top low power (10 watts or less) score.
Certificate winners and their scores for the 2006 through 2009 Marathons are listed on the DX Marathon Web site at: http://www.dxmarathon.com
The DX Marathon Web site now includes helpful hints to avoid common errors and also includes a list of known pirate stations that will not likely count for the 2010 Marathon.
In addition, the DX Marathon score sheet is now available as a template on Google Docs which eliminates any need to have Excel or equivalent on your computer.
Updates for the DX Marathon due to the upcoming changes in the Nether-lands Antilles will be announced by CQ Magazine."

FREE BOOKS TO DOWNLOAD. Vlad, UA6JD, informs OPDX that he has FREE books to download about Web designing: "Bells and Whistles for HAM RADIO Web Design", "CLUB LOGO", "SCROLL BOX" "BACKGROUND" and "WWII MEMORIAL".
For more info on downloading these books (FREE), visit:
http://www.qrz.com/db/ua6jd#Download
To view samples on QRZ.com pages (which was established on the basis of these books), click on the callsign in the bottom part of the download page. Contact Vlad if you need any help with changing your page on QRZ.com.

HP, PANAMA. Rene, HP1DCP, will be active during the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/Low-Power entry. QSL via HP1DCP.

IOTA NEWS.....
AF-018. Tony, IK1QBT, will be active as IG9/IK1QBT from Pantelleria Island (IIA TP-001) between November 23-30th. Activity will also include the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (80m) entry and signing as IH9X. QSL via IK1QBT, by the Bureau or direct (see QRZ.com).

AF-019. Genny, IZ8TDP, will be active as IG9D from Lampedusa Island (IIA AG-001, MIA MI-126, WLOTA 2312) in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (??) entry. QSL via his home callsign, direct or by the Bureau.

EU-045. Members of the A.R.I. Sezione di Cinisello Balsamo (IQ2CJ) will be activating two islands from the IOTA group EU-045 as IB0/IZ2ACD between September 25th and October 2nd. Activity will be from Ponza Island (WAIP LT, IIA LT002) and Zannone Island (WAIP LT, IIA LT012). Operations will be on 80/40/20/ 17/15/10 meters. QSL via IZ2ACD direct (QRZ.com).

NA-066. Tom, AB6Z, will be active from San Clemente Island (USI CA008S, WLOTA 2332, Los Angeles County, CA) between October 1-30th. Activity will be limited due to his work schedule, but look for him on 40/20 meters using mainly CW (with some SSB). He will operate with only 100 watts and a vertical antenna. QSL via K5OAZ (w/SASE/SAE). Logs will be uploaded to LoTW and eQSL.

OC-261. Andy, VK5MAV, will be active as VK5MAV/5 or possibly a special callsign or prefix from Flinders Island between September 21-27th. Activity will be on 40/20/15/10 meters mainly using CW. QSL via his home callsign, direct or by the Bureau.

J2, DJIBOUTI. Freddy, F5IRO, who has been active as J28RO since July, is planning to be active in both the CQWW DX SSB Contest (October 30-31st) and CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry. He is expected to stay here for about another 22 months. His normal activity will be on the HF bands using CW, SSB and the Digital modes. His QSL Manager is F8DFP. QSL direct (w/SAE + valid IRC PLEASE NO MONEY AT ALL), or by the French REF-Union Bureau. The direct cards without the above mentioned will be answered by the Bureau. For updates and more info, visit his Blog at: http://j28ro.blogspot.com

KH2, GUAM. Dave, N2NL, will be active as KH2/N2NL from Barrigada on the Island of Guam (IOTA OC-026, USI GU003S, WLOTA 0064) during the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or W2YC (QRZ.com).

KH6BZF PROPAGATION FORECAST/REPORT (For September 20-26th)....
Sept 20 HN-AN SOLAR REFERENCE KEYS
Sept 21 LN-HN --------------------
Sept 22 HN BN - Below Normal
Sept 23 AN AN - Above Normal/Geomagnetic Level is QUIET
Sept 24 AN LN - Low Normal
Sept 25 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sept 26 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Philippe/LX2A and a team of operators will be active as LX7I during the CQWW DX RTTY Contest (September 25-26th) as a Multi-2 entry. Operators mentioned are: Willi/DF8QB, Frank/DL4VCG, Andy/LX1DA, Philippe/LX2A and possibly more. QSL via LX2A. Visit the LX2A Web page at: http://www.lx2a.com

OH0, ALAND ISLANDS. Members of the Storstockholms Radioamat rer Club (SK0ZA) will be active as OH0/SK0ZA from Aland Island (EU-002) between September 24-26th. Activity will be on all bands and modes. Visit their

We page at: http://www.sk0za.se

P4, ARUBA. John, W2GD, will be active as P40W from Santa Cruz, Aruba (SA-036, WLOTA 0033), during the CQWW DX SSB Contest (October 30-31st). Entry category is undecided at this time. QSL via LoTW or N2MM (QRZ.com).

PJ5 & PJ7, NETHERLANDS ANTILLES (Update). With the strong possibility of two new DXCC entities to be created on October 10th, Will, AA4NC, plans to activate St. Eustatius (NA-145) between October 9-15th, as PJ5/AA4NC, followed by Sint Maarten (NA-105) between October 15-18th, as PJ7/AA4NC. Activity will be a portable operation with low power on 40-10 meters using CW, SSB, RTTY and PSK31. QSL via LoTW, and by the Bureau or direct to AA4NC.

QSLS VIA LoTW: 3D20CR, 4O3A, 6W2SC, 9A2IH, 9K2MU, 9A5ZM, BH4QAK, CN8KD, D4C, DL1XX, E74A, E75MC, EA3GHZ, EA7AJR, EB5CS, EF1A, EI3GC, EM5HQ, FW5RE, G3TXF, GR2HQ, HB9TQL, J39BS, J5UAP, JA1BOQ, KH2L, KH0/KT3Q, LY2IJ, MD0CCE, NP2KW, OE3GCU, OH0X, OK1CF, OK1HRA, OQ5M, OZ2TF, P33W, PY2DEL, RV6LO, SO9Q, SP1F, SV2BFN, UR4EWT, UZ0U, VK7ZE, VP9/W4OV, WP4WW and YL5T

QSLS RECEIVED VIA MAIL: 3C9B, 3C0C, 4S7ULG, 5R8GZ, 8P3A, C6AMS, FR5ZL, GJ6YB, J6/W0SA, JD1BMH, JD1BMM, JT1FDB/7, K7BX/p, RW2F, T30XG, T32CI, T32MI, T32SI, T32VI, TL0A, TR8CA, UN7QX, V44KP, V51AS, YI9PSE, ZS8M, ZV8S, ZX8C and ZX8W

QSLS RECEIVED VIA THE BUREAU: None reported this week!

R1, ANTARCTICA. Mike, RW1AI (ex-UA1AFM), currently active as R1ANP from the Progress Antarctic station, is planning to activate the Chinese's Zhongshan Antarctic Base for the first time ever. Look for him to be active as R1ANP/A from Zhongshan station in October and November. He will be using 100 watts into vertical antenna. If you would like to see pictures of the base, visit the French Polar Team's Web site at:

http://www.french-polar-team.fr/BY_Chinese_Stations_Antarctica.php

ST, SUDAN. Robert, S53R/ST2AR, will be active in next weekend's CQWW DX RTTY Contest (September 25-26th) as a Single-Op/All-Band/Lower-Power entry. QSL direct to his home callsign.

T30, WEST KIRIBATI. Operators Jacek/SP5EAQ and Jacek/SP5DRH will once again head to the Pacific next year, but this time to activate Tarawa Island (OC-017) as T30AQ and T30RH, respectively, between March 1-17th (2011). Activity will be on all bands 160-10 meters using CW, SSB and RTTY. Jacek, SP5DRH, will focus mainly on 160 meters and 30 meters RTTY, with some 80 meters. Jacek, SP5EAQ, is a SSB operator and will operate on the remaining bands. They will have two separate stations using Elecraft K3/100 with 600w amps. Antennas are: 18m high Spiderbeam poles (few 9m long poles) and a GP5 antenna by SP7GXP. They will try to operate at the same time. Rys, SP5EWY, will be their pilot station for this operation. QSL via their home callsigns. For more details and update, visit their Web site at: http://www.sp5drh.com/t30

T7, SAN MARINO. Members of "Tifariti Gang" will be active as T70A in the CQWW DX RTTY Contest (September 25-26th) and the CQWW DX SSB Contest using the contest station of the "Amateurs Radio Republic of San Marino" (ARRSM). Operators mentioned are:
CQWW DX RTTY - Antonio/EA5RM (Team Leader), Juan/EA1CJ, Alberto/EA1SA, Agustin/EA1KY, Javier/EA2ABI, Roberto/EA2RY, Manolo/EA7AJR and Francisco/EA7HHV.

CQWW DX SSB - Antonio/EA5RM (Team Leader), Flo/F5CWU, Fabrizio/IN3ZNR, Giorgio/IZ4AKS, Mike/UA9KGH, Valery/UT7CR and Dimitri/UY7CW.
QSL T70A via A.R.R.S.M. Radio Club, P.O.BOX 77, 47890 Rep. San Marino, SAN MARINO. For more info, see: http://www.dxfriends.com

VC1, CANADA (Special Event). Members of the Westcumb ARC in Amherst, NS, will activate the special event callsign VC1J on October 24th. Activity is to celebrate the 65th anniversary of the United Nations (UN) and the United Nations Educational, Scientific and Cultural Organization (UNESCO). Operations will be from the "Joggins Fossil Cliffs" which became a UNESCO site last year. Look for them on many different modes. A special event QSL card will be available. Listen for QSL instructions.

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via VE3DZ, direct or by the Bureau.

VP5, TURKS & CAICOS ISLANDS. Peppe, I8UZA, informs OPDX that he will be active as VP5/I8UZA from Turks and Caicos Islands (NA-002, WLOTA 1476) almost all of October and November. Activity will be on all bands (except 30/17/12m) using mostly SSB and possibly RTTY. He will also be active as VP5I during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (15m) entry. He will be using a K3 radio with an AL 1500

amp into the following antennas: 3 element 153BA yagi (20m ASL), 2L vertical right on the beach and maybe 2L Quad. QSL both callsigns via his home callsign.

VP8/O, SOUTH ORKNEY ISLANDS (Update). Members of the "Micro-lite Penguins DXpedition Team" are expected to be active from here next year between January 27th and February 8th, 2011. Two new members have been added to the VP8ORK team: Steve/K6AW and Nodir/EY8MM. For details about the South Orkney Islands, bios on all the operators and possible updates, visit the DXpedition's Web page at: http://www.vp8o.com

VY0, CANADA. Steve, N3SL, informs OPDX that "The Bret Favre of ham radio is back! (I knew he wasn't serious....)." Jay "J", VY1JA, has obtained permission (from the Canadian Forces CFS Alert) to set up a station at his work assignment in the Nunavut territory and will be active as VY0JA between October 6th and November 9th. He will be taking a FT-990 and wire antennas, and activity will be barefoot on CW (preferred) and perhaps some RTTY and SSB. "J" has updated his QRZ.com page to indicate the new QTH, which is the northernmost permanently inhabited site on Earth. Also, look for him to be in the California QSO Party (October 2-3th) as VY1JA to test the equipment before he leaves for Nunavut. He says that once this VY0 operation is over, he'll be "back into retirement" vis-a-vis ham radio. "(Go Bret!)" QSL both callsign via N3SL (JA ONLY to JA3JM).

WP3, PUERTO RICO. Operators Al/WP3C, Rafael/KP4WW, Jim/WP3A and James/ KP2BH will be active as WP3C during the CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry. QSL via W3HNK.

XW1, LAOS. Bruce, XW1B, from Vientiane, will be active during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Lower-Power entry. QSL via E21EIC, direct or by the Bureau.

ZF, CAYMAN ISLANDS (NA-016). Robert, K5PI, will possibly be active as ZF2PI from the Little Cayman Island as early as November 18th, but more likely from Grand Cayman Island (WLOTA LH-1042) between November 23-26th. His activity will also include the CQWW DX CW Contest (November 27-28th) as an operator with the ZF1A contest team. Robert mentions, "ZF now has 60m privileges, effective March of this year. I am happy to operate 60m if anyone needs ZF." QSL ZF2PI via LoTW or K5PI. QSL ZF1A via LoTW, and by the Bureau or direct to K6AM.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 19th September 2010

WAI Activity Day

IRTS are going to relaunch the Worked All Ireland Award with an Activity Day on Sunday 26th September. IRTS want to encourage operators with mobile and portable facilities to activate squares and everybody is asked to work out their WAI square to boost activity.

The W.A.I. awards are open to all amateurs and short wave listeners throughout, the world, who wish to participate. Membership of any specific organisation is not pre-requisite.

The aim of the awards scheme is to expand the geographical knowledge of Ireland and its offshoreislands.

1) To encourage activity in general and promote mobile and portable expedition activity on both LF and VHF bands.

2) To encourage amateurs and Shortwave Listeners to improve their operating skills by participating in or running nets.

The worked all Ireland awards were inspired by the WAB awards scheme devised by the late John Morris G3ABG and are based on extensive work carried out by David Jones GI3KVD and the late Paddy McGill GM3MTH.

Tom Rea, EI2GP, and Steve Wright, EI5DD, took the original work, checked the areas, made additions and compiled the book to its present day format which is now printed and distributed by the IRTS.

The Galway VHF Group sponsors the Certificates and manages the awards.

Stations calling into the radio news on the 26th are encouraged to give their WAI square as well asthe report.

More details on the Worked All Ireland program is available in the current issue of Echo Ireland

---

DAR Theory Classes & Live Morse Tuition

Anyone interested in attending Theory Classes at Dundalk Amateur Radio Society Please contact Tony EI4DIB at ei4dib /at/ ei7dar.com or via text to 086 4066660

DAR has also begun live Morse tuition on Tuesday nights commencing at 20:40. The first class was this past Tuesday 14th September on 145.400 FM. DAR have decided to use this frequency as it is used by a lot of Hams and SWL's locally in the North East. If the idea is a success we may eventually QSY to the Dundalk 2m repeater, giving National and International coverage with the Repeater linked for live streaming on the Internet.

The idea is to send some Morse at a slow and easy pace with good gaps between words. It is hoped to help those of you who are just starting out and those that want to sharpen up. So please tune in to 145.400 with pen and paper at the ready.

More info is available on the DAR website at www.ei7dar.com

Amateur Radio Licence Study Group

Michael EI2GKB is starting a study group in the Naas Newbridge and Kildare area, for further details Michael can be contacted by mobile on 087 2481970 or via email miklef /at/ oceanfree.net

---

SEARG

South Eastern Amateur Radio Group will be on air from the promenade in Tramore on Saturday the 25th of September from 12:30 to 17:30. The event is the Tramore Surf and Sea Festival. As operations will be to publicise to hobby, we would appreciate if operators could keep a listen out for us on both the SERN repeater network and around the 80m WAI frequency.

APRS email List

John EI7IG hosts an email list any experimenters interested in APRS. This is a low-volume list for further details please Contact, John Ronan, EI7IG 086 8167310 for more information.

30m Multi Mode Weekend

The weekend of the 25 / 265h of September is the annual 30m Multi Mode Weekend. This weekend give Amateurs and SWL's alike the chance to participate in Activity on the 30m band.

This weekend is a good opportunity for those that have Multimode software to use and Experiment some of the less used modes. Please bear in mind the 30m Region 1 band plan and also if calling CQ on a exotic or less heard mode during regular operation to be patient and call a number of times using the chosen mode as it may take some time for operators to actually find and decode the mode you have chosen to use.

Please also note this is not a contest, however most stations active on Digi modes particularly on 30m will be a member of the 30 Meter Digital

Group, membership to this group is free. A membership certificate is issued once an application has been processed, which can be printed. Each member of the Group receives a membership number on their certificate, these numbers usually get exchanged in QSO's with Signal Reports and can be used for various Group issued awards and certificates etc.

Please note this is not a contest Weekend the 30m band is Contest Free.

More details on this Multi Mode weekend and membership of the 30 Meter Digital Group please check out the groups website at www.30mdg.net

---

IOTA activation EU-123

For the week starting 18th September, members of Sands Contest Group and Workington Radio Club along with Brendon Minish, EI6IZ will be visiting the Isle of Arran off the coast of south western Scotland, operating under the callsign MS0SCG.

They plan to operate on VHF, HF, SSB, CW and data modes. The location is IOTA island number EU123 and SCOTIA island number CS14.

For more information and an up to date blog on the event, Please checkout the group's website http://www.m0scg.org.uk

HH2JR receives Golden Antenna Award

Jean-Robert Gaillard, HH2JR, has been presented with the Golden Antenna award for his work in the aftermath of the Haiti earthquake.

He was presented with his award by the Deputy Mayor of Bad Bentheim, for his efforts as the "voice of Haiti".. When in January 2010 an earthquake destroyed large parts of his homeland Haiti and claimed many lives HH2JR used his amateur radio station to tell the world about the disaster. He was assisted by two U.S. Hams, Fred, W3ZU, Florida, and Rick, WA1RTK, in NewHampshire.

The town of Bad Bentheim in Germany makes an award every year to the amateur or amateur group who has made exceptional effort following accidents or naturaldisasters.

HH2JR was interviewed via video earlier this year by Brendan Nutley EI1429 This video interview is stored on the video link on the DAR website which can be found at www.ei7dar.com

---

Rallies Today Sunday 19th September is the North Cork Radio Group's First Annual Rally and Electronics Fair. The venue is the Blarney Golf Resort, Tower, Co. Cork

Doors open at 11:30 a.m. The Rally Organiser is Liam, EI7GTB

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1918 First direct radio message, UK to Aust. received by E Fisk, Sydney.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXNL 1693 - Sep 15, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

A7 - QATAR
Jamal Rayyan is the first OM to get a reciprocal license in Qatar. He is the anchorman of the Arabic news network Al Jazeera. Jamal is active as A71/JY5FX in SSB mainly on 15m, 17m and 20m using an IC-7800, a 3ele SteppIr antenna or an Icom-7000 when mobile. His QSL route is:
Jamal Rayyan, Alfardan Garden, Al Hilal, Doha 23123, Qatar.
He announced his amateur radio callsign on the TV network and the video can be found at: http://www.youtube.com/watch?v=fdG4cTmBTiE

GJ - JERSEY, EU-013
Craig,MJ/K3PLV, is staying on Jersey (EU-013) from Sep 14-22. He is working in CW/SSB/RTTY on 160m-10m. QSL via homecall, direct or bureau.

JW - SVALBARD, EU-026
Lars,SM4TUV, is QRV as JW8XSA mostly in PSK31 on 30m from Sep 14-22. Lars is working for the Norwegian polar institute. QSLs via homecall. After this stay he will move on to Antarctica. More information about this will be published in the DXNL later.

JY - JORDAN
Members of the "Royal Jordanian Radio Amateurs Society" (RJRAS) are activating the special event station JY7P from Sep 17-19. The "P" in the suffix stands for Petra, the rose-red city, which was the capital of the Nabataeans. Petra is a UNESCO World Heritage Site since Dec 6, 1985. More information can be found at: http://www.jy7p.com
QSL cards via RJRAS, The Royal Jordanian Radio Amateurs Society, PO Box 2353, Amman 11181, Jordan.

OX - GREENLAND, NA-018
An international YL team grouped to make a DXpedition to Greenland. The team members are Inger,OZ7AGR, Evelyne,F5RPB, Ruth,IT9ESZ, Unni,LA6RHA, Ingrid,LA8FOA, and Waltraud,DJ6US. They will work in SSB and CW on all HF bands signing OX6YL from Kangerlussuaq (NA-018) from Sep 16-20.

QSL via bureau or direct to OZ7AGR.
More information online: http://home.online.no/~la6rha/greenland.htm

T8 - PALAU, OC-009
Takio,JH3QFL, and Haruki,JH3KEA, will be active from Palau (OC-009)
signing T88TB and T88KH in CW, SSB and RTTY on 80m-6m from Sep 19-22.
QSLs for T88TB via JH3QFL, QSLs for T88KH via JH3KEA.

TA - TURKEY
Karl,TA0/WA2KBZ, is working from Buyukada Island (no IOTA) until the
end of September. QSL via homecall.

TF - ICELAND, EU-021
Rene,TF/DL2JRMU/p, and Netti,TF/DO6XX/p, are active in CW on 80m-10m
from Iceland (EU-021, WLOTA LH 2975) from Sep 18-23.
QSLs via bureau or direct to their homecalls.
See also: http://www.qsl.net/dl2jrm

ZL7 - CHATHAM ISLANDS, OC-038
Kaz,JH1HRJ/ZL3JP, plans to activate the Chatham Islands (OC-038) from
Sep 17-21. He will work as ZL7J in CW, SSB and maybe also RTTY on all
bands (including WARC). QSLs via JARL bureau or direct to his homecall.

ZL8 - KERMADEC ISLANDS, OC-039
Since the last press release a few things have changed concerning the
ZL8X DXpedition. Chris,DL1MGB, writes that the sea freight is ready
for shipping. Due to other commitments Joerg,DL8WPX, and Markus,DJ7EO,
had to cancel their plans. A new operator is YL Vicky,SV2KBS. The
current list of operators include DJ5IW, DJ9RR, DK1II, DL1MGB, DL3DXX,
DL5CW, DL5LYM, DL5XL, DL6FBL, DL8LAS, DL8OH, SP5XVY and SV2KBS. The
latest press release can be found at:
http://www.kermadec.de/news/news_archives/index.php?task=shownews&id=16

5B - CYPRUS, AS-004
Corny,5B4/DF6FR, is staying on Cyprus (AS-004) from Sep 16-30. He works
mainly in CW on 20-10m running 100 watts into a vertical. Since this is
a computer-free holiday no sekds can be arranged via e-mail. More info
on QRZ.com. QSLs also via bureau to DF6FR.

6W - SENEGAL
During the last two weeks of September Enrico,IK2FIL, plans to work as
6V7X only in RTTY on 10m-80m. He will also join the CQWW RTTY Contest
as single OP/allband. Enrico said: "Save the money of your direct QSLs
and invest it in better antennas!" He will upload the QSOs every day to
the LoTW and eQSL. All remaining QSOs will be confirmed via bureau
automatically by the end of this year.
Online logs are available at: http://www.clublog.org/charts/?c=6v7x
and his homepage is: http://6v7x.jimdo.com

8Q - MALEDIVES, AS-013
Seiji,JK1KSB, is active in SSB, RTTY and PSK31 on 80m-10m signing 8Q7SO
from the Mirihi Island Resort (AS-013) from Sep 16-26. QSL via JK1KSB.

Steve,M0XVT, activates Komandoo Island (AS-013) in the Lhaviyani atoll
from Sep 11-18. Steve works as 8Q7SB mostly on 17m and 20m using his
FT-817 and a Yo-Yo antenna. QSL via bureau or direct to his homecall.

WFF OPERATION: Members of the "Algarve STAR DX Team" are activating the
nature reserve "St. Andre e Sancha" (DPRN & WFF CTFF-19) on Sep 19.
The OPs Luis,CT1CQK, Toze,CT1GFK, Al,CT1GPQ, and Mike,CT1IUA, are QRV
as CR6A working in CW and SSB on 40m-15m. QSL via CT1GFK.
Find more information at: http://algarvedx.com

SILENT KEYS: Following DXers passed away during the last week:
Manel Dotu Pascual (EA3EJA, president of the Association of Disabled
Blind Radioamateurs of Catalonia, ARMIC), Peter Hale (G4OAD),
Edward Rose (HS0ZAN), Silvano Stefan (I3OKZ), Irmeli Virtanen (OH3TJ),
Gianfranco Dell'Antonia (IN3DYG), Ladislav "Laco" Satmary (OM8AM),
Mikhail Y. Egorov (RK3DP), Mikhail Y. Filippov (UA0MF),
David Bishop (VE7PO) and Harold "Bob" Hall (W8QHG).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The 3rd Asia Pacific DX Convention (APDXC) will be held in the Osaka
International House in Osaka/Japan on Nov 5-7. When you want to join
this event and need more info visit their website: http://www.apdxc.org
---
"Highway to Hell" by AC/DC is known by everyone but "Highway to a
DX Party" maybe not. This is a major event by several radio clubs along
the famous "Route 66" taking place from Sep 11-19. Find more info at:
http://www.w6jbt.org/Route66OTAEvent/Index.htm

UPCOMING CONTESTS

Sep 18/19: Scandinavian Activity Contest, CW
Sep 19: QCWA QSO Party
Sep 19: North American Sprint, SSB

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-097, 7X, Mediterranean Sea Coast West: A group of Algerian HAMs is QRV as
7V2PI from Pisan Island from Sep 16-20. QSL via EA5FL (direct/bureau).

EU-008, GM/MM, Inner Hebrides: Members of the "Middlesex DX Group" are
active as GB2MUL from Mull Island from Sep 18-24. QSL via 2W0VAG.

EU-123, GM/MM, Scottish Coastal Island: Members of the "Sands Contest Group"
and the "Workington Radio Club" are signing MS0SCG from Arran Island
from Sep 18-25.

EU-125, OZ, Jylland West Group: Reiner,OZ/DK4VY/p, is working from the
island Fanoe (DIA NS-002) from Sep 12-17. QSL via homecall.

NA-092, TX, State West Group: Buzz,NI5DX, and Al,WD5IQR, are singing NI5DX/p
from Mustang Island (USI TX-011S) from Sep 17-19. QSL via NI5DX.

OC-171, VK4, QLD State South Group: Akira,JA1NLX/VK4, plans to activate
Dunk Island from Sep 17-24. QSL via homecall.

Lighthouse activities (WLOTA/ARLHS/ILLW)

The Netherland Antilles reform their status:

As of 10 October 2010, the Dutch Antilles will cease to exist as a country.
Curacao and St Maarten will become separate countries within the Kingdom of
the Netherlands, while Bonaire, Saba and St Eustatius will become special
Dutch municipalities. Aruba already had a separate status. The ceremony was
attended by Prince Willem-Alexander and Deputy Kingdom Relations Minister
Ank Bijleveld and caretaker Prime Minister Jan Peter Balkenende.
The prime minister called the declaration "a new chapter". The intensive
process which has taken five years is supposed to give the larger islands
more autonomy. See the original article online at:
http://www.rnw.nl/english/bulletin/dutch-antilles-sign-declaration-reforming-their-status

What does this means for us DXers?
Since it's official now the DXCC Desk may release an announcement concerning
the future DXCC status of the islands after Oct 10. To be added as a new
"political entity" one of these criterias has meet one of these criteria:
a) The entity is a UN member state.
b) The entity has been assigned a callsign prefix block by the ITU.
c) The entity must be listed on either the US Department of State's list of
"Dependencies and Areas of Special Sovereignty" or the United Nations
list of "Non-Self-Governing Territories."
However, it is clear that several DXpeditions will be on the air from all
islands until Oct 10. All operations will be announced later here.

Many thanks for contributing to this issue of the DXNL are going to:

Amateur Radio Newsline(tm) Report 1727 - September 17 2010

Amateur Radio Newsline report number 1727 with a release date of
Friday, September 17 2010 to follow in 5-4-3-2-1.

The following is a QST. A new European solar observation system can
warn of solar storms, Canadian hams forced to share spectrum with a
cycling event, the ARRL asks the FCC to clarify where ham radio stands
on 2 point 3 Ghz and the Fall VHF and UHF Sprints are here. Find out
the details on Amateur Radio Newsline(tm) report number 1727 coming
your way right now.

(Billboard Cart Here)

**

PROPAGATION SCIENCE: NEW EUROPEAN SYSTEM GIVES WARNING OF SOLAR STORMS

Researchers at the University of Bradford located in the United Kingdom
say that a new method of predicting solar storms that could help to
avoid widespread power and communications blackouts has been launched.
Amateur Radio Newslines Norm Seeley, KI7UP, is here with more:

--

Up to now, solar weather prediction has been done manually with experts
looking at 2 dimensional satellite images of the sun and assessing the
likelihood of future activity. But a team from the university's Centre
for Visual Computing has created the first online automated prediction
system using 3D images generated from the Solar and Heliospheric
Observatory or SOHO satellite.

Already in use by both NASA and the European Space Agency, the Bradford
Automated Solar Activity Prediction system also known by the acronym
ASAP identifies and classifies sun spots and then feeds this
information through a model which can predict the likelihood of solar
flares. The system is able to accurately predict a solar flare six
hours in advance and the team is working to achieve a similar accuracy
for the prediction of major solar eruptions in the near future.

Solar storms involve the release of huge amounts of hot gas and
magnetic forces from the surface of the sun into space at around a
million miles an hour. The next major solar storms are expected in
2012-13 as part of the sun's 11-year weather cycle. A 2008 US National
Academy of Sciences report estimated that modern reliance on
electronics and satellite communications means a major storm could

cause twenty times more economic damage than Hurricane Katrina.

Although major solar eruptions and coronal mass ejections normally take several days to reach the Earth, the largest recorded in 1859 took only eighteen hours. Solar flares which can also cause significant disruption to communications systems take just a few minutes. Because of this, advance warning is of vital importance to enable steps to be taken to avoid the worst effects of such solar activity.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale Arizona, reporting for the Amateur Radio Newsline.

--

Data recovered from the system is on-line at the European Spaceweather website at tinyurl.com/2ud62yo (University of Bradford, ESA, Science OnLine)

**

RADIO LAW: CANADIAN HAMS FORCED TO SHARE SPECTRUM WITH CYCLING EVENT

Hams in two Canadian cities were recently forced to temporarily share their VHF and UHF frequencies for a pair of sporting events. On September 10th, telecommunications regulator Industry Canada advised both Radio Amateurs of Canada and Radio Amateurs du Quebec that their Montreal office had authorized a number of 430 to 450 MHz frequencies and a single VHF frequency of 145.555 MHz for non-ham radio use.

According to Industry Canada these frequencies in the 70 cm and 2 meter amateur bands were authorized to support communications for many European entrants of a now concluded cycling event held on September 10th and 12th in Quebec City and Montreal. Industry Canada says that the frequencies were chosen to avoid known amateur repeater channels.

In a statement after the announcement, Radio Amateurs of Canada said that this type of authorized intrusion by Industry Canada of non-amateur communications in amateur spectrum is highly unusual and is a matter of great concern to the national society. Radio Amateurs of Canada says that it will be taking the matter up with Industry Canada officials. It is also interested in knowing if actual interference had been caused to amateur radio communications by these non amateur events. (Various)

ENFORCEMENT: BEIJING CRACKS DOWN ON UNLICENSED BROADCASTERS

The Chinese government backed English-language daily the Global Times reports on a crackdown on users of unlicensed radio transmitters in that nation.

According to the article, It appears that users of radio transmitters with a power output of half a watt or more will have to register. In

the case of commercial users registration is with the Beijing Radio Administration Bureau. For those described as non-commercial users with registration will be with the Beijing Wireless Sports Association. For the latter group the registration procedure will involve taking and passing an amateur radio test.

The article, incorrectly titled "Bureau Cracks Down on Radio Hams," labels both commercial and hobby users as radio amateurs. It is also suspected that the writer got the name of the association wrong and was likely referring to the Chinese Radio Sports Association as the registration point for non commercial broadcasters. You can read it for yourself at tinyurl.com/37hkzve (Southgate)

**

RADIO LAW: ARRL ASKS FCC TO CLARIFY 2.3 GHZ IMPACT SHARING ON HAM RADIO

Back in the USA, the ARRL has filed a Petition for Clarification or Partial Reconsideration asking the FCC to clarify, or partially reconsider a single aspect of its Report and Order in WT Docket No 07-293. This involving possible impact on the Amateur Radio Service by a result of the partial implementation of the agency's National Broadband Plan.

In it, the FCC adopted amendments to the rules for Wireless Communications Services in the 2.3 GHz band. The amendments will permit mobile broadband services, in addition to fixed services, in the bands 2305-2317.5 and 2347.5-2360 MHz.

Specifically, the ARRL requested that the Commission affirm that Section 2.102(f) of the its rules applies to Wireless Communications Service fixed and mobile operations, so that harmful interference that is caused to Amateur Radio Service operations in the 2300-2305 MHz band is to be remedied by Wireless Communications Service licensees. Also that the current out-of-band emission limits for the Wireless Communications Service devices in Section 27.53(a)(3) of the Commission's rules continue to apply to mobile, portable and fixed facilities across the entirety of the 2300-2305 MHz band following the rule changes implemented in this regulatory change. (ARRL)

**
RADIO POLITICS: IRESC SUSPENDS OPERATION TO RESTRUCTURE The International Radio Emergency Support Coalition has halted all operations. According to a posting on its website, the reason for the suspension is to undertake a fundamental restructuring. The unsigned announcement continued by saying membership at all levels was being immediately cancelled, but the organization claims that it will return to normal operations once its restructuring is complete. You will remember our report last week that South Africa's Hamnet amateur radio emergency response organization had severed all links with the International Radio Emergency Support Coalition. This, over a

difference of opinion in how the IRESC should function. The full text of the coalition to restructure is on line at www.iresc.org. (IRESC)

RADIO LAW: NY STATE HAM WINS FOR HAM RADIO IN TROY CITY COURT A New York State ham ticketed under the states driving while using a cellphone law has won his case in court. This, after a judge affirms that ham radio gear is not hone the same as a mobile phone. We have more in this report:
--
Back on May 30th Steve Bozak, WB2IQU, of Clifton Park, New York, was operating his station while mobile when an officer in Troy New York pulled him over and cited him under the states cellular phone ban while driving law. Bozak, whose mobile was a hand held transceiver protested. Rather than paying the $100 fine he decided to take the matter to court. When he initially lost in Traffic Court he appealed the matter to the Troy City Court. It was there on September 8th that judge Matthew Turner found in Bozak's favor and dismissed the charge. In rendering his decision the judge found that the Vehicle and Traffic Law defines a Mobile Telephone as a device used by subscribers and other users of wireless telephone service to access such services. Also that a Wireless Telephone Service is defined as two-way real time voice telecommunications service that is interconnected to a public switched telephone network and is provided by a commercial mobile radio service. The judge then continued by noting that a review of 47 C.F.R.20.3 reveals that Citizens Band Radio Service and by inference Amateur Radio as well is defined as a private mobile radio service not commercial mobile radio service. Therefore, the court found that the use of an amateur radio device does not fit the definition of a mobile telephone as defined under the Vehicle and Traffic Law and granted Bozak's motion to dismiss. For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
--
At airtime, it is not known if the city of Troy will appeal the judges decision in Bozak's favor or will simply let the matter drop. And while there have been several attempts at getting the law changed to specifically exclude radio amateurs operating mobile, to date there has been no interest on the part of the legislature to do so. This means that any amateur cited under it has to challenge it as Seve Bozak did or simply pay the fine. (KS4BZ, others)
**
RADIO LAW: NEW CANADIAN DISTRACTED DRIVING LAW EXEMPTS HAM HT'S UNTIL 2013 Hams in Canada have are living under a time-limited exemption to a

distracted driver law. Under Ontario Regulation 366/09, that took effect last September 29th, drivers who hold a valid radio operator certificate issued under the Radiocommunication Act of Canada may drive a motor vehicle on a Canadian highway while holding or using a hand held two-way radio such as an H-T. Unfortunately, this exemption will be revoked on January 1st, 2013. However, there seems to be a way to continue to use an HT as a mobile radio after that date. Another section of the law deals with remote control of cell phones and other two-way devices. It says that a person may drive a motor vehicle on a Canadian highway while pressing a button on a device that is worn on his or her head or hung over or placed inside his or her ear or is attached to his or her clothing and is linked to a hand-held wireless communication device. This, in order to make, answer or end a cell phone call or to transmit or receive voice communication on a two-way radio, a hand microphone or portable radio. But those who use two-way radios that are permanently mounted and have push to talk microphones fare better. According to the language of the law, a person may drive a motor vehicle on a highway while pressing a button on a hand-held wireless communication device to make, answer or end a cell phone call or to transmit or receive voice communication on a two-way radio. But only if the device is placed securely in or mounted to the motor vehicle so that it does not move while the vehicle is in motion and the driver can see it at a quick glance and easily reach it without adjusting his or her driving position. (IC, QRZ.com)
**
RESCUE RADIO: ESA DEVELOPS EMCOMM SATELLITE GUIDED MICROPLANE

An unmanned rescue radio aircraft system guided by computer has been developed within the European Space Agency's Business Incubation Centre. This, to provide rapid monitoring of land areas and disaster zones.

A German start-up company called MAVinci developed the new system with European Space Agency that uses autonomous micro-air vehicles or MAV's with a wingspan of less than two meters to inspect land areas.

MAVinci is hosted by ESA's Technology Transfer Programme Office in Darmstadt, Germany. That's where ESA engineers provided expertise on attitude-determination algorithms and exploiting satellite navigation data to guide the aircraft by radio. ESA's optical lab in the Netherlands also helps MAVinci with the calibration of their optical camera.

The micro aircraft's autopilot controls the plane from takeoff to landing, and uses while using satellite navigation to follow a planned track, triggering the camera to image the target area. From the ground, the plane is followed by radio by a safety pilot who can take over the controls at anytime.

The MAVinci aircraft have already helped Spanish farmers in Andalusia fight land erosion. They will also likely become another tool in assessing damage caused by floods, landslides, hurricanes along with

other natural and man caused disasters. (ScienceDaily)

RESCUE RADIO: HAM RADIO HELPS BRING SIERRA MADRE CA EMCOMM STATION ON THE AIR Officials of Sierra Madre, California have launched the city's first-ever emergency radio station. Broadcasting on 1630 kHz in the AM broadcast band, the station is designed to issue alerts and other vital communications during floods, fires, quakes and other emergencies. The project was spearheaded by Hank Landsberg, WB6MEU. Landsberg, who was the winner of the city's 2010 Public Safety Award, helped cut the ribbon at the new radio station inside City Hall. Landsberg tells Newsline that it was a project that he enjoyed contributing to:
--
WB6MEU: "You can use TIS (Travlers Information Stations) for either traveler's information, community information, public service announcements as well as emergency information. So I pursued it a bit and we got the license from the FCC in October 2009 and then the city gave us the go-ahead to design and build the station which is what I did."
--
Landsberg says that in addition to the radio station that Sierra Madre also is bringing back its famous warning horn. Three blasts from the horn will notify residents to tune into 1630 kHz for up-to-date emergency information. In all, Sierra Madre spent about $24,000 to help create the station, with residents and local businesses contributing another $13,000 to make the project a reality. A complete interview with Hank Landsberg, WB6MEU, about the new station can be heard on this weeks Rain Report. Its on-line now at www.therainreport.com. (ARNewsline, Pasadena Star News)

NAMES IN THE NEWS: HH2JR HONORED WITH BAD BENTHEIM GOLDEN ANTENNA AWARD Some names n the news. The town of Bad Bentheim in Germany has been presented Jean-Robert Gaillard, HH2JR, with the Golden Antenna award. This in recognition of his work in the aftermath of the Haiti earthquake. He was presented with his award by Christel Somberg who is the Deputy Mayor of Bad Bentheim. In making the presentation Somberg noted that HH2JR became the voice of Haiti in the aftermath of last January's earthquake that destroyed large parts of his homeland and claimed many lives. That's when HH2JR used his amateur radio station to tell the world about the disaster. He was assisted by two U.S. hams identified as W3ZU, of Inverness, Florida, and WA1RTK, in New Hampshire. The town of Bad Bentheim in Germany makes an award every year to the amateur or amateur group who has made exceptional effort following accidents or natural disasters. (Southgate, DARC)
**
NAMES IN THE NEWS: K6P ON THE AIR FOR NATIONAL POW MIA RECOGNITION DAY

Mark McMullin, KM6HB, will operate as special event station K6P for the 6th straight year to commemorate National POW-MIA Recognition Day. Listen out for Mark between September 17th and the 19th on 3.785, 7.250, 14.253 and 18.150 Mhz plus or minus an Q-R-M. The commemorative QSL for this operation will be a 2 part picture card. If you work him, send yours to KM6HB, Mark McMullen, P.O. Box 27271,Santa Ana, California 92799,in the USA.

THE CHANGING OF THE GUARD: ARRL HONARY VICE PRESIDENT HUGH TURNBULL, W3ABC - SK

The changing of the guard in amateur radio continues. This with word that ARRL Honorary Vice President Hugh Turnbull, W3ABC, of Silver Spring, Maryland, became a silent key on Tuesday, September 14th.

Hugh Turnbull served the ARRL as Atlantic Division Vice Director from 1980 to1982 and as Director from 1982 to 1996. The ARRL Board named him as a Vice President in 1996 and Honorary Vice President in 2000.

Aside from his long and distinguished service to the ARRL, W3ABC was actively involved in several Washington DC-area amateur radio clubs and organizations, including the Foundation for Amateur Radio. This is agroup of clubs from the Maryland, Washington, DC and Northern Virginia area that awards scholarships to deserving radio amateurs.

A licensed and active radio amateur since 1932, Hugh's engineering career included employment with the FCC, the Voice of America and NASA.

According to his daughter, Karen Shangraw, Hugh Turnbull will be buried with full military honors at Arlington National Cemetery. At the time of his passing,W3ABC was age 93. (ARRL)

**
EMERGING TECHNOLOGY: CHATTANOOGA ELECTRIC POWER CHOOSES FIBER OPTICS FOR INTERNET SERVICE Chattanooga Tennessee's city-owned electrical utility has started offering an Internet service that is among the fastest in the world, but its not using Broadband over Powerline technology. The Chattanooga Electric Power Board's new Fiber Optics network will provide a 1 gigabit-per-second Internet service. The utility said the service is more than 200 times faster than the average national download speed today but will not come cheap. Priced at $350 a month, it's also much more expensive than the typical

residential plan. The full story is on-line at tinyurl.com/39n5vmy (Yahoo News, N6ZXJ)

**

EMERGING HAM TECHNOLOGY: WSJT BETA VER 9.0 NOW AVAILABLE

A beta release of WSJT 9.0 is now available for free download on the WSJT Home Page. The new version by author Joe Taylor, K1JT, has more than a half dozen new or improved features that include enhanced performance for FSK441, calculation of EME Doppler spread caused by lunar librations and simplification and clarification of the user interface.

K1JT asks that after gaining some experience with the beta release of WSJT 9.0, please share your views and opinions about it. Of course, bug reports are also welcome

More details on this new version can be found in the on-line WSJT 9.0 Supplement to User's Guide. A link to download the new version can be found at tinyurl.com/wsjt9. (K1JT)

**

CONTEST CORNER: THE FALL VHF/UHF SPRINTS ARE HERE

>From the contest corner word that the Fall 2010 VHF and UHF Sprints are here. The 144 MHz Sprint is on Monday, September 20th from 7 to 11pm your local time. Next up is the 222 MHz Sprint on Tuesday, September. 28th which is followed by the 432 MHz Sprint on Wednesday, October 6thth All three of these run from 7 to 11 pm your local time.

The Microwave Sprint for 902 MHz and up will happen on Saturday, October 16th, from 6am to noon local. The last will be the 50 MHz Sprint running from 2300 UTC on Saturday, October 30th until 0300 UTC on Sunday, October 31st. The 50 MHz event follows UTC time due to the possible inter-timezone and international contacts that might take place anytime on 6 meters.

The Fall VHF/UHFSprints are again being sponsored by the Southeastern VHF Society. More information on all these Sprints is on-line at tinyurl.com/2adk39l (KC9BQA, VHF Reflector)

**

CONTEST CORNER: VA THAI CONTEST CALL TO SHARE

Charlie Harpole, HS0ZCW, has informed the Ohio Penn DX Newsletter that the Radio Amateur Society of Thailand has received permission from the radio governing body of Thailand to utilize the special callsign of E2E for use in any contest. There is no expiration date for the callsign. The Radio Amateur Society of Thailand says that it will share the callsign with its members on a rotational basis. QSL to HS0AC, which is the other the Radio Amateur Society of Thailand valid callsign. (OPDX)

**

DX

In DX, VK4AN will be active as 3D2A from Viti Levu Island between October 27th and November 14th. Operation will be on 160 through 10 meters including 30, 17 and 12 meters using CW, SSB, RTTY and PSK31. QSL via VK4AN

K3PLV will be active portable MJ from Jersey Island through September 22nd. His operation will be on 160 through 10 meters using CW, SSB and RTTY. QSL via his home callsign, either direct or by the Bureau.

DJ5AA and DL2DXA will be active portable EA8 from La Palma through September 24th. Operation will be holiday style on 80 through 10 meters QSL via their home callsigns, either direct or via the bureau.

Lastly, word that IZ8EDJ will activate the Agropoli Lighthouse during the a lighthouse special event on September 26th. For more details, see the following Web page at www.strangeradioteam.com.

(Above from various DX news sources)

**

THAT FINAL ITEM: THE 2010 NEWSLINE LISTENER SURVEY

And finally this week, it has been over a decade since we ran a survey to find out what repeaters and nets around the world are playing these weekly Amateur Radio Newsline reports. We were about to start one a few years back, but unfortunately our then Surveymaster, the late Karl Pagel, N6BVU, took ill and was hospitalized.

As regular listeners know, Karl became a Silent Key last November 10th. Since then performing a new survey has been on hold. Now, the Newark Radio Society in New Jersey has offered to take over the responsibilities of conducting a 2010 Amateur Radio Newsline Bulletin Station Survey, and it has set up a special e-mail account to begin the process.

If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, you are invited to be a part of this review. What we need you to do is to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day or days of the week it is broadcast, the time zone and the estimated audience you think you have. Please e-mail that information along with your name and callsign to arnschedule at gmail dot com. Once again that's arnschedule (at) gmail (do)t com.

We will keep the survey open through the end of November and hopefully by years end we will have a new schedule of when and where you can hear Amateur Radio Newsline on the air. Our thanks to Leon Grauer, N0TAZ and the Newark Radio Society for their taking on this rather daunting task.

And once again, please send your survey response by e-mail to arnschedule (at) gmail (dot) com. We and the Newark Radio Society look

forward to hearing from you. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Fred Vobbe, W8HDU, saying 73 from Lima, Ohio, and we thank you for listening.

Solution Manual Engineering Design (4th Ed., George Dieter & Linda Schmidt)
Solution Manual Engineering Design and Graphics with Autodesk Inventor 2009 (James Bethune)
Solution Manual Engineering Design : A Project-Based Introduction (2nd Ed., Clive Dym & Patrick Little)
Solution Manual Engineering Design : A Project-Based Introduction (3rd Ed., Clive Dym & Patrick Little)
Solution Manual Tools and Tactics of Design (Dominick, Demel, Lawbaugh, Freuler, Kinzel & Fromm)
Solution Manual Engineering Analysis in Applied Mechanics (John Brewer)
Solution Manual Engineering Fluid Mechanics (William Graebel)
Solution Manual Advanced Fluid Mechanics (William Graebel)
Solution manual Essential Computational Fluid Dynamics (Oleg Zikanov)
Solution Manual Computational Fluid Dynamics : A Practical Approach (Jiyuan Tu, Guan Heng Yeoh & Chaoqun Liu)
Solution Manual Mechanics of Fluids (8th Ed., Massey)
Solution Manual Fluid Mechanics (5th Ed., Frank White)
Solution Manual Fluid Mechanics (6th Ed., Frank White)
Solution Manual Fluid Mechanics (7th Ed., Frank White)
Solution Manual Viscous Fluid Flow (3rd Ed., Frank White)
Solution Manual Thermodynamics and Heat Power (6th Ed., Kurt C. Rolle)
Solution Manual Introduction to the Thermodynamics of Materials (4th Ed. David Gaskell)
Solution Manual Engineering Thermodynamics : Work and Heat Transfer (4th Ed., G.F.C. Rogers & Yon Mayhew)
Solution Manual Introduction to Thermodynamics and Heat Transfer (2nd Ed., Yunus Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (1st Ed., Yunus Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (2nd Ed., Yunus Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (3rd Ed., Yunus Cengel & Robert Turner)
Solution Manual Thermodynamics : An Engineering Approach (5th Ed., Yunus Cengel)
Solution Manual Thermodynamics : An Engineering Approach (6th Ed., Yunus Cengel & Michael Boles)
Solution Manual Thermodynamics : An Engineering Approach (7th Ed., Yunus Cengel & Michael Boles)
Solution Manual Essentials of Fluid Mechanics : Fundamentals and Applications (1st Ed., Yunus Cengel, John Cimbala)

Solution Manual Fluid Mechanics (1st Ed., Yunus Cengel & John Cimbala)
Solution Manual Fluid Mechanics (2nd Ed., Yunus Cengel & John Cimbala)
Solution Manual Heat Tranfer (2nd Ed., Yunus Cengel)
Solution Manual Heat and Mass Transfer : A Practical Approach (3rd Ed., Yunus Cengel)
Solution Manual Heat and Mass Transfer : Fundamentals and Applications (4th Ed., Yunus Cengel & Afshin Ghajar)
Solution Manual Introduction to Fluid Mechanics (6th Ed., Robert Fox, Alan McDonald & Philip Pritchard)
Solution Manual Introduction to Fluid Mechanics (7th Ed., Robert Fox, Philip Pritchard & Alan McDonald)
Solution Manual Fluid Mechanics (5th Ed., Douglas)
Solution Manual Fluid Mechanics (3rd Ed., Kundu & Cohen)
Solution Manual Fluid Mechanics (4th Ed., Kundu & Cohen)
Solution Manual Elementary Fluid Mechanics (7th Ed., Street, Watters & Vennard)
Solution Manual Fluid Mechanics with Engineering Applications (10th Ed., Finnemore & Franzini)
Solution Manual Fundamentals of Fluid Mechanics (4th Ed., Bruce Munson, Donald Young, Theodore Okiishi)
Solution Manual Fundamentals of Fluid Mechanics (5th Ed., Bruce Munson, Donald Young, Theodore Okiishi)
Solution Manual Fundamentals of Fluid Mechanics (6th Ed., Bruce Munson, Donald Young, Theodore Okiishi, Wade Huebsch)
Solution Manual Fundamentals of Fluid Mechanics - SI Units (6th Ed., Bruce Munson, Donald Young, Theodore Okiishi, Wade Huebsch)
Solution Manual A Brief Introduction to Fluid Mechanics (3rd Ed., Donald Young, Bruce Munson, Theodore Okiishi)
Solution Manual A Brief Introduction to Fluid Mechanics (4th Ed., Donald Young, Bruce Munson, Theodore Okiishi, Wade Huebsch)
Solution Manual Engineering Fluid Mechanics (7th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (8th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (9th Ed., Clayton Crowe, Donald Elger, John Roberson, Barbara Williams)
Solution Manual Fluid Mechanics (Potter & Foss)
Solution Manual Mechanics of Fluids (3rd Ed., Potter)
Solution Manual Fluid Power with Applications (7th Ed., Esposito)
Solution Manual Mechanics of Fluids (4th Ed., Shames)
Solution Manual Applied Fluid Mechanics (6th Ed., Mott)
Solution Manual Applied Fluid Mechanics - SI Units (6th Ed., Mott)
Solution Manual Hydraulic Control Systems (Noah Manring)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (5th Ed., S.L. Dixon)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (6th Ed., S.L. Dixon & Cesare Hall)
Solution Manual The Design of High-Efficiency Turbomachinery and Gas

Turbines (2nd Ed., David Gordon Wilson & Theododios Korakianitis)
Solution Manual Fundamentals of Turbomachinery (William Peng)
Solution Manual Principles of Turbomachinery in Air-Breathing Engines (Baskharone)
Solution Manual Fundamentals of Jet Propulsion with Applications (Ronald D. Flack)
Solution Manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution Manual Thermodynamics : An Integrated Learning System (Schmidt, Ezekoye, Howell & Baker)
Solution Manual Design of Fluid Thermal Systems (2nd Ed., William Janna)
Solution Manual Design and Simulation of Thermal Systems (N.V. Suryanarayana & Oner Arici)
Solution Manual Introduction to Thermal and Fluids Engineering (Kaminski & Jensen)
Solution Manual Heating, Ventilating and Air Conditioning Analysis and Design (6th Ed., McQuiston)
Solution Manual Electricity, Electronics, and Control Systems for HVAC (4th Ed., Thomas Kissell)
Solution Manual Heat and Mass Transfer (Anthony Mills)
Solution Manual Convective Heat and Mass Transfer (4th Ed., Kays & Crawford)
Solution Manual Advanced Engineering Thermodynamics (3rd Ed., Bejan)
Solution Manual Convection Heat Transfer (3rd Ed., Bejan)
Solution Manual Design with Constructal Theory (Adrian Bejan & Sylvie Lorente)
Solution Manual Shape and Structure, from Engineering to Nature (Adrian Bejan)
Solution Manual Thermodynamics : Concepts and Applications (Stephen Turns)
Solution Manual Heat Transfer (10th Ed., Jack Holman)
Solution Manual Principles of Heat Transfer (Kaviany)
Solution Manual Heat Convection (Latif M. Jiji)
Solution Manual Fundamentals of Momentum, Heat and Mass Transfer (5th Ed., Welty)
Solution Manual Analytical Methods for Heat Transfer and Fluid Flow Problems (Bernhard Weigand)
Solution Manual Two-Phase Flow : Theory and Applications (Clement Kleinstreuer)
Solution Manual Convective Heat Transfer (kakac)
Solution Manual An Introduction to Fluid Dynamics : Principles of Analysis and Design (Stanley Middleman)
Solution Manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution Manual Fundamentals of Thermodynamics (5th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)
Solution Manual Fundamentals of Thermodynamics (6th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)
Solution Manual Fundamentals of Thermodynamics (7th Ed., Claus

Borgnakke & Richard Sonntag)
Solution Manual Introduction to Engineering Thermodynamics (1st Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Introduction to Engineering Thermodynamics (2nd Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Fundamentals of Engineering Thermodynamics (5th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics - SI Units (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Heat and Mass Transfer (5th Ed., Incropera, DeWitt)
Solution Manual Fundamentals of Heat and Mass Transfer (6th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (4th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (5th Ed., Incropera, DeWitt)
Solution Manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution Manual Radiative Heat Transfer (2nd Ed., Michael Modest)
Solution Manual Computational Heat Transfer (2nd Ed., Jaluria)
Solution Manual Principles of Combustion (2nd Ed., Kenneth Kuan-yun Kuo)
Solution Manual Combustion (2nd Ed., Irvin Glassman)
Solution Manual Combustion (3rd Ed., Irvin Glassman)
Solution Manual Incompressible Flow (3rd Ed., Panton)
Solution Manual Modern Compressible Flow : With Historical Perspective (3rd Ed., John Anderson)
Solution Manual Non-Newtonian Flow : Fundamentals and Engineering Applications (R.P. Chhabra & J F Richardson)
Solution Manual Computational Techniques for Fluid Dynamics (Srinivas, K., Fletcher, C.A.J.)
Solution Manual Introduction to Computational Fluid Dynamics (A.W. Date)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Robotic Mechanical Systems : Theory, Methods, and Algorithms (3rd Ed., Jorge Angeles)
Solution Manual Kinematic Chains and Machine Components Design (Dan B. Marghitu)

Solution Manual Kinematics, Dynamics, and Design of Machinery (2nd Ed., Waldron & Kinzel)
Solution Manual Kinematics and Dynamics of Machinery (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Kinematics and Dynamics of Machinery - SI Units (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Machines and Mechanisms : Applied Kinematic Analysis (3rd Ed., Myszka)
Solution Manual Mechanism Design : Analysis and Synthesis (4th Ed., Erdman, Sandor & Kota)
Solution Manual Mechanical Design : A Components Approach (2nd Ed., Peter Childs)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (1st Ed., Collins)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (2nd Ed., Collins, Busby & Staab)
Solution Manual Fundamentals of Machine Component Design (3rd Ed., Juvinall)
Solution Manual Fundamentals of Machine Component Design (4th Ed., Juvinall)
Solution Manual Design of Machine Elements (8th Ed., Spotts)
Solution Manual Machine Elements in Mechanical Design (4th Ed., Mott)
Solution Manual Machine Elements in Mechanical Design - SI Units (4th Ed., Mott)
Solution Manual Mechanical Design : An Integrated Approach (1st Ed., Ansel Ugural)
Solution Manual Design of Machinery (3rd Ed., Norton)
Solution Manual Design of Machinery (4th Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (3rd Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (4th Ed., Norton)
Solution Manual Mechanical Engineering Design (6th Ed., Shigley)
Solution Manual Mechanical Engineering Design (7th Ed., Shigley, Mischke & Budynas)
Solution Manual Shigley's Mechanical Engineering Design (8th Ed., Budynas & Nisbett)
Solution Manual Shigley's Mechanical Engineering Design (9th Ed., Budynas & Nisbett)
Solution Manual Fundamentals of Machine Elements (1st Ed., Hamrock)
Solution Manual Fundamentals of Machine Elements (2nd Ed., Hamrock)
Solution Manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins & Sanjeev Khanna)
Solution Manual Mechanics of Materials (3th Ed., Beer)
Solution Manual Mechanics of Materials (5th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (6th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (7th Ed., Gere & Goodno)
Solution Manual Mechanics of Materials (Ansel Ugural)
Solution Manual Mechanics of Materials : An Integrated Learning System

(1st Ed., Timothy Philpot)
Solution Manual Mechanics of Materials : An Integrated Learning System (2nd Ed., Timothy Philpot)
Solution Manual Mechanics of Materials (2nd Ed., Roy R. Craig)
Solution Manual Simplified Mechanics and Strength of Materials (6th Ed., James Ambrose)
Solution Manual Engineering Applications of Dynamics (Dean Karnopp & Donald Margolis)
Solution Manual Engineering Mechanics : Statics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Dynamics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Statics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Vector Mechanics for Engineers : Statics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Statics (8th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (8th Ed., Ferdinand Beer)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium (Sheppard & Tongue)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium - Update Edition (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion (2nd Ed., Sheppard & Tongue)
Solution Manual Statics and Mechanics of Materials : An Integrated Approach (2nd Ed., Riley, Sturges & Morris)
Solution Manual Mechanics of Materials (6th Ed., Riley, Sturges & Morris)
Solution Manual Basic Engineering Plasticity : An Introduction with Engineering and Manufacturing Applications (David Rees)

Solution Manual Theory of Plasticity (3rd Ed. Jagabanduhu Chakrabarty)
Solution Manual Deformation and Fracture Mechanics of Engineering Materials (4th Ed., Richard Hertzberg)
Solution Manual Deformable Bodies and Their Material Behavior (Haslach & Armstrong)
Solution Manual Intermediate Mechanics of Materials (1st Ed., Barber)
Solution Manual Elasticity (2nd Ed., J.R. Barber)
Solution Manual Elasticity : Theory, Applications, and Numerics (1st Ed., Martin Sadd)
Solution Manual Elasticity : Theory, Applications, and Numerics (2nd Ed., Martin Sadd)
Solution Manual Elasticity in Engineering Mechanics (2nd Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (6th Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (2nd Ed., Cook & Young)
Solution Manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution Manual Applied Mechanics for Engineering Technology (8th Ed., Keith M. Walker)
Solution Manual Applied Statics and Strength of Materials (5th Ed. Limbrunner & Spiegel)
Solution Manual Statics and Strength of Materials (Robert Mott)
Solution Manual Applied Strength of Materials (4th Ed., Mott)
Solution Manual Applied Strength of Materials (5th Ed., Mott)
Solution Manual Intermediate Dynamics for Engineers (Marcelo R.M & Crespo da Silva)
Solution Manual Engineering Mechanics : Statics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Dynamics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Statics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Engineering Mechanics : Dynamics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Elastic And Inelastic Stress Analysis (Irving Shames)
Solution Manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution Manual Strength of Materials - A New Unified Theory for the 21st Century (Surya Patnaik & Dale Hopkins)
Solution Manual Statics and Strengths of Materials (6th Ed., Morrow & Kokernak)
Solution Manual Engineering Mechanics : Statics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics (12th Ed., Hibbeler)

Solution Manual Engineering Mechanics : Statics - SI Units (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (12th Ed., Hibbeler)
Solution Manual Mechanics of Materials (4th Ed., Hibbeler)
Solution Manual Mechanics of Materials (6th Ed., Hibbeler)
Solution Manual Mechanics of Materials (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials - SI Units (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials (8th Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (Beer, Johnston, DeWolf & Mazurek)
Solution Manual Statics and Mechanics of Materials (Bedford, Liechti & Fowler)
Solution Manual Statics and Mechanics of Materials (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials - SI Units (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (3rd Ed., Hibbeler)
Solution Manual Energy Principles and Variational Methods in Applied Mechanics (2nd Ed., Reddy)
Solution Manual The Physics of Vibrations and Waves (6th Ed., Pain)
Solution Manual Engineering Vibrations (3rd Ed., Inman)
Solution Manual Mechanical Vibrations (4th Ed., Singiresu S. Rao)
Solution Manual Mechanical Vibrations - SI Units (4th Ed., Singiresu S. Rao)
Solution Manual Theory of Vibration : An Introduction (2nd Ed., A.A. Shabana)
Solution Manual Vibration of Discrete and Continuous Systems (2nd Ed., Ahmed Shabana)
Solution Manual Introduction to Finite Element Vibration Analysis (Maurice Petyt)
Solution Manual Vibrations and Stability : Advanced Theory, Analysis, and Tools (2nd Ed., Jon J. Thomsen)
Solution Manual Dynamics and Vibration : An Introduction (Magd Abdel Wahab)
Solution Manual Mechanical Vibration (William J. Palm, III)
Solution Manual Random Vibrations : Analysis of Structural and Mechanical Systems (Loren Lutes & Shahram Sarkani)
Solution Manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution Manual Fundamentals of Structural Integrity : Damage Tolerant Design and Nondestructive Evaluation (Alten F. Grandt)
Solution Manual A First Course in the Finite Element Method (4th Ed., Daryl L. Logan)
Solution Manual Finite Element Analysis Theory and Application with ANSYS (3rd Ed., Moaveni)
Solution Manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution Manual Fundamentals of Finite Element Analysis (1st Ed.,

David V. Hutton)
Solution Manual The Finite Element Method in Engineering (4th Ed., Rao)
Solution Manual The Finite Element Method and Applications in Engineering Using ANSYS (Madenci & Guven)
Solution Manual Introduction to Finite Element Analysis and Design (Nam-Ho Kim, Bhavani V. Sankar)
Solution Manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution Manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution Manual Fundamental Finite Element Analysis and Applications : with Mathematica and Matlab Computations (Asghar Bhatti)
Solution Manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution Manual Modeling and Analysis of Dynamic Systems (3rd Ed., Close)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual System Dynamics (1st Ed., William J Palm III)
Solution Manual System Dynamics (2nd Ed., William J Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual System Dynamics : Modeling and Simulation of Mechatronic Systems (4th Ed., Karnopp, Margolis & Rosenberg)
Solution Manual Concepts and Applications of Finite Element Analysis (4th Ed., Cook, Malkus, Plesha & Witt)
Solution Manual Finite Element Modeling for Stress Analysis (Robert Cook)
Solution Manual Fracture Mechanics : Fundamentals and Applications (2nd Ed., T.L. Anderson)
Solution Manual Mechanical Behavior of Materials (3rd Ed., Dowling)
Solution Manual Mechanical Behavior of Materials (W.F. Hosford)
Solution Manual Mechanical Behavior of Materials (Keith Bowman)
Solution Manual Theory and Design for Mechanical Measurements (4th Ed., Figliola & Beasley)
Solution Manual Mechanical Measurements (6th Ed., Beckwith, Marangoni & Lienhard)
Solution Manual Measurement and Data Analysis for Engineering and Science (Patrick Dunn)
Solution Manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution Manual Work Systems : The Methods, Measurement & Management of Work (Mikell P. Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (2nd Ed., Groover)
Solution Manual Automation, Production Systems, and Computer-

Integrated Manufacturing (3rd Ed., Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution Manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual DeGarmo's Materials and Processes in Manufacturing (10th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution Manual Design for Manufacturing : A Structured Approach (Corrado Poli)
Solution Manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution Manual Engineering Materials Science (Milton Ohring)
Solution Manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution Manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution Manual Materials Science for Engineering Students (Traugott Fischer)
Solution Manual Essentials of Modern Materials Science and Engineering (James Newell)
Solution Manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution Manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution Manual Materials Selection in Mechanical Design (3rd Ed., Michael Ashby)
Solution Manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)

Solution Manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution Manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution Manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution Manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution Manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Manufacturing Processes for Engineering Materials (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing Processes for Engineering Materials - SI Units (5th Ed. Kalpakjian, Smith & Chih-Wah Kok)
Solution Manual Manufacturing, Engineering & Technology (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology (6th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology - SI Units (6th Ed. Kalpakjian & Smith)
Solution Manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)
Solution Manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution Manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution Manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution Manual Applied Manufacturing Process Planning : With Emphasis on Metal Forming and Machining (Nelson, Schneider)
Solution Manual Mastering CAD/CAM (1st Ed., Ibrahim Zeid)
Solution Manual Principles of CAD/CAM/CAE (Kunwoo Lee)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Introduction to Computer Numerical Control (4th Ed., Valentino & Goldenberg)
Solution Manual Linear State-Space Control Systems (Robert L. Williams, II & Douglas A. Lawrence)
Solution Manual Gas Turbine Theory (6th Ed., H.I.H. Saravanamuttoo, G.F.C. Rogers, H. Cohen & Paul Straznicky)
Solution Manual Rocket Propulsion Elements (7th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Rocket Propulsion Elements (8th Ed., George P. Sutton & Oscar Biblarz)

Solution Manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution Manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution Manual Atmospheric and Space Flight Dynamics : Modeling and Simulation with MATLAB and Simulink (Ashish Tewari)
Solution Manual Flight Dynamics Principles (2nd Ed., by Cook)
Solution Manual Mechanics of Flight (1st Ed., Warren F. Phillips)
Solution Manual Mechanics of Flight (2nd Ed., Warren F. Phillips)
Solution Manual Fundamentals of Airplane Flight Mechanics (David G. Hull)
Solution Manual Dynamics of Flight : Stability and Control (3rd Ed., Bernard Etkin & Lloyd Duff Reid)
Solution Manual Aircraft Rescue and Firefighting (5th Ed., IFSTA)
Solution Manual Aircraft Propulsion (Saeed Farokhi)
Solution Manual Aircraft Performance (Maido Saarlas)
Solution Manual Flight Performance of Fixed and Rotary Wing Aircraft (Antonio Filippone)
Solution Manual Fundamentals Of Aircraft Structural Analysis (Howard Curtis)
Solution Manual Aircraft Control and Simulation (2nd Ed., Brian Stevens & Frank Lewis)
Solution Manual Aircraft Structures for Engineering Students (3rd Ed., T.H.G. Megson)
Solution Manual Aircraft Structures for Engineering Students (4th Ed., T.H.G. Megson)
Solution Manual Introduction to Aircraft Structural Analysis (T.H.G. Megson)
Solution Manual Mechanics of Aircraft Structures (2nd Ed, C. T. Sun)
Solution Manual Principles of Helicopter Aerodynamics (1st Ed., Leishman)
Solution Manual Fundamentals of Aerodynamics (2nd Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (3th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (4th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (5th Ed., Anderson)
Solution Manual Aerodynamics for Engineers (5th Ed., John Bertin & Russell Cummings)
Solution Manual Introduction to Flight (5th Ed., Anderson)
Solution Manual Introduction to Flight (6th Ed., Anderson)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual Introduction to Mechatronics and Measurement Systems (2nd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (3rd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution Manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)

Solution Manual Gas Dynamics (3rd Ed., John & Keith)
Solution Manual Fundamentals of Gas Dynamics (2nd Ed, Robert D. Zucker)
Solution Manual Theory of Ground Vehicles (3rd Ed., J. Y. Wong)
Solution Manual Theory of Ground Vehicles (4th Ed., J. Y. Wong)
Solution Manual Vehicle Dynamics : Theory and Application (Reza Jazar)
Solution Manual Internal Combustion Engines : Applied Thermosciences (2nd Ed., Ferguson & Kirkpatrick)
Solution Manual Advanced Engine Performance Diagnosis (4th Ed., James Halderman)
Solution Manual Automotive Engines (8th Ed., Crouse)
Solution Manual Automotive Heating & Air Conditioning (5th Ed., Tom Birch)
Solution Manual Diagnosis and Troubleshooting of Automotive Electrical, Electronic, and Computer Systems (5th Ed., James Halderman)
Solution Manual Automotive Brake Systems Package (4th Ed., Rehkopf)
Solution Manual Automotive Brake Systems (4th Ed., Halderman)
Solution Manual Automotive Engine Performance (2nd Ed., Halderman)
Solution Manual Automotive Engines : Theory and Servicing (6th Ed., James Halderman)
Solution Manual Automotive Fuel and Emissions Control Systems (2nd Ed., James Halderman & James Linder)
Solution Manual Automotive Science and Mathematics (Allan Bonnick)
Solution Manual Automotive Mathematics (Jason Rouvel)
Solution Manual Automotive Service Management (Andrew Rezin)
Solution Manual Automotive Technology : Principles, Diagnosis, and Service (3rd Ed., Halderman)
Solution Manual Automotive Steering, Suspension, and Alignment (4th Ed., Halderman)
Solution Manual Automatic Transmissions & Transaxles (4th Ed., Tom Birch & Chuck Rockwood)
Solution Manual Hybrid and Alternative Fuel Vehicles (Halderman & Martin)
Solution Manual Manual Drivetrains and Axles (5th Ed., Birch & Rockwood)
Solution Manual Blueprint Reading for the Machine Trades (6th Ed., Schultz & Smith)
Solution Manual Modern Welding Technology (6th Ed., Cary & Helzer)
Solution Manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution Manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution Manual Tissue Mechanics (Cowin, Doty)
Solution Manual Technology and Society (3rd Ed., Hjorth, Eichler, Khan & Morello)
Solution Manual BTEC First Engineering Curriculum Support Pack (Mike Tooley)
Solution Manual BTEC First Engineering (Mike Tooley)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer &

William Keat)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution Manual Engineering Science (5th Ed., W. Bolton)
Solution Manual Principles of Energy Conversion (2nd Ed., Archie W. Culp)
Solution Manual Fundamentals of Renewable Energy Processes (1st Ed., Aldo da Rosa)
Solution Manual Fundamentals of Renewable Energy Processes (2nd Ed., Aldo da Rosa)
Solution Manual Alternative Energy Systems (B. K. Hodge)
Solution Manual Solar Energy Engineering : Processes and Systems (Soteris Kalogirou)
Solution Manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution Manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution Manual Energy Technology and Directions for the Future (Fanchi)
Solution Manual Power Generation Technologies (Paul Breeze)
Solution Manual Concepts in Engineering (Holtzapple & Reece)
Solution Manual Concepts in Engineering (2nd Ed., Holtzapple & Reece)
Solution Manual Foundations of Engineering (2nd Ed, Holtzapple & Dan Reece)
Solution Manual Industrial Mechanics and Maintenance (3rd Ed., Larry Chastain)
Solution Manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution Manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Engineering Drawing And Design (7th Ed., Jensen, Helsel & Short)
Solution Manual Autodesk Inventor (James M. Leake)
Solution Manual Engineering Design Graphics : Sketching, Modeling, and Visualization (1st Ed., James Leake & Jacob Borgerson)
Solution Manual Orthopaedic Biomechanics : Mechanics and Design in Musculoskeletal Systems (Donald Bartel, Dwight Davy & Tony Keaveny)
Solution Manual Science for Engineering (3rd Ed., John Bird)

- Electrical, Electronics & Computer Engineering :

Solution Manual Design for Electrical and Computer Engineers (J. Eric Salt & Robert Rothery)
Solution Manual Electrical Engineering : Principles and Applications (3rd Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (4th Ed., Hambley)

Solution Manual Electrical Engineering : Principles and Applications (5th Ed., Hambley)
Solution Manual Electronics (2nd Ed., Hambley)
Solution Manual Electronics and Communications for Scientists and Engineers (Martin Plonus)
Solution Manual Cryptography & Network Security (Behrouz A Forouzan)
Solution Manual Data Communications and Networking (3rd Ed., Behrouz A. Forouzan)
Solution Manual Data Communications and Networking (4th Ed., Behrouz A. Forouzan)
Solution Manual TCP/IP Protocol Suite (2nd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (3rd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (4th Ed., Behrouz Forouzan)
Solution Manual Local Area Networks (Behrouz A Forouzan)
Solution Manual Analog Integrated Circuits for Communication : Principles, Simulation and Design (2nd Ed., Donald Pederson & Kartikeya Mayaram)
Solution Manual Satellite Communications (2nd Ed, Pratt, Bostian, Allnutt)
Solution Manual Business Data Communications (Behrouz A Forouzan)
Solution Manual Logic and Computer Design Fundamentals (4th Ed., Mano & Kime)
Solution Manual Linear Robust Control (Michael Green, David J. N. Limebeer)
Solution Manual Adaptive Control (2nd Ed., Karl Johan Astrom, Bjorn Wittenmark)
Solution Manual Digital Control Engineering : Analysis and Design (M. Sami Fadali & Antonio Visioli)
Solution Manual Computer-Controlled Systems : Theory and Design (3rd Ed., Karl Johan Astrom & Bjorn Wittenmark)
Solution Manual Electric Circuits (7th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (8th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (9th Ed., Nilsson & Riedel)
Solution Manual Introductory Circuits for Electrical and Computer Engineering (James Nilsson, Susan Riedel)
Solution Manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution Manual Applied Electromagnetics : Early Transmission Lines Approach (Stuart Wentworth)
Solution Manual Fundamentals of Electromagnetics with Engineering Applications (Stuart Wentworth)
Solution Manual Electromagnetics for Engineers : With Applications to Digital Systems and Electromagnetic Interference (Clayton Paul)
Solution Manual MEMS & Microsystems : Design and Manufacture (1st Ed., Tai-Ran Hsu)
Solution Manual MEMS & Microsystems : Design, Manufacture, and Nanoscale Engineering (2nd Ed., Tai-Ran Hsu)
Solution Manual Probability and Statistics for Engineering and the Sciences (7th Ed., Jay L. DeVore)
Solution Manual Probability and Stochastic Processes : A Friendly

Introduction for Electrical and Computer Engineers (2nd Ed., Roy Yates & David Goodman)
Solution Manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)
Solution Manual Fuel Cell Engines (Matthew M. Mench)
Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)
Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney Colella, Suk-Won Cha, Fritz Prinz)
Solution Manual Control Systems Engineering (4th Ed., Norman Nise)
Solution Manual Control Systems Engineering (5th Ed., Norman Nise)
Solution Manual Automatic Control Systems (8th Ed., Benjamin C. Kuo, Farid Golnaraghi)
Solution Manual Automatic Control Systems (9th Ed., Farid Golnaraghi, Benjamin C. Kuo)
Solution Manual Basic Electricity for Industry : Circuits and Machines - Canadian Edition (Doug Edgar)
Solution Manual Basic Engineering Circuit Analysis (8th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (9th Ed., Irwin & Nelms)
Solution Manual A Brief Introduction to Circuit Analysis (J. David Irwin)
Solution Manual Semiconductor Devices : Basic Principles (Jasprit Singh)
Solution Manual Semiconductor Device Fundamentals (Robert F. Pierret)
Solution Manual Device Electronics for Integrated Circuits (3rd Ed., Richard S. Muller, Theodore I. Kamins)
Solution Manual Fundamentals of Semiconductor Devices (Anderson)
Solution Manual Scientific Computing (2nd Ed., Michael T. Heath)
Solution Manual Scientific Computing with Case Studies (Dianne P. O'Leary)
Solution Manual Pattern Recognition and Machine Learning (Christopher M. Bishop)
Solution Manual Modern Semiconductor Devices for Integrated Circuits (Chenming C. Hu)
Solution Manual Analysis and Design of Analog Integrated Circuits (4th Ed., Paul Gray, et al.)
Solution Manual Analysis and Design of Analog Integrated Circuits (5th Ed., Paul Gray)
Solution Manual Analysis and Design of Digital Integrated Circuits (3rd Ed., Hodges)
Solution Manual Introduction to Electric Circuits (6th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (7th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (8th Ed., Dorf & Svoboda)
Solution Manual Modulation, Detection and Coding (Tommy Öberg)
Solution Manual Principles of Communications: Systems, Modulation, and Noise (5th Ed., R.E. Ziemer & W.H. Tranter)

Solution Manual Principles of Communications (6th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual The Analysis and Design of Linear Circuits (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits : Laplace Early (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits (5th Ed, Thomas)
Solution Manual The Analysis and Design of Linear Circuits (6th Ed, Thomas, Rosa & Toussaint)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual Modern Control Systems (11th Ed., Dorf & Bishop)
Solution Manual Modern Control Systems (12th Ed., Dorf & Bishop)
Solution Manual System Dynamics (1st Ed., William Palm III)
Solution Manual System Dynamics (2nd Ed., William Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Optimal Control (2nd Ed., Frank Lewis & Vassilis Syrmos)
Solution Manual Optimal Control Theory : An Introduction (Donald E. Kirk)
Solution Manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution Manual Analog Signals and Systems (Erhan Kudeki & David C. Munson, Jr.)
Solution Manual Continuous and Discrete Time Signals and Systems (Mrinal Mandal, Amir Asif)
Solution Manual Digital Signal and Image Processing (Tamal Bose)
Solution Manual Digital Image Processing (2nd Ed., Rafael Gonzalez, Richard Woods)
Solution Manual Discrete-Time Signal Processing (2nd Ed., Alan Oppenheim, Ronald Schafer, John Buck)
Solution Manual Discrete-Time Signal Processing (3rd Ed., Alan Oppenheim & Ronald Schafer)
Solution Manual Signal Processing First (James H. McClellan, Ronald W. Schafer, Mark A. Yoder)
Solution Manual Statistical Digital Signal Processing and Modeling (Monson Hayes)
Solution Manual Digital Signal Processing (Thomas J. Cavicchi)
Solution Manual Digital Signal Processing System Design : LabVIEW-Based Hybrid Programming (2nd Ed., Kehtarnavaz)
Solution Manual Digital Signal Processing (2nd Ed., Mitra)
Solution Manual Digital Signal Processing (3rd Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., John G. Proakis, Dimitris K Manolakis)
Solution Manual Digital Signal Processing (Charles Schuler & Mahesh Chugani)
Solution Manual Digital Signal Processing : Fundamentals and

Applications (Li Tan)
Solution Manual Digital Signal Processing : An Experimental Approach (Shlomo Engelberg)
Solution Manual Digital Signal Processing : System Analysis and Design (Paulo S. R. Diniz)
Solution Manual Digital Signal Processing : A Modern Introduction (Ashok Ambardar)
Solution Manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution Manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution Manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution Manual Logic Synthesis and Verification Algorithms (Gary Hachtel & Fabio Somenzi)
Solution Manual Adaptive Filtering : Algorithms and Practical Implementation (3rd Ed., Paulo S. R. Diniz)
Solution Manual Introduction to Scientific Computation and Programming (Daniel T. kaplan)
Solution Manual Principles of Signal Detection and Parameter Estimation (Bernard C. Levy)
Solution Manual Electric Machines Analysis and Design Applying MatLab (Cathey)
Solution Manual Fundamentals of Electrical Engineering (Giorgio Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (4th Ed, Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (5th Ed, Rizzoni)
Solution Manual Fundamentals of Electric Circuits (2nd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (3rd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (4th Ed., Alexander & Sadiku)
Solution Manual MSP430 Microcontroller Basics (John Davies)
Solution Manual Programming Massively Parallel Processors : A Hands-on Approach (David Kirk & Wen-mei Hwu)
Solution Manual Embedded DSP Processor Design : Application Specific Instruction Set Processors (Dake Liu)
Solution Manual Embedded Microcontrollers and Processor Design (Charles Greg Osborn)
Solution Manual Embedded System Design : A Unified Hardware/Software Introduction (Vahid & Givargis)
Solution Manual Embedded Microcomputer Systems : Real Time Interfacing (2nd Ed., Jonathan W. Valvano)
Solution Manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution Manual Principles of Computer System Design : An Introduction (Jerome Saltzer & M. Frans Kaashoek)

Solution Manual The Illustrated Network : How TCP/IP Works in a Modern Network (Walter Goralski)
Solution Manual Electronic Design Automation : Synthesis, Verification, and Test (Laung-Terng Wang, Yao-Wen Chang & Kwang-Ting Cheng)
Solution Manual Digital Design (Frank Vahid)
Solution Manual Digital Logic Design Principles (Balabanian & Carlson)
Solution Manual Fundamentals of Logic Design (5th Ed., Charles H. Roth)
Solution Manual Real-Time Systems and Software (Alan Shaw)
Solution Manual Introduction to VLSI Circuits and Systems (John P. Uyemura)
Solution Manual Chip Design for Submicron VLSI : CMOS Layout & Simulation (John Uyemura)
Solution Manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution Manual Objects, Abstraction, Data Structures and Design : Using C++ (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Objects, Abstraction, Data Structures and Design Using Java Version 5.0 (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Computer Architecture and Organization : An Integrated Approach (Murdocca & Heuring)
Solution Manual Wiley Pathways Networking Basics (1st Ed., Ciccarelli, Faulkner, FitzGerald, Dennis & Miller)
Solution Manual Software Engineering : Principles and Practice (3rd Ed., Hans van Vliet)
Solution Manual Software Design : From Programming to Architecture (Eric Braude)
Solution Manual Software Engineering : An Object-Oriented Perspective (Eric Braude)
Solution Manual Software Engineering : Modern Approaches (2nd Ed., Eric Braude & Michael Bernstein)
Solution Manual Neural and Adaptive Systems : Fundamentals through Simulations (José Principe, Neil Euliano & W. Curt Lefebvre)
Solution Manual Fundamentals of Electronic Circuit Design (David J. Comer & Donald T. Comer)
Solution Manual Microelectronic Circuit Design (2nd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (3rd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (4th Ed., Jaeger & Blalock)
Solution Manual Introduction to Microelectronic Fabrication : Volume 5 of Modular Series on Solid State Devices (2nd Ed., Richard Jaeger)
Solution Manual Microelectronic Circuits (5th Ed., Adel S. Sedra, K. C. Smith)
Solution Manual VHDL for Engineers (Kenneth Short)
Solution Manual Fundamentals of Digital Logic with VHDL Design (1st Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (2nd

Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (3rd Ed., Brown & Vranesic)
Solution Manual CMOS Analog Circuit Design (2nd Ed., Phillip E. Allen, Douglas R. Holberg)
Solution Manual Design of Analog CMOS Integrated Circuits (Behzad Razavi)
Solution Manual Design of Integrated Circuits for Optical Communications (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics, Preliminary Edition (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics (1st Ed., Behzad Razavi)
Solution Manual Design with Operational Amplifiers and Analog Integrated Circuits (3rd Ed., Sergio Franco)
Solution Manual Your UNIX : The Ultimate Guide (1st Ed., Sumitabha Das)
Solution Manual Your UNIX : The Ultimate Guide (2nd Ed., Sumitabha Das)
Solution Manual Microwave Engineering (Annapurna Das)
Solution Manual Microwave Engineering (3rd Ed., David M. Pozar)
Solution Manual Microwave and RF Design of Wireless Systems (David M. Pozar)
Solution Manual Introduction to Wireless Systems (P. M. Shankar)
Solution Manual Microwave Transistor Amplifiers : Analysis and Design (2nd Ed., Guillermo Gonzalez)
Solution Manual Control Systems (Madan Gopal)
Solution Manual A First Lab in Circuits and Electronics (Yannis Tsividis)
Solution Manual Power Electronic Circuits (Issa Batarseh)
Solution Manual Power System Analysis : Analysis and Design (John Grainger)
Solution Manual Power Systems Analysis (2nd Ed., Hadi Saadat)
Solution Manual Power Systems Analysis and Design (4th Ed., J.Duncan Glover and Mulukutla S. Sarma)
Solution Manual Power Electronics : Converters, Applications, and Design (3rd Ed., Ned Mohan, Tore Undeland & William Robbins)
Solution Manual An Introduction to Digital and Analog Communications (2nd Ed., Simon Haykin & Michael Moher)
Solution Manual Communication Systems (4th Ed., Simon Haykin)
Solution Manual Communication Systems (5th Ed., Simon Haykin)
Solution Manual Communication Systems (4th Ed., A. Bruce Carlson, Paul B. Crilly, Janet Rutledge)
Solution Manual Communication Systems (5th Ed., A. Bruce Carlson, Paul B. Crilly)
Solution Manual Signals and Systems (2nd Ed., Simon Haykin & Barry Van Veen)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (1st Ed., Patt and Patel)
Solution Manual Introduction to Computing Systems : From bits & gates

to C & beyond (2nd Ed., Patt and Patel)
Solution Manual Elements of the Theory of Computation (2nd Ed., Lewis & Papadimitriou)
Solution Manual Introduction to Languages and the Theory of Computation (3rd Ed., John Martin)
Solution Manual Introduction to Languages and the Theory of Computation (4th Ed., John Martin)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Silicon VLSI Technology : Fundamentals, Practice, and Modeling (Plummer, Deal & Griffin)
Solution Manual Dynamic Electromagnetics (Paul Diament)
Solution Manual Engineering Electromagnetics (2nd Ed., Nathan Ida)
Solution Manual Engineering Electromagnetics (Kenneth Demarest)
Solution Manual Field and Wave Electromagnetics (1st Ed., David Cheng)
Solution Manual Fundamentals of Engineering Electromagnetics (David Cheng)
Solution Manual Information Modeling and Relational Databases (2nd Ed., Terry Halpin & Tony Morgan)
Solution Manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual The Intel Microprocessors (8th Ed., Barry B. Brey)
Solution Manual Wireless Networking (Kumar, Manjunath & Kuri)
Solution Manual Wireless Communications : Principles and Practice (2nd Ed., Theodore S. Rappaport)
Solution Manual Digital Electronics and Design with VHDL (Volnei A. Pedroni)
Solution Manual System-on-Chip Test Architectures : Nanometer Design for Testability (Wang, Stroud & Touba)
Solution Manual Digital Design (Verilog) : An Embedded Systems Approach Using Verilog (Peter Ashenden)
Solution Manual Digital Design (VHDL) : An Embedded Systems Approach Using VHDL (Peter Ashenden)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (3rd Ed., Patterson & Hennessy)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (4th Ed., Patterson & Hennessy)
Solution Manual Fundamentals of Computer Organization and Design (Sivarama P. Dandamudi)
Solution Manual Wireless Communications & Networking (Vijay Garg)
Solution Manual Network Flows : Theory, Algorithms, and Applications (Ravindra K. Ahuja, Thomas L. Magnanti, James B. Orlin)
Solution Manual Network Analysis, Architecture, and Design (3rd Ed., James McCabe)
Solution Manual Computer Networks : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Computer Networks ISE : A Systems Approach (4th Ed., Peterson & Davie)

Solution Manual Digital Design and Computer Architecture (David Harris & Sarah Harris)
Solution Manual Fault-Tolerant Systems (Israel Koren & C. Krishna)
Solution Manual Computer Architecture : Pipelined and Parallel Processor Design (Michael J. Flynn)
Solution Manual Computer Architecture : A Quantitative Approach (4th Ed., Hennessy & Patterson)
Solution Manual High-Performance Embedded Computing : Architectures, Applications, and Methodologies (Wayne Wolf)
Solution Manual Pattern Recognition (3rd Ed., Theodoridis & Koutroumbas)
Solution Manual Pattern Recognition (4th Ed., Theodoridis & Koutroumbas)
Solution Manual Data Mining : Concepts and Techniques (2nd Ed., Han & Kamber)
Solution Manual Commonsense Reasoning (Erik Mueller)
Solution Manual Introduction to Data Compression (3rd Ed., Khalid Sayood)
Solution Manual Programming Language Pragmatics (2nd Ed., Michael Scott)
Solution Manual Programming Language Pragmatics (3rd Ed., Michael Scott)
Solution Manual Computer Graphics for Java Programmers (2nd Ed., Leen Ammeraal & Kang Zhang)
Solution Manual Database Modeling and Design : Logical Design (4th Ed., Teorey, Lightstone & Nadeau)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (1st Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (2nd Ed., Wayne Wolf)
Solution Manual Virtual Machines : Versatile Platforms for Systems and Processes (Jim Smith & Ravi Nair)
Solution Manual Comprehensive Functional Verification : The Complete Industry Cycle (Wile, Goss & Roesner)
Solution Manual User Interface Design and Evaluation (Stone, Jarrett, Woodroffe & Minocha)
Solution Manual Network Algorithmics : An Interdisciplinary Approach to Designing Fast Networked Devices (George Varghese)
Solution Manual Data Modeling Essentials (3rd Ed., Simsion & Witt)
Solution Manual A Student Guide to Object-Oriented Development (Carol Britton & Jill Doake)
Solution Manual Routing, Flow, and Capacity Design in Communication and Computer Networks (Pioro & Medhi)
Solution Manual Knowledge Representation and Reasoning (Brachman & Levesque)
Solution Manual Communication Networking : An Analytical Approach (Anurag Kumar, D. Manjunath & Joy Kuri)
Solution Manual Principles and Practices of Interconnection Networks (Dally & Towles)
Solution Manual Game Physics (David Eberly)

Solution Manual Engineering a Compiler (Keith Cooper & Linda Torczon)
Solution Manual Constraint Processing (Rina Dechter)
Solution Manual Design Methods for Reactive Systems : Yourdon, Statemate, and the UML (R. J. Wieringa)
Solution Manual Temporal Data & the Relational Model (C.J. Date, Darwen & Lorentzos)
Solution Manual Java Made Simple (2nd Ed., P. K. McBride)
Solution Manual The Firmware Handbook (Jack Ganssle)
Solution Manual Optical Networks : A Practical Perspective (2nd Ed., Ramaswami & Sivarajan)
Solution Manual Optical Networks : A Practical Perspective (3rd Ed., Ramaswami, Sivarajan & Sasaki)
Solution Manual Usability Engineering : Scenario-Based Development of Human-Computer Interaction (Rosson & Carroll)
Solution Manual The Designer's Guide to VHDL (2nd Ed., Peter Ashenden)
Solution Manual Transactional Information Systems : Theory, Algorithms, and the Practice of Concurrency Control and Recovery (Weikum & Vossen)
Solution Manual Parallel Computer Architecture : A Hardware/Software Approach (Culler, Singh & Gupta)
Solution Manual Advanced Compiler Design and Implementation (Steven Muchnick)
Solution Manual Parallel Programming with MPI (Peter Pacheco)
Solution Manual Distributed Algorithms (Nancy Lynch)
Solution Manual Electrical and Electronic : Principles and Technology (3rd Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (3rd Ed., John Bird)
Solution Manual Electronic Circuits : Fundamentals & Applications (3rd Ed., Mike Tooley)
Solution Manual A Practical Guide to SysML : The Systems Modeling Language (Friedenthal, Moore & Steiner)
Solution Manual Multidimensional Signal, Image, and Video Processing and Coding (John Woods)
Solution Manual Bioelectrical Signal Processing in Cardiac and Neurological Applications (Leif Sörnmo & Pablo Laguna)
Solution Manual Foundations of Analog and Digital Electronic Circuits (Anant Agarwal & Jeffrey Lang)
Solution Manual Introduction to Linear Circuit Analysis and Modelling : From DC to RF (Luis Moura & Izzat Darwazeh)
Solution Manual Embedded Systems Architecture : A Comprehensive Guide for Engineers and Programmers (Tammy Noergaard)
Solution Manual Bioimpedance and Bioelectricity Basics (2nd Ed., Grimnes & Martinsen)
Solution Manual Simulation Modeling and Analysis with ARENA (Tayfur Altiok & Benjamin Melamed)
Solution Manual The Visual Story : Creating the Visual Structure of Film, TV and Digital Media (2nd Ed., Bruce Block)
Solution Manual The Shut Up and Shoot Documentary Guide : A Down & Dirty DV Production (Anthony Artis)

Solution Manual Portable Video : ENG & EFP (5th Ed., Medoff & Fink)
Solution Manual Voice and Vision : A Creative Approach to Narrative Film and DV Production (Mick Hurbis-Cherrier)
Solution Manual Writing for Multimedia and the Web : A Practical Guide to Content Development for Interactive Media (3rd Ed., Timothy Garrand)
Solution Manual Developing and Maintaining a Design-Tech Portfolio : A Guide for Theatre, Film & TV (Rafael Jaen)
Solution Manual Producing for TV and Video : A Real-World Approach (Cathrine Kellison)
Solution Manual Producing for TV and New Media : A Real-World Approach for Producers (2nd Ed., Cathrine Kellison)
Solution Manual Placing Shadows : Lighting Techniques for Video Production (3rd Ed., Gloman & Tom LeTourneau)
Solution Manual Film Directing Fundamentals : See Your Film Before Shooting (3rd Ed., Nicholas Proferes)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (3rd Ed., Musburger & Kindem)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (4th Ed., Kindem & Musburger)
Solution Manual Directing the Documentary (5th Ed., Michael Rabiger)
Solution Manual Video Production Handbook (4th Ed., Gerald Millerson & Jim Owens)
Solution Manual Making Media : Foundations of Sound and Image Production (Jan Roberts-Breslin)
Solution Manual Prepare to Board! Creating Story and Characters for Animation Features and Shorts (Nancy Beiman)
Solution Manual Light and Lens : Photography in the Digital Age (Robert Hirsch)
Solution Manual The Radio Station : Broadcast, Satellite & Internet (7th Ed., Michael Keith)
Solution Manual Developing Story Ideas (2nd Ed., Michael Rabiger)
Solution Manual Radio Production Worktext : Studio and Equipment (5th Ed., Reese, Gross & Gross)
Solution Manual Broadcast News Writing, Reporting, and Producing (4th Ed., Ted White)
Solution Manual Problem Solving and Programming Concepts (7th Ed., Sprankle)
Solution Manual Problem Solving and Programming Concepts (8th Ed., Sprankle & Hubbard)
Solution Manual A Balanced Introduction to Computer Science (2nd Ed., David Reed)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Starting Out with Programming Logic and Design (Tony Gaddis)
Solution Manual Starting Out with Programming Logic and Design (2nd Ed., Tony Gaddis)
Solution Manual Tools For Structured and Object-Oriented Design (7th Ed., Bohl & Rynn)

Solution Manual Programming with Alice and Java (Lewis & DePasquale)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual XML How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, Ted Lin, Praveen Sadhu)
Solution Manual Python How to Program (Harvey M. Deitel, Paul J. Deitel, Jonathan P. Liperi Ben Wiedermann)
Solution Manual Perl How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, D. C. McPhie)
Solution Manual C How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual C How to Program (5th Ed., Harvey & Paul Deitel)
Solution Manual C++ How to Program (6th Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic.NET How to Program (2nd Ed., Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Visual C++ 2008 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Internet & World Wide Web : How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual Web Technologies : A Computer Science Perspective (Jeffrey C. Jackson)
Solution Manual Mastering the Internet, XHTML and JavaScript (2nd Ed., Ibrahim Zeid)
Solution Manual Weaving a Website : Programming in HTML, Java Script, Perl and Java (Susan Anderson-Freed)
Solution Manual Simply C++ : An Application-Driven Tutorial Approach (Harvey & Paul Deitel)
Solution Manual Visual C# 2005 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Visual C# 2008 How to Program (3rd Ed., Harvey & Paul Deitel)
Solution Manual Simply C# : An Application-Driven Tutorial Approach (Harvey & Paul Deitel, Hoey & Yaeger)
Solution Manual Java : An Introduction to Problem Solving and Programming (4th Ed., Walter Savitch)
Solution Manual Java : An Introduction to Problem Solving and Programming (5th Ed., Savitch & Carrano)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Java How to Program (7th Ed., Harvey & Paul Deitel)
Solution Manual Java For Students (5th Ed., Bell & Parr)
Solution Manual Java, Java, Java, Object-Oriented Problem Solving (3rd Ed., Morelli & Walde)
Solution Manual Java : An Eventful Approach (Bruce, Danyluk & Murtagh)
Solution Manual Introduction to Java Programming with JBuilder (3rd Ed., Y. Daniel Liang)
Solution Manual Starting Out with Visual Basic 2008 (4th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Visual Basic 2010 (5th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Python (Tony Gaddis)

Solution Manual Object-Oriented Programming in Python (Goldwasser & Letscher)
Solution Manual Introduction to MathCAD 11 (Ronald W. Larsen)
Solution Manual Introduction to MathCAD 13 (2nd Ed., Ronald W. Larsen)
Solution Manual MatLAB Programming (David Kuncicky)
Solution Manual Introduction to Maple 8 (David Schwartz)
Solution Manual Introduction to FORTRAN 90 (2nd Ed., Larry R. Nyhoff & Sanford Leestma)
Solution Manual Fortran 95/2003 Scientists and Engineers (3rd Ed., Stephen J. Chapman)
Solution Manual Introduction to Java (Stephen J. Chapman)
Solution Manual Java Software Solutions for AP Computer Science A (2nd Ed., Lewis, Loftus & Cocking)
Solution Manual Business Data Networks and Telecommunications (6th Ed., Raymond R. Panko)
Solution Manual Business Data Networks and Telecommunications (7th Ed., Raymond R. Panko)
Solution Manual Business Data Communications (Allen Dooley)
Solution Manual Object-Oriented Programming in C++ (4th Ed., Robert Lafore)
Solution Manual C++ : Classes and Data Structures (Jeffrey Childs)
Solution Manual Data Structures Outside-In with Java (Sesh Venugopal)
Solution Manual Data Structures and Abstractions with Java (2nd Ed., Frank M. Carrano)
Solution Manual Data Structures and Algorithms in Java (Peter Drake)
Solution Manual Practical Introduction to Data Structures and Algorithm Analysis : C++ Edition (2nd Ed., Clifford A. Shaffer)
Solution Manual Computer Vision : A Modern Approach (David Forsyth & Jean Ponce)
Solution Manual Computer Graphics Using Java 2D and 3D (Hong Zhang & Y. Daniel Liang)
Solution Manual Computer Graphics Using OpenGL (3rd Ed., Francis Hill Jr. & Stephen Kelley)
Solution Manual Computer Graphics with OpenGL (3rd Ed., Donald Hearn & M. Pauline Baker)
Solution Manual User-Centered Web Site Development : A Human-Computer Interaction Approach (McCracken & Wolfe)
Solution Manual Fundamentals of Game Design (Ernest Adams & Andrew Rollings)
Solution Manual Introduction to The Game Industry (Moore & Sward)
Solution Manual Fundamentals of Math and Physics for Game Programmers (Wendy Stahler)
Solution Manual Usability Engineering : Process, Products & Examples (Laura Leventhal & Julie Barnes)
Solution Manual Web Usability : A User-Centered Design Approach (Jonathan Lazar)
Solution Manual Structured Computer Organization (5th Ed., Andrew S. Tanenbaum)
Solution Manual Assembly Language for Intel-Based Computers (5th Ed., Kip Irvine)

Solution Manual Assembly Language for x86 Processors (6th Ed., Kip R. Irvine)
Solution Manual Fundamentals of Multimedia (Ze-Nian Li & Mark Drew)
Solution Manual Digital Media Primer (Yue-Ling Wong)
Solution Manual Essentials for Design Macromedia Director MX 2004 Comprehensive (Tara Gray)
Solution Manual Modern Systems Analysis and Design (4th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (5th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Database Management (8th Ed., Hoffer, Prescott & Topi)
Solution Manual Modern Database Management (9th Ed., Hoffer, Prescott & Topi)
Solution Manual Database Systems Using Oracle (2nd Ed., Nilesh Shah)
Solution Manual An Advanced Course in Database Systems : Beyond Relational Databases (Dietrich & Urban)
Solution Manual Data and Text Mining : A Business Applications Approach (Thomas Miller)
Solution Manual Network Management : Concepts and Practice, A Hands-On Approach (J. Richard Burke)
Solution Manual Computer and Communication Networks (Nader F. Mir)
Solution Manual High Performance TCP/IP Networking (Mahbub Hassan & Raj Jain)
Solution Manual Computer Security : Principles and Practice (William Stallings & Lawrie Brown)
Solution Manual Computer Forensics : Principles and Practices (Volonino, Anzaldua & Godwin)
Solution Manual Disaster Recovery : Principles and Practices (April Wells, Charlyne Walker & Timothy Walker)
Solution Manual Firewalls and VPNs : Principles and Practices (Richard Tibbs & Edward Oakes)
Solution Manual Network Defense and Countermeasures : Principles and Practices (Chuck Easttom)
Solution Manual Corporate Computer and Network Security (1st Ed., Raymond Panko)
Solution Manual Corporate Computer and Network Security (2nd Ed., Raymond Panko)
Solution Manual IP Telephony Using CallManager Express Lab Portfolio (Cheryl Schmidt & Ernie Friend)
Solution Manual High-Speed Networks and Internets : Performance and Quality of Service (2nd Ed., William Stallings)
Solution Manual Object-Oriented Modeling and Design with UML (2nd Ed., Michael Blaha & James Rumbaugh)
Solution Manual Operating Systems : Internals and Design Principles (5th Ed., William Stallings)
Solution Manual Operating Systems : Internals and Design Principles (6th Ed., William Stallings)
Solution Manual Distributed Systems : Principles and Paradigms (2nd Ed., Tanenbaum & Van Steen)

Solution Manual Modern Operating Systems (3rd Ed., Andrew Tanenbaum)
Solution Manual Operating Systems Design and Implementation (3rd Ed., Andrew Tanenbaum & Albert Woodhull)
Solution Manual UNIX Unbounded : A Beginning Approach (5th Ed., Amir Afzal)
Solution Manual Introduction to Operating Systems and Networks (Ruth Watson)
Solution Manual Operating Systems (3rd Ed., Harvey Deitel, Paul Deitel & David Choffnes)
Solution Manual Operating Systems Principles (Lubomir Bic & Alan Shaw)
Solution Manual A Practical Guide to Linux : Commands, Editors, and Shell Programming (Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (2nd Ed., Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (3rd Ed., Mark Sobell)
Solution Manual A Practical Guide to Fedora and Red Hat Enterprise Linux: College Edition (Mark Sobell)
Solution Manual A Practical Guide to Ubuntu Linux (Mark Sobell)
Solution Manual Automata, Computability and Complexity : Theory and Applications (Elaine Rich)
Solution Manual Modern Digital Electronics (R.P. Jain)
Solution Manual Linear Systems and Signals (B.P. Lathi)
Solution Manual Modern Digital and Analog Communications Systems (3rd Ed., B. P. Lathi)
Solution Manual Introduction to Digital Systems (Milo D. Ercegovac, Lang & Moreno)
Solution Manual Embedded Systems : Architechture, Programming and Design (Raj Kamal)
Solution Manual Modern Power System Analysis (D. P. Kothari & I. J. Nagrath)
Solution Manual Basic Electrical Engineering (2nd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Electric Machines (3rd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Circuits and Networks (A. Sudhakar & S. Palli Shyammohan)
Solution Manual Electrical and Electronic Technology (9th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electrical and Electronic Technology (10th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electric Motors and Drives : Fundamentals, Types and Applications (3rd Ed., Austin Hughes)
Solution Manual Modern Processor Design : Fundamentals of Superscalar Processors (John P. Shen)
Solution Manual Computer Networks : Principles, Technologies and Protocols for Network Design (N. Olifer & V. Olifer)
Solution Manual Computer Networking : Internet Protocols in Action (Jeanna Matthews)
Solution Manual Computer Organization (5th Ed., Hamacher et al.)

Solution Manual CMOS Digital Integrated Circuits : Analysis and Design (3rd Ed., Sung-Mo Kang & Yusuf Leblebici)
Solution Manual Introduction to Logic Design (1st Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic Design (2nd Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic Design (3rd Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic and Computer Design (Alan B Marcovitz)
Solution Manual Digital Principles and Design (Donald D. Givone)
Solution Manual Programmable Logic Controllers (3rd Ed., Frank Petruzella)
Solution Manual Antenna Theory and Design (2nd Ed., Stutzman & Thiele)
Solution Manual Antennas for All Applications (3rd Ed., John Kraus & Ronald Marhefka)
Solution Manual Principles of Neurocomputing for Science and Engineering (Fredric M. Ham & Ivica Kostanic)
Solution Manual Introduction to Algorithms (2nd Ed., Cormen, et al.)
Solution Manual Algorithms (Dasgupta, et al.)
Solution Manual Applied Operating Systems Concepts (Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating Systems Concepts with Java (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual C++ Program Design (3rd Ed., Cohoon & Davidson)
Solution Manual Java : Program Design 5.0 (Cohoon & Davidson)
Solution Manual Programming in C++ : Lessons and Applications (Timothy B. D'Orazio)
Solution Manual Applied C : An Introduction and More (Alice Fischer)
Solution Manual Programming Languages : Principles and Paradigms (1st Ed., Allen Tucker & Robert Noonan)
Solution Manual Programming Languages : Principles and Paradigms (2nd Ed., Allen Tucker & Robert Noonan)
Solution Manual Introduction to Parallel Computing (2nd Ed., Grama, Karypis, Kumar & Gupta)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael J Quinn)
Solution Manual Data Communications and Network Security (Houston H. Carr & Charles Snyder)
Solution Manual Data Communications and Networks (David Miller)

Solution Manual Management Information Systems (3rd Ed., Post & Anderson)
Solution Manual Management Information Systems (4th Ed., Post & Anderson)
Solution Manual Database Management Systems (3rd Ed. Post)
Solution Manual Management Information Systems (9th Ed., James A. O'Brien, George Marakas)
Solution Manual Introduction to Systems Analysis and Design (Whitten & Bentley)
Solution Manual Systems Analysis & Design : An Active Approach (2nd Ed., Marakas)
Solution Manual An Introduction to Object-Oriented Programming with Java (4th Ed., C. Thomas Wu - Otani)
Solution Manual An Introduction to Object-Oriented Programming with Java (5th Ed., C. Thomas Wu - Otani)
Solution Manual A Comprehensive Introduction to Object-Oriented Programming With Java (C. Thomas Wu)
Solution Manual Data Structures and the Java Collections Framework (1st Ed., William Collins)
Solution Manual Data Structures and the Java Collections Framework (2nd Ed., William Collins)
Solution Manual Data Structures and the Standard Template Library (William Collins)
Solution Manual Database System Concepts (4th Ed., Silberschatz)
Solution Manual Database System Concepts (5th Ed., Silberschatz)
Solution Manual Database System Concepts (6th Ed., Silberschatz, Korth & Sudarshan)
Solution Manual Database Management Systems (3rd Ed., Ramakrishnan & Gehrke)
Solution Manual Fundamentals of Network Security (Eric Maiwald)
Solution Manual Computing Concepts (1st Ed., Haag, et al.)
Solution Manual Computing Concepts (2nd Ed., Haag et al.)
Solution Manual Microsoft Office 2003 (Haag et al.)
Solution Manual Advanced Programming Using Visual Basic .NET (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Advanced Programming Using Visual Basic 2005 (3rd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming with Java (Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in C♯.Net (1st Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual C♯ 2005 (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Learning Programming Using Visual Basic.Net (Bill Burrows & Joe Lanford)
Solution Manual Programming in Visual Basic.NET : Visual Basic.NET 2005 (6th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual Basic .Net : 2003 Update Edition (5th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Survey of Operating Systems (2nd Ed., Jane Holcombe &

Charles Holcombe)
Solution Manual Principles of Voice and Data Communications (Regis J. Bates & Marcus Bates)
Solution Manual Mike Meyers' Network+ Guide To Managing and Troubleshooting Networks (Michael Meyers)
Solution Manual Introduction to Windows Server 2003 (Eric Ecklund)
Solution Manual Programming The Web : An Introduction (Barrie Sosinsky & Valda Hilley)
Solution Manual Programming The Web Using XML (Ellen Pearlman & Eileen Mullin)
Solution Manual Internet Marketing : Building Advantage in a Networked Economy (2nd Ed., Rafi Mohammed et al.)
Solution Manual Internet Technologies at Work (Fred T. Hofstetter)
Solution Manual Internet Literacy (4th Ed., Fred T. Hofstetter)
Solution Manual Software Engineering : A Practitioner's Approach (5th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (6th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (7th Ed., Roger Pressman)
Solution Manual Web Engineering : A Practioner's Approach (1st Ed., Roger S. Pressman & David Lowe)
Solution Manual Object-Oriented Software Engineering (Stephen Schach)
Solution Manual Object-Oriented and Classical Software Engineering (5th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (6th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (7th Ed., Steve Schach)
Solution Manual Introduction to Object-Oriented Analysis and Design (Steve Schach)
Solution Manual Communication Networks (2nd Ed., Alberto Leon-Garcia & Indra Widjaja)
Solution Manual Fundamentals of Digital Logic with Verilog Design (1st Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Fundamentals of Digital Logic with Verilog Design (2nd Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Continuous and Discrete Control Systems (John Dorsey)
Solution Manual Engineering Circuit Analysis (6th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Circuit Analysis (7th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Electromagnetics (7th Ed., William Hayt & John Buck)
Solution Manual Principles of Electronic Materials and Devices (2nd Ed., Safa O. Kasap)
Solution Manual Principles of Electronic Materials and Devices (3rd Ed., Safa O. Kasap)
Solution Manual Programming in Haskell (Graham Hutton)
Solution Manual Probability and Random Processes With Applications to

Signal Processing and Communications (Miller & Childers)
Solution Manual Logic in Computer Science : Modelling and Reasoning about Systems (2nd Ed., Michael Huth & Mark Ryan)
Solution Manual Introduction to Distributed Algorithms (2nd., Gerard Tel)
Solution Manual Information Theory, Inference and Learning Algorithms (David J. C. MacKay)
Solution Manual Digital Systems Engineering (William Dally & John Poulton)
Solution Manual Concepts in Programming Languages (by John Mitchell)
Solution Manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)
Solution Manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution Manual System Modeling and Analysis : Foundations of System Performance Evaluation (Hisashi Kobayashi & Brian Mark)
Solution Manual Wireless Communications (Andrea Goldsmith)
Solution Manual Testing of Digital Systems (N. K. Jha & S. Gupta)
Solution Manual Space-Time Coding (Hamid Jafarkhani)
Solution Manual Space-Time Block Coding for Wireless Communications (Erik Larsson & Petre Stoica)
Solution Manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution Manual Radio-Frequency Electronics : Circuits and Applications (Jon Hagen)
Solution Manual Photonic Devices (Jia-ming Liu)
Solution Manual Networking Wireless Sensors (Bhaskar Krishnamachari)
Solution Manual Mobile Wireless Communications (Mischa Schwartz)
Solution Manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution Manual Fundamentals of Wireless Communication (David Tse & Pramod Viswanath)
Solution Manual Fundamentals of Modern VLSI Devices (Yuan Taur & Tak H. Ning)
Solution Manual Electronic and Optoelectronic Properties of Semiconductor Structures (Jasprit Singh)
Solution Manual An Introduction to Statistical Signal Processing (Robert M. Gray)
Solution Manual An Introduction to Radio Frequency Engineering (Christopher Coleman)
Solution Manual Algebraic Codes for Data Transmission (Richard Blahut)
Solution Manual Fundamentals of Solid State Electronics (C.T. Sah)
Solution Manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed.,

Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Semiconductor Fabrication (Gary S. May, Simon M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (2nd Ed, Simon M. Sze)
Solution Manual Physics of Semiconductor Devices (3rd Ed., Simon M. Sze, Kwok K. Ng)
Solution Manual Electric Machinery (6th Ed., Fitzgerald)
Solution Manual Electric Machinery Fundamentals (4th Ed., Chapman)
Solution Manual Electric Machinery and Power System Fundamentals (Chapman)
Solution Manual Local Area Networks (2nd Ed., Keiser)
Solution Manual Signals and Systems : Analysis of Signals Through Linear Systems (1st Ed., M.J. Roberts)
Solution Manual Fundamentals of Signals and Systems (M.J. Roberts)
Solution Manual Introduction to Signals and Systems (Lindner)
Solution Manual Semiconductor Physics and Devices (3rd Ed., Donald Neamen)
Solution Manual An Introduction to Semiconductor Devices (Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (3rd Ed., Donald Neamen)
Solution Manual Electronic Circuit Analysis and Design (2nd Ed., Donald Neamen)
Solution Manual Design for Electrical and Computer Engineers (1st Ed., Ralph Ford & Chris Coulston)
Solution Manual Fundamentals of Modeling and Analyzing Engineering Systems (Cha, Rosenberg, Dym)
Solution Manual Linear Systems (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual A Linear Systems Primer (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual Principles of Linear Systems (Philip E. Sarachik)
Solution Manual Linear Systems Control : Deterministic and Stochastic Methods (Elbert Hendricks, Ole Jannerup & Paul Haase Sørensen)
Solution Manual Power Systems Harmonics : Fundamentals, Analysis and Filter Design (George J. Wakileh)
Solution Manual Principles of Adaptive Filters and Self-learning Systems (Anthony Zaknich)
Solution Manual Algebraic Methods for Nonlinear Control Systems (2nd Ed., Conte, Moog & Perdon)
Solution Manual Discrete-Time Control Systems (2nd Ed., K. Ogata)
Solution Manual Modern Control Engineering - Problems B (3rd Ed., K. Ogata)
Solution Manual Modern Control Engineering (4th Ed., K. Ogata)
Solution Manual Modern Control Engineering (5th Ed., K. Ogata)
Solution Manual Modern Control Engineering - International Version (5th Ed., K. Ogata)

Solution Manual LabVIEW 8 Student Edition (Bishop)
Solution Manual LabVIEW 2009 Student Edition (Bishop)
Solution Manual Learning with LabVIEW 2009 (Bishop)
Solution Manual Introduction to Feedback Control (Li Qiu & Kemin Zhou)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual Feedback Control of Dynamic Systems (4th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (5th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems - International Version (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Predictive Control with Constraints (Jan Maciejowski)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Engineering Problem Solving with C (3rd Ed., Etter)
Solution Manual Engineering Problem Solving with C++ (2nd Ed., Etter)
Solution Manual Process Control Instrumentation Technology (8th Ed., Johnson)
Solution Manual Electrical Power and Controls (2nd Ed., Skvarenina & DeWitt)
Solution Manual Electronics and Computer Math (8th Ed., Deem & Zannini)
Solution Manual Circuits, Signals, and Systems for Bioengineers : A MATLAB-Based Introduction (John Semmlow)
Solution Manual VLSI Test Principles and Architectures : Design for Testability (Laung-Terng Wang, Cheng-Wen Wu & Xiaoqing Wen)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Machine Vision : Theory, Algorithms, Practicalities (3rd Ed., E. R. Davies)
Solution Manual Essential Java for Scientists and Engineers (Brian D. Hahn & Katherine M. Malan)
Solution Manual Guide to Microsoft Excel 2002 for Scientists and Engineers (3rd Ed., Bernard V. Liengme)
Solution Manual 10-Key Touch Key : Developing Speed and Accuracy (Burton)
Solution Manual Introduction to C++ Programming, Brief Version (Y. Daniel Liang)
Solution Manual Introduction to C++ Programming, Comprehensive (Y. Daniel Liang)
Solution Manual C++ for Business Programmers (2nd Ed., John C. Molluzzo)
Solution Manual Introduction to Java Programming - Brief Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version -

International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (6th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming : Fundamentals First (6th Ed., Y. Daniel Liang)
Solution Manual Objects First With Java : A Practical Introduction Using BlueJ (3rd Ed., Barnes & Kolling)
Solution Manual Simply Java Programming : An Application-Driven™ Tutorial Approach (Deitel)
Solution Manual Java : An Introduction to Computing (Joel Adams, Larry R. Nyhoff & Jeffrey Nyhoff)
Solution Manual Advanced Java™ 2 Platform How to Program (Deitel & Santry)
Solution Manual SQL for SQL Server (Bijoy Bordoloi & Douglas B. Bock)
Solution Manual An Introduction to Programming Using Visual Basic 2005 (6th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2008 (7th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2010 (8th Ed., Schneider)
Solution Manual Simply Visual Basic .NET (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Simply Visual Basic 2005 (2nd Ed., Harvey & Paul Deitel & Associates)
Solution Manual Simply Visual Basic 2008 (3rd Ed., Harvey & Paul Deitel & Associates)
Solution Manual Visual Basic 2005 How to Program (3rd Ed., Deitel & Associates)
Solution Manual Visual Basic 2008 How to Program (4th Ed., Deitel & Associates)
Solution Manual An Introduction to Programming with Visual Basic 6.0 (4th Ed., Schneider)
Solution Manual Visual Basic.Net Programming (2nd Ed., Jeffrey Tsay)
Solution Manual Simply Visual Basic .NET (Harvey & Paul Deitel & Nieto)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual PC Systems, Installation and Maintenance (2nd Ed., R.P. Beales)
Solution Manual Introduction to Linear Programming (Leonid N. Vaserstein)
Solution Manual Electric Circuits Fundamentals (8th Ed., Thomas Floyd)
Solution Manual Introductory Circuit Analysis (11th Ed., Robert L. Boylestad)
Solution Manual Introductory Circuit Analysis (12th Ed., Robert L.

Boylestad)
Solution Manual Principles of Electric Circuits : Conventional Current Version (8th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Conventional Current Version (9th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (8th Ed., Thomas L. Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (9th Ed., Thomas L. Floyd)
Solution Manual Contemporary Electric Circuits : Insights and Analysis (2nd ed., Strangeway, Petersen, Gassert & Lokken)
Solution Manual Introductory Electronic Devices and Circuits : Electron Flow Version (7th Ed., Paynter)
Solution Manual Introductory Electronic Devices and Circuits : Conventional Flow Version (7th Ed., Paynter)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (2nd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (3rd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (2nd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (3rd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Introductory DC/AC Circuits (6th Ed., Nigel P. Cook)
Solution Manual Introductory DC/AC Electronics (6th Ed., Nigel P. Cook)
Solution Manual Electronic Devices : Conventional Current Version (7th Ed., Floyd)
Solution Manual Electronic Devices : Conventional Current Version (8th Ed., Floyd)
Solution Manual Electronic Devices : Electron Flow Version (7th, Floyd)
Solution Manual Electronic Devices : Electron Flow Version (8th, Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (7th Ed., Thomas L. Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (8th Ed., Floyd & Buchla)
Solution Manual Electronic Devices and Circuit Theory (9th Ed., Boylestad, Nashelsky)
Solution Manual Electronic Devices and Circuit Theory (10th Ed., Boylestad, Nashelsky)
Solution Manual The Science of Electronics : DC/AC (David M. Buchla, Thomas L. Floyd)
Solution Manual The Science of Electronics : Digital (Floyd & Buchla)
Solution Manual The Science of Electronics: Analog Devices (Floyd & Buchla)
Solution Manual Digital Electronics : A Practical Approach (7th Ed., Kleitz)
Solution Manual Digital Electronics : A Practical Approach (8th Ed.,

Kleitz)
Solution Manual Digital Systems : Principles and Applications (10th Ed., Tocci, Widmer & Moss)
Solution Manual Digital Electronics with VHDL - Quartus II Version (Kleitz)
Solution Manual Digital Fundamentals (9th Ed., Floyd)
Solution Manual Digital Fundamentals (10th Ed., Floyd)
Solution Manual Digital Fundamentals with PLD Programming (Thomas L. Floyd)
Solution Manual The 8051 Microcontroller (4th Ed., MacKenzie & Chung-Wei Phan)
Solution Manual The 8051 Microcontroller and Embedded Systems (2nd Ed., Muhammad Ali Mazidi, Janice Mazidi & Rolin McKinlay)
Solution Manual INTEL Microprocessors 8086/8088, 80186/80188, 80286, 80386, 80486, Pentium, Prentium ProProcessor, Pentium II, III, 4, (7th Ed., Barry B. Brey)
Solution Manual Microcontroller Technology : The 68HC11 (5th Ed., Peter Spasov)
Solution Manual PIC Microcontroller (Muhammad Ali Mazidi, Rolin McKinlay & Danny Causey)
Solution Manual HCS12 Microcontrollers and Embedded Systems : Using Assembly and C with CodeWarrior (Muhammad Ali Mazidi, Danny Causey & Janice Mazidi)
Solution Manual The x86 PC : Assembly Language, Design, and Interfacing (5th Ed., Muhammad Ali Mazidi, Janice Mazidi & Danny Causey)
Solution Manual The AVR Microcontroller and Embedded Systems : Using Assembly and C (Muhammad Ali Mazidi, Sarmad Naimi & and Sepehr Naimi)
Solution Manual Industrial Electronics (James A. Rehg, Glenn J. Sartori)
Solution Manual Programmable Controllers Using the Allen-Bradley SlC-500 Family (2nd Ed., Dave Geller)
Solution Manual Programmable Logic Controllers (James A. Rehg, Glenn J. Sartori)
Solution Manual Fundamentals of Programmable Logic Controllers, Sensors, and Communications (3rd Ed., Jon Stenerson)
Solution Manual An Introduction to Programming with Visual Basic 6.0, Update Edition (4th Ed., Schneider)
Solution Manual C++ Programming Today (1st Ed., Barbara Johnston)
Solution Manual C++ Programming Today (2nd Ed., Barbara Johnston)
Solution Manual Introduction to Data Communications and Networking (Wayne Tomasi)
Solution Manual Introduction to Telecommunications (2nd Ed., Martha Rosengrant)
Solution Manual Network Security Essentials : Applications and Standards (3rd Ed., William Stallings)
Solution Manual Network Security Essentials : Applications and Standards (4th Ed., William Stallings)
Solution Manual Information Security: Principles and Practices (Mark Merkow, James Breithaupt)

Solution Manual Principles and Practice of Information Security (Linda Volonino, Stephen R. Robinson)
Solution Manual Principles of Electronic Communication Systems (3rd Ed., Louis E. Frenzel)
Solution Manual Modern Electronic Communication (8th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Modern Electronic Communication (9th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Electronic Communications for Technicians (2nd ed., Tom Wheeler)
Solution Manual Concepts In Systems and Signals (2nd Ed., John D. Sherrick)
Solution Manual Understanding Fiber Optics (5th Ed., Jeff Hecht)
Solution Manual Understanding UNIX/LINUX Programming : A Guide to Theory and Practice (Bruce Molay)
Solution Manual Applying PIC18 Microcontrollers : Architecture, Programming, and Interfacing using C and Assembly (Barry Brey)
Solution Manual Electrical Power and Controls (2nd Ed., Timothy L. Skvarenina, William E. DeWitt)
Solution Manual Process Control Instrumentation Technology (8th Ed., Curtis Johnson)
Solution Manual Electrical Machines, Drives and Power Systems (6th Ed., Theodore Wildi)
Solution Manual Introduction to Vacuum Technology (David M. Hata)
Solution Manual Electronic Project Design and Fabrication (6th Ed., Ronald A. Reis)
Solution Manual Technology and Society (3rd Ed., Linda Hjorth, Barbara A. Eichler, Ahmed S. Khan, John Morello)
Solution Manual Solid State Electronic Devices (6th Ed., Ben Streetman, Sanjay Banerjee)
Solution Manual Approaching Quantum Computing (Dan C. Marinescu & Gabriela M. Marinescu)
Solution Manual Foundations of MEMS (Chang Liu)
Solution Manual Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (6th Ed., Ulaby, Michielssen & Ravaioli)
Solution Manual Basic Electromagnetics with Applications (Nannapaneni Narayana Rao)
Solution Manual Elements of Engineering Electromagnetics (6th Ed., Nannapaneni Narayana Rao)
Solution Manual Fundamentals of Electromagnetics for Electrical and Computer Engineering (Nannapaneni Narayana Rao)
Solution Manual Digital Design (4th Ed., M. Morris Mano & Michael D. Ciletti)
Solution Manual Digital Design : Principles and Practices Package (4th Ed., John F. Wakerly)
Solution Manual VHDL: A Starter's Guide (2nd Ed., Sudhakar Yalamanchili)
Solution Manual Computer Organization and Architecture : Designing for

Performance (7th Ed., William Stallings)
Solution Manual Computer Organization and Architecture : Designing for Performance (8th Ed., William Stallings)
Solution Manual Parallel Programming : Techniques and Applications Using Networked Workstations and Parallel Computers (2nd Ed., Barry Wilkinson & Michael Allen)
Solution Manual Fundamentals of Parallel Processing (Harry F. Jordan & Gita Alaghband)
Solution Manual Digital and Analog Communication Systems (7th Ed., Leon W. Couch)
Solution Manual Digital Communications (4th Ed., John Proakis)
Solution Manual Digital Communications (5th Ed., John Proakis)
Solution Manual Principles of Digital Communication and Coding (Andrew J. Viterbi, Jim K. Omura)
Solution Manual Modern Wireless Communications (Simon Haykin, Michael Moher)
Solution Manual Communication Systems Engineering (2nd Ed., John G. Proakis & Masoud Salehi)
Solution Manual ISDN and Broadband ISDN with Frame Relay and ATM (4th Ed., William Stallings)
Solution Manual Data and Computer Communications (8th Ed., William Stallings)
Solution Manual Cryptography and Network Security (4th Ed., William Stallings)
Solution Manual Cryptography and Network Security : Principles and Practice (5th Ed., William Stallings)
Solution Manual Computer Networking with Internet Protocols (William Stallings)
Solution Manual Local and Metropolitan Area Networks (6th Ed., William Stallings)
Solution Manual Probabilistic Systems and Random Signals (Abraham Haddad)
Solution Manual Error Control Coding (2nd Ed., Shu Lin & Daniel J. Costello)
Solution Manual Wireless Communications & Networks (2nd ed., William Stallings)
Solution Manual Wireless Communications and Networking (Jon W. Mark, Weihua Zhuang)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual Signals, Systems, and Transforms (3rd Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms - International Version (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Fundamentals of Signals and Systems Using the Web and Matlab (3rd Ed., Edward Kamen & Bonnie Heck)
Solution Manual Adaptive Filter Theory (4th Ed., Simon Haykin)
Solution Manual Neural Networks and Learning Machines (3rd Ed., Simon

Haykin)
Solution Manual Spectral Analysis of Signals (Petre Stoica & Randolph L. Moses)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (2nd Ed., Snyder)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (3rd Ed., Snyder)
Solution Manual Fluency with Information Technology, Brief Edition (Lawrence Snyder)
Solution Manual Excel 2003 Volume II: Advanced Concepts in Excel (5th Ed., Karen Jolly)
Solution Manual Focus on Excel 2003 (Julie Hayward Spooner)
Solution Manual Comprehensive Excel 2002 for Office XP (4th Ed., Karen Jolly)
Solution Manual Ethics for the Information Age (2nd Ed., Michael Quinn)
Solution Manual Ethics for the Information Age (3rd Ed., Michael Quinn)
Solution Manual Computer Science : An Overview (8th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (9th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (10th Ed., J. Glenn Brookshear)
Solution Manual Excel 2003 Volume 1 : Core Concepts in Excel (5th Ed., Karen J. Jolly)
Solution Manual Concise Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Concise Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Extended Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Extended Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Logic and Design of Computer Programs (Jim Messinger)
Solution Manual Absolute C++ (2nd Ed., Walter Savitch)
Solution Manual Absolute C++ (3rd Ed., Walter Savitch)
Solution Manual Absolute C++ (4th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ : The Object of Programming (5th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (6th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (7th Ed., Walter Savitch)
Solution Manual Problem Solving, Abstraction, and Design using C++ (4th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Problem Solving, Abstraction & Design Using C++ (5th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Starting Out with C++ : From Control Structures through Objects (5th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects (6th Ed., Tony Gaddis)

Solution Manual Starting Out with C++ : From Control Structures through Objects - Brief Version (6th Ed., Tony Gaddis)
Solution Manual Starting out with C++ Brief Version Updated (4th Ed., Gaddis & Krupnow)
Solution Manual Starting out with C++ Brief Version (5th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Brief Version Update, Visual C++ .NET (4th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Early Objects (5th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (6th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (7th Ed., Gaddis, Walters & Muganda)
Solution Manual C++ By Dissection (Ira Pohl)
Solution Manual Essential C++ for Engineers and Scientists (2nd Ed., Jeri Hanly)
Solution Manual C++ Coach : Essentials for Introductory Programming (Jeff Salvage)
Solution Manual C++ Primer (4th Ed., Stanley Lippman, Josée Lajoie & Barbara Moo)
Solution Manual Engineering Computation with MATLAB (1st Ed., David Smith)
Solution Manual Engineering Computation with MATLAB (2nd Ed., David Smith)
Solution Manual Absolute Java (1st Ed., Walter Savitch)
Solution Manual Absolute Java (2nd Ed., Walter Savitch)
Solution Manual Absolute Java (3rd Ed., Walter Savitch)
Solution Manual Absolute Java (4th Ed., Walter Savitch)
Solution Manual The Art and Science of Java (Eric Roberts)
Solution Manual Building Java Programs : A Back to Basics Approach (Stuart Reges & Martin Stepp)
Solution Manual Introduction to Programming in Java : An Interdisciplinary Approach (Robert Sedgewick & Kevin Wayne)
Solution Manual Java Foundations: Introduction to Program Design and Data Structures (John Lewis, Peter DePasquale & Joe Chase)
Solution Manual Starting Out with Java : Early Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (4th Ed., Gaddis)
Solution Manual Java Software Solutions (Java 5.0 version) : Foundations of Program Design (4th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (5th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (6th Ed., Lewis & Loftus)
Solution Manual Starting Out with Java : From Control Structures through Data Structures (Gaddis & Muganda)

Solution Manual Object of Java, The: Introduction to Programming Using Software Engineering Principles (2nd Ed, David Riley)
Solution Manual Object-Oriented Programming in Java : A Graphical Approach, Preliminary Edition (Kathryn E. Sanders & Andy van Dam)
Solution Manual Starting Out with Java 5 : Control Structures to Objects (Tony Gaddis)
Solution Manual Starting Out with Java 5 : Early Objects (Tony Gaddis)
Solution Manual Introduction to Programming Using Java : An Object-Oriented Approach (2nd Ed., David Arnow, Scott Dexter & Gerald Weiss)
Solution Manual Computing with Java (2nd Ed., Art Gittleman)
Solution Manual Problem Solving with Java, Update (2nd Ed., Elliot B. Koffman & Ursula Wolz)
Solution Manual Starting Out with Alice : A Visual Introduction to Programming (Tony Gaddis)
Solution Manual Problem Solving and Program Design in C (4th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (5th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (6th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Starting Out with Visual Basic 2005 (3rd Ed., Tony Gaddis & Kip Irvine)
Solution Manual Starting Out with Visual Basic 6 (Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Starting Out with Visual Basic.Net (2nd Ed., Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Computer Programming Fundamentals with Applications in Visual Basic® 6.0 (Mitchell Kerman & Ronald Brown)
Solution Manual Advanced VB.NET Alternate with VB.Net CD's (3rd Ed., Kip Irvine & Tony Gaddis)
Solution Manual Advanced Visual Basic 2005 (4th Ed., Kip Irvine & Tony Gaddis)
Solution Manual C# Software Solutions : Foundations of Program Design (John Lewis)
Solution Manual Problem Solving, Abstraction and Design Using C++, Visual C++.NET Edition (Frank Friedman & Elliot Koffman)
Solution Manual Ada 95 : Problem Solving and Program Design (3rd Ed., Michael Feldman & Elliot Koffman)
Solution Manual Programming and Problem Solving with Delphi (Mitchell Kerman)
Solution Manual C Program Design for Engineers (2nd Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Data Abstraction & Problem Solving with C++ (5th ed., Frank Carrano)
Solution Manual Data Structures and Algorithm Analysis in C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in C++ (3rd Ed., Mark Allen Weiss)
Solution Manual Data Abstraction and Problem Solving with C++ : Walls and Mirrors (4th Ed., Frank Carrano)

Solution Manual Data Structures and Problem Solving Using C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in Java (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures in Java : From Abstract Data Types to the Java Collections Framework (Simon Gray)
Solution Manual Data Abstraction and Problem Solving with Java (2nd Ed., Frank Carrano & Janet Prichard)
Solution Manual Data Structures and Other Objects Using Java (3rd Ed., Michael Main)
Solution Manual Data Structures and Problem Solving Using Java (3rd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Problem Solving Using Java (4th Ed., Mark Allen Weiss)
Solution Manual Java Software Structures : Designing and Using Data Structures (2nd Ed., John Lewis, Joseph Chase)
Solution Manual The Object of Data Abstraction and Structures (using Java) (David Riley)
Solution Manual Classic Data Structures in Java (Timothy Budd)
Solution Manual Data Structures in Java (Thomas A. Standish)
Solution Manual Data Structures, Algorithms and Software Principles in C (Thomas A. Standish)
Solution Manual Introduction to the Design and Analysis of Algorithms (1st Ed., Anany Levitin)
Solution Manual Introduction to the Design and Analysis of Algorithms (2nd Ed., Anany Levitin)
Solution Manual Algorithm Design (Jon Kleinberg & Éva Tardos)
Solution Manual Data Structures and Algorithm Analysis in C (2nd Ed., Mark Allen Weiss)
Solution Manual Computer Algorithms : Introduction to Design and Analysis (3rd Ed., Sara Baase & Allen Van Gelder)
Solution Manual Artificial Intelligence : Structures and Strategies for Complex Problem Solving (6th Ed., George Luger)
Solution Manual Artificial Intelligence : A Modern Approach (2nd Ed., Stuart Russell & Peter Norvig)
Solution Manual The Complete A+ Guide to PC Repair (3rd Ed., Cheryl Schmidt)
Solution Manual The Complete A+ Guide to PC Repair (4th Ed., Cheryl Schmidt)
Solution Manual Complete Computer Repair Textbook (4th Ed., Cheryl Schmidt)
Solution Manual Computer Systems Organization and Architecture (John D. Carpinelli)
Solution Manual CMOS VLSI Design: A Circuits and Systems Perspective (3rd Ed., Neil Weste & David Harris)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (4th Ed., Edward Angel)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (5th Ed., Edward Angel)
Solution Manual File Structures : An Object-Oriented Approach with C++

(3rd Ed., Michael J. Folk, Bill Zoellick & Greg Riccardi)
Solution Manual Oracle 10g Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Databases, Types and the Relational Model (3rd Ed., C. J. Date & Hugh Darwen)
Solution Manual Fundamentals of Database Systems (5th Ed., Ramez Elmasri & Shamkant Navathe)
Solution Manual Database Systems : An Application-Oriented Approach, Introductory Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual Database Systems : An Application Oriented Approach, Complete Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (4th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (5th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual Database Systems : The Complete Book (2nd Ed., Hector Garcia-Molina, Jeffrey D. Ullman, Jennifer Widom)
Solution Manual A First Course in Database Systems (3rd Ed., Jeffrey D. Ullman, Jennifer Widom)
Solution Manual Fundamentals of Database Systems/Oracle 9i Programming (4th Ed., Ramez Elmasri, Shamkant B. Navathe & Rajshekhar Sunderraman)
Solution Manual An Introduction to Database Systems (8th Ed., C.J. Date)
Solution Manual Oracle 9i Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Elements of Information Theory (1st Ed., Thomas M. Cover & Joy A. Thomas)
Solution Manual Principles of Database Systems with Internet and Java Applications (Greg Riccardi)
Solution Manual Introduction to Data Mining (Pang-Ning Tan, Michael Steinbach & Vipin Kumar)
Solution Manual Data Mining: A Tutorial Based Primer (Richard Roiger & Michael Geatz)
Solution Manual Learning SQL : A Step-by-Step Guide Using Access (Sikha Bagui, Richard Earp)
Solution Manual Learning SQL : A Step-By-Step Guide Using Oracle (Richard Earp, Sikha Bagui)
Solution Manual Access 2007 Guidebook (6th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Access 2003 Guidebook for Office XP (5th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Implementing Databases in Oracle 9i (John Day & Craig Van Slyke)
Solution Manual Web 101: Making the Net Work for You (2nd Ed., Wendy Lehnert)
Solution Manual Web 101 (3rd Ed., Wendy G. Lehnert & Richard L. Kopec)

Solution Manual Web Developer Foundations : Using XHTML (2nd Ed., Terry Felke-Morris)
Solution Manual Web Development & Design Foundations With XHTML (3rd Ed., Terry Felke-Morris)
Solution Manual Web Development and Design Foundations with XHTML (4th Ed., Terry Felke-Morris)
Solution Manual Internet Effectively : A Beginner's Guide to the World Wide Web (Tyrone Adams & Sharon Scollard)
Solution Manual Light on the Web : Essentials to Making the 'Net Work for You (Wendy G. Lehnert)
Solution Manual Programming the World Wide Web (3rd Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (4th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (5th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (6th Ed., Robert W. Sebesta)
Solution Manual XML: Language Mechanics and Applications (Dwight Peltzer)
Solution Manual Practical Perl with CGI Applications (Elizabeth Chang)
Solution Manual Developing Web Applications with Active Server Pages (Thom Luce)
Solution Manual Structure and Interpretation of Signals and Systems (Edward A. Lee & Pravin Varaiya)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (2nd Ed., Thomas Sudkamp)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (3rd Ed., Thomas Sudkamp)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Software Quality Assurance : From Theory to Implementation (Daniel Galin)
Solution Manual Object Oriented Software Development Using Java (2nd Ed., Xiaoping Jia)
Solution Manual Introduction to the Team Software Process (Watts S. Humphrey)
Solution Manual Software Project Management : A Real-World Guide to Success (Joel Henry)
Solution Manual Software Engineering (7th Ed., Ian Sommerville)
Solution Manual Software Engineering (8th Ed., Ian Sommerville)
Solution Manual Software Engineering (9th Ed., Ian Sommerville)
Solution Manual Software Engineering (3rd Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Software Engineering : Theory and Practice (4th Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Object-Oriented Programming featuring Graphical Applications in Java (Michael Laszlo)
Solution Manual Project-Based Software Engineering : An Object-Oriented Approach (Evelyn Stiller & Cathie LeBlanc)

Solution Manual Engineering of Software, The: A Technical Guide for the Individual (Dick Hamlet & Joe Maybee)
Solution Manual Concepts of Programming Languages (7th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (8th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (9th Ed., Robert W. Sebesta)
Solution Manual Advanced Java : Internet Applications (2nd Ed., Art Gittleman)
Solution Manual Objects to Components with Java 2 Platform (Art Gittleman)
Solution Manual C for Java Programmers (Tomasz Muldner)
Solution Manual Pointers on C (Kenneth Reek)
Solution Manual C++ Programming with Design Patterns Revealed (Tomasz Muldner)
Solution Manual The C++ Programming Language (3rd Ed., Bjarne Stroustrup)
Solution Manual Operating Systems : A Systematic View (6th Ed., William S. Davis & T.M. Rajkumar)
Solution Manual Unix: The Textbook (2nd Ed., Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Operating Systems (3rd Ed., Gary Nutt)
Solution Manual LINUX & UNIX Programming Tools : A Primer for Software Developers (Syed Mansoor Sarwar & Khaled H. Al-Saqabi)
Solution Manual Addison-Wesley's Interactive Linux Tutorial and Reference (Edutrends, Inc.)
Solution Manual Linux : The Textbook (Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Kernel Projects for Linux (Gary Nutt)
Solution Manual OSP : An Environment for Operating System Projects (Michael Kifer & Scott A. Smolka)
Solution Manual Distributed Computing : Principles and Applications (M.L. Liu)
Solution Manual Distributed Operating Systems and Algorithm Analysis (Randy Chow & Theodore Johnson)
Solution Manual Mastering Networks : An Internet Lab Manual (Jorg Liebeherr & Magda El Zarki)
Solution Manual Computer Networking Complete Package (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach Featuring the Internet (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (4th Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (5th Ed., James Kurose & Keith Ross)
Solution Manual Producing Great Sound for Film and Video (3rd Ed., Jay Rose)
Solution Manual Network Management : Principles and Practice (Mani Subramanian)

Solution Manual Computer Security : Art and Science (Matt Bishop)
Solution Manual Introduction to Computer Security (Matt Bishop)
Solution Manual How to Break Software Security (James A. Whittaker &
Herbert H. Thompson)
Solution Manual Parallel Programming in C with MPI and Open MP
(Michael Quinn)
Solution Manual Modern Recording Techniques (6th Ed., Miles Huber &
Runstein)
Solution Manual Creating Powerful Radio : Getting, Keeping and Growing
Audiences News, Talk, Information & Personality Broadcast, HD,
Satellite & Internet (Valerie Geller)
Solution Manual Electronic Media Law and Regulation (5th Ed., Kenneth
Creech)
Solution Manual Electronic Media Management, Revised (5th Ed., Pringle
& Starr)
Solution Manual Convergent Journalism an Introduction: Writing and
Producing Across Media (Quinn & Filak)
Solution Manual Flash Journalism : How to Create Multimedia News
Packages (Mindy McAdams)

List of Solutions Manuals

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES & BHUTAN".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=VQJ2M78Y

I do not review the forums, just send me an email.

- Math, Statistics & Probability :

Solution manual Advanced Engineering Mathematics (8th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (9th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (2nd Ed, Michael Greenberg)
Solution manual Advanced Engineering Mathematics (6th Ed., Peter O'Neil)
Solution manual Advanced Modern Engineering Mathematics (3rd Ed., Glyn James)
Solution manual Modern Engineering Mathematics (4th Ed., Glyn James)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., Henry J. Ricardo)
Solution manual Elementary Differential Equations (7th Ed., Boyce)
Solution manual Elementary Differential Equations (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations (9th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (7th Ed., Boyce & Diprima)

Solution manual Elementary Differential Equations and Boundary Value Problems (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (9th Ed., Boyce & Diprima)
Solution manual Differential Equations : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Differential Equations with Boundary Value Problems : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Calculus : Early Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Introduction to the Finite Element Method: Theory, Programming and Applications (Erik G. Thompson)
Solution manual Mathematics for Engineers : A Modern Interactive Approach (3rd., Anthony Croft & Robert Davison)
Solution manual Measurement and Data Analysis for Engineering and Science (Patrick F Dunn)
Solution manual Elementary Linear Algebra (4th Ed., Stephen Andrilli & David Hecker)
Solution manual Elementary Linear Algebra Edition Abridged (9th Ed., Anton & Rorres)
Solution manual Elementary Linear Algebra (9th Ed., Anton)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Anton & Rorres)
Solution manual Boundary Value Problems and Partial Differential Equations (6th Ed., David Powers)
Solution manual Introductory Statistics : Using Technology (5th Ed., Prem S. Mann)
Solution manual Introductory Statistics (6th Ed., Prem S. Mann)
Solution manual Introductory Statistics (7th Ed., Prem S. Mann)
Solution manual Modern Algebra : An Introduction (6th Ed., John Durbin)

Solution manual The Art and Craft of Problem Solving (2nd Ed., Paul Zeitz)
Solution manual Introductory Statistics for the Behavioral Sciences (6th Ed., Welkowitz, Cohen & Ewen)
Solution manual Statistics : Principles and Methods (5th Ed., Richard Johnson)
Solution manual Statistics : Principles and Methods (6th Ed., Richard Johnson)
Solution manual Statistical Bioinformatics : with R (Sunil K. Mathur)
Solution manual Parameter Estimation and Inverse Problems (Richard Aster, Brian Borchers & Clifford Thurber)
Solution manual Codes : An Introduction to Information Communication and Cryptography (Norman L. Biggs)
Solution manual Geometry and Its Applications (2nd Ed., Walter A. Meyer)
Solution manual Elementary Differential Geometry (2nd Ed., A.N. Pressley)
Solution manual Fractal Geometry : Mathematical Foundations and Applications (2nd Ed., Kenneth Falconer)
Solution manual Analytical and Computational Methods of Advanced Engineering Mathematics (Grant B. Gustafson & Calvin H. Wilcox)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (4th Ed., Daniel Solow)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (5th Ed., Daniel Solow)
Solution manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution manual Modeling Random Processes for Engineers and Managers (James Solberg)
Solution manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Applied Statistics for Engineers and Physical Scientists (3rd Ed., Johannes Ledolter & Robert Hogg)
Solution manual Applied Statistics and Probability for Engineers (3rd Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (4th Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (5th Ed., Montgomery & Runger)
Solution manual Engineering Statistics (3rd Ed., Montgomery, Runger & Hubele)
Solution manual Engineering Statistics (4th Ed., Montgomery, Runger & Hubele)
Solution manual Introduction to Statistical Quality Control (5th Ed., Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Montgomery)

Solution manual Calculus : One Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (8th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Squaring the Circle : Geometry in Art and Architecture (Paul Calter)
Solution manual Technical Mathematics (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus, Canadian Edition (Paul Calter & Michael Calter)
Solution manual Techniques of Problem Solving (Luis Fernández, Haedeh Gooransarab)
Solution manual Probability and Statistics in Engineering (4th Ed., Hines, Montgomery, Goldsman & Borror)
Solution manual A First Course in Design and Analysis of Experiments (Gary W. Oehlert)
Solution manual Design and Analysis of Experiments (6th Ed., Douglas Montgomery)
Solution manual Design and Analysis of Experiments (7th Ed., Douglas Montgomery)
Solution manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution manual Introduction to the Design & Analysis of Experiments (Canavos & Koutrouvelis)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed., Wadsworth, Stephens, Godfrey)
Solution manual Essential Statistics for Economics, Business and Management (Teresa Bradley)
Solution manual Statistics and Econometrics : Methods and Applications (Ashenfelter, Levine & Zimmerman)
Solution manual Applied Combinatorics (5th Ed., Alan Tucker)
Solution manual Vector Calculus (Miroslav Lovric)
Solution manual Applied Multivariate Techniques (Subhash Sharma)
Solution manual Mathematical Modeling (3rd Ed., Mark Meerschaert)
Solution manual Discrete Mathematics : Mathematical Reasoning and Proof with Puzzles, Patterns, and Games (Douglas Ensley, J. Winston Crawley)
Solution manual Probability, Random Variables and Random Signal Principles (4th Ed., Peyton Z., Jr. Peebles)
Solution manual Introduction to C++, Excel MATLAB & Basic Engineering Numerical Methods V1.1 (Harvey Stenger & Charles Smith)
Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (1st Ed., Amos Gilat & Vish Subramaniam)

Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (2nd Ed., Amos Gilat & Vish Subramaniam)
Solution manual MATLAB : An Introduction with Applications (2nd Ed., Amos Gilat)
Solution manual MATLAB : An Introduction with Applications (3rd Ed., Amos Gilat)
Solution manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett & Horrell)
Solution manual Understanding Analysis (Stephen Abbott)
Solution manual Time Series Analysis With Applications in R (2nd Ed., Jonathan D. Cryer & Kung-Sik Chan)
Solution manual Time Series Analysis and Its Applications : With R Examples (2nd Ed., Robert Shumway & David Stoffer)
Solution manual Doing Statistics for Business with Excel : Data, Inference, and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Engineering with Excel (3rd Ed., Ronald W. Larsen)
Solution manual Spreadsheet Tools for Engineers Using Excel 2007 (Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (2nd Ed. Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (3rd Ed. Byron Gottfried)
Solution manual Introduction to Matlab 7 (Etter, Kuncicky & Moore)
Solution manual Introduction to Matlab 6 for Engineers (1st Ed., William J Palm III)
Solution manual Introduction to Matlab 7 for Engineers (2nd Ed., William J Palm III)
Solution manual A Concise Introduction to MATLAB (William J Palm III)
Solution manual Numerical Methods for Engineers (4th Ed. Steven Chapra, Raymond Canale)
Solution manual Numerical Methods for Engineers (5th Ed. Steven Chapra, Raymond Canale)
Solution manual Numerical Methods for Engineers (6th Ed. Steven Chapra, Raymond Canale)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (1st Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (2nd Ed., Steven Chapra)
Solution manual MATLAB for Engineers (1st Ed., Holly Moore)
Solution manual MATLAB for Engineers (2nd Ed., Holly Moore)
Solution manual Statistics for Engineers and Scientists (1st Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (2nd Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (3rd Ed., William Navidi)
Solution manual Principles of Statistics for Engineers and Scientists

(William Navidi)
Solution manual Probability (Jim Pitman)
Solution manual Basic Probability Theory (Robert B. Ash)
Solution manual Stochastic Calculus for Finance (Steven E. Shreve)
Solution manual Markov Processes for Stochastic Modeling (Oliver Ibe)
Solution manual Mathematical Statistics with Applications (K.M. Ramachandran & Chris Tsokos)
Solution manual Probability : A Graduate Course (Allan Gut)
Solution manual Linear Algebra Done Right (2nd Ed., Sheldon Axler)
Solution manual Precalculus : A Prelude to Calculus (Sheldon Axler)
Solution manual Statistics for Business (Derek Waller)
Solution manual An Introduction to the Mathematics of Financial Derivatives (2nd Ed., Salih Neftci)
Solution manual Elementary Number Theory with Applications (2nd Ed., Thomas Koshy)
Solution manual Introduction to Probability Models (9th Ed., Sheldon Ross)
Solution manual Introduction to Probability Models (10th Ed., Sheldon Ross)
Solution manual Introductory Statistics (2nd Ed., Sheldon Ross)
Solution manual Introduction to Probability and Statistics for Engineers and Scientists (4th Ed., Sheldon Ross)
Solution manual Basic Mathematics through Applications (4th Ed. by Akst, Bragg)
Solution manual Developmental Mathematics (6th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics (7th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (1st Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (2nd Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Essential Mathematics (2nd Ed., Margaret Lial & Stanley Salzman)
Solution manual Essential Mathematics (3rd Ed., Margaret Lial & Stanley Salzman)
Solution manual Prealgebra & Introductory Algebra (2nd Ed. by Elayn El Martin-Gay)
Solution manual Prealgebra (5th Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Prealgebra (5th Ed., Elayn El Martin-Gay)
Solution manual Prealgebra : An Integrated Approach (Lial & Hestwood)
Solution manual Integrated Arithmetic and Basic Algebra (4th Ed., Jordan & Palow)
Solution manual Introductory Algebra through Applications (1st Ed., Akst & Bragg)
Solution manual Introductory Algebra through Applications (2nd Ed., Akst & Bragg)
Solution manual Beginning Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen R. Angel)

Solution manual Intermediate Algebra with Applications & Visualization (3rd Ed., Rockswold & Krieger)
Solution manual Intermediate Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (3rd Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Algebra for College Students (4th Ed., Mark Dugopolski)
Solution manual Algebra for College Students (5th Ed., Mark Dugopolski)
Solution manual Algebra For College Students (6th Ed., Robert F Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (6th Ed., Lial, Hornsby & McGinnis)
Solution manual Statistics, Data Analysis, and Decision Modeling (3rd Ed., James Evans)
Solution manual Statistics, Data Analysis, and Decision Modeling (4th Ed., James Evans)
Solution manual College Geometry : A Discovery Approach (2nd Ed., David Kay)
Solution manual College Geometry : Using The Geometer's Sketchpad - Preliminary Edition (Barbara Reynolds & William Fenton)
Solution manual College Geometry : A Problem Solving Approach with Applications (2nd Ed., Musser, Trimpe & Maurer)
Solution manual A Survey of Mathematics with Applications (8th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition (8th Ed., Angel, Abbott & Runde)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas: Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Thinking : Problem-Solving and Proofs (2nd Ed., John P. D'Angelo & Douglas B. West)
Solution manual Thinking Mathematically (4th Ed., Robert F. Blitzer)
Solution manual Introduction to Mathematical Thinking: Algebra and Number Systems (Will J. Gilbert & Scott A. Vanstone)
Solution manual Mathematical Reasoning : Writing and Proof (1st Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning : Writing and Proof (2nd Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning for Elementary Teachers (4th Ed., Calvin T. Long & Duane W. DeTemple)
Solution manual Mathematical Reasoning for Elementary Teachers (5th Ed., Long, DeTemple & Millman)
Solution manual Mathematics for Elementary School Teachers (4th Ed., O'Daffer, Charles, Cooney, Dossey & Schielack)

Solution manual Mathematics for Elementary Teachers (2nd Ed., Sybilla Beckmann)
Solution manual Finite Mathematics and Calculus with Applications (7th Ed., Lial, Greenwell & Ritchey)
Solution manual Finite Mathematics and Calculus with Applications (8th Ed., Lial, Greenwell & Ritchey)
Solution manual Additional Calculus Topics (11th Ed., Barnett, Ziegler & Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & Wood)
Solution manual Finite Mathematics for Business, Economics, Life Sciences and Social Sciences (11th Ed., Barnett, Ziegler, Byleen)
Solution manual Finite Mathematics (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus and Its Applications (9th Ed., Bittinger & Ellenbogen)
Solution manual Calculus for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Calculus with Applications (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus with Applications : Brief Version (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Concepts of Calculus with Applications (Martha Goshaw)
Solution manual University Calculus : Elements with Early Transcendentals (Hass, Weir & Thomas, Jr.)
Solution manual Thomas' Calculus, Early Transcendentals: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual Thomas' Calculus: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual University Calculus : Alternate Edition (Hass, Weir & Thomas, Jr.)
Solution manual Differential Equations Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Differential Equations and Boundary Value Problems : Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations with Boundary Value Problems (6th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations (6th Ed., Edwards & Penney)
Solution manual Fundamentals of Differential Equations (7th Ed., Nagle, Saff & Snider)
Solution manual Fundamentals of Differential Equations with Boundary Value Problems (5th Ed., Nagle, Saff & Snider)
Solution manual Differential Equations and Linear Algebra (3rd Ed., Goode & Annin)
Solution manual Discrete Mathematical Structures (6th Ed., Kolman, Busby & Ross)

Solution manual College Algebra Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra : Graphs and Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (3rd Ed., Judith A. Beecher, Judith A. Penna & Marvin L. Bittinger)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry for College Readiness (Margaret L. Lial & John Hornsby)
Solution manual Algebra and Trigonometry Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Algebra and Trigonometry : Graphs & Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Trigonometry : A Unit Circle Approach (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus (4th Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus : Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Precalculus : Functions and Graphs (3rd Ed. Mark Dugopolski)
Solution manual Precalculus : Graphs & Models and Graphing (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Discrete and Combinatorial Mathematics (5th ed., Ralph P. Grimaldi)
Solution manual Discrete Mathematics (Sherwood Washburn, Thomas Marlowe & Charles T. Ryan)
Solution manual Discrete Mathematics (5th ed., John Dossey, Albert Otto, Lawrence Spence & Charles Vanden Eynden)
Solution manual Mathematics for New Technologies (Don Hutchison & Mark Yannotta)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures: With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual The Finite Element Method in Engineering (4th Ed., by Rao)
Solution manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kelton)
Solution manual Simulation Modeling and Analysis (4th Ed., Averill Law)
Solution manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution manual Algebra : Form and Function (William McCallum, Eric

Connally & Deborah Hughes-Hallett)
Solution manual Algebra : Form and Function, Preliminary Edition (William McCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Applied Calculus (2nd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (3rd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (4th Ed., Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (3rd Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (4th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (5th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Single Variable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (5th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (5th Ed., Deborah Hughes-Hallett)
Solution manual Functions Modeling Change : A Preparation for Calculus - Texas Edition (2nd Ed., Eric Connally, Deborah Hughes-Hallett & Andrew M. Gleason)
Solution manual Functions Modeling Change : A Preparation for Calculus (2nd Ed., Eric Connally, Deborah Hughes-Hallett, et al.)
Solution manual Functions Modeling Change : A Preparation for Calculus (3rd Ed., Eric Connally)
Solution manual Differential Equations (A. King, J. Billingham, S. Otto)
Solution manual Regression Methods in Biostatistics : Linear, Logistic, Survival, and Repeated Measures Models (Eric Vittinghoff, David Glidden, Stephen Shiboski, Charles McCulloch)
Solution manual A Modern Introduction to Probability and Statistics : Understanding Why and How (F.M. Dekking, C. Kraaikamp, H.P. Lopuhaä, L.E. Meester)
Solution manual Statistical Methods for the Analysis of Repeated Measurements (Charles S. Davis)
Solution manual Bayesian Core : A Practical Approach to Computational Bayesian Statistics (Jean-Michel Marin, Christian Robert)
Solution manual The Bayesian Choice : From Decision-Theoretic Foundations to Computational Implementation (2nd Ed., Christian Robert)
Solution manual Essentials of Stochastic Processes (Rick Durrett)

Solution manual Methods of Multivariate Statistics (Muni Srivastava)
Solution manual Regression Analysis : Theory, Methods, and Applications (Ashish Sen & Muni Srivastava)
Solution manual Applied Probability and Statistics (Mario Lefebvre)
Solution manual Basic Probability Theory with Applications (Mario Lefebvre)
Solution manual Foundations of Hyperbolic Manifolds (2nd Ed., John Ratcliffe)
Solution manual Fourier and Laplace Transforms (R. J. Beerends , H. G. ter Morsche)
Solution manual Infinite-Dimensional Dynamical Systems (James C. Robinson)
Solution manual Mathematical Methods for Physics and Engineering, (3rd Ed., Riley, Hobson & Bence)
Solution manual Numerical Methods in Engineering with MATLAB (Jaan Kiusalaas)
Solution manual Numerical Methods in Engineering with Python (Jaan Kiusalaas)
Solution manual An Introduction to Numerical Analysis (Endre Suli and David Mayers)
Solution manual Fundamentals of Engineering Numerical Analysis (Parviz Moin)
Solution manual Statistical Design (George Casella)
Solution manual Statistical Inference (2nd Ed., George Casella, Roger L. Berger)
Solution manual Monte Carlo Statistical Methods (2nd Ed., Christian P. Robert, George Casella)
Solution manual Introducing Monte Carlo Methods with R (Christian Robert & George Casella)
Solution manual Introduction to Mathematical Structures and Proofs (Larry J. Gerstein)
Solution manual Analyzing Categorical Data (Jeffrey S. Simonoff)
Solution manual Fundamentals of Complex Analysis with Applications to Engineering, Science, and Mathematics (3rd Ed., E. Saff & Arthur Snider)
Solution manual Probability & Statistics for Engineers & Scientists (8th Ed., Walpole, Myers, Ye)
Solution manual Statistics for Engineering and the Sciences (5th Ed., Mendenhall & Sincich)
Solution manual A Second Course in Statistics : Regression Analysis (6th Ed., Mendenhall & Sincich)
Solution manual Miller & Freund's Probability and Statistics for Engineers (7th Ed., Johnson, Miller, Freund)
Solution manual Miller & Freund's Probability and Statistics for Engineers (8th Ed., Johnson, Miller, Freund)
Solution manual Numerical Methods Using Matlab (4th Ed., Mathews & Fink)
Solution manual Applied Numerical Analysis Using MATLAB (2nd Ed., Laurene v. Fausett)
Solution manual Applied Numerical Analysis (7th Ed., Curtis F. Gerald,

Patrick O. Wheatley)
Solution manual Friendly Introduction to Numerical Analysis (Bradie)
Solution manual Elementary Linear Algebra (2nd Ed., Spence, Insel & Friedberg)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Kolman & Hill)
Solution manual Introductory Linear Algebra : An Applied First Course (8th Ed., Kolman & Hill)
Solution manual Linear Algebra with Applications (6th Ed., S. Leon)
Solution manual Linear Algebra with Applications (7th Ed., S. Leon)
Solution manual Linear Algebra for Engineers and Scientists Using Matlab (Hardy)
Solution manual Linear Algebra with Applications (3rd Ed., Bretscher)
Solution manual Linear Algebra with Applications (4th Ed., Bretscher)
Solution manual Modern Matrix Algebra (Hill & Kolman)
Solution manual Matrix Methods : Applied Linear Algebra (3rd Ed., Richard Bronson & Gabriel B. Costa)
Solution manual A Transition to Abstract Mathematics : Learning Mathematical Thinking and Writing (2nd Ed., Randall Maddox)
Solution manual Partial Differential Equations and Boundary Value Problems with Fourier Series (2nd ed., Asmar)
Solution manual Applied Partial Differential Equations (4th Ed., Haberman)
Solution manual Technical Calculus (5th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics with Calculus (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Introductory Mathematics (4th Ed., Cook)
Solution manual Mathematics for the Technical Trades (Cook)
Solution manual College Mathematics (7th Ed., Cleaves & Hobbs)
Solution manual Fundamentals of Statistics (2nd Ed., Michael III Sullivan)
Solution manual Fundamentals of Statistics (3rd Ed., Michael III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (2nd Ed., Michael III Sullivan)
Solution manual Modern Elementary Statistics (12th Ed., John E. Freund, Benjamin M. Perles)
Solution manual Statistics : The Art and Science of Learning From Data (Agresti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (2nd Ed., Agresti & Franklin)
Solution manual Elementary Statistics : Picturing the World (3rd Ed., Larson & Farber)
Solution manual Elementary Statistics : Picturing the World (4th Ed., Larson & Farber)
Solution manual A First Course in Statistics (9th Ed., McClave & Sincich)

Solution manual A First Course in Statistics (10th Ed., McClave & Sincich)
Solution manual Statistics (10th Ed., McClave & Terry Sincich)
Solution manual Statistics (11th Ed., McClave & Terry Sincich & William Mendenhall)
Solution manual Interactive Statistics (3rd Ed., Martha Aliaga & Brenda Gunderson)
Solution manual Statistics for the Life Sciences (3rd Ed., Samuels & Witmer)
Solution manual Applied Statistics and the SAS Programming Language (5th Ed., Cody & Smith)
Solution manual Biostatistics for the Health Sciences (R. Clifford Blair & Richard Taylor)
Solution manual Biostatistics : How It Works (Steve Selvin)
Solution manual Business Statistics : First Course (4th Ed., Levine, Krehbiel & Berenson)
Solution manual Business Statistics : First Course (5th Ed., Levine, Krehbiel & Berenson)
Solution manual Course in Business Statistics (4th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision Making Approach (6th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (7th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (8th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Statistics for Business & Economics (10th Ed., McClave, Benson & Sincich)
Solution manual Statistics for Managers Using Excel (5th Ed., Levine)
Solution manual Statistics for Managers Using Microsoft Excel (4th Ed., Levine, Stephan, Krehbiel & Berenson)
Solution manual Statistics for Business and Economics (5th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (6th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (7th Ed., Newbold, Carlson & Thorne)
Solution manual Basic Business Statistics : Concepts and Applications (10th Ed., Berenson, Krehbiel & Levine)
Solution manual Basic Business Statistics (11th Ed., Berenson, Levine & Krehbiel)
Solution manual John E. Freund's Mathematical Statistics with Applications (7th Ed., Miller)
Solution manual Probability and Statistical Inference (7th Ed., Hogg & Tanis)
Solution manual Probability and Statistical Inference (8th Ed., Hogg & Tanis)
Solution manual Introduction to Mathematical Statistics (6th Ed., Hogg, Craig & McKean)
Solution manual Introduction to Mathematical Statistics and Its

Applications (4th Ed., Larsen & Marx)
Solution manual A Brief Course in Mathematical Statistics (Hogg & Tanis)
Solution manual Fundamentals of Probability, with Stochastic Processes (3rd Ed., Saeed Ghahramani)
Solution manual A First Course in Probability (7th Ed., Sheldon Ross)
Solution manual A First Course in Probability (8th Ed., Sheldon Ross)
Solution manual Applied Multivariate Statistical Analysis (6th Ed., Johnson & Wichern)
Solution manual Multivariate Data Analysis (6th Ed., Hair, Black, Babin, Anderson & Tatham)
Solution manual Multivariate Data Analysis (7th Ed., Hair, Black, Babin, Anderson)
Solution manual Essential MATLAB for Engineers and Scientists (3rd Ed., Brian Hahn & Dan Valentine)
Solution manual Essential MATLAB for Engineers and Scientists (4th Ed., Brian Hahn & Dan Valentine)
Solution manual Introduction to Applied Statistical Signal Analysis : Guide to Biomedical and Electrical Engineering Applications (3rd Ed. Richard Shiavi)
Solution manual Construction Mathematics (Surinder Virdi & Roy Baker)
Solution manual Numerical Methods in Biomedical Engineering (Stanley Dunn, Alkis Constantinides & Prabhas Moghe)
Solution manual Probability and Statistics with Integrated Software Routines (Ronald Deep)
Solution manual Finite Element Analysis with Error Estimators : An Introduction to the FEM and Adaptive Error Analysis for Engineering Students (J. Akin)
Solution manual Basic Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (5th Ed., John Bird)
Solution manual Higher Engineering Mathematics (5th Ed., John Bird)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Mathematics for Electrical Engineering and Computing (Mary Attenborough)
Solution manual Probability and Random Processes : With Applications to Signal Processing and Communications (Miller & Childers)
Solution manual Introductory Statistics for Engineering Experimentation (Peter Nelson, Karen Copeland & Marie Coffin)
Solution manual Understanding Engineering Mathematics (Bill Cox)
Solution manual Statistics And Probability For Engineering Applications With Microsoft Excel (Decoursey)
Solution manual Business Math Using Calculators : With 10-Key Computer Assisted Instruction (Burton)
Solution manual Mathematics for Economics and Business (5th Ed., Ian Jacques)
Solution manual Business Math, Brief (7th Ed., Cleaves & Hobbs)
Solution manual Math for Merchandising: A Step-by-Step Approach (3rd Ed., Moore)
Solution manual Mathematics for Business (7th Ed., Salzman , Miller &

Clendenen)
Solution manual Mathematics for Business (8th Ed., Salzman , Miller & Clendenen)
Solution manual Basic College Mathematics with Early Integers (K. Elayn Martin-Gay)
Solution manual Developmental Mathematics (K. Elayn Martin-Gay)
Solution manual An Introduction to Analysis (3rd Ed., William Wade)
Solution manual An Introduction to Analysis (4th Ed., William Wade)
Solution manual A Friendly Introduction to Analysis (2nd Ed., Witold A.J. Kosmala)
Solution manual Advanced Calculus (Gerald Folland)
Solution manual Analysis : With an Introduction to Proof (4th Ed., Steven R. Lay)
Solution manual Essentials of Basic College Mathematics (John Jr Tobey, Jr., Jeffrey Slater)
Solution manual Basic College Mathematics (5th Ed., John Tobey & Jeffrey Slater)
Solution manual Prealgebra (3rd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen Angel)
Solution manual Elementary Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Elementary Algebra for College Students (7th Ed., Allen R. Angel)
Solution manual Experiencing Introductory and Intermediate Algebra Through Functions and Graphs (3rd Ed., JoAnne Thomasson & Robert Pesut)
Solution manual Introductory Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Beginning Algebra (6th Ed., John Jr Tobey & Jeffrey Slater)
Solution manual Beginning Algebra : Early Graphing (Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Beginning and Intermediate Algebra (2nd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Introductory Algebra (4th Ed., Robert Blitzer)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (7th Ed., Allen Angel)
Solution manual Intermediate Algebra (Michael Sullivan III & Katherine Struve)
Solution manual Intermediate Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Essentials of Intermediate Algebra for College Students (Robert Blitzer)
Solution manual Intermediate Algebra (4th Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (5th Ed., Robert Blitzer)
Solution manual Algebra A Combined Approach (3rd Ed., K. Elayn Martin-Gay)

Solution manual Elementary & Intermediate Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Essentials of Introductory and Intermediate Algebra for College Students (Robert F. Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (5th Ed., Robert F Blitzer)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (4th Ed., Robert Blitzer)
Solution manual College Algebra Essentials (2nd Ed., Robert F. Blitzer)
Solution manual College Algebra : An Early Functions Approach (Robert F. Blitzer)
Solution manual College Algebra : Concepts Through Functions (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra : Concepts Through Functions (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Essentials of College Algebra : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Algebra and Trigonometry (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry (3rd Ed., Robert F. Blitzer)
Solution manual Algebra and Trigonometry: An Early Functions Approach (Robert Blitzer)
Solution manual Algebra & Trigonometry (7th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry Enhanced With Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Trigonometry (7th Ed., Michael Sullivan)
Solution manual Trigonometry (8th Ed., Michael Sullivan)
Solution manual Trigonometry Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Robert Blitzer)
Solution manual Precalculus (4th Ed., Robert Blitzer)
Solution manual Precalculus (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus : A Right Triangle Approach (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus Essentials (2nd Ed., Robert Blitzer)
Solution manual Precalculus Essentials (3rd Ed., Robert Blitzer)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (1st Ed., Michael Sullivan III &

Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (5th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Essentials : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Excursions in Modern Mathematics (5th Ed., Peter Tannenbaum)
Solution manual Excursions In Modern Mathematics with Mini-Excursions (6th Ed., Peter Tannenbaum)
Solution manual Quantitive Reasoning & the Environment (Greg Langkamp & Joseph Hull)
Solution manual Fundamentals of Mathematics (10th Ed., William M Setek & Michael A Gallo)
Solution manual Learning Math in Elementary and Middle School & IMAP Package (4th Ed., Cathcart, Pothier, Vance & Bezuk)
Solution manual Understanding the Math You Teach: Content and Methods for Prekindergarten Through Grade 4 (Anita C. Burris)
Solution manual Algebra Connections (Ira J. Papick & UMO University of Missouri)
Solution manual Calculus Connections (Asma Harcharras, Dorina Mitrea)
Solution manual Data Analysis and Probability Connections: Mathematics for Middle School Teachers (Debra A. Perkowski & Michael Perkowski)
Solution manual Geometry Connections (John K. Beem)
Solution manual Elementary Math Modeling Updated (2nd Ed., Mary Ellen Davis & C. Henry Edwards)
Solution manual Additional Calculus Topics (11th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Finite Math and Its Application (9th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Finite Mathematics and Its Application (10th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and social Sciences (11th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Additional Calculus Topics (9th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Brief Calculus and Its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Brief Calculus and Its Applications (12th Ed., Larry

Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (10th Ed., Larry Goldstein, David Schneider, David Lay)
Solution manual Calculus and its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (12th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Calculus, Early Transcendentals (6th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus, Early Transcendentals (7th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus Early Transcendentals (Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Calculus (6th Ed., Henry Edwards & David E. Penney)
Solution manual Single Variable Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Vector Calculus (3rd Ed., Susan Colley)
Solution manual Applied Linear Algebra (Peter Olver & Cheri Shakiban)
Solution manual Differential Equations and Linear Algebra (2nd Ed., Jerry Farlow, James E. Hall, Jean Marie McDill & Beverly West)
Solution manual Differential Equations and Linear Algebra (2nd Ed., C. Henry Edwards & David Penney)
Solution manual Differential Equations and Linear Algebra (3rd Ed., C. Henry Edwards & David Penney)
Solution manual Differential Equations (2nd Ed., John Polking, Al Boggess & David Arnold)
Solution manual Differential Equations with Boundary Value Problems (2nd ed., John Polking, Al Boggess & David Arnold)
Solution manual Discrete Mathematics with Graph Theory (3rd Ed., Edgar Goodaire & Michael Parmenter)
Solution manual Essential Discrete Mathematics (Todd Feil & Joan Krone)
Solution manual Statistical Methods for the Social Sciences (4th Ed., Agresti & Finlay)
Solution manual A Brief Course in Mathematical Statistics (Tanis & Hogg)
Solution manual Business Mathematics, 10th Ed. (Miller, Salzman & Clendenen)
Solution manual Elementary Statistics (6th Ed., Weiss)
Solution manual Elementary Statistics (7th Ed., Weiss)
Solution manual Elementary Statistics Using the Graphing Calculator: For the TI-83/84 Plus (Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus

Calculator (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Update (9th Ed., Mario Triola)
Solution manual Elementary Statistics (10th Ed., Mario Triola)
Solution manual Elementary Statistics (11th Ed., Mario Triola)
Solution manual Essentials of Statistics (2nd Ed., Mario Triola)
Solution manual Essentials of Statistics (3rd Ed., Mario Triola)
Solution manual Essentials of Statistics (4th Ed., Mario Triola)
Solution manual Introductory Statistics (7th Ed., Neil Weiss)
Solution manual Introductory Statistics (8th Ed., Neil Weiss)
Solution manual Intro Stats (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Intro Stats (3rd Ed., De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Elementary Statistics Using Excel (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (4th Ed., Mario Triola)
Solution manual Stats : Modeling the World (2nd Ed., Bock, Velleman & De Veaux)
Solution manual Stats : Modeling the World (3rd Ed., Bock, Velleman & De Veaux)
Solution manual Statistical Reasoning for Everyday Life (2nd Ed., Bennett, Briggs & Triola)
Solution manual Statistical Reasoning for Everyday Life (3rd Ed., Bennett, Briggs & Triola)
Solution manual Business Statistics (Triola & Franklin)
Solution manual Business Statistics (Sharpe, De Veaux & Velleman)
Solution manual Business Statistics : A First Course (Sharpe, De Veaux & Velleman)
Solution manual Biostatistics for the Biological and Health Sciences with Statdisk (Marc Triola & Mario Triola)
Solution manual Biostatistics : A Guide to Design, Analysis and Discovery (2nd Ed., Ronald Forthofer, Eun Lee, Mike Hernandez)
Solution manual A Course in Probability (Neil A. Weiss)
Solution manual Probability and Statistics (3rd Ed., DeGroot & Schervish)
Solution manual Statistics for Science and Engineering (John Kinney)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (1st Ed., Chartrand, Polimeni & Zhang)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (2nd Ed., Chartrand, Polimeni & Zhang)
Solution manual Elementary Number Theory (5th Ed., Kenneth H. Rosen)
Solution manual History of Mathematics : Brief Version (Victor J. Katz)
Solution manual Geometry : An Investigative Approach (2nd Ed., Phares

G. O'Daffer & Stanley Clemens)
Solution manual A First Course in Abstract Algebra (7th Ed., John Fraleigh)
Solution manual Complex Variables with Applications (3rd Ed., David Wunsch)
Solution manual Numerical Analysis with CD-ROM (Timothy Sauer)
Solution manual Numerical Analysis and Scientific Computation (Jeffery Leader)
Solution manual Linear Algebra and Differential Equations (Gary Peterson & James Sochacki)
Solution manual Elementary Differential Equations (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Elementary Differential Equations with Boundary Value Problems (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Fundamentals of Differential Equations (6th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Fundamentals of Differential Equations and Boundary Value Problems (4th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Linear Algebra and Its Applications with CD-ROM, Update (3rd Ed., David C. Lay)
Solution manual Introduction to Linear Algebra (5th ed., Lee W. Johnson, R. Dean Riess & Jimmy T. Arnold)
Solution manual Calculus for the Life Sciences (Marvin L. Bittinger, Neal Brand & John Quintanilla)
Solution manual Calculus with Applications for the Life Sciences (Raymond N. Greenwell, Nathan P. Ritchey & Margaret L. Lial)
Solution manual Calculus : An Integrated Approach to Functions and Their Rates of Change, Preliminary Edition (Robin J. Gottlieb)
Solution manual Calculus (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Thomas' Calculus, Alternate Edition (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Calculus : A Complete Course (2nd Ed., Ross L. Finney, Franklin D. Demana, Bert K. Waits & Daniel Kennedy)
Solution manual Calculus (Elgin H. Johnston & Jerry Mathews)
Solution manual Thomas' Calculus, Updated (10th Ed., George B. Thomas, Jr., Ross L. Finney, Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Thomas' Calculus Early Transcendentals (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual University Calculus (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual University Calculus : Alternate Edition (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual Thomas' Calculus, Media Upgrade (11th Ed., George B. Thomas, Jr., Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus, Early Transcendentals, Media Upgrade

(11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Calculus with Applications (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Calculus with Applications, Brief Version (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Finite Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematical Ideas (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (3rd Ed., Bennett & Briggs)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (4th Ed., Bennett & Briggs)
Solution manual A Problem Solving Approach to Mathematics (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Survey of Mathematics with Applications (7th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition (7th Ed., Angel, Abbott & Runde)
Solution manual Mathematics All Around (3rd Ed., Tom Pirnot)
Solution manual Mathematics for Elementary School Teachers (3rd Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary School Teachers (4th Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary Teachers with Activities (Sybilla Beckmann)
Solution manual Mathematics for Elementary Teachers plus Activities Manual (2nd Ed., Sybilla Beckmann)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (8th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for

Elementary School Teachers (10th Ed., Billstein, Libeskind & Lott)
Solution manual Essentials of Using and Understanding Mathematics : A Quantitative Reasoning Approach (Jeffrey Bennett & William Briggs)
Solution manual Technical Calculus with Analytic Geometry (4th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus Metric Version (8th Ed., Allyn Washington)
Solution manual Introduction to Technical Mathematics (5th Ed., Washington, Triola & Reda)
Solution manual A Graphical Approach to Precalculus (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits (3rd Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Precalculus : Functions and Graphs (5th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphical, Numerical, Algebraic (7th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual Package (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Functioning in the Real World : A Precalculus Experience (2nd Ed., Gordon, F. Gordon, Tucker & Siegel)
Solution manual Precalculus with Modeling and Visualization (3rd Ed., Gary K. Rockswold)
Solution manual Precalculus with Modeling and Visualization (4th Ed., Gary K. Rockswold)
Solution manual Precalculus (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Mark Dugopolski)
Solution manual Precalculus (4th Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (2nd Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (3rd Ed., Mark Dugopolski)
Solution manual Fundamentals of Precalculus (Mark Dugopolski)
Solution manual Trigonometry (1st Ed., Mark Dugopolski)
Solution manual Trigonometry (2nd Ed., Mark Dugopolski)

Solution manual Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual Trigonometry (8th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry (9th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry : A Circular Function Approach (Marie Aratari)
Solution manual A Graphical Approach to Algebra and Trigonometry (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Algebra and Trigonometry (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Algebra and Trigonometry : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Algebra and Trigonometry (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Algebra and Trigonometry (3rd Ed., Beecher, Penna & Bittinger)
Solution manual College Algebra and Trigonometry (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry (4th Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry : A Unit Circle Approach (5th Ed., Mark Dugopolski)
Solution manual Algebra and Trigonometry with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Algebra and Trigonometry with Modeling and Visualization (4th Ed., Gary Rockswold)
Solution manual College Algebra and Trigonometry (3rd Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra and Trigonometry (4th Ed., Lial, Hornsby & Schneider)
Solution manual A Graphical Approach to College Algebra (4th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual A Graphical Approach to College Algebra (5th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual College Algebra : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra (J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual College Algebra with Modeling and Visualization (4th Ed., Gary Rockswold)
Solution manual Essentials of College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Essentials of College Algebra (Lial, Hornsby & Schneider)

Solution manual Essentials of College Algebra, Alternate Edition (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra (3rd Ed., Mark Dugopolski)
Solution manual College Algebra (4th Ed., Mark Dugopolski)
Solution manual College Algebra (5th Ed., Mark Dugopolski)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (1st Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (2nd Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra (2nd Ed., Judith Beecher, Judith Penna & Marvin Bittinger)
Solution manual College Algebra (9th Ed., Margaret Lial, John Hornsby & David Schneider)
Solution manual Essentials of Geometry for College Students (2nd Ed., Margaret Lial, Barbara Brown, Arnold Steffenson & L. Murphy Johnson)
Solution manual Algebra for College Students (5th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (4th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Elementary and Intermediate Algebra (1st Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Introductory and Intermediate Algebra : A Combined Approach (2nd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra through Applications (2nd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Elementary and Intermediate Algebra (1st Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra (3rd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra : Concepts and

Applications (4th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Beginning and Intermediate Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Foundations of Mathematics (Marvin Bittinger & Judith Penna)
Solution manual Intermediate Algebra (9th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra (10th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra : Graphs & Models (3rd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra (9th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra with Applications and Visualization (2nd Ed., Gary Rockswold & Terry Krieger)
Solution manual Intermediate Algebra (Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra: Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Beginning Algebra (10th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Prealgebra and Introductory Algebra (Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Introductory Algebra (9th Ed., Marvin Bittinger)
Solution manual Introductory Algebra (10th Ed., Marvin Bittinger)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Margaret Lial, John Hornsby, Terry McGinnis & Diana Hestwood)
Solution manual Prealgebra and Introductory Algebra (3rd Ed., Margaret Lial, Diana Hestwood, John Hornsby & Terry McGinnis)
Solution manual Elementary Algebra with Early Systems of Equations (Tom Carson & Ellyn Gillespie)
Solution manual Elementary Algebra : Concepts and Applications (6th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra : Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Introductory Algebra (Richelle Blair)
Solution manual Introductory Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory Algebra (9th Ed., Margaret Lial, John

Hornsby & Terry McGinnis)
Solution manual Beginning Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Integrated Arithmetic and Basic Algebra (3rd Ed., Bill Jordan & William Palow)
Solution manual Introductory Algebra through Applications (Geoffrey Akst & Sadie Bragg)
Solution manual Prealgebra (3rd Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra (5th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Prealgebra (2nd Ed., Tom Carson)
Solution manual Basic Mathematics (9th Ed., Marvin Bittinger)
Solution manual Basic Mathematics (10th Ed., Marvin Bittinger)
Solution manual Basic Mathematics Preliminary Edition (Robert Prior)
Solution manual Basic Mathematics with Early Integers (Marvin Bittinger & Judith Penna)
Solution manual Basic College Mathematics (7th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic College Mathematics (8th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Fundamental Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Wave Motion (J. Billingham & A. C. King)
Solution manual Solving ODEs with MATLAB (L. F. Shampine, I. Gladwell & S. Thompson)
Solution manual Numerical Solution of Partial Differential Equations: An Introduction (2nd Ed., K. W. Morton & D. F. Mayers)
Solution manual Measure Theory and Filtering : Introduction and Applications (Lakhdar Aggoun & Robert J. Elliott)
Solution manual Mathematical Models in Biology : An Introduction (Elizabeth S. Allman & John A. Rhodes)
Solution manual Insurance Risk and Ruin (David C. M. Dickson)
Solution manual Data Analysis and Graphics Using R : An Example-based Approach (2nd Ed., John Maindonald & John Braun)
Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution manual Convex Optimization (Stephen Boyd & Lieven Vandenberghe)
Solution manual Concrete Abstract Algebra : From Numbers to Gröbner Bases (Niels Lauritzen)
Solution manual A Concrete Approach to Abstract Algebra : From the Integers to the Insolvability of the Quintic (Jeffrey Bergen)
Solution manual Calculus : Concepts and Methods (Ken Binmore & Joan

Davies)
Solution manual An Introduction to Partial Differential Equations (Yehuda Pinchover & Jacob Rubinstein)
Solution manual An Introduction to Ordinary Differential Equations (James C. Robinson)
Solution manual An Introduction to Mathematical Physiology and Biology (2nd Ed., J. Mazumdar)
Solution manual An Introduction to Financial Option Valuation : Mathematics, Stochastics and Computation (Desmond Higham)
Solution manual An Interactive Introduction to Mathematical Analysis (Jonathan Lewin)
Solution manual An Introduction to Mathematical Finance: Options and Other Topics (1st Ed., Sheldon M. Ross)

- Physics & Astronomy :

Solution manual Introduction to Solid State Physics (8th Ed., Charles Kittel)
Solution manual Quantum Physics (3rd Ed., Stephen Gasiorowicz)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Fundamentals of Electromagnetics with Engineering Applications (Stuart M. Wentworth)
Solution manual Physics (7th Ed. by Paul E. Tippens)
Solution manual Physics (6th Ed., Cutnell & Johnson)
Solution manual Physics (7th Ed., Cutnell & Johnson)
Solution manual Physics (8th Ed., Cutnell & Johnson)
Solution manual Essentials of Physics (Cutnell & Johnson)
Solution manual Understanding Physics (1st Ed., Cummings, Laws, Redish & Cooney)
Solution manual Introductory Physics : Building Understanding (Jerold Touger)
Solution manual Physics Matters : An Introduction to Conceptual Physics (James Trefil & Robert Hazen)
Solution manual How Things Work : The Physics of Everyday Life (3rd Ed., Louis Bloomfield)
Solution manual An Introduction to Modern Astrophysics (2nd Ed., Bradley W. Carroll & Dale A. Ostlie)
Solution manual Foundations of Astrophysics (Barbara Ryden & Bradley Peterson)
Solution manual Physics (5th Ed., Halliday, Resnick, Krane)
Solution manual Fundamentals of Physics (6th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (7th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (8th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (9th Ed., David Halliday,

Robert Resnick & Jearl Walker)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (3rd Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (4th Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (5th Ed., Thomas Griffith)
Solution manual Physics of Everyday Phenomena : A Conceptual Introduction to Physics (6th Ed., W. Thomas Griffith & Juliet W. Brosing)
Solution manual Integrated Science (2nd Ed., Tillery et al.)
Solution manual Integrated Science (3rd Ed., Tillery et al.)
Solution manual Integrated Science (4th Ed., Tillery et al.)
Solution manual Physical Science (5th Ed., Tillery)
Solution manual Physical Science (6th Ed., Tillery)
Solution manual Physical Science (7th Ed., Tillery)
Solution manual Physical Science (8th Ed., Tillery)
Solution manual The Physical Universe (11th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual The Physical Universe (12th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual Physics of the Life Sciences (Jay Newman)
Solution manual Physics in Biology and Medicine (3rd Ed., Paul Davidovits)
Solution manual Optics (1st Ed., Ajoy Ghatak)
Solution manual Optics (4th Ed., Eugene Hecht)
Solution manual Nonlinear Optics (3rd Ed., Robert Boyd)
Solution manual Introduction to Optics (3rd Ed., Frank L Pedrotti, Leno M Pedrotti & Leno S Pedrotti)
Solution manual Principles of Physical Optics (Charles Bennett)
Solution manual Optics : Principles and Applications (Kailash Sharma)
Solution manual Continuum Electromechanics (James R. Melcher)
Solution manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution manual Matter and Interactions I : Modern Mechanics (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 1 : Modern Mechanics (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions II : Electric and Magnetic Interactions (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 2 : Electric and Magnetic Interactions (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution manual Introduction to Statistical Physics (Kerson Huang)
Solution manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution manual An Introduction to Thermodynamics and Statistical Mechanics (2nd Ed, Keith Stowe)
Solution manual Equilibrium and Non-Equilibrium Statistical Thermodynamics (Michel Le Bellac, Fabrice Mortessagne & G. George

Batrouni)
Solution manual Elements of Statistical Mechanics: With an Introduction to Quantum Field Theory and Numerical Simulation (Ivo Sachs & Siddhartha Sen)
Solution manual Quantum Transport (2nd Ed., Supriyo Datta)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution manual Quantum Mechanics (Gennaro Auletta, Mauro Fortunato & Giorgio Parisi)
Solution manual Applied Quantum Mechanics (1st Ed., A. F. J. Levi)
Solution manual Applied Quantum Mechanics (2nd Ed., A. F. J. Levi)
Solution manual Fundamentals of Quantum Mechanics (C.L. Tang)
Solution manual Astronomy : A Physical Perspective (2nd Ed., Marc L. Kutner)
Solution manual Classical Mechanics (Douglas Gregory)
Solution manual Electromagnetic Field Theory Fundamentals (2nd Ed., Singh Guru & Hiziroglu)
Solution manual Special Relativity : From Einstein to Strings (P.M. Schwarz & J.H. Schwarz)
Solution manual Gravity : An Introduction to Einstein's General Relativity (James Hartle)
Solution manual A Short Course in General Relativity (James Foster & J. David Nightingale)
Solution manual Statistical Thermodynamics (Normand Laurendeau)
Solution manual Statistical Thermodynamics and Microscale Thermophysics (Van P. Carey)
Solution manual Thermal Physics (Ralph Baierlein)
Solution manual Topics in Atomic Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Foundations of Quantum Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Applied Physics (8th Ed., Dale Ewen, Ronald Nelson, Neill Schurter & Erik Gundersen)
Solution manual Applied Physics (9th Ed., Dale Ewen, Neill Schurter & Erik Gundersen)
Solution manual Analytical Mechanics (7th Ed., Grant R. Fowles, George Cassiday)
Solution manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution manual Diagnostic Ultrasound Imaging : Inside Out (Thomas Szabo)
Solution manual Astronomy : A Beginner's Guide to the Universe (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual The Cosmic Perspective (5th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Cosmic Perspective Media Update (4th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (4th

Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual Astronomy Today (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual Astronomy Today (6th Ed., Eric Chaisson & Steve McMillan)
Solution manual Conceptual Physical Science (3rd Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Physical Science (4th Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Integrated Science (Paul G. Hewitt, Suzanne Lyons, John A. Suchocki & Jennifer Yeh)
Solution manual Physics : Concepts & Connections (4th Ed., Art Hobson)
Solution manual Conceptual Physics (10th Ed., Paul Hewitt)
Solution manual Conceptual Physics Fundamentals (Paul G. Hewitt)
Solution manual College Physics (6th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (7th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (8th Ed., Young & Geller)
Solution manual Modern Physics (2nd Ed., Randy Harris)
Solution manual Modern Physics for Scientists and Engineers (John Morrison)
Solution manual Solid State Physics : Essential Concepts (David Snoke)
Solution manual Physics with Mastering Physics (3rd Ed., James Walker)
Solution manual Physics with Mastering Physics (4th Ed., James Walker)
Solution manual Active Learning Guide (Alan Van Heuvelen & Eugenia Etkina)
Solution manual E&M TIPERs : Electricity & Magnetism Tasks (C. J. Hieggelke, D. P. Maloney, T. L. O'Kuma & Steve Kanim)
Solution manual Physics : Principles with Applications (6th Ed., Douglas C. Giancoli)
Solution manual Physlet® Physics : Interactive Illustrations, Explorations and Problems for Introductory Physics (Wolfgang Christian & Mario Belloni)
Solution manual University Physics with Modern Physics with Mastering Physics (11th Ed., Hugh Young & Roger Freedman)
Solution manual University Physics with Modern Physics with Mastering Physics (12th Ed., Hugh Young & Roger Freedman)
Solution manual Physics for Scientists and Engineers (3rd Ed., Douglas C. Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (3rd Ed., Douglas Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (4th Ed., Douglas Giancoli)

Solution manual Physlet® Quantum Physics : An Interactive Introduction (Mario Belloni, Wolfgang Christian & Anne Cox)
Solution manual Introduction to Electrodynamics (3rd Ed., David J. Griffiths)
Solution manual Introduction to Quantum Mechanics (2nd Ed., David Griffiths)
Solution manual Quantum Mechanics : An Accessible Introduction (Robert Scherrer)
Solution manual Modern Quantum Mechanics (J. J. Sakurai)
Solution manual The Physics of Sound (3rd Ed., Richard Berg & David Stork)
Solution manual Electromagnetism : Principles and Applications (1st Ed., Paul Lorrain, Dale R. Corson)
Solution manual Classical Electromagnetism (Jerrold Franklin)
Solution manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution manual An Introduction to Astrobiology (Iain Gilmour & Mark Sephton)
Solution manual An Introduction to Galaxies and Cosmology (Mark HJones & Robert Lambourne)
Solution manual An Introduction to the Solar System (Neil McBride & Iain Gilmour)
Solution manual Quantum Physics (Michel Le Bellac)
Solution manual Laser Fundamentals (2nd Ed., William T. Silfvast)
Solution manual Laser Electronics (3rd Ed., Joseph T. Verdeyen)
Solution manual Introductory Quantum Optics (Christopher Gerry & Peter Knight)
Solution manual Introduction to Plasma Physics: With Space and Laboratory Applications (D. A. Gurnett & A. Bhattacharjee)
Solution manual A Short Introduction to Quantum Information and Quantum Computation (Michel Le Bellac)
Solution manual A Quantum Approach to Condensed Matter Physics (Philip L. Taylor & Olle Heinonen)
Solution manual A First Course in String Theory (Barton Zwiebach)
Solution manual A First Course in Computational Physics and Object-Oriented Programming with C++ (David Yevick)
Solution manual A Course in Modern Mathematical Physics : Groups, Hilbert Space and Differential Geometry (Peter Szekeres)
Solution manual Ultrasonic Nondestructive Evaluation Systems: Models and Measurements (Lester W. Schmerr & Sung-Jin Song)
Solution manual Explorations : Stars Galaxies and Planets (1st Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (2nd Ed., Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (3rd Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (4th Ed.

Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (5th Ed.
Updated, Thomas Arny)
Solution manual Astronomy : Journey to the Cosmic Frontier (3rd Ed.,
John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (4th Ed.,
John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (5th Ed.,
John D. Fix)
Solution manual Pathways to Astronomy with Starry Night Pro (Steven
Schneider & Thomas T Arny)
Solution manual From Molecules to Networks (2nd Ed., John Byrne &
James Roberts)
Solution manual Biotechnology (David Clark & Nanette Pazdernik)
Solution manual Light and Video Microscopy (Randy Wayne)

List of Solutions Manuals

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES & BHUTAN".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=VQJ2M78Y

I do not review the forums, just send me an email.

- Civil Engineering and Architecture :

Solution manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution manual Fundamentals of Structural Analysis (1st Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (2nd Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (3rd Ed., Leet & Uang)
Solution manual A Structures Primer (Harry F. Kaufman)
Solution manual Steel Design (4th Ed., William T. Segui)
Solution manual Structural and Stress Analysis (2nd Ed., Megson)
Solution manual Structural Steel Design ASD Method (4th Ed., Jack McCormac)
Solution manual Structural Steel Design (4th Ed., Jack McCormac)
Solution manual Structural Steel Design : A Practice Oriented Approach (Abi Aghayere & Jason Vigil)
Solution manual Unified Design of Steel Structures (Louis Geschwindner)
Solution manual Steel Structures : Behavior and LRFD (1st Ed., Ramulu Vinnakota)

Solution manual The Engineering of Foundations (1st Ed., Rodrigo Salgado)
Solution manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins & Sanjeev Khanna)
Solution manual Analysis and Design of Shallow and Deep Foundations (Lymon Reese, William Isenhower & Shin-Tower Wang)
Solution manual Elementary Structures for Architects and Builders (5th Ed., Ronald Shaeffer)
Solution manual Statics and Strength of Materials for Architecture and Building Construction (3rd Ed., Onouye & Kane)
Solution manual Finite Element Techniques in Structural Mechanics (C. T. F. Ross)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual Adjustment Computations : Spatial Data Analysis (4th Ed., Charles Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., Charles Ghilani)
Solution manual Surveying (5th Ed., Jack McCormac)
Solution manual Surveying with Construction Applications (6th Ed., Barry Kavanagh)
Solution manual Surveying with Construction Applications (7th Ed., Barry Kavanagh)
Solution manual Surveying : Principles and Applications (8th Ed., Barry Kavanagh)
Solution manual Surveying Fundamentals and Practices (6th Ed., Jerry Nathanson, Michael Lanzafama & Philip Kissam)
Solution manual Structural Analysis (5th Ed., Hibbeler)
Solution manual Structural Analysis (7th Ed., Hibbeler)
Solution manual Structural Analysis - SI Units (7th Ed., Hibbeler)
Solution manual Dynamics of Structures (3rd Ed., Chopra)
Solution manual Principles of Geotechnical Engineering (6th Ed., Braja M. Das)
Solution manual Geotechnical Engineering: Principles and Practices (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)
Solution manual Geotechnical Engineering: Principles and Practices - International Version (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)
Solution manual Fundamentals of Structural Stability (George Simitses & Dewey Hodges)
Solution manual Fundamentals of Structural Mechanics (2nd Ed., keith D. Hjelmstad)
Solution manual Fundamentals of Structural Dynamics (2nd Ed., Roy Craig & Andrew Kurdila)
Solution manual Design of Concrete Structures (13th Ed., Nilson, Darwin & Dolan)
Solution manual Design of Concrete Structures (14th Ed., Nilson,

Darwin & Dolan)
Solution manual Structures (6th Ed., Daniel Lewis Schodek & Martin Bechthold)
Solution manual Concrete Structures (Mehdi Setareh & Robert Darvas)
Solution manual Reinforced Concrete Design : A Practical Approach (Brzev & Pao)
Solution manual Reinforced Concrete : A Fundamental Approach (6th Ed., Edward Nawy)
Solution manual Reinforced Concrete Design (6th Ed., Chu-Kia Wang, Charles Salmon)
Solution manual Reinforced Concrete Design (7th Ed., Chu-Kia Wang, Charles Salmon & José Pincheira)
Solution manual Reinforced Concrete Design (6th Ed., George Limbrunner & Abi Aghayere)
Solution manual Reinforced Concrete Design (7th Ed., George Limbrunner & Abi Aghayere)
Solution manual Reinforced Concrete : Mechanics and Design (4th Ed., James MacGregor & James Wight)
Solution manual Reinforced Concrete : Mechanics and Design (5th Ed., James Wight & James MacGregor)
Solution manual Reinforced Concrete : Mechanics and Design - International Version (5th Ed., James Wight & James MacGregor)
Solution manual Structural Concrete : Theory and Design (3rd Ed., M. Nadim Hassoun & Akthem Al-Manaseer)
Solution manual Structural Concrete : Theory and Design (4th Ed., M. Nadim Hassoun & Akthem Al-Manaseer)
Solution manual Design of Reinforced Concrete (6th Ed., Jack McCormac & James Nelson)
Solution manual Design of Reinforced Concrete (7th Ed., ACI 318-05 Code Edition, by Jack McCormac)
Solution manual Design of Reinforced Concrete (8th Ed., Jack McCormac & Russell Brown)
Solution manual Structural Analysis : Using Classical and Matrix Methods (3rd Ed., James Nelson, Jr., Jack McCormac)
Solution manual Structural Analysis : Using Classical and Matrix Methods (4th Ed., Jack McCormac)
Solution manual Pavement Design and Materials (A. T. Papagiannakis, E. A. Masad)
Solution manual Traffic Engineering (4th Ed., Roger P. Roess, Elena S. Prassas, William R. McShane)
Solution manual Principles of Highway Engineering and Traffic Analysis (3rd Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Principles of Highway Engineering and Traffic Analysis (4th Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Highway Engineering (7th Ed., Paul Wright & Karen Dixon)
Solution manual Soil Mechanics : Concepts and Applications (2nd Ed., William Powrie)
Solution manual Unsaturated Soil Mechanics (Ning Lu & William Likos)
Solution manual Soil Mechanics and Foundations (2nd Ed., Muniram

Budhu)
Solution manual Soils and Foundations - SI Units (6th Ed., Liu & Evett)
Solution manual Soils and Foundations (7th Ed., Liu & Evett)
Solution manual Fundamentals of Soil Mechanics for Sedimentary and Residual Soils (Laurence Wesley)
Solution manual Essentials of Soil Mechanics and Foundations : Basic Geotechnics (7th Ed., David McCarthy)
Solution manual Foundations and Earth Retaining Structures (Muniram Budhu)
Solution manual Design Analysis in Rock Mechanics (William G. Pariseau)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydraulic Control Systems (Noah Manring)
Solution manual Open Channel Hydraulics (A. Osman Akan)
Solution manual Open Channel Hydraulics (Terry Sturm)
Solution manual Open Channel Hydraulics (2nd Ed., Terry Sturm)
Solution manual Open-Channel Flow (2nd Ed., M. Hanif Chaudhry)
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Branko Ladanyi)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. Andrew Chadwick)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Robert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Transportation Engineering : An Introduction (3rd Ed., C. Jotin Khisty, B. Kent Lall)
Solution manual Introduction to Transportation Engineering (2nd Ed., Banks)
Solution manual Urban Transportation Planning (2nd Ed., Meyer & Miller)
Solution manual Transportation Engineering and Planning (3rd Ed., Papacostas & Prevedouros)
Solution manual Structural Wood Design : A Practice-Oriented Approach (Abi Aghayere & Jason Vigil)
Solution manual Simplified Design of Wood Structures (6th Ed., James Ambrose & Patrick Tripeny)
Solution manual Simplified Design of Steel Structures (8th Ed., James Ambrose & Patrick Tripeny)
Solution manual Materials and Components of Interior Architecture (7th Ed., J. Rosemary Riggs)
Solution manual Olin's Construction : Principles, Materials, and Methods (8th Ed., H. Leslie Simmons)
Solution manual Basic Construction Materials (8th Ed., Theodore Marotta, John C. Coffey, Cynthia LaFleur-Brown & Christine LaPlante)
Solution manual Fundamentals of Residential Construction (2nd Ed., Edward Allen & Rob Thallon)
Solution manual Fundamentals of Building Construction : Materials and Methods (4th Ed., Edward Allen & Joseph Iano)

Solution manual Fundamentals of Building Construction : Materials and Methods (5th Ed., Edward Allen & Joseph Iano)
Solution manual Composites for Construction : Structural Design with FRP Materials (Lawrence Bank)
Solution manual Building Construction : Principles, Materials, and Systems (Madan Mehta, Diane Armpriest & Walter Scarborough)
Solution manual Construction Contracts (2nd Ed., Jimmie Hinze)
Solution manual Sustainable Construction and Design (Regina Leffers)
Solution manual Global Engineering and Construction (J. K. Yates)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Materials for Civil and Construction Engineers (3rd Ed., Michael S. Mamlouk & John P. Zaniewski)
Solution manual Construction Management (3rd Ed., Daniel Halpin)
Solution manual Construction Management Fundamentals (1st Ed., Schexnayder & Mayo)
Solution manual Construction Management Fundamentals (2nd Ed., Knutson, Schexnayder, Fiori & Mayo)
Solution manual Construction Planning, Equipment, and Methods (6th Ed., Peurifoy & Schexnayder)
Solution manual Construction Planning, Equipment, and Methods (7th Ed., Peurifoy, Schexnayder & Shapira)
Solution manual Construction Planning, Equipment, and Methods (8th Ed., Peurifoy, Schexnayder, Shapira & Schmitt)
Solution manual Construction Methods and Management (7th Ed., Stephens Nunnally)
Solution manual Construction Methods and Management (8th Ed., Stephens Nunnally)
Solution manual Construction Project Administration (8th Ed., Edward Fisk, Wayne Reynolds)
Solution manual Construction Project Administration (9th Ed., Edward Fisk, Wayne Reynolds)
Solution manual Construction Project Management (3rd Ed., Gould & Joyce)
Solution manual The Management of Construction : A Project Lifecycle Approach (F. Lawrence Bennett)
Solution manual Construction Accounting and Financial Management (1st Ed., Steven Peterson)
Solution manual Construction Accounting and Financial Management (2nd Ed., Steven Peterson)
Solution manual Principles and Practices of Commercial Construction (8th Ed., Cameron K. Andres & R.C. Smith)
Solution manual Cost Analysis and Estimating for Engineering and Management (Phillip Ostwald & Timothy McLaren)
Solution manual Construction Estimating Using Excel (Stephen J. Peterson)
Solution manual Heating and Cooling of Buildings : Design for Efficiency (2nd Ed., Jan Kreider, Peter Curtiss & Ari Rabl)
Solution manual Heating, Cooling, Lighting : Sustainable Design Methods for Architects (3rd Ed., Norbert Lechner)
Solution manual Mechanical and Electrical Systems in Architecture,

Engineering and Construction (5th Ed., Frank R. Dagostino & Joseph B. Wujek)
Solution manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution manual Introduction to Naval Architecture : Formerly Muckle's Naval Architecture for Marine Engineers (4th Ed., E.C. Tupper)
Solution manual Architectural Drawing and Light Construction (8th Ed., Philip A. Grau, III & Edward J. Muller)
Solution manual NEW Autodesk Civil 3D : Procedures & Applications (Harry O. Ward)
Solution manual Structural Health Monitoring with Piezoelectric Wafer Active Sensors (Victor Giurgiutiu)
Solution manual Architecture Design Notebook (2nd Ed., Peter Fawcett)
Solution manual Civil Drafting Technology (7th Ed., David A. Madsen, Terence M. Shumaker & David P. Madsen)
Solution manual Introduction to Homeland Security (2nd Ed., Bullock & George Haddow)

- Environmental Engineering, Earth and Environmental Sciences :

Solution manual Principles of Environmental Engineering and Science (1st Ed., Mackenzie Davis & Susan Masten)
Solution manual Principles of Environmental Engineering and Science (2nd Ed., Mackenzie Davis & Susan Masten)
Solution manual Introduction to Environmental Engineering (Richard Mines & Laura Lackey)
Solution manual Introduction to Environmental Engineering (4th Ed., MacKenzie Davis & David Cornwell)
Solution manual Introduction to Environmental Engineering and Science (2nd Ed., Gilbert Masters)
Solution manual Introduction to Environmental Engineering and Science (3rd Ed., Gilbert Masters & Wendell Ela)
Solution manual Solar Energy Engineering (Soteris Kalogirou)
Solution manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution manual Energy Technology and Directions for the Future (Fanchi)
Solution manual Environmental Engineering : Fundamentals, Sustainability, Design (James Mihelcic, Julie Zimmerman)
Solution manual Environmental Engineering Science (Nazaroff & Alvarez - Cohen)
Solution manual Environmental Engineering (4th Ed., Ruth Weiner & Robin Matthews)
Solution manual Environmental Pollution and Control (4th Ed., Peirce,

Vesilind & Weiner)
Solution manual Introduction to Engineering and the Environment (1st Ed., Edward Rubin)
Solution manual Basic Environmental Technology : Water Supply, Waste Management & Pollution Control (5th Ed., Jerry Nathanson)
Solution manual Water and Wastewater Technology - SI Units (5th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Technology (6th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Engineering (Mackenzie L. Davis)
Solution manual Water Supply and Pollution Control (8th Ed., Viessman Jr., Hammer, Perez & Chadik)
Solution manual Water Supply and Pollution Control - International Version (8th Ed., Viessman Jr., Hammer, Perez & Chadik)
Solution manual Water Treatment : Principles and Design (2nd Ed., by MWH)
Solution manual Water Resources Engineering (Ralph A. Wurbs & Wesley P. James)
Solution manual Water Resources Engineering 2005 Edition (Larry W. Mays)
Solution manual Water Resources Engineering (2nd Ed., Larry W. Mays)
Solution manual Water Resources Engineering (2nd Ed., Chin)
Solution manual Water Chemistry (Benjamin)
Solution manual Plant Pathology (5th Ed., George Agrios)
Solution manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution manual Principles of Sequence Stratigraphy (Octavian Catuneanu)
Solution manual The Earth's Ionosphere : Plasma Physics & Electrodynamics (2nd Ed., Michael Kelley)
Solution manual Atmosphere, Ocean and Climate Dynamics : An Introductory Text (Marshall & Plumb)
Solution manual Atmospheric Science : An Introductory Survey (2nd Ed., John Wallace, Peter Hobbs)
Solution manual Environmental Issues : An Introduction to Sustainability (3rd Ed., McConnell & Abel)
Solution manual Environmental Science : Toward A Sustainable Future (10th Ed., Wright & Nebel)
Solution manual Hazard City : Assignments in Applied Geology (3rd Ed., King, Carpenter & Wilson)
Solution manual Introduction to Environmental Geology (4th ERd., Edward Keller)
Solution manual The Science of Grapevines : Anatomy and Physiology (Markus Keller)
Solution manual Geoenvironmental Engineering : Site Remediation, Waste Containment, and Emerging Waste Management Technologies (Hari Sharma & Krishna Reddy)
Solution manual Natural Hazards : Earth's Processes as Hazards, Disasters and Catastrophes (2nd Ed., Keller & Blodgett)
Solution manual Essentials of Oceanography (9th Ed., Trujillo &

Thurman)
Solution manual Exercises for Weather and Climate (6th Ed., Greg Carbone)
Solution manual Fundamentals of Ground Water (Franklin Schwartz & Hubao Zhang)
Solution manual Practical Problems in Groundwater Hydrology (Scott Bair & Terry Lahm)
Solution manual Groundwater Hydrology (3rd Ed., David Keith Todd & Larry Mays)
Solution manual Groundwater Science (Charles Fitts)
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Branko Ladanyi)
Solution manual Stormwater Management for Land Development : Methods and Calculations for Quantity Control (Thomas A. Seybert)
Solution manual Urban Hydrology, Hydraulics, and Stormwater Quality : Engineering Applications and Computer Modeling (A. Osman Akan & Houghtalen)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. Andrew Chadwick)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Robert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Agriculture's Ethical Horizon (Robert Zimdahl)
Solution manual Environmental Contaminants : Assessment and Control (Daniel Vallero)
Solution manual A Problem-Solving Approach to Aquatic Chemistry (James Jensen)
Solution manual Hazardous Waste Management (2nd Ed., Michael LaGrega, Phillip Buckingham & Jeffrey Evans)
Solution manual Environmental Biotechnology : Principles and Applications (1st Ed., Bruce Rittmann & Perry McCarty)
Solution manual Chemistry for Environmental Engineering and Science (5th Ed., Clair Sawyer, Perry McCarty & Gene Parkin)
Solution manual Geology for Engineers and Environmental Scientists (3rd Ed., Alan Kehew)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydrology : Water Quantity and Quality Control (2nd Ed., Wanielista, Kersten & Eaglin)
Solution manual Hydrology and Floodplain Analysis (4th Ed., Philip Bedient, Wayne Huber & Baxter Vieux)
Solution manual Hydrology : An Introduction (Brutsaert)
Solution manual Applied Atmospheric Dynamics (Amanda H. Lynch & John J. Cassano)
Solution manual Mid-Latitude Atmospheric Dynamics : A First Course (Jonathan E. Martin)
Solution manual Adjustment Computations : Spatial Data Analysis (4th

Ed., Charles Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., Charles Ghilani)
Solution manual Ecology (4th Ed., Manuel C. Molles)
Solution manual Industrial Ecology and Sustainable Engineering (T. E. Graedel & Braden R. Allenby)
Solution manual Principles of Environmental Science : Inquiry and Applications (4th Ed., Cunningham)
Solution manual Principles of Environmental Science : Inquiry and Applications (5th Ed., Cunningham)
Solution manual Environmental Science : A Global Concern (9th Ed., Cunningham)
Solution manual Environmental Science : A Global Concern (10th Ed., Cunningham)
Solution manual Essential Environmental Science (1st Ed., Edward Keller & Daniel Botkin)
Solution manual Environmental Science : Earth as a Living Planet (6th Ed., Daniel Botkin & Edward Keller)
Solution manual Environmental Science : Earth as a Living Planet (7th Ed., Daniel Botkin & Edward Keller)
Solution manual Environmental Science : Earth as a Living Planet, Canadian Edition (Daniel Botkin & Edward Keller & Isobel Heathcote)
Solution manual Introduction to Marine Biogeochemistry (2nd Ed., Susan Libes)
Solution manual Farm Management (5th Ed., Ronald Kay, William Edwards & Patricia Duffy)
Solution manual Farm Management (6th Ed., Ronald Kay, William Edwards & Patricia Duffy)
Solution manual Environmental Geology (6th Ed., Carla Montgomery)
Solution manual Environmental Geology (7th Ed., Carla Montgomery)
Solution manual Environmental Geology (8th Ed., Carla Montgomery)
Solution manual Natural Disasters (4th Ed., Patrick Abbott)
Solution manual Natural Disasters (5th Ed., Patrick Abbott)
Solution manual Natural Disasters (6th Ed., Patrick Abbott)
Solution manual Geography Information Systems (2nd Ed., Kang-tsung Chang)
Solution manual Meteorology (2nd Ed., Danielson et al.)
Solution manual Fundamentals of Oceanography (4th Ed., Duxbury, Sverdrup)
Solution manual Fundamentals of Oceanography (5th Ed., Duxbury, Sverdrup)
Solution manual Introduction to Geography (8th Ed., Getis et al.)
Solution manual Introduction to Geography (9th Ed., Getis et al.)
Solution manual Introduction to Geography (10th Ed., Getis et al.)
Solution manual Introduction to Geography (11th Ed., Getis et al.)
Solution manual Physical Geology : The Earth Revealed (4th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology : The Earth Revealed (6th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology : Earth Revealed (7th Ed., Plummer,

McGeary & Carlson)
Solution manual Physical Geology (9th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (10th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (11th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (12th Ed., Plummer, McGeary & Carlson)
Solution manual Exploring the World Ocean (W. Sean Chamberlin & Tommy Dickey)
Solution manual Mastering ArcGIS (3rd Ed., Maribeth Price)
Solution manual Mastering ArcGIS (4th Ed., Maribeth Price)
Solution manual An Introduction to the World's Oceans (7th Ed., Sverdrup et al.)
Solution manual An Introduction to the Worlds Oceans (8th Ed., Sverdrup et al.)
Solution manual An Introduction to the Worlds Oceans (9th Ed., Sverdrup & Armbrust)
Solution manual An Introduction to the Worlds Oceans (10th Ed., Sverdrup & Armbrust)
Solution manual Laboratory Studies in Earth History (8th Ed., Brice et al.)
Solution manual Laboratory Studies in Earth History (9th Ed., Brice et al.)
Solution manual Exploring Geology (1st Ed., Reynolds et al.)
Solution manual Manual of Mineral Science (23rd Ed., Cornelis Klein & Barbara Dutrow)
Solution manual Isotopes : Principles and Applications (3rd Ed., Gunter Faure & Teresa Mensing)
Solution manual Earth Science : Understanding Environmental Systems (Edgar Spencer)
Solution manual Fundamentals of Weed Science (3rd Ed., Robert Zimdahl)
Solution manual Field and Laboratory Exercises in Animal Behavior (Tillberg, Breed & Hinners)
Solution manual Soils : An Introduction (6th Ed., Michael Singer & Donald Munns)
Solution manual Soils, Land, and Life (Stan Buol)
Solution manual Soils in Our Environment (10th Ed., Raymond Miller & Duane Gardiner)
Solution manual Soils in Our Environment (11th Ed., Raymond Miller & Duane Gardiner)
Solution manual Soil Microbiology, Ecology and Biochemistry (3rd Ed., Eldor Paul)
Solution manual Soil in the Environment : Crucible of Terrestrial Life (Daniel Hillel)
Solution manual Design Analysis in Rock Mechanics (William G. Pariseau)
Solution manual Forest Management and Planning (Bettinger, Boston, Siry & Grebner)
Solution manual Agricultural Systems : Agroecology and Rural

Innovation for Development (Sieglinde Snapp & Barry Pound)
Solution manual Plant Systematics (Michael Simpson)
Solution manual The Nature and Properties of Soils (14th Ed., Nyle Brady & Raymond Weil)
Solution manual Elements of the Nature and Properties of Soils (2nd Ed., Nyle Brady & Ray Weil)
Solution manual Materials and the Environment : Eco-informed Material Choice (Michael Ashby)

- Chemistry and Chemical Engineering :

Solution manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution manual Principles and Modern Applications of Mass Transfer Operations (Jaime Benitez)
Solution manual Diffusion : Mass Transfer in Fluid Systems (2nd Ed., Cussler)
Solution manual Separation Process Principles (1st Ed, Seader & Henley)
Solution manual Separation Process Principles (2nd Ed, Seader & Henley)
Solution manual Analysis, Synthesis and Design of Chemical Processes (3rd Ed., Turton, Bailie, Whiting & Shaeiwitz)
Solution manual Principles of Chemical Separations with Environmental Applications (Richard D. Noble)
Solution manual Product and Process Design Principles : Synthesis, Analysis, and Evaluation (2nd Ed., Seider, Seader & Lewin)
Solution manual Product and Process Design Principles : Synthesis, Analysis, and Design (3rd Ed., Seider, Seader, Lewin & Widagdo)
Solution manual Principles and Practices of Automatic Process Control (3rd Ed., Smith & Corripio)
Solution manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)
Solution manual Process Dynamics and Control (2nd Ed., Seborg, Edgard & Mellichamp)
Solution manual Process Dynamics and Control (3rd Ed., Seborg, Edgard, Mellichamp & Doyle)
Solution manual Process Control : A First Course with MATLAB (P.C. Chau)
Solution manual Plant Design and Economics for Chemical Engineers (5th Ed., Peters & Timmerhaus)
Solution manual Basic Principles and Calculations in Chemical Engineering (7th Ed., Himmelblau)
Solution manual Unit Operations of Chemical Engineering (6th Ed., McCabe & Smith)
Solution manual Unit Operations of Chemical Engineering (7th Ed., McCabe & Smith)
Solution manual Transport Phenomena in Biological Systems (1st Ed., George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena in Biological Systems (2nd Ed.,

George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena : A Unified Aprroach (Robert S. Brodkey & Harry C. Hershey)
Solution manual Modeling in Transport Phenomena : A Conceptual Approach (2nd Ed., Ismail Tosun)
Solution manual Transport Phenomena (2nd Ed., Bird & Stewart)
Solution manual Solutions to Class 1&2 - Transport Phenomena (Bird)
Solution manual Chemical Engineering Design (Gavin Towler)
Solution manual Chemical Engineering Design (Coulson & Richardson's Chemical Engineering - Volume 6) - (4th Ed., Sinnott)
Solution manual Chemical Engineering Design - SI Edition (5th Ed., Sinnott & Towler)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Chemical Engineering Design and Analysis : An Introduction (Duncan & Reimer)
Solution manual Introduction to Chemical Reactor Analysis (R.E. Hayes)
Solution manual Kinetics of Catalytic Reactions (Albert Vannice)
Solution manual An Introduction to Chemical Engineering Kinetics and Reactor Design (Charles G. Hill)
Solution manual Chemical Reactions and Chemical Reactors (George W. Roberts)
Solution manual Chemical Reaction Engineering (3rd Ed., Levenspiel)
Solution manual Fundamentals of Chemical Reaction Engineering (1st Ed., Davis)
Solution manual Conceptual Design of Distillation Systems (1st Ed., Doherty & Malone)
Solution manual Fluid Mechanics for Chemical Engineers (3rd Ed., Noel de Nevers)
Solution manual Introduction to Chemical Processes : Principles, Analysis, Synthesis (1st Ed., Regina M. Murphy)
Solution manual Optimization of Chemical Processes (2nd Ed., Edgar & Himmelblau)
Solution manual Two-Phase Flow : Theory and Applications (Clement Kleinstreuer)
Solution manual Chemical and Engineering Thermodynamics (3rd Ed., Stanley I. Sandler)
Solution manual Chemical, Biochemical, and Engineering Thermodynamics (4th Ed., Stanley I. Sandler)
Solution manual Introduction to Chemical Engineering Thermodynamics (6th Ed., Smith & Van Ness)
Solution manual Introduction to Chemical Engineering Thermodynamics (7th Ed., Smith & Van Ness)
Solution manual Engineering and Chemical Thermodynamics (Koretsky)
Solution manual Introduction to Chemical Principles (9th Ed., Stephen Stoker)
Solution manual Basic Chemistry (2nd Ed., K. Timberlake & W. Timberlake)

Solution manual Phase Equilibria, Phase Diagrams and Phase Transformations : Their Thermodynamic Basis (2nd Ed., Mats Hillert)
Solution manual Principles of Chemical Kinetics (2nd Ed., James House)
Solution manual Elementary Principles of Chemical Processes (3rd Ed., Felder & Rousseau)
Solution manual Elements of Chemical Reaction Engineering (3rd Ed., Fogler)
Solution manual Principles Of Polymer Systems (5th Ed., by Ferdinand Rodriguez, Claude Cohen, Christopher Ober, Lynden Archer)
Solution manual Group Theory with Applications in Chemical Physics (Patrick Jacobs)
Solution manual Food Analysis (3rd Ed., Suzanne Nielsen)
Solution manual Introduction to Physical Chemistry (3rd Ed., Ladd)
Solution manual General Chemistry: Principles and Modern Applications (10th Ed., Ralph H. Petrucci, F. Geoffrey Herring, Jeffry D. Madura, Carey Bissonnette)
Solution manual Virtual ChemLab : General Chemistry Student Lab Manual / Workbook, v2.5, 3rd Ed. (Brian Woodfield & Matthew Asplund)
Solution manual Introductory Chemistry (2nd Ed., Nivaldo J. Tro)
Solution manual Introductory Chemistry (3rd Ed., Nivaldo J. Tro)
Solution manual Conceptual Integrated Science (Hewitt, Lyons, Suchocki & Yeh)
Solution manual Introductory Chemistry: Concepts and Connections (4th Ed., Charles Corwin)
Solution manual Prentice Hall Lab Manual Introductory Chemistry (4th Ed., Charles Corwin)
Solution manual Modern Organic Synthesis : An Introduction (George S. Zweifel, Michael H. Nantz)
Solution manual General, Organic and Biological Chemistry : Structures of Life (2nd Ed., Karen Timberlake)
Solution manual Chemistry : An Introduction to General, Organic, and Biological Chemistry (9th Ed., Karen Timberlake)
Solution manual Chemistry : An Introduction to General, Organic, and Biological Chemistry (10th Ed., Karen Timberlake)
Solution manual Conceptual Chemistry (3rd Ed., John A. Suchocki)
Solution manual Explorations in Conceptual Chemistry : A Student Activity Manual (Jeffrey Paradis)
Solution manual Criminalistics : An Introduction to Forensic Science (9th Ed., Richard Saferstein)
Solution manual Physical Chemistry (Thomas Engel & Philip Reid)
Solution manual Physical Chemistry for the Life Sciences (Engel, Drobny & Reid)
Solution manual Quantum Chemistry and Spectroscopy with Spartan Student Physical Chemistry Software (Thomas Engel & Philip Reid)
Solution manual Themodynamics, Statistical Thermodynamics, and Kinetics (Thomas Engel & Philip Reid)
Solution manual Physical Chemistry (7th. Ed., Peter Atkins & Julio de Paula)
Solution manual Physical Chemistry (2nd Ed., Robert Mortimer)
Solution manual Physical Chemistry (3rd Ed., Robert Mortimer)

Solution manual Chemistry (4th Ed., Olmsted & Williams)
Solution manual Chemistry : Structure and Dynamics (3rd Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry : Structure and Dynamics (4th Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry (3rd Ed., Catherine E. Housecroft & Edwin Constable)
Solution manual Chemistry (4th Ed., Catherine E. Housecroft & Edwin Constable)
Solution manual General Chemistry : The Essential Concepts (4th Ed., Raymond Chang)
Solution manual Principles of General Chemistry (2nd Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (3rd Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (4th Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (5th Ed., Martin Silberberg)
Solution manual General, Organic and Biochemistry (3rd ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (4th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (5th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (6th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual Introduction to General, Organic and Biochemistry in the Laboratory: Laboratory Manual (8th Ed., Hein, Peisen, Ritchey, Pattison & Arena)
Solution manual Introduction to General, Organic and Biochemistry in the Laboratory: Laboratory Manual (9th Ed., Hein, Pattison, Arena & Best)
Solution manual Introduction to General, Organic and Biochemistry (8th Ed., Hein, Best, Pattison & Arena)
Solution manual Introduction to General, Organic and Biochemistry (9th Ed., Hein, Pattison, Arena & Best)
Solution manual General, Organic and Biological Chemistry : An Integrated Approach, Laboratory Experiments (Macaulay, Bauer & Bloomfield)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (1st Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (2nd Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (3rd Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : A Guided Inquiry (Michael Garoutte)
Solution manual Biophysical Chemistry (James P. Allen)
Solution manual Fundamentals of Chemistry (3rd Ed., David Goldberg)

Solution manual Fundamentals of Chemistry (4th Ed., David Goldberg)
Solution manual Fundamentals of Chemistry (5th Ed., David Goldberg)
Solution manual Chemistry : A Guided Inquiry (4th Ed., Richard Moog & John Farrell)
Solution manual Chemistry : Matter and Its Changes (4th Ed., Brady & Senese)
Solution manual Chemistry : The Study of Matter and Its Changes (5th Ed., Brady & Senese)
Solution manual Chemistry : An Everyday Approach to Chemical Investigation (Sally Solomon, Susan Rutkowsky & Charles Boritz)
Solution manual Organic Chemistry (8th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Organic Chemistry (9th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Organic Chemistry (10th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Advanced Organic Chemistry Part A : Structure and Mechanisms (5th Ed., Francis Carey & Richard Sundberg)
Solution manual Advanced Organic Chemistry Part B : Reaction and Synthesis (5th Ed., Francis Carey & Richard Sundberg)
Solution manual Modern Analytical Chemistry (Harvey)
Solution manual General Chemistry Lab Manual (Petra A. M. van Koppen)
Solution manual Organic Structure Determination Using 2-D NMR Spectroscopy : A Problem-Based Approach (Jeffrey Simpson)
Solution manual Practical Interfacing in the Laboratory : Using a PC for Instrumentation, Data Analysis and Control (Stephen E. Derenzo)
Solution manual Bioprocess Engineering Principles (Pauline M. Doran)
Solution manual Isotopes : Principles and Applications (3rd Ed., Gunter Faure & Teresa Mensing)
Solution manual Fundamentals of Forensic Science (Max Houck & Jay Siegel)
Solution manual Chemistry Case Studies for Allied Health (Colleen Kelley & Wendy Weeks)
Solution manual The Extraordinary Chemistry of Ordinary Things (4th Ed., Carl Snyder)
Solution manual The Art and Science of Chemical Analysis (Christie Enke)
Solution manual Spectrometric Identification of Organic Compounds (7th Ed., Robert Silverstein, Francis Webster, David Kiemle)
Solution manual Bioinstrumentation (John G. Webster)
Solution manual Medical Instrumentation Application and Design (4th Ed., John G. Webster)
Solution manual Microscale General Chemistry Laboratory : with Selected Macroscale Experiments (2nd Ed., Zvi Szafran, Ronald Pike, Judith Foster)
Solution manual Microscale Organic Laboratory : with Multistep and Multiscale Syntheses (4th Ed., Dana Mayo, Ronald Pike, Peter Trumper)
Solution manual Laboratory Manual for Principles of General Chemistry (8th Ed., Jo Allan Beran)

- Industrial Engineering, Business, Economics and Finance :

Solution manual Basics of Engineering Economy (1st Ed., Leland T Blank & Anthony Tarquin)
Solution manual Engineering Economy (5th Ed., Leland T Blank & Anthony Tarquin)
Solution manual Engineering Economy (6th Ed., Leland T Blank & Anthony Tarquin)
Solution manual Contemporary Engineering Economics (4th Ed., Chan Park)
Solution manual Contemporary Engineering Economics (5th Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics (2nd Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics : International Version (2nd Ed., Chan Park)
Solution manual Engineering Economy (13th Ed, Sullivan, Wicks & Luxhoj)
Solution manual Engineering Economy (14th Ed, Sullivan, Wicks & Koelling)
Solution manual Engineering Economics : International Version (14th Ed., Sullivan, Wicks & Koelling)
Solution manual Recursive Methods in Economic Dynamics (C. Irigoyen)
Solution manual Engineering Design (Rudolph J. Eggert)
Solution manual Engineering Design : A Project-Based Introduction (2nd Ed., Clive L. Dym & Patrick Little)
Solution manual Engineering Design : A Project-Based Introduction (3rd Ed., Clive L. Dym & Patrick Little)
Solution manual Tools and Tactics of Design (Dominick, Demel, Lawbaugh, Freuler, Kinzel & Fromm)
Solution manual Introduction to Statistical Quality Control (5th Ed., Douglas C. Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Douglas C. Montgomery)
Solution manual An Introduction to Investment Banks, Hedge Funds, and Private Equity : The New Paradigm (David Stowell)
Solution manual Financial and Economic Analysis for Engineering and Technology Management (2nd Ed., Henry E. Riggs)
Solution manual Introduction to Operations Research (7th Ed., Hillier and Lieberman)
Solution manual Introduction to Operations Research (8th Ed., Hillier and Lieberman)
Solution manual Introduction to Operations Research (9th Ed., Hillier and Lieberman)
Solution manual Methods, Standards, and Work Design (11th Ed., Niebel & Freivalds)
Solution manual Niebel's Methods, Standards and Work Design (12th Ed., Freivalds & Niebel)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)

Solution manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution manual Quality Control (8th Ed., Dale Besterfield)
Solution manual Introduction to Optimum Design (2nd Ed., Jasbir Arora)
Solution manual Numerical Optimization (2nd Ed., Jorge Nocedal & Stephen Wright)
Solution manual Optimization : Foundations and Applications (Ronald E. Miller)
Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer & William Keat)
Solution manual Exploring Engineering : An Introduction to Engineering and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution manual Quantitative Methods For Management (William E. Pinney, Donald B. McWilliams, Joe Ormsby, Mark Atchison)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed., Wadsworth, Stephens, Godfrey)
Solution manual Managing Engineering and Technology (4th, Morse & Babcock)
Solution manual Managing Engineering and Technology (5th, Morse & Babcock)
Solution manual Quality Planning and Analysis : From Product Development through Use (4th Ed., Gryna)
Solution manual Juran's Quality Planning and Analysis for Enterprise Quality (5th Ed., Gryna, Chua & DeFeo)
Solution manual Quality (4th Ed., Summers)
Solution manual Quality (5th Ed., Summers)
Solution manual Quality Management (2nd Ed., Summers)
Solution manual Quality Management (5th Ed., Goetsch & Davis)
Solution manual Quality Management for Organizational Excellence : Introduction to Total Quality (6th Ed., David Goetsch & Stanley Davis)
Solution manual Applied Econometric Time Series (2nd Ed., Walter Enders)
Solution manual Applied Econometric Time Series (3rd Ed., Walter Enders)
Solution manual Statistics and Econometrics : Methods and Applications (Ashenfelter, Levine & Zimmerman)
Solution manual Econometric Analysis (5th Ed., William H. Greene)
Solution manual Econometric Analysis (6th Ed., William H. Greene)
Solution manual Management : A Practical Introduction (4th Ed., Angelo Kinicki & Brian Williams)
Solution manual Forest Management and Planning (Pete Bettinger, Kevin Boston, Jacek Siry & Donald Grebner)

Solution manual Foundations of Multinational Financial Management (5th Ed., Shapiro)
Solution manual Foundations of Multinational Financial Management (6th Ed., Shapiro & Sarin)
Solution manual Multinational Financial Management (8th Ed., Shapiro)
Solution manual Multinational Financial Management (9th Ed., Shapiro)
Solution manual Doing Statistics for Business with Excel : Data, Inference, and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett & Horrell)
Solution manual Modern Portfolio Theory and Investment Analysis (7th Ed., Elton, Gruber, Brown & Goetzmann)
Solution manual Modern Portfolio Theory and Investment Analysis (8th Ed., Elton, Gruber, Brown & Goetzmann)
Solution manual Accounting : What the Numbers Mean (6th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (7th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (8th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (9th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Global Accounting and Control : A Managerial Emphasis (Gray, Salter, Radebaugh)
Solution manual International Accounting and Multinational Enterprises (6th Ed., Radebaugh, Gray, Black)
Solution manual Quality : A Corporate Force, Managing for Excellence (C. Harold Aikens)
Solution manual Quality Inspired Management : The Key to Sustainability (C. Harold Aikens)
Solution manual Value Driven Product Planning and Systems Engineering (H. E. Cook & L. A. Wissmann)
Solution manual Work Systems : The Methods, Measurement & Management of Work (Mikell Groover)
Solution manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution manual Occupational Safety and Health for Technologists, Engineers, and Managers (5th Ed., Goetsch)
Solution manual Occupational Safety and Health for Technologists, Engineers, and Managers (6th Ed., Goetsch)
Solution manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Fundamentals of Forensic Science (Max Houck & Jay Siegel)
Solution Manual Project Management for Business and Engineering : Principles and Practice (2nd Ed., John Nicholas)
Solution Manual Project Management for Business and Engineering : Principles and Practice (3rd Ed., John Nicholas)

Solution Manual CIMA Official Learning System Integrated Management (4th Ed., Ann Norton)
Solution Manual CIMA Official Learning System Enterprise Management (6th Ed., Ann Norton & Jenny Hughes)
Solution Manual CIMA Official Learning System Financial Operations (6th Ed., Jo Watkins)
Solution Manual CIMA Official Learning System Financial Management (6th Ed., Luisa Robertson)
Solution Manual CIMA Official Learning System Enterprise Strategy (6th Ed., Neil Botten)
Solution Manual CIMA Official Learning System Fundamentals of Business Maths (4th Ed., Graham Eaton)
Solution Manual CIMA Official Learning System Financial Analysis (4th Ed., Catherine Gowthorpe)
Solution Manual CIMA Official Learning System Fundamentals of Financial Accounting (2nd Ed., Henry Lunt)
Solution Manual CIMA Official Learning System Fundamentals of Financial Accounting (6th Ed., Henry Lunt)
Solution Manual CIMA Official Learning System Performance Management (6th Ed., Jo Avis)
Solution Manual CIMA Official Learning System Fundamentals of Management Accounting (2nd Ed., Janet Walker)
Solution Manual CIMA Official Learning System Management Accounting Financial Strategy (4th Ed., John Ogilvie)
Solution Manual CIMA Official Learning System Financial Strategy (6th Ed., John Ogilvie)
Solution Manual CIMA Official Learning System Organisational Management and Information Systems (4th Ed., Bob Perry)
Solution Manual CIMA Learning System Enterprise Operations (Bob Perry)
Solution Manual CIMA Learning System Management Accounting - Performance Evaluation (4th Ed., Robert Scarlett)
Solution Manual CIMA Official Learning System - Performance Operations (6th Ed., Robert Scarlett)
Solution Manual CIMA Official Learning System Fundamentals of Business Economics (2nd Ed., Steve Adams & Paul Periton)
Solution Manual Operations Management in Context (2nd Ed., Rowbotham, Azhashemi & Galloway)
Solution Manual Accounting for Business Studies (Aneirin Sion Owen)
Solution Manual ISO 9001 : 2000 Quality Registration Step-by-Step (3rd Ed., Fred Dobb)
Solution Manual Systems for Planning and Control in Manufacturing (D. K. Harrison & D. J. Petty)
Solution Manual Facilities Planning (3rd Ed., Tompkins, White, Bozer & Tanchoco)
Solution Manual Facilities Planning (4th Ed., Tompkins)
Solution Manual Facilities Planning and Design (Alberto Garcia-Diaz & J. MacGregor Smith)
Solution Manual Planning and Control of Manufacturing Operations (John Kenworthy)
Solution Manual Professionalism: Real Skills for Workplace Success

(Anderson & Bolt)
Solution Manual Customer Service : Career Success Through Customer Loyalty (4th Ed., Timm)
Solution Manual Customer Service : A Practical Approach (3rd Ed., Harris)
Solution Manual Customer Service : A Practical Approach (4th Ed., Harris)
Solution Manual Serving Internal and External Customers (Anne Swartzlander)
Solution Manual The Theory of Interest (3rd Ed., Stephen G. Kellison)
Solution Manual Customer Relationship Management : The Bottom Line to Optimizing Your ROI (Anton & Petouhoff)
Solution Manual Engineering Economy and the Decision-Making Process (Joseph C. Hartman)
Solution Manual Engineering Management : Challenges in the New Millennium (C. M. Chang)
Solution Manual Cost Analysis and Estimating for Engineering and Management (Phillip F. Ostwald & Timothy S. McLaren)
Solution Manual Supply Chain Management (3rd Ed., Sunil Chopra & Peter Meindl)
Solution Manual Supply Chain Management (4th Ed., Sunil Chopra & Peter Meindl)
Solution Manual Supply Chain Management : From Vision to Implementation (Stanley E. Fawcett, Lisa M. Ellram, Jeffrey A. Ogden)
Solution Manual Industrial Safety and Health Management (5th Ed., C. Ray Asfahl)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Jon S. Stenerson & Kelly Curran)
Solution Manual Introduction to Management Science (8th Ed., Bernard W. Taylor)
Solution Manual Introduction to Management Science (9th Ed., Bernard W. Taylor)
Solution Manual Introduction to Management Science (10th Ed., Bernard W. Taylor)
Solution Manual Operations Research : An Introduction (8th Ed., Taha)
Solution Manual Decision Support Systems and Intelligent Systems (7th Ed., Turban, Aronson, Ting-Peng Liang)
Solution Manual Decision Support and Business Intelligence Systems (8th Ed., Turban, Aronson, Ting-Peng Liang & Sharda)
Solution Manual Introduction to Information Systems : Canadian Edition (Rainer, Turban, Splettstoesser-Hogeterp, Sanchez-Rodriguez)
Solution Manual Introduction to Information Systems : Supporting and Transforming Business (1st Ed., Rainer, Turban, Potter)
Solution Manual Introduction to Information Systems : Supporting and Transforming Business (2nd Ed., Rainer, Turban)
Solution Manual Information Technology for Management : Transforming Organizations in the Digital Economy (5th Ed., Turban, Leidner, McLean, Wetherbe)
Solution Manual Information Technology for Management : Transforming Organizations in the Digital Economy (6th Ed., Turban, Leidner,

McLean, Wetherbe)
Solution Manual Information Technology for Management : Improving Performance in the Digital Economy (7th Ed., Turban & Volonino)
Solution Manual Operations Management (7th Ed., Krajewski, Ritzman)
Solution Manual Operations Management : Process and Value Chains (8th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management : Process and Supply Chains (9th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management : Process and Supply Chains - Global Edition (9th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management (8th Ed., Jay Heizer & Render)
Solution Manual Operations Management (9th Ed., Jay Heizer & Render)
Solution Manual Operations Management (10th Ed., Jay Heizer & Render)
Solution Manual Introduction to Operations and Supply Chain Management with Advanced Decision Support Tools (1st Ed., Cecil Bozarth)
Solution Manual Introduction to Operations and Supply Chain Management (2nd Ed., Cecil Bozarth, Robert B. Handfield)
Solution Manual Managing Business Process Flows : Principles of Operations Management (2nd Ed., Anupind, Chopra, Deshmukh, et al)
Solution Manual Principles Of Operations Management (6th Ed., Heizer & Render)
Solution Manual Principles Of Operations Management (7th Ed., Heizer & Render)
Solution Manual Principles Of Operations Management (8th Ed., Heizer & Render)
Solution Manual Foundations of Operations Management (Ritzman & Krajewski)
Solution Manual Foundations of Operations Management - Canadian Edition (2nd Ed., Ritzman, Krajewski, Malhotra & Klassen)
Solution Manual Basic Marketing : A Marketing Strategy Planning Approach (16th Ed., Perreault, Cannon & McCarthy)
Solution Manual Basic Marketing : A Marketing Strategy Planning Approach (17th Ed., Perreault, Cannon & McCarthy)
Solution Manual Foundations of Financial Management (11th Ed., Block & Hirt)
Solution Manual Foundations of Financial Management (12th Ed., Block & Hirt)
Solution Manual Foundations of Financial Management (13th Ed., Block, Hirt & Danielsen)
Solution Manual Decision Modeling with Microsoft® Excel (6th Ed., Moore & Weatherford)
Solution Manual Managing Quality : Integrating The Supply Chain (3rd Ed., S. Thomas Foster)
Solution Manual Six Sigma : Basic Tools and Techniques (Donna C.S. Summers)
Solution Manual A First Course in Quality Engineering (KS Krishnamoorthi)
Solution Manual Statistical Quality Design and Control (2nd Ed., DeVor, Chang & Sutherland)
Solution Manual Economics : A Tool for Critically Understanding

Society (7th Ed., Riddell, Shackelford, Stamos & Schneider)
Solution Manual Economics : A Tool for Critically Understanding Society (8th Ed., Riddell, Shackelford, Stamos & Schneider)
Solution Manual Introduction to Economic Reasoning (6th Ed., William D. Rohlf, Jr.)
Solution Manual Introduction to Economic Reasoning (7th Ed., William D. Rohlf, Jr.)
Solution Manual Economics (9th Ed., Michael Parkin)
Solution Manual Essential Foundations of Economics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Essential Foundations of Economics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Understanding Modern Economics (Roger LeRoy Miller)
Solution Manual The Economics of Macro Issues (3rd Ed., Roger LeRoy Miller & Daniel K. Benjamin)
Solution Manual Foundations of Economics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Economics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual International Economics (8th Ed., Dominick Salvatore)
Solution Manual International Economics (9th Ed., Dominick Salvatore)
Solution Manual International Economics (10th Ed., Dominick Salvatore)
Solution Manual Introduction to International Economics (1st Ed., Dominick Salvatore)
Solution Manual Introduction to International Economics (2nd Ed., Dominick Salvatore)
Solution Manual Economics Today (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (15th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View - Canadian Edition (4th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (15th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View - Canadian Edition (4th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (15th Ed., Roger LeRoy Miller)
Solution Manual Economics (Michael A. Leeds, Peter von Allmen & Richard C. Schiming)
Solution Manual Economics : Private Markets and Public Choice (7th Ed., Ekelund, Jr., Ressler & Tollison)
Solution Manual Principles of Economics, 7th Ed. (Roy J. Ruffin & Paul

R. Gregory)
Solution Manual The Economics of Public Issues (14th Ed., Miller, Benjamin & North)
Solution Manual The Economics of Public Issues (15th Ed., Miller, Benjamin & North)
Solution Manual Macroeconomics (7th Ed., Michael Parkin)
Solution Manual Macroeconomics (8th Ed., Michael Parkin)
Solution Manual Macroeconomics (9th Ed., Michael Parkin)
Solution Manual Foundations of Microeconomics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Microeconomics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Macroeconomics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Macroeconomics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Microeconomic Theory (Andreu Mas-Colell, Michael D. Whinston, Jerry R. Green)
Solution Manual Microeconomics MyEconLab Homework Edition (Leeds, von Allmen & Schiming)
Solution Manual Macroeconomics MyEconLab Homework Edition (Leeds, von Allmen & Schiming)
Solution Manual Microeconomics (7th Ed., Michael Parkin)
Solution Manual Microeconomics (8th Ed., Michael Parkin)
Solution Manual Microeconomics (9th Ed., Michael Parkin)
Solution Manual Microeconomics (6th Ed., Robert Pindyck & Daniel Rubinfeld)
Solution Manual Microeconomics (7th Ed., Robert Pindyck & Daniel Rubinfeld)
Solution Manual Macroeconomics (2nd Ed., Stephen D. Williamson)
Solution Manual Macroeconomics (3rd Ed., Stephen D. Williamson)
Solution Manual Macroeconomics Update Edition (5th Ed., Andrew B. Abel, Ben S. Bernanke)
Solution Manual Macroeconomics (6th Ed., Andrew B. Abel, Ben S. Bernanke & Dean Croushore)
Solution Manual Macroeconomics (10th Ed., Robert J. Gordon)
Solution Manual Macroeconomics (11th Ed., Robert J. Gordon)
Solution Manual Macroeconomics - Canadian Edition (3rd Ed., Olivier Blanchard & David R. Johnson)
Solution Manual Macroeconomics (4th Ed., Olivier Blanchard)
Solution Manual Macroeconomics - Canadian Edition (4th Ed., Olivier Blanchard & David R. Johnson)
Solution Manual Macroeconomics (5th Ed., Olivier Blanchard)
Solution Manual Systems Engineering and Analysis (5th Ed., Benjamin Blanchard & Wolter Fabrycky)
Solution Manual Economic Growth (1st Ed., David N. Weil)
Solution Manual Economic Growth (2nd Ed., David N. Weil)
Solution Manual Money, the Financial System, and the Economy (5th Ed., R. Glenn Hubbard)
Solution Manual Money, the Financial System, and the Economy (6th Ed.,

R. Glenn Hubbard)
Solution Manual Money, Banking and Financial Markets (2nd Ed., Stephen G. Cecchetti)
Solution Manual The Economics of Money, Banking and Financial Markets (8th Ed., Frederic S. Mishkin)
Solution Manual The Economics of Money, Banking and Financial Markets (9th Ed., Frederic S. Mishkin)
Solution Manual Principles of Money, Banking, and Financial Markets (11th Ed., Ritter, Silber & Udell)
Solution Manual Principles of Money, Banking, and Financial Markets (12th Ed., Ritter, Silber & Udell)
Solution Manual Fundamentals of Corporate Finance (Parrino & Kidwell)
Solution Manual Financial Institutions, Markets, and Money (9th Ed., Kidwell, Blackwell, Whidbee & Peterson)
Solution Manual Financial Institutions, Markets, and Money (10th Ed., Kidwell, Blackwell, Whidbee & Peterson)
Solution Manual International Economics (3rd Ed., James Gerber)
Solution Manual International Economics (4th Ed., James Gerber)
Solution Manual International Economics (5th Ed., James Gerber)
Solution Manual International Economics (7th Ed., Steven Husted & Michael Melvin)
Solution Manual International Economics (8th Ed., Steven Husted & Michael Melvin)
Solution Manual International Economics (3rd Ed., W. Charles Sawyer & Richard L. Sprinkle)
Solution Manual World Trade and Payments : An Introduction (9th Ed., Caves, Frankel & Jones)
Solution Manual World Trade and Payments : An Introduction (10th Ed., Caves, Frankel & Jones)
Solution Manual International Economics : Theory and Policy (7th Ed., Krugman & Obstfeld)
Solution Manual International Economics : Theory and Policy (8th Ed., Krugman & Obstfeld)
Solution Manual International Money and Finance (7th Ed., Michael Melvin)
Solution Manual Economic Development (9th Ed., Todaro & Smith)
Solution Manual Microeconomics (4th Ed., Jeffrey M. Perloff)
Solution Manual Microeconomics (Don E. Waldman)
Solution Manual Microeconomics : Theory and Applications with Calculus (Jeffrey M. Perloff)
Solution Manual Microeconomic : Theory and Applications (9th Ed., Browning & Zupan)
Solution Manual Microeconomic : Theory and Applications (10th Ed., Browning & Zupan)
Solution Manual Environmental Economics and Policy (5th Ed., Tom Tietenberg)
Solution Manual Environmental and Natural Resource Economics (7th Ed., Tom Tietenberg)
Solution Manual Health Economics (3rd Ed., Charles E. Phelps)
Solution Manual Industrial Organization : Theory and Practice (3rd

Ed., Waldman & Jensen)
Solution Manual Modern Industrial Organization (4th Ed., Carlton & Perloff)
Solution Manual Modern Labor Economics : Theory and Public Policy (9th Ed., Ehrenberg & Smith)
Solution Manual Law and Economics (4th Ed., Cooter & Ulen)
Solution Manual Law and Economics (5th Ed., Cooter & Ulen)
Solution Manual Market Regulation (Roger Sherman)
Solution Manual Public Finance and the American Economy (2nd Ed., Neil Bruce)
Solution Manual The Economics of Sports (2nd Ed., Leeds & von Allmen)
Solution Manual The Economics of Sports (3rd Ed., Leeds & von Allmen)
Solution Manual Introduction to Econometrics, Brief Edition (James H. Stock & Mark W. Watson)
Solution Manual Introduction to Econometrics (2nd ed., James H. Stock & Mark W. Watson)
Solution Manual Econometrics : A Modern Introduction (Michael P. Murray)
Solution Manual Using Econometrics : A Practical Guide (5th Ed., A.H. Studenmund)
Solution Manual Mathematical Methods for Economics (2nd Ed., Michael Klein)
Solution Manual Personal Finance with Financial Planning Software (3rd Ed., Jeff Madura)
Solution Manual Finance : Investments, Institutions, and Management - Update (2nd Ed., Stanley G. Eakins)
Solution Manual Introduction to Finance (Lawrence J. Gitman & Jeff Madura)
Solution Manual Principles of Managerial Finance Brief (4th Ed., Lawrence J. Gitman)
Solution Manual Principles of Managerial Finance (11th Ed., Lawrence J. Gitman)
Solution Manual Corporate Finance (Jonathan Berk & Peter DeMarzo)
Solution Manual Corporate Finance (7th Ed., Stephen A. Ross, Randolph W. Westerfield, Jeffrey Jaffe)
Solution Manual Principles of Corporate Finance (7th Ed., Richard A. Brealey, Stewart C. Myers)
Solution Manual Risk Takers : Uses and Abuses of Financial Derivatives (John Marthinsen)
Solution Manual Theory of Asset Pricing (George Pennacchi)
Solution Manual Multinational Business Finance (10th Ed., Eiteman, Stonehill & Moffett)
Solution Manual Multinational Business Finance (11th Ed., Eiteman, Stonehill & Moffett)
Solution Manual Fundamentals of Multinational Finance (1st Ed., Moffett, Stonehill & Eiteman)
Solution Manual Fundamentals of Multinational Finance (2nd Ed., Moffett, Stonehill & Eiteman)
Solution Manual Fundamentals of Multinational Finance (3rd Ed., Moffett, Stonehill & Eiteman)

Solution Manual Cases in International Finance (2nd Ed., Dufey & Giddy)
Solution Manual Fundamentals of Investing (9th Ed., Gitman & Joehnk)
Solution Manual Fundamentals of Investing (10th Ed., Gitman & Joehnk)
Solution Manual OTIS : Online Trading (Wharton Learning Lab)
Solution Manual Derivatives Markets (2nd Ed., Robert L. McDonald)
Solution Manual Principles of Risk Management and Insurance (9th Ed., George E. Rejda)
Solution Manual Principles of Risk Management and Insurance (10th Ed., George E. Rejda)
Solution Manual Financial Markets and Institutions (5th Ed., Frederic S. Mishkin & Stanley G. Eakins)
Solution Manual Financial Markets and Institutions (6th Ed., Frederic S. Mishkin & Stanley G. Eakins)
Solution Manual Statistical Analysis of Financial Data in S-PLUS (Rene A. Carmona)
Solution Manual Statistics and Finance : An Introduction (David Ruppert)
Solution Manual Mathematical Statistics for Economics and Business (Ron C. Mittelhammer)
Solution Manual Job Hazard Analysis (James E. Roughton & Nathan Crutchfield)
Solution Manual Managerial Issues of Enterprise Resource Planning Systems (David L. Olson)
Solution Manual Business Driven Technology (1st Ed., Haag et al.)
Solution Manual Business Driven Technology (2nd Ed., Haag et al.)
Solution Manual Operations Management : An Integrated Approach (2nd Ed., R. Dan Reid & Nada Sanders)
Solution Manual Operations Management : An Integrated Approach (3rd Ed., R. Dan Reid & Nada Sanders)
Solution Manual Operations Management (4th Ed., R. Dan Reid & Nada Sanders)
Solution Manual Commercial Banking: The Management of Risk (3rd Ed., Gup & Kolari)
Solution Manual Essential Statistics for Economics, Business and Management (Teresa Bradley)
Solution Manual Calculus for Business, Economics, and the Social and Life Sciences (8th Ed., Hoffmann & Bradley)
Solution Manual Calculus for Business, Economics, and the Social and Life Sciences (9th Ed., Hoffmann & Bradley)
Solution Manual Calculus for Business, Economics, and the Social and Life Sciences, Brief Edition (10th Ed., Hoffmann & Bradley)
Solution Manual Applied Calculus for Business, Economics, and the Social and Life Sciences, Expanded Edition (10th Ed., Hoffmann & Bradley)
Solution Manual Accounting for Governmental and Nonprofit Entities (12th Ed., Wilson & Kattelus)
Solution Manual Accounting for Governmental and Nonprofit Entities (13th Ed., Wilson & Kattelus)
Solution Manual Accounting for Governmental and Nonprofit Entities

(14th Ed., Wilson, Kattelus & Reck)
Solution Manual Accounting for Governmental and Nonprofit Entities (15th Ed., Wilson, Reck & Kattelus)
Solution Manual Accounting Theory : Text and Readings (7th Ed., Schroeder, Clark & Cathey)
Solution Manual Financial Accounting Theory and Analysis : Text Reading and Cases (8th Ed., Schroeder, Clark & Cathey)
Solution Manual Financial Accounting Theory and Analysis : Text and Cases (9th Ed., Schroeder, Clark & Cathey)
Solution Manual Financial Accounting in an Economic Context (6th Ed., Jamie Pratt)
Solution Manual Financial Accounting in an Economic Context (7th Ed., Jamie Pratt)
Solution Manual Principles of Engineering Economic Analysis (5th Ed., White, Case, Pratt)
Solution Manual Financial Accounting (Michael Jones)
Solution Manual Financial Accounting : A Valuation Emphasis (Hughes, Ayres, Hoskin)
Solution Manual Financial Accounting : A Decision-Making Approach (2nd Ed., King, Lembke & Smith)
Solution Manual Financial Accounting (4th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Financial Accounting, with Annual Report (5th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Financial Accounting (6th Ed., Weygandt, Kimmel & Kieso)
Solution Manual Financial Accounting (7th Ed., Weygandt, Kimmel & Kieso)
Solution Manual Financial Accounting : IFRS Edition (1st Ed., Weygandt, Kimmel & Kieso)
Solution Manual Acive Learning Edition for Financial Accounting : Tools for Business Decision Making (3rd Ed., Kimmel, Weygandt & Kieso)
Solution Manual Financial Accounting : Tools for Business Decision Making, with Annual Report (3rd Ed., Kimmel, Weygandt & Kieso)
Solution Manual Financial Accounting : Tools for Business Decision Making (4th Ed., Kimmel, Weygandt & Kieso)
Solution Manual Financial Accounting : Tools for Business Decision Making (5th Ed., Kimmel, Weygandt & Kieso)
Solution Manual Managerial Decision Modeling with Spreadsheets : Canadian Edition (1st Ed., Render, Stair, Balakrishnan & Smith)
Solution Manual Managerial Decision Modeling with Spreadsheets (1st Ed., Render, Stair, Balakrishnan)
Solution Manual Managerial Decision Modeling with Spreadsheets (2nd Ed., Balakrishnan, Render & Stair)
Solution Manual Introduction to Managerial Accounting (2nd Ed., Brewer, Garrison. Noreen)
Solution Manual Introduction to Managerial Accounting (3rd Ed., Brewer, Garrison. Noreen)
Solution Manual Introduction to Managerial Accounting (4th Ed., Brewer, Garrison. Noreen)

Solution Manual Introduction to Managerial Accounting (5th Ed., Brewer, Garrison. Noreen)
Solution Manual Managerial Accounting (Balakrishnan, Sivaramakrishnan & Sprinkle)
Solution Manual Managerial Accounting : Tools for Business Decision Making, Active Learning Edition (2nd Ed., Weygandt, Kieso & Kimmel)
Solution Manual Managerial Accounting : Tools for Business Decision Making (3rd Ed., Weygandt, Kieso & Kimmel)
Solution Manual Managerial Accounting : Tools for Business Decision Making (4th Ed., Weygandt, Kimmel & Kieso)
Solution Manual Managerial Accounting : Tools for Business Decision Making (5th Ed., Weygandt, Kimmel & Kieso)
Solution Manual Managerial Accounting : Creating Value in a Dynamic Business Environment (6th Ed., Ronald Hilton)
Solution Manual Managerial Accounting : Creating Value in a Dynamic Business Environment (7th Ed., Ronald Hilton)
Solution Manual Managerial Accounting : Creating Value in a Dynamic Business Environment (8th Ed., Ronald Hilton)
Solution Manual Managerial Accounting (2nd Ed., James Jiambalvo)
Solution Manual Managerial Accounting (3rd Ed., James Jiambalvo)
Solution Manual Managerial Accounting (4th Ed., James Jiambalvo)
Solution Manual Accounting : Tools for Business Decision Making (2nd Ed., Kimmel, Weygandt & Kieso)
Solution Manual Accounting : Tools for Business Decision Making (3rd Ed., Kimmel, Weygandt & Kieso)
Solution Manual Intermediate Accounting (4th Ed., Spiceland, Sepe & Tomassini)
Solution Manual Intermediate Accounting (5th Ed., Spiceland, Sepe, Nelson & Tomassini)
Solution Manual Intermediate Accounting (6th Ed., Spiceland, Sepe & Nelson)
Solution Manual Intermediate Accounting: Principles and Analysis (2nd Ed., Warfield, Weygandt & Kieso)
Solution Manual Intermediate Accounting (11th Ed., Kieso, Weygandt, Warfield)
Solution Manual Intermediate Accounting (12th Ed., Kieso, Weygandt, Warfield)
Solution Manual Fundamentals of Intermediate Accounting (Kieso, Weygandt, Warfield)
Solution Manual Accounting Principles (6th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Accounting Principles (7th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Accounting Principles (8th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Accounting Principles (9th Ed., Weygandt, Kieso & Kimmel)
Solution Manual Advanced Accounting (Bline, Fischer & Skekel)
Solution Manual Advanced Accounting (2nd Ed., Jeter & Chaney)
Solution Manual Advanced Accounting (3rd Ed., Jeter & Chaney)

Solution Manual Advanced Accounting (4th Ed., Jeter & Chaney)
Solution Manual Advanced Financial Accounting (7th Ed., Richard Baker, Valdean Lembke, Thomas King, Cynthia Jeffrey)
Solution Manual Advanced Financial Accounting (8th Ed., Richard Baker, Valdean Lembke, Thomas King, Cynthia Jeffrey)
Solution Manual Project Management : A Managerial Approach (6th Ed., Meredith & Mantel)
Solution Manual Project Management : A Managerial Approach (7th Ed., Meredith & Mantel)
Solution Manual Operations Management for MBAs (3rd Ed., Meredith & Shafer)
Solution Manual Operations Management for MBAs (4th Ed., Meredith & Shafer)
Solution Manual Project Management in Practice (3rd Ed., Mantel, Meredith, Shafer & Sutton)
Solution Manual Wiley Pathways Project Management (1st Ed., Portny, Mantel, Jr., Meredith, Shafer, Sutton & Kramer)
Solution Manual Core Concepts : Project Management in Practice (2nd Ed., Mantel, Meredith, Shafer & Sutton)
Solution Manual Advanced Project Management : Best Practices on Implementation (2nd Ed., Harold Kerzner)
Solution Manual Project Management Case Studies (3rd Ed., Harold Kerzner)
Solution Manual Project Management : A Systems Approach to Planning, Scheduling, and Controlling (9th Ed., Harold Kerzner)
Solution Manual Project Management : A Systems Approach to Planning, Scheduling, and Controlling (10th Ed., Harold Kerzner)
Solution Manual Information Technology Project Management : Providing Measurable Organizational Value (2nd Ed., Jack Marchewka)
Solution Manual Information Technology Project Management (3rd Ed., Jack Marchewka)
Solution Manual Core Concepts of Government and Not-for-Profit Accounting (Granof & Wardlow)
Solution Manual Government and Not-for-Profit Accounting : Concepts and Practices (3rd Ed., Granof)
Solution Manual Government and Not-for-Profit Accounting : Concepts and Practices (4th Ed., Granof)
Solution Manual Government and Not-for-Profit Accounting : Concepts and Practices (5th Ed., Granof)
Solution Manual Business Communication Essentials, First Canadian Edition (Bovee, Thill, Schatzman & Scribner)
Solution Manual Business Communication Essentials, Second Canadian Edition (Bovee, Thill & Scribner)
Solution Manual Business Communication Essentials (2nd Ed., Bovee & Thill & Schatzman)
Solution Manual Business Communication Essentials (3rd Ed., Bovee & Thill)
Solution Manual Business Communication Essentials (4th Ed., Bovee & Thill)
Solution Manual Business Data Communications (5th Ed., William

Stallings)
Solution Manual Business Data Communications (6th Ed., William Stallings)
Solution Manual Business Data Communications and Networking (8th Ed., FitzGerald & Dennis)
Solution Manual Business Data Communications and Networking (9th Ed., FitzGerald & Dennis)
Solution Manual Business Data Communications and Networking (10th Ed., FitzGerald & Dennis)
Solution Manual Operations Management (1st Ed., Andrew Greasley)
Solution Manual Operations Management (2nd Ed., Andrew Greasley)
Solution Manual Operations Management : Quality and Competitiveness in a Global Environment (5th Ed., Russell & Taylor)
Solution Manual Operations Management : Creating Value Along the Supply Chain (6th Ed., Russell & Taylor)
Solution Manual Auditing Cases (3rd Ed., Beasley, Buckless, Glover & Prawitt)
Solution Manual Auditing Cases: An Interactive Learning Approach (4th Ed., Beasley, Buckless, Glover & Prawitt)
Solution Manual Auditing and Other Assurance Services, Canadian Tenth Edition (10th Ed., Arens, Elder, Beasley & Splettstoesser-Hogeterp)
Solution Manual Auditing and Assurance Services : An Intergrated Approach (11th Ed., Arens, Elder & Beasley)
Solution Manual Auditing and Assurance Services : An Intergrated Approach (12th Ed., Arens, Elder & Beasley)
Solution Manual Auditing and Assurance Services : An Intergrated Approach (13th Ed., Arens, Elder & Beasley)
Solution Manual Modern Auditing : Assurance Services and the Integrity of Financial Reporting (8th Ed., Boynton & Johnson)
Solution Manual Investments : Analysis and Management (9th Ed., Charles Jones)
Solution Manual Investments : Analysis and Management (10th Ed., Charles Jones)
Solution Manual Investments : Analysis and Management (11th Ed., Charles Jones)
Solution Manual The Art of Modeling with Spreadsheets : Management Science, Spreadsheet Engineering, and Modeling Craft (Powell & Baker)
Solution Manual Management Science : The Art of Modeling with Spreadsheets (2nd Ed., Powell & Baker)
Solution Manual Management Science : The Art of Modeling with Spreadsheets, Excel 2007 Update (Powell & Baker)
Solution Manual Wiley Pathways Introduction to Database Management (Gillenson, Ponniah et al.)
Solution Manual Advanced Theory and Practice in Sport Marketing (Eric Schwarz & Jason Hunter)
Solution Manual Sport and the Media : Managing the nexus (Matthew Nicholson)
Solution Manual Sport Facility Operations Management : A Global Perspective (Eric Schwarz, Stacey Hall & Simon Shibli)
Solution Manual Sport Management : Principles and Application (Russell

Hoye, Aaron Smith, et al.)
Solution Manual International Business : The Challenge of Global Competition (10th Ed., Ball, McCulloch, Geringer, Minor & McNett)
Solution Manual International Business : The Challenge of Global Competition (11th Ed., Ball, McCulloch, Geringer, Minor & McNett)
Solution Manual International Business : The Challenge of Global Competition (12th Ed., Ball, McCulloch, Geringer, Minor & McNett)
Solution Manual Statistics for Business (Derek Waller)
Solution Manual Mergers, Acquisitions, and Other Restructuring Activities (4th Ed., Donald DePamphilis)
Solution Manual Mergers, Acquisitions, and Other Restructuring Activities (5th Ed., Donald DePamphilis)
Solution Manual Contemporary Tourism : An international approach (Chris Cooper & Michael Hall)
Solution Manual Nation branding : Concepts, Issues, Practice (Keith Dinnie)
Solution Manual International Business : A Global Perspective (Katsioloudes & S. Hadjidakis)
Solution Manual Managing Cultural Differences : Global Leadership Strategies for the 21st Century (7th Ed., Moran, Harris & Moran)
Solution Manual Marketing Plans : How to prepare them, how to use them (6th Ed., Malcolm McDonald)
Solution Manual Human Resource Management for the Hospitality and Tourism Industries (Dennis Nickson)
Solution Manual Exploring Employee Relations : An International Approach (2nd Ed., Mike Leat)
Solution Manual Introduction to Financial Technology (Roy Freedman)
Solution Manual Managing Innovation : New Technology, New Products, and New Services in a Global Economy (2nd Ed., John Ettlie)
Solution Manual Enterprise : Entrepreneurship and Innovation : Concepts, Contexts and Commercialization (Lowe & Marriott)
Solution Manual Strategic Management : Global Cultural Perspectives for Profit and Non-Profit Organizations (Marios Katsioloudes)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Introduction to e-Business : Management and Strategy (Colin Combe)
Solution Manual Managing People and Organizations in Changing Contexts (Graeme Martin)
Solution Manual Sustainable Tourism (David Weaver)
Solution Manual Knowledge Management in Theory and Practice (Kimiz Dalkir)
Solution Manual Fixed Income Markets and Their Derivatives (3rd Ed., Suresh Sundaresan)
Solution Manual Introduction to Human Resource Management (2nd Ed., John Stredwick)
Solution Manual Organisations and the Business Environment (2nd Ed., David Campbell & Tom Craig)
Solution Manual Strategic Operations Management (2nd Ed., Brown, Lamming, Bessant & Jones)

Solution Manual Worldwide Destinations : The Geography of Travel and Tourism (4th Ed., Boniface & Cooper)
Solution Manual Worldwide Destinations : The Geography of Travel and Tourism (5th Ed., Boniface & Cooper)
Solution Manual Worldwide Destinations Casebook : The Geography of Travel and Tourism (2nd Ed., Boniface & Cooper)
Solution Manual Marketing in Travel and Tourism (4th Ed., Middleton, Fyall, Morgan & Ranchhod)
Solution Manual Strategic Marketing Planning (1st Ed., C. Gilligan & R. Wilson)
Solution Manual Strategic Marketing Planning (2nd Ed., C. Gilligan & R. Wilson)
Solution Manual Strategic Marketing Management : Planning, Implementation and Control (3rd Ed., Wilson & Gilligan)
Solution Manual Marketing Communications Management : Concepts and Theories, Cases and Practices (Paul Copley)
Solution Manual Auction Theory (2nd Ed., Vijay Krishna)
Solution Manual Principles of Financial Engineering (1st Ed., Salih Neftci)
Solution Manual Principles of Financial Engineering (2nd Ed., Salih Neftci)
Solution Manual A Behavioral Approach to Asset Pricing (2nd Ed., Hersh Shefrin)
Solution Manual Managing Finance : A Socially Responsible Approach (D. Crowther)
Solution Manual Customer Relationship Management (2nd Ed., Francis Buttle)
Solution Manual Introduction to Knowledge Management : KM in Business (Groff & Jones)
Solution Manual Principles of Retailing (J. Fernie, S. Fernie & Moore)
Solution Manual Business Strategy (2nd Ed., Campbell, Stonehouse & Houston)
Solution Manual Market-Led Strategic Change (3rd Ed., Nigel Piercy)
Solution Manual Market-Led Strategic Change (4th Ed., Nigel Piercy)
Solution Manual International Hospitality Management : Concepts and cases (Alan Clarke & Wei Chen)
Solution Manual Electronic Commerce : Principles and Practice (Hossein Bidgoli)
Solution Manual Financial Management for Hospitality Decision Makers (Chris Guilding)
Solution Manual Accounting Essentials for Hospitality Managers (2nd Ed., Chris Guilding)
Solution Manual Global Business Leadership (E.S. Wibbeke)
Solution Manual Strategic Marketing : Planning and Control (2nd Ed., Drummond, Ensor & Ashford)
Solution Manual Project Finance in Theory and Practice : Designing, Structuring, and Financing Private and Public Projects (Stefano Gatti)
Solution Manual Hotel Convention Sales, Services and Operations (Pat Golden-Romero)
Solution Manual Contemporary Financial Intermediation (2nd Ed.,

Greenbaum & Thakor)
Solution Manual Intermediate Financial Theory (2nd Ed., Danthine & Donaldson)
Solution Manual Essential Law for Marketers (Ardi Kolah)
Solution Manual Introduction to Health and Safety at Work (4th Ed., Phil Hughes & Ed Ferrett)
Solution manual An Introduction to the Mathematics of Financial Derivatives (2nd Ed., Salih Neftci)
Solution manual Introduction to Emergency Management (3rd Ed., Haddow, Bullock & Coppola)
Solution manual Food and Beverage Management (4th Ed., Davis, Lockwood, Pantelidis & Alcott)
Solution manual Maritime Security : An Introduction (Michael McNicholas)
Solution manual Contemporary Logistics (8th Ed., Paul R. Murphy, Donald Wood)
Solution manual Contemporary Logistics (9th Ed., Paul R. Murphy, Donald Wood)

- Materials Engineering :

_____

Solution manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution manual Materials Science for Engineering Students (Traugott Fischer)
Solution manual Essentials of Modern Materials Science and Engineering (James Newell)
Solution manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)
Solution manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)
Solution manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution manual Manual of Mineral Science (23rd Ed., Cornelis Klein & Barbara Dutrow)
Solution manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution manual DeGarmo's Materials and Processes in Manufacturing

(10th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution manual Engineering Materials Science (Milton Ohring)
Solution manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution manual Mechanical Behavior of Materials (3rd Ed. Dowling)
Solution manual Mechanical Behavior of Materials (W.F. Hosford)
Solution manual Mechanical Behavior of Materials (Keith Bowman)
Solution manual Deformation and Fracture Mechanics of Engineering Materials (4th Ed., Richard Hertzberg)
Solution manual From Polymers to Plastics (A.K. van der Vegt)
Solution manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Principles Of Polymer Systems (5th Ed., by Ferdinand Rodriguez, Claude Cohen, Christopher Ober, Lynden Archer)
Solution manual Introduction to the Thermodynamics of Materials (4th Ed. David Gaskell)
Solution manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution manual Plastics : Materials and Processing (3rd Ed., Strong)
Solution manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution manual Creative Design of Products and Systems (Saeed Niku)
Solution manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David Jones)
Solution manual Materials and the Environment : Eco-informed Material Choice (Michael Ashby)
Solution manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)

Solution manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution manual Basic Engineering Plasticity : An Introduction with Engineering and Manufacturing Applications (David Rees)
Solution manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution manual Theory of Plasticity (3rd Ed. Jagabanduhu Chakrabarty)
Solution manual Plastics : Microstructure and Engineering Applications (3rd Ed., Nigel Mills)
Solution manual Laser Processing of Engineering Materials : Principles, Procedure and Industrial Application (John Ion)
Solution manual Sintering : Densification, Grain Growth and Microstructure (Suk-Joong Kang)
Solution manual Biomaterials : An Introduction (3rd Ed., Joon Park & R.S. Lakes)
Solution manual Biomaterials : The Intersection of Biology and Materials Science (Temenoff & Mikos)
Solution manual Biomaterials Science : An Introduction to Materials in Medicine (2nd Ed., Ratner, Hoffman, Schoen & Lemons)
Solution manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution manual Introduction to Materials Management (6th Ed., Arnold, Chapman & Clive)
Solution manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution manual Composite Materials : Science and Engineering (2nd Ed., Krishan K. Chawla)
Solution manual Laminar Composites (George Staab)
Solution manual Physical Metallurgy and Advanced Materials (7th Ed., R.E. Smallman & A.H.W. Ngan)

FR - REUNION, AF-016 / 5R - MADAGASCAR, AF-013
Willi,DJ7RJ, is travelling through the Indian Ocean again in autumn.
First he flies to Reunion (AF-016) where he will show up as FR/DJ7RJ
between Sep 23 and Oct 3. Willi is working in CW and SSB on 160m-6m.
His next stop will be Madagascar (AF-013) where he plans to become QRV
as 5R8RJ from Oct 4-29. QSLs via bureau or direct to his homecall.

HI - DOMINICAN REPUBLIC, NA-096
David,HI7/K3LP, will spend his holidays in Punta Cana (NA-096) from
Sep 24 until Oct 4. Since this is a family you should expect only
little activities in the early morning or late evening hours.
QSLs should be sent via bureau or direct to his homecall.
More information can be found at: http://www.k3lp.com/hi7_k3lp.htm

SV9 - CRETE, EU-015
Uli,SV9/DJ9XB, is staying on Crete (EU-015) from Sep 18-29. Uli is
working only in RTTY. During the upcoming CQWW RTTY Contest he will
sign J49XB in the category SOSB on 15m. QSL via bureau, direct or LoTW.

T8 - PALAU, OC-009
Nao,JK1FNL, is going to become active as T88NA from Palau (OC-009)
in CW, SSB and RTTY on 160m-6m from Sep 23-26. QSL via homecall.

TA - TURKEY
Members of the TCSWAT (TC Special Wireless Activity Team) will activate
the Civa Burnu Lighthouse (ARLHS TUR-002) as TC6CLH on all bands (but
mostly on 40m/20m) on Sep 25/26. QSLs via bureau or direct to TA1HZ.
See also: http://www.tcswat.org and http://www.qrz.com/db/TC6CLH
It is not necessary to send your QSLs direct since all QSOs will be
confirmed via bureau automatically.

VP9 - BERMUDA ISLANDS, NA-005
VP9/WW3S and VP9/ND8L will be QRV from the shack of VP9GE on the island

of Bermuda (NA-005) from Sep 23-27. They will use the special callsign
VP9I during the CQWW RTTY Contest on Sep 25/26. QSL for VP9I via N1HRA.
QSLs for VP9/WW3S and VP9/ND8L via their homecalls, also via LoTW.

9M6 - EAST MALAYSIA, OC-295
9M6XRO, 9M6DXX, 9W6AMC, 9W6LEE and G3USR are planning an activity from
Pulau Sebatik (OC-295) from Sep 24-27. They will sign 9M6XRO/p in CW
and 9M6DXX/p in SSB running two stations simultaneously on 80m-10m with
emphasis put on 40m-15m. This IOTA group was activated before that only
once in July 2006.
QSLs for both calls via bureau, direct or LoTW to M0URX.
If you want to request a bureau QSL online please visit the website:
http://www.m0urx.com/sebatik.html

FRANCE, SPECIAL EVENT STATIONS
The 16th Pelota World Championships taking place in France between
Sep 25 and Oct 1 are reason to activate three special event stations:
TM16EK in the city of Pau, TM16EJ in the city of Lescar and TM16EH in
Oloron-Sainte-Marie. All QSLs via bureau or direct to F6KDU.

ITALY, SPECIAL EVENT STATIONS
II0ESA is QRV from Frascati from Sep 18-26 during the "Science Week and
Researchers Night" of the European Space Agency (http://www.esa.int).
QSL via IZ0FEJ.

II1IARD will be active in CW/SSB on 20m/40m on Sep 25, 0800-1300 UTC,
during a meeting of the crew of the Italian destroyer "Ardito".
QSL via bureau or direct to IT9MRM.

WFF ACTIVITIES: 4J5T, 4J8VHF, 4K4K and YL7A are working as 4K3FF in CW, SSB
and RTTY on 20m and 40m from the Turyanchay nature reserve (4JFF-014)
in Azerbaijan between Sep 20 and Oct 3. QSL via YL7A.

4J5A, 4J5T, 4J7WMF, 4K4K, 4K6OF, RA6FPL (4K3FPL) and RL7KT (4K3QQA)
will then activate the Ag Gel nature reserve (4JFF-001) in CW, SSB and
PSK31 on 20m and 40m signing 4J0WFF from Sep 25-27.
QSL via 4J5T (c/o Parvana Hasanova Fornati, 12584 Eden Court,
Apple Valley, MN 55124, USA).

Arnaud,F4FOO, and other members of the F6KJG radio club will be QRV as
TM40FO from the Foret d'Orient regional nature park from Sep 24-26.
More activites from there will follow on Oct 1-3, Oct 15-17, Oct 22-24
and Oct 29-31. QSL via bureau or direct to F4FOO.

SILENT KEYS: Hugh Turnbull,W3ABC, honorary vice-president of the ARRL sadly
passed away on Sep 14 at the age of 93. Other Silent Keys are:
John David Freiberger (K5OLE), Aleksandr A. Kuzmenko (RV4LK),
Valentin N. Syomichev (RZ3DK), Irene Wheaton (VE1CF),
Geoff Wilson (VE1GW) and William C. Conner (W2GBC)

DXCC: QSL cards of ZS8M (Marion Island) are accepted for DXCC credit now.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The Japanese club JARL has put up a website to find out whether you can
send your QSL to a specific station via the JARL QSL bureau or not at:
https://www.jarl.com/jarlorjp/security/loginsrchuni.php

The DX Magazine, known for its "Most Wanted" lists, has started the
DX survey 2010. Please go to: http://www.dxpub.com/dx_survey2010.html
The results will be published in January 2011.

The homepage of the "Northern California DX Foundation" has a new
design. Check yourself at: http://ncdxf.org

Heard Island (VK0/H) will be activated again in 2014. Find more info at
http://www.french-polar-team.fr/VK0_Atlas_Cove_Heard_Island.php and
http://www.heardisland.aq

UPCOMING CONTESTS

Sep 25/26: CQ WW RTTY DX Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-045, I, Lazio Region Group: Some members of IQ2CQ are going to activate
the islands Ponza (IIA LT002) and Zannone (IIA LT002) as IB0/IZ2ACD
from Sep 25 until Oct 2. QSL via IZ2ACD (direct).

EU-172, OZ, Jylland East & Fyn Group: OZ/DJ5NN, OZ/DL2LTM and OZ/DL2TG will
be QRV from Aro Island between Sep 25 and Oct 4. QSLs via homecalls.

NA-091, VE7, BC Province South Group: Rick,K6VVA/VE7, is going to hit the
airwaves from Quadra Island (CisA BC-006) from Sep 27-30.QSL via N6AWD.

OC-261, VK5, SA State West Centre Group: Andy,VK5MAV/p, is working from
Flinders Island from Sep 21-27. QSL via homecall.

Old QSL cards found

Al,VE1AL, writes "I am ashamed to admit that I have found a box of QSLs that I thought had been sent via the bureau many years ago. The cards are for QSOs with CY9DXX, CY0DXX, VE1AL and VF1L, plus a few for other callsigns I have used. I am integrating my 2010 QSLs for VE1AL with these cards and they should be in the mail to the bureau within the next few weeks. Well over 1000 QSLs are involved and I regret that many will probably be returned due to various reasons." All of Al's computerized logs have been uploaded to LoTW, but that does not include the CY9 or CY0DXX logs.

CQWW DX Contest, RTTY - Further announcements:

The CQWW DX Contest in RTTY will take place on Sep 25/26.

The Iowa QSO Party

Mark your ham calendars - Saturday October 16, 2010 is the Iowa QSO Party! The contest runs from 1400 to 2300 UTC (9AM - 6 PM CDT).

After many years of no QSO Party held in Iowa, the Ottumwa Amateur Radio Club started sponsoring the event last year. Check their web site for complete rules and information: www.wa0dx.org.

There are several categories in which to compete - particularly interesting are the single-op and multi-op mobile classes. Why so?

Well it seems the ever increasing popularity of working all US counties draws many county hunters to the state QSO parties. But the casual QSO party contestant may not be aware of the advantages of activating some of the "rare" Iowa counties.

Further, in looking at the results of the 2009 Iowa QSO Party, we find there were only eight entrants in single-op mobile and ONE in the multi-op mobile classes. More mobile stations would certainly liven things up.

A mobile operation from one or more rare Iowa counties would generate some good scores, help out the avid county hunters, and boost the Iowa QSO Party. If you have an HF mobile or portable station, why not take advantage of the multi-op mobile class by inviting a newly licensed ham along for a road trip to a rare Iowa county?

There is also a club competition for three or more entrants. Can your club field three mobile stations going out to some rare counties? Think of the fun (and scores) a caravan of mobiles could generate.

Listed below in priority order, are the top Iowa counties needed by the county hunters:

1. Washington
2. Pocahontas
3. Keokuk
4. Madison
5. Hardin
6. Audubon
7. Louisa
8. Mahaska
9. Van Buren
10. Sac
11. Guthrie

12. Dallas
13. Buena Vista
14. Adams

The following are all about equal in demand:

Adair
Black Hawk
Butler
Crawford
Franklin
Humboldt
Ida
Jasper
Jefferson
Ringgold
Shelby

I'll be out there operating HF mobile - See you in the Iowa QSO Party!

Rod Blocksome, K0DAS

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

>
> -- What is a 'follow-up', and what does 'moderated' mean?
>
> If you are new to Usenet and are not familiar with the terminology, you
> might want to read the general introductory articles found in the
> newsgroup news.announce.newusers. Doing so will make your life on the
> net much easier, and will probably save you from making silly beginner's
> mistakes.
>
> If you think that at this moment you are reading an echo, a conference,
> or a bulletin board, I'd also strongly suggest a trip over to
> news.announce.newusers.
>
> For the rest of this article, we will assume you have a basic knowledge
> of Usenet terminology and mechanics.
>
> A moderated group means that any article that needs to be posted to the
> group has to be accepted by the moderator of the group. Since we need to
> ensure that followups to an article (discussion) do not show up in the
> rec.radio.info newsgroup, the `Followup-To:' header line contains a
> newsgroup that is appropriate for discussions about the specific article.
>
> -- OK, so now I know what 'moderated' means. Tell me more.
>
> Rec.radio.info is a moderated newsgroup, which means that all articles
> submitted to the group will have to be approved by the moderator first.
>

> The current moderator of the group is the rec.radio.amateur.moderated
> Moderation Team. Submissions to rec.radio.info can be posted, or
> e-mailed to:
>
> rec-radio-info@panix.com
>
> Comments, criticisms, suggestions or questions about the group can be
> e-mailed to:
>
> rec-radio-info-request@panix.com
>
> But before you do so, please be sure to check out the "Posting
> Guidelines" article.
>
> The influence of the moderator should be minimal and of an
> administrative nature, consisting chiefly of weeding out obviously
> inappropriate articles, while making sure correct headers etc. are used
> for the appropriate ones.
>
> -- What type of material is considered inappropriate?
>
> There are three broad categories of articles which will be rejected by
> the moderator:
>
> 1) Requests for information: rec.radio.info is strictly a one-way
> street. We receive information in our mailbox; we then post it to
> rec.radio.info. Requests for specific information belong in the
> normal discussion newsgroups. If your request gets answered, you
> might consider passing the answer on to rec.radio.info,
> though. Especially if you can edit it into a informational, rather
> than a discussion, format.
>
> 2) Obvious discussion articles, or articles that appear unsubstantiated.
>
> 3) Commercial stuff: a relatively unbiased test of a radio product would
> be accepted, but any hint of for-profit might be reason for
> rejection. For three reasons: This is not the purpose of the list,
> for-profit is a controversial topic, and this list may be passed onto
> Amateur Packet Radio (where for-profit is prohibited except under
> certain provisos).
>
> rec.radio.swap may be more deserving of the posting in any matter.
>
> Similarly, copyrighted material generally cannot be used. If it's
> TRULY worthwhile to the net, We would recommend obtaining permission
> from the copyright holder. Please note the source, and if permission
> was given. We reserve the right to make the final decision concerning
> appropriateness in all situations. In most cases, a brief summary
> of, or pointer to, the copyrighted information may be all we can
> allow.

>
> -- I do not have access to news, how can I get the information posted
> to rec.radio.info?
>
> Google has an excellent web interface to Usenet newsgroups. It is
> available at:
>
> http://groups.google.com
>
> It supports both reading and posting.
>
> Another excellent web interface to at least the radio-related Usenet
> newsgroups is the RadioBanter site:
>
> http://www.radiobanter.com
>
> sponsored by the NewsgroupBanter project:
>
> http://www.newsgroupbanter.com
>
> It, too, supports both reading and posting.
>
> -- Will the material appearing in rec.radio.info be archived somewhere?
>
> Yes. See Google Groups and RadioBanter above.
>
> Effectively this means that anything you post to rec.radio.info will be
> permanently stored, so your work will not be lost.
>
> -- I have a regular posting with timely information, is there a way to
> speed up it's delivery, or automate for more convenience?
>
> Yes, there is! It may take a bit of chatter with the moderator, but we
> are willing to take responsible people and provide them the means of
> posting the articles directly from their site. We will try everything we
> can as we fully realize that DX (distant signal) and astronomical data
> can be somewhat transitory. We are also willing to allow regular posters
> of information the same courtesy, even if the information is not as time
> critical.
>
> We refer to this as self-moderation, which is partly based on the model
> for rec.answers/news.answers. This requires co-operation and goodwill
> to be beneficial to the community in the rec.radio hierarchy.
>
> Please direct any comments, questions, or criticisms about this article
> to rec-radio-info-request@panix.com.
>

==> + ON THE AIR: UNITED STATES SUPPORTS SECONDARY AMATEUR RADIO
ALLOCATION AT 461-469 AND 471-478 KHZ

The Federal Communications Commission and the National
Telecommunications and Information Administration -- the spectrum
regulators for United States private sector and government users,
respectively -- have agreed to support a secondary MF allocation to the
Amateur Radio Service at 461-469 kHz and 471-478 kHz at the 2012 World
Radiocommunication Conference (WRC-12), to be held in Geneva,
Switzerland from January 23-February 17. FCC and NTIA officials
formally presented the proposal at a meeting of the Second Permanent
Consultative Committee of the Inter-American Telecommunication
Commission, held August 30-September 3 in Fortaleza, Brazil. Read more
here

```

cation-at-461-469-and-471-478-khz>.

==> ARRL AWARDS COMMITTEE MAKES STATEMENT ON DISSOLUTION OF NETHERLANDS ANTILLES

To clarify the administrative process by which the anticipated changes to the two existing Netherlands Antilles DXCC entities will be made, the ARRL Awards Committee has determined that at 0400 UTC (12:00 AM local time in the islands) on October 10, 2010, the two Netherland Antilles DXCC entities will be deleted. Commencing at 0400 UTC (12:00 AM local time) on October 10, 2010, operation from the islands of Curacao, Bonaire, Sint Maarten, Saba and St Eustatius will count for a yet-to-be-determined number of new entities under the DXCC List Criteria and Political Entities, Rule 1 and/or Rule 2 Geographic Separation Entities. When the Awards Committee determines what Rule 1 or Rule 2 actions apply, it will announce the final disposition of the entities on the DXCC list. The DXCC desk will not accept confirmations for these new entities until after January 1, 2011.

==> + PUBLIC SERVICE: 2010 ATLANTIC HURRICANE SEASON PROVES TO BE A BUSY ONE FOR HAMS

So far, with nine tropical storms and four hurricanes, the 2010 Atlantic hurricane season has indeed been a busy one. Beginning with Hurricane Alex in June, hams at WX4NHC -- the Amateur Radio station at the National Hurricane Center in Miami, Florida -- and weather spotters around the country have kept an eye on these storms. Hurricane Earl came in late August and early September, Hurricane Karl in September and now Hurricane Igor is making its way across the Canadian Maritimes. The 2010 Atlantic hurricane season officially began on June 1 and will continue through November 30. Read more here <http://www.arrl.org/news/2010-atlantic-hurricane-season-proves-to-be-a-busy-one-for-hams>.

==> + HQ HAPPENINGS: FIVE NEW SECTION MANAGERS TO MEET IN NEWINGTON FOR TRAINING

This weekend, five newly elected or appointed Section Managers are in Newington for an orientation workshop. The primary purposes of the workshop sessions are to share ideas and to provide basic administrative, management, leadership and motivational training.

"The Section Manager Workshop is an orientation and training event for new Section Managers that have come on board within the last year or so," said ARRL Field Organization Team Supervisor Steve Ewald, WV1X. "The ARRL has conducted this training each year at HQ for the past several years, and it has been well received by past participants. The Membership and Volunteer Programs Department Staff and its Field Organization Team are the lead coordinators of the event. We also cover the responsibilities and functions of the Section Manager position, and the SMs are able to visit with ARRL Headquarters staff members and learn more about the many programs that the ARRL supports. The workshop

sessions are presented by several ARRL Headquarters staff members who are experts in their respective areas."

The following five Section Managers are attending the orientation workshop: Nebraska Section Manager Art Zygielbaum, K0AIZ; North Carolina Section Manager Bill Morine, N2COP; Oklahoma Section Manager Kevin O'Dell, N0IRW; South Carolina Section Manager Marc Tarplee, N4UPF, and Southern Florida Section Manager David Fowler, K4DLF. Zygielbaum, Morine and Tarplee are current Section Managers; O'Dell and Fowler begin their terms October 1.

==> + TIM DUFFY, K3LR, TO RECEIVE RCA'S GOLDWATER AWARD

The Radio Club of America (RCA) has named Tim Duffy, K3LR, of West Middlesex, Pennsylvania, as the recipient of its Barry Goldwater Amateur Radio Award. The Goldwater Award is given to an RCA member who is also a licensed amateur in recognition of a long record of service to the public through the use of Amateur Radio. He will receive the award at the RCA's 101st annual awards banquet held November 19 in New York City. Duffy -- an ARRL Life Member who became an RCA member in 1999 and serves on the RCA Board of Directors, as well as chairman of its Marketing Committee -- will also be inducted as an RCA Fellow this year. Read more here <http://www.arrl.org/news/tim-duffy-k3lr-to-receive-rca-s-goldwater-award>.

==> + NOMINATIONS NOW BEING ACCEPTED FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

At its July 2009 meeting, the ARRL Board of Directors established the George Hart Distinguished Service Award to be given to an ARRL member whose service to the League's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System. Read more here <http://www.arrl.org/news/nominations-now-being-accepted-for-the-george-hart-distinguished-service-award>.

==> ON THE WEB: HAMFESTS AND CONVENTIONS

This week, we've made several improvements to the Hamfest and Convention pages <http://www.arrl.org/hamfests-and-conventions-calendar> on our Web site, including quick and easy links to the Hamfest Planner, Application <http://www.arrl.org/hamfest-convention-application> and Sanctioning information <http://www.arrl.org/files/file/New%20Convention%20Hamfest%20Rules.pdf>, as well as an updated version of the Speaker's Bureau <http://www.arrl.org/speakers-bureau>.

Other highlights:

- Added a clearer description of the benefits of ARRL Sanctioning
- Added more call outs to Hamfest section
- Links to the Hamfest Application from the ARRL Sanctioned page, as
well as links to the Rules and Regulations.
- One other improvement of note, if you visit www.arrl.org/get-involved
<http://www.arrl.org/get-involved>, you'll see a direct link to the
Hamfest pages from the first panel of the carousel.

==> + PBS SHOW FEATURES HISTORY MYSTERY WITH AN AMATEUR RADIO TWIST

In the PBS show History Detectives, a group of researchers helps
people to seek answers to various historical questions they have,
usually centering around a family heirloom, an old house or other
historic object or structure. So when Chuck Roedel, WA2MXR, of Beverly
Hills, Florida, had what he thought may be an artifact from the turning
point in the US space race against Soviet Russia, he called on the
detectives to help him sort it all out. The show featured Roedel and
his history mystery back in June, and his segment was just made
available to the public on the History Detectives Web site. Read more
here
<http://www.arrl.org/news/pbs-show-features-history-mystery-with-an-amateur-r
adio-twist>.

==> + ARRL TO WELCOME USTTI STUDENTS

Next week -- September 27-October 1 -- the ARRL will welcome
students who want to learn how to administer and regulate Amateur Radio
programs in their home countries. This course, offered by the United
States Telecommunications Training Institute (USTTI) for learners from
developing countries, will help the participants create, administer and
foster an Amateur Radio Service in their countries. Read more here
<http://www.arrl.org/news/arrl-to-welcome-ustti-students-1>.

==> + SOLAR UPDATE

Tad "There's a little black spot on the Sun today
<http://www.youtube.com/watch?v=aw1MNBgLw0w>" Cook, K7RA, reports: The
autumnal equinox occurred early today at 0309 UTC. Conditions were good
this week, with sunspots visible every day -- and with very little
geomagnetic activity. The average daily sunspot numbers rose more than
24 points to 40, and average daily solar flux was up nearly five points
to 82.9. The solar flux is expected to rise to 88 for the next few
days, September 23-27. Geomagnetic activity should be unsettled to
active for today and tomorrow, September 23-24, with the planetary A
index for September 23-30 at 18, 18, 12, 6, 6, 8, 10 and 5. Bill
Magruder, KD7KST, sent in an interesting link that allows the user to
view live aurora from Yellowknife in Canada's Northwest Territories,
which is at 62.433 degrees north latitude. Go here
<http://www.asc-csa.gc.ca/eng/astronomy/auroramax/connect.asp> to have
a look -- after dark, of course. Look for more information on the ARRL
Web site on Friday, September 24. For more information concerning radio
propagation, visit the ARRL Technical Information Service Propagation
page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad

Cookism" is brought to you by Gordon Sumner's King of Pain <http://en.wikipedia.org/wiki/King_of_Pain>.

==> THIS WEEK ON THE RADIO

This week:

- September 24 -- NCCC Sprint Ladder
- September 25-26 -- CQ Worldwide DX Contest (RTTY); Texas QSO Party
- September 25 -- AGCW VHF/UHF Contest
- September 27 -- QRP Homebrewer Sprint
- September 28 -- 222 MHz Fall Sprint (local time)

Next week:

- October 2 -- TARA PSK Rumble Contest; F9AA Cup (CW); EU Autumn Sprint (SSB)
- October 2-3 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; California QSO Party; EPC Russia DX Contest; Oceania DX Contest (SSB); International HELL-Contest
- October 3 -- F9AA Cup (SSB); UBA ON Contest (SSB); RSGB 21/28 MHz Contest; German Telegraphy Contest
- October 5 -- ARS Spartan Sprint
- October 6 -- 432 MHz Fall Sprint (local time)
- October 7 -- SARL 80 Meter QSO Party

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS

- October 15-17 -- ARRL Pacific Division Convention <http://www.pacificon.org/>, San Ramon, California

** NEW! MMMonVHF chat - TEST ***

We just implemented a chat section into MMMonVHF, which is still
in a test stage. In order to follow-up it's behaviour in a real
world environment I would kindly ask for your support. The chat
is only available for users which are logged in into MMMonVHF.
So, in order to test the chat, please login and follow the Chat
-Test- link in the Contact dropdown menu! Thank you!

** AURORA WATCH 2010-09-21 **

A solar wind stream is buffeting Earth's magnetic field, and this
could cause geomagnetic activity at high latitudes. Sky watchers
in Alaska, Canada and Scandinavia should be alert for auroras!
Sept. 21st began with a eruption on the sun's northeastern limb
that ... couldn't ... quite ... lift off. The eruption, abeit
beautiful, was not particularly effective. It produced neither a
bright flash of electromagnetic radiation (a "solar flare") nor
a substantial CME. More potent events may be just around the
corner. A magnetic active region crackling with B- and C-class
solar flares is about to emerge over the northeastern limb.

** A United Nations declared World Space Week **

UN-declared World Space Week, October 4-10, needs your
participation! Any event, small or large, helps attract global
media and public attention. Thus we ask everyone to plan a space
related event for October 4-10 and add it to the calendar at
http://www.worldspaceweek.org/calendar Your participation is
important and appreciated! SOUREC: dennis.a.stone"at"nasa.gov

Might be an opportunity to demonstrate visibly, to a world wide
stage, EME. Also there is a Word Conference beginnig in two days,
at Charles University, in Prague CZ. It is the SGAC organization's
conference, see:
http://www.spacegeneration.org/index.php/activities/space-generation-congress
I am offering to work with the SGAC and other groups (CAMRAS, AEXA,
Mexico, NASA) towards a coordinated world wide EME operation, for
the Yuris night activities, which, being world wide, are actually
24/7 depending on your world location. in the days bracketing April
11. See http://www.yurisnight.net ...

RAC Bulletin 2010-016E - Director Elections
2010-09-22

Congratulations are extended to Mr. William (Bill) Gipps, VE7ISV / VE7XS who was recently re-elected as the RAC Director for British Columbia / Yukon, for another two year term which starts January 1, 2011 ending December 31, 2012. Mr Gipps ran unopposed, eliminating the need for a balloted election.

Congratulations are extended to Mr. Derek Hay, VE4HAY who was recently re-elected as the RAC Director for Midwest, for another two year term which starts January 1, 2011 ending December 31, 2012. Mr. Hay ran unopposed, eliminating the need for a balloted election.

Congratulations are extended to Mr. Bill Unger, VE3XT who was recently re-elected as the RAC Director for Ontario North / East, for another two year term which starts January 1, 2011 ending December 31, 2012. Mr. Unger ran unopposed, eliminating the need for a balloted election.

Congratulations are extended to Mr. Everett (Ev) Price, VO1DK who was recently elected as the new RAC Director for Atlantic, for a two year term which starts January 1, 2011 ending December 31, 2012. Mr. Price ran unopposed, eliminating the need for a balloted election. Ev is an avid sailor, an officer and instructor with the Canadian Power and Sail Squadron, has a distinguished history with Scouts Canada and over thirty years amateur radio experience.

The RAC Executive and Directors wish to extend a sincere "Thank You" to Mr. Len Morgan VE9MY, Director for Atlantic, for his service to the RAC and dedication to amateur radio as he heads off at the end of December to find even more "islands" to work his radio from.

Paul Burggraaf VO1PRB
RAC Corporate Secretary

It's a closed codec - you can't look at it, play with it, improve it or adjust it.

In fact, being patented, it's ILLEGAL to do any of that.

Which means it's not amateur radio.

Hell, even the name is a registered trademark of Icom.

Ok but if you have bought a commercial transceiver for amateur radio,
can you look at or improve upon any part of it?

E.g. the firmware that is running on the microprocessor(s) that control it?

No, but by studying the interfaces and functions you could design your
own processor and firmware that would replace the original.

With D-STAR unless you buy the pre-programmed DSP chips or the DV
dongle you can't legally reimplement the AMBE codec at all, and that
makes it very different from other kit that implements unpatented modes.

The problem is that amateurs cannot live with the fact that someone
implemented a codec that is better than what they can develop themselves.

There would be no problem when amateurs could actually develop a better
codec than AMBE. But they have not shown they can.

Everyone can put up a site with a statement that they want to develop
something and need donations. But this development needs more than
donations.

Sometimes is it better to just admit that someone did a better job than
you could have done yourself, and just pay him for the work.

Really? I thought that what those of us that can't live with it thought
is that we don't like technology that locks out homebrew. That's what
the use of DVSI's AMBE codec does.

I don't know exactly why JARL chose AMBE other than because it was the
only codec available at the time. If so, they should have thought about
that a lot harder and perhaps decided to sponsor the development of a
free codec instead. That would have been really good, but I suppose I
can see that it would have introduced a delay. D-STAR has other faults,
one being that it appears not to be extensible so that there is no way
to include other codecs and allow the correct one to be used according
to the other user's set up.

>
> There would be no problem when amateurs could actually develop a

Well we'll see won't we? It's taken a while to find people with the
necessary expertise but Codec2 is now moving forward with people
working on it that have that expertise.

>

Yes, it needs talent and for that you need exposure to collect them
together. That's happening now.

>

I have no problem with that, remember that the "free" part of free software is referring to freedom, not money. But if someone refuses to provide something that I can look inside and understand then I won't use it.

It's called a choice.

I think you need to study the implications of the words 'amateur',
'professional' and 'commercial', and then have a read of the Amateur
licence.

Spike

Probably, yes.

Done similar in the past (modified firmware/programming software to let
commercial radios go out of band).

But if I want to operate on a given mode (AM/FM/SSB etc), I can build my
own, should I so choose, from whichever components I so choose.

If I was to lose my mind and choose to operate D-Star, I MUST buy an
AMBE chip.

826. Amateur Radio Newsline(tm) Report 1728 - September 24 2010 Amateur Radio

Newsgroup: rec.radio.amateur.misc
Date: 2010-09-24 12:38:45 UTC

**

RESTRUCTURING: US TO SUPPORT NEW MEDIUM WAVE HAM BAND PROPOSAL AT WRC 2012

A new ham Medium Frequency allocation could be in ham radios future. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

The ARRL reports that the United States is supporting new secondary Amateur Radio allocation at 461 to 469 kHz and 471 to 478 kHz. This after both the Federal Communications Commission and the National Telecommunications and Information Administration spectrum regulators have agreed to support this secondary Medium Frequency allocation to the at the 2012 World Radiocommunication Conference to be held in Geneva, Switzerland.

The FCC and NTIA formally presented the proposal at a meeting of the Second Permanent Consultative Committee of the Inter-American Telecommunication Commission held a few weeks ago in Brazil. However the proposal will likely draw opposition from maritime interests domestically and internationally. They have expressed opposition to any amateur allocation in the 415 to 526.5 kHz spectrum.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the City of Angels.

--

The full story is on-line at tinyurl.com/2a4zwry which is a direct link to the ARRL web news item. (Southgate, ARRL)

**

RESCUE RADIO: GAREC 2010 CONFERENCE UPDATE

As previously reported, the 2010 Global Amateur Radio Emergency Communications Conference or GAREC 2010 is scheduled for October 11th to the 12th on the Caribbean island of Curacao. Its now been announced that one of the highlights of this years conference will be an actual emergency communications exercise. This as a way of exploring how information sharing across borders can be improved.

The Global Amateur Radio Emergency Communications Conference supported by the International Amateur Radio Union, all three IARU Regions and the ARRL. With its theme of "Learning through Practicing," this year's conference is an important opportunity for emergency communicators to discuss recent events, discover technical solutions to problems and how to cooperate with professional partners. (Southgate)

**

RADIOSPORTS: USA TO HOST 2014 WORLD RADIOSPORT TEAM CHAMPIONSHIP

The 2014 World Radiosport Team Championship games will be held in the United States and two former participants will be heading up the event. Bruce Tennant is here with the details:

--

Hosting rights for the 2014 World Radiosport Team Championship or WRTC have been awarded to the New England WRTC 2014 Organizing Committee. This organization is a newly-formed independent group, and not part of any existing organization, national society, or club.

Heading up the group are former WRTC participants Doug Grant K1DG as Chairman and Randy Thompson K5ZD as Co-Chairman. They are joined by a committee made up of some of the worlds greatest contesters and DX'ers including CQ Magazine's John Dorr, K1AR, Kids Day creator Larry "Tree" Tyree N6TR and ARRL New England Director Tom Frenaye, K1KI, to mention only three.

According to Doug Grant, K1DG, writing on the groups news blog, since the first Radiosport Team Championship in Seattle, Washington, back in 1990 there have been six W-R-TC events, with a total of 234 teams and 468 operator spots. Grant adds that those 468 operator positions have been occupied by 353 different operators from 49 different DXCC entities.

For the Amateur Radio Newsline, I,m Bruce Tennant, K6PZW, in Los Angeles.

RESCUE RADIO: NATIONAL EAS TEST AGAIN DELAYED

Radio World On-Line says that the long anticipated and firstever national EAS test will likely not be scheduled in early 2011. A federal source confirmed to the magazine that reason for the delay is to allow time for additional outreach and education with the public, with broadcasters, with state and local emergency management and federal partners. The on-line magazine says that the extra outreach will enable the alert and warning community to be better prepared for the nationwide exercise when it finally does take place. (RW)

**

ENFORCEMENT: SBE FINDS ARCO COMMERCIAL TRIPS EAS DECODERS AT RADIO STATIONS

British Petrolium has pulled an ad for subsidiary Arco that used what sounded like Emergency Activation or EAS tones. This, after members of the Society of Broadcast Engineers EAS Committee and participants in SBE's EAS Exchange identified a radio commercial as the source of unexpected triggering of EAS alert receivers.

The commercial started with effects that sounded like a shortened EAS header tone followed by the spoken phrase, "The following alert is from ARCO." The EAS like headers were partial, but contained enough information to mimic the start of an real EAS header, because it used the proper frequencies and data rate. When this commercial was played by a station that is being monitored as a local EAS source, it may cause some decoder equipment to un-mute and print a partial message.

For those not aware of how EAS messahes work while the internal monitor speaker is un-muted, the alert is not relayed by the EAS unit on the monitoring station. Although the problem will only affect stations that both monitor a station that airs the ARCO commercial material and that have a particular type of EAS equipment, the SBE had recommended fpr stations check the affected commercial material.

It should be noted that the existence of EAS header data in this commercialmight be considered an FCC violation when aired. Regulation 11.45 says that no person may transmit or cause to transmit the EAS codes or Attention Signal, or a recording or simulation thereof, in any circumstance other than in an actual National, State or Local Area emergency or authorized test of the EAS system.

Though the spot did not use actual EAS tones ad agency Ogilvy and Mather Worldwide which created the commercial stated it regretted confusion the spot may have caused. For those who have not heard it, an MP3 of the commercial can be downloaded at tinyurl.com/arcospot (CGC Communicator, SBE Website, others.)

ENFORCEMENT: FCC WARNING LETTER ISSUED IN NET INTERFERENCE CASE

The FCC has sent a Warning Notice to an Ohio ham alleging him of being the source of interference to a 75 meter net. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The Warning Notice dated September 3rd was sent to Charles A. Hathaway, W8ROX, by FCC Special Counsel Laura Smith. In it Smith says that the Commission received several complaints of interference to the Century Club Net operating on 3902 KHz. At her request, the staff at the Commission's monitoring station began investigating in order to determine the location of this interference. Over the next month, the monitoring station confirmed that the interference was taking place and used its direction finding equipment to determine that the signal was coming from a location north of Athens, Ohio.

The Commission's Detroit Field Office was notified and they began a field investigation into the matter. On July 21st at approximately 10:20 PM, the field agents heard an audible transmission interrupt the ongoing Century Club Net. They began using their vehicle's direction finding equipment to determine the location of the offending transmitter. At 12:40 AM, they had a positive Direction Find to a beam antenna. At that time, they knocked on the door and attempted to inspect the station. No one answered the door. They returned the next day at 4:21 PM and at that time were able to inspect the station.

During the inspection, Hathaway indicated to the agents that he was unaware that his station had been transmitting during the time in question. This was because he had been having problems with his push to talk button getting turned on accidentally.

As part of the inspection, the agents took pictures of Hathaway's equipment, including a close up of his push to talk button and its relative position to his microphone and the rest of his equipment.

In her letter, Smith told Hathaway that his argument that he was unaware that his station had been transmitting during the time in question because of this problem with his push to talk button was unpersuasive. She wrote that one of the Commission's field agents specifically noted in his report that the push to talk button is not located on or near the rest of Hathaway's equipment. Rather that it was strung through the handle of his desk drawer and away from the desk top where the remainder of his equipment is located. Moreover, according to the agents, the push to talk button appeared to be in

working order during the inspection.

Smith concluded by telling Hathaway that his alleged operation as described in the Warning Letter, and verified by the Commission's field staff, is contrary to the basis and purpose of the amateur radio service. This as it is set out in Section 97.1 of the Commission's rules. Also, that it is a violation of Section 97.101(d) of the rules. She then warned Hathaway that the Commission expects him to abide by its rules. As such, her letter to him serves notice that, if operation of this type reoccurs, Hathaway could be subject to severe penalties. These include anything from a modification proceeding to restrict the frequencies upon which he may operate, to a fine or even revocation of his license.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, following this FCC enforcement action from Scottsdale, Arizona.

--

A link to the FCC Warning Letter can be found at www.fcc.gov/eb/AmateurActions/files/Hatha10_09_2 1_5203.html. (FCC)

ENFORCEMENT FOLLOW-UP: FCC AFFIRMS $10000 FINE AGAINST FLORIDA UNLICENSED STATION

A follow-up to our story several months ago about to Christopher M. Myers, whom the FCC claimed they found to be operating an unlicensed broadcast station on 95.9 MHz of Lauderhill, Florida. On September 9th, the regulatory agency affirmed a $10,000 fine issued to Myers as a Notice of Apparent Liability for Monetary Forfeiture on July 12th. Amateur Radio Newsline's Fred Vobbe, W8HDU, has more:

--

By way of background, back on August 14, 2008, the Enforcement Bureau's Miami Office issued a Notice of Unlicensed Operation to Christopher M. Myers for operating an FM broadcast station from his residence on 91.7 MHz without a license. The notice warned him that continued operation could subject him to further enforcement action.

On July 21, 2009, in response to a complaint that Myers was still operating an unlicensed station at his residence in Lauderhill, Florida, agents from the Miami Office used direction-finding to locate the source of broadcast transmissions on the frequency 95.9 MHz. It was traced to the same building from which Myers previously operated an unlicensed radio station on 91.7 MHz. In the ensuing months the FCC says it received continued complaints regarding this operation.

On March 7, 2010, the agents from the Miami Office inspected the unlicensed station, which was located in a condominium unit owned Myers. The agents observed a coaxial cable that connected a roof-mounted antenna on the condominium building to an FM radio

transmitter operating on the frequency 95.9 MHz located inside Myers's condominium unit. The agents also observed that Christopher Myers was the only person present inside his unit at the time of the Commission's inspection.

This past July 12th, the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Myers. In the time since then Myers had not filed a response to the NA L. Now, based on the information before it the FCC has again affirmed the forfeiture and given Myers the customary 30 days to pay or to file a further appeal.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

At airtime, it's unknown in Myers has contacted the FCC regarding this matter or if he has paid the fine. (FCC)

RADIO CRIME: CALIFORNIA STATION LOOSES GROUND SYSTEM A SECOND TIME

For the second time in two years copper thieves have struck the Butte Broadcasting Company's KKXX AM transmitter site in Paradise, California. According to the Oroville Mercury Register, this time the thieves made of with about 22,000 feet of Number 10 wire from the ground system, which was apparently bundled into lengths of 10 to 20 feet and then carted away.

Station manager Andrew Palmquist said the transmitter was able to remain on the air. Palmquist told the paper that the thieves apparently knew what they were doing. They left just enough wire for the ground system to allow the station to continue to broadcast. Palmquist told the paper the thieves took a back road to the tower, avoiding a locked gate.

After the first wire theft in 2008, Palmquist said copper grounding wires were replaced and a concrete footing was poured about every 10 to 15 feet along the length of the wire in hopes of discouraging future thefts. However this time, the thieves cut and removed the wires between the concrete.

According to a scrap copper website, with the worlds economy still not very stable, that kind of wire is only is fetching between $1.22 and $2.75 a pound. So the thieves went to a lot of work and risked their lives to get very little in return.

KKXX management is asking anyone with knowledge about the copper theft to contact the station. (RW)

ELECTRONICS INDUSTRY: GE CLOSING ITS LAST INCANDESCENT US LAMP FACTORY

The General Electric Company is closing its last incandescent light bulb factory in the United States. This, to comply with the Energy Independence and Security Act of 2007.

According to news reports, the resulting savings in energy and greenhouse-gas emissions are expected to be immense. But the move also had unintended consequences. Rather than setting off a long predicted surge in the domestic manufacture of replacement lights such as Compact Fluorescents, many are already being manufactured overseas. Most come from China and are assembled at a low cost that domestic manufacturers cannot match. (Published news reports)

HAM RADIO IN SPACE: ISS ATV ACTIVATED BRIEFLY ON SEPTEMBER 14th

In ham radio news from space, word that the crew on-board the International Space Station activated the Slow Scan Television experiment on September 14th. G8ATE in Leichester, England, reports having received 4 good images from the I-S-S during the 12:32 and 14:06 UTC passes before the crew switched back to packet operation. (ANS)

**

HAM RADIO IN SPACE: ARISSAT 1 NEAR COMPLETION

ARISSat Project Manager Gould Smith, WA4SXM, says that the ARISSat-1 satellite is completed and is currently undergoing vibration testing in Orlando, Florida. Smith notes that the shipping container for both the flight unit and a back-up is under construction which will lead to the shipping of the two flight ready satellites to Houston in the very near future.

>From Houston, NASA will be sending the satellites on to Russia at the end of the month. Once there, the Kursk Experiment will be attached, additional testing done and then the entire flight package will be transported to the Baikonur Cosmodrome for launch.

ARISSat-1, which is the former SuitSat 2 is scheduled to transported to the International Space Station in January 2011. It will be manually released into orbit during a space walk sometime next February. (AMSAT-NA, WA4SXM)

**

HAM RADIO NEAR SPACE: BALLOON LAUNCH ASSISTANCE NEEDED

Amateur radio operators in the Maryland, Virginia and Washington D.C. area may be interested in becoming a team member of the 'Small High-Altitude Expendable Balloon Launch.' Pat Kilroy, N8PK, is assembling his team starting and says he needs hams who are willing to establish one or more effective ground stations.

N8PK held an initial planning session at the Carroll County Amateur Radio Club meeting in Westminster, Maryland on September 13th, complete with a demo of the three different PICetSat transponder modules. Two of the modules have their telemetry downlink in Morse Code 433.920 MHz FM and the other uses Packet Radio. The team will later choose to fly.

The launch of the Small High-Altitude Expendable Balloon is planned for the Mason-Dixon Hamfest on Sunday, October 24th. If you want to volunteer please send him an e-mail to Patrick.L.Kilroy at nasa dot gov. (ANS)

**

ON THE AIR: VC1J TO CELEBRATE THE 65th ANNIVERSARY OF THE UN

On the air, word from up North that Canada's Westcumb Amateur Radio Club in Amherst, Nova Scotia has been granted the callsign VC1J. This for the special event station celebrating the 65th Anniversary of the United Nations and UNESCO. The club will be activating VC1J from the Joggins Fossil Cliffs which became a UNESCO site last year. Operations will be on Sunday October 24th on various bands and modes. A special event QSL card will be available for those who contact VC1J on that date. (RAC)

**

THE CONTEST CORNER: REVISED RULES IN OCEANIA DX CONTEST

The Oceania DX Contest, Australia's Premier international amateur radio contest, is coming up on the first two weekends of October. October 2nd and 3rd sees the SSB competition with the C-W segment on the 9th and the 10th. This year there are some slight changes to the rules. The category of multiple operators with one transmitter means that anyone with a station can enter with some additional operators as only one transmitter is used. The other new category is 2 transmitters. (VK4TI)

**

ON THE AIR: CANADIAN COASTAL STATION CG3MUG

The Thunder Bay MCTS Centre of the Canadian Coast Guard Radio system will celebrate 100 years of service in November and ham radio will be a part of the celebration.

Constructed by the Canadian Marconi Company wireless station, MUG Port Arthur was the first Canadian Great Lakes Marconi station built. In 1912, following the success of MUG, the Canadian government constructed a chain of marine radio stations from Port Arthur down to Kingston, Ontario.

Now, during November of 2010, radio amateurs at the Center will be operating special event station CG3MUG to celebrate this achievement. Throughout this period there will be several chances for both ham's and SWL's to obtain a special 100th anniversary CG3MUG QSL card. For more information, please visit tinyurl.com/38k8mc on the World Wide Web. (VA3ROM, VE3VAI)

**

DX

In DX, a group of German operators will be active from the Madiera Islands as CR3L during the CQ World Wide DX RTTY Contest on September 25th and 26th. Operators will probably be active as CT9 slash their home call before and after the contest. QSL via DJ6QT

VK4AN will be active as 3D2A from Viti Levu Island between October 27th and November 14th. Operation will be on 160 through 10 meters including 30, 17 and 12 meters using CW, SSB, RTTY and PSK31. QSL via VK4AN

Members of the Storstockholms Radioamat"rer Club will be active as SK0ZA slash OH0 from the Aland Island between September 24th to the 26th. Operations will be on all bands and modes. Visit their web page at www dot sk0za dot se.

W8FV will be returning to Tanzania and will be active as 5H9PD between October 2nd to the 30th. Operation will probably be on 40 through 10 meters, depending on propagation, mostly CW with thew possibility of some PSK31. QSL via his home callsign.

Members of the Safari DX Activators Club of Azerbaijan will be activating two different Nature Reserves between September 20th and October 3rd. The operators and participants are representatives of the countries of Latvia, Russia and Azerbaijan. There will be two different teams, callsigns and QSL routes. Use the directions given to you on the air.

VK5MAV will be active slash 5 or possibly using a special callsign or prefix from Flinders Island between September 21st to the 27th. Operations will be on 40, 20, 15 and 10 meters mainly using CW. QSL via his home callsign, either direct or by the Bureau.

Lastly, members of the Czech and Slovak Contest Crew have announced a DXpedition to The Gambia to take place between November 17th and the 30th. They will be using renewed callsigns from their previous 2007 operation as C50C or C52C. Also, the special callsign C5A will be reserved for the CQ World Wide DX CW Contest. QSL by the Bureau or direct to: Branislav Daras, P.O.Box 6, SK-820 08, Bratislava 28, Slovak Republic.

Above from various DX newsw sources.)

THAT FINAL ITEM: PEPSI AWARDS GRANT TO MINNESOTA HAM RADIO CLUB

And finally this week, word that the Pepsi-Cola Company of Rochester, Minnesota, has awarded the Rochester Amateur Radio Club a grant of $2,355. This to fund new radio equipment that will allow the club to better assist in emergency and community communications in downtown Rochester.

By way of background, the Rochester Amateur Radio Club is a Minnesota non-profit corporation and holds Federal tax exempt status by the Internal Revenue Service as well. It is an ARRL affiliated group and has the stated purposes to advance general interest and knowledge of amateur radio, to promote cooperation and exchange of information between members and to provide public service support for community activities. To accomplish this, the club maintains two VHF repeaters a UHF repeater, and three APRS digipeaters.

The Pepsi-Cola Company of Rochester a franchise beverage distributor of the Gillette Group Inc., recently awarded another $15,000 in local Pepsi Refresh Grants to area organizations. In all, the company planned to award up to $100,000 to local communities in 2010. To find out more about the Pepsi Refresh Grants, you can take your web browser to www.refresheverything.com. The Rochester Amateur Radio club can be found on-line at www.rarchams.org (Rochester Post- Bulletin)

That's not strictly true. The whole point of a patent (from the Latin 'patere' - to reveal) is that an inventor discloses the workings of his invention to the public in return for legal protection and the exclusive right to prevent others from exploiting his invention commercially. It does not prevent others from studying the invention and designing improvements and even patenting those improvements if they meet the required criteria. Of course, it will not be possible to exploit those improvements without the permission of the holder of the original patent (and vice versa). Whether an individual may build a patented device for personal 'research' purposes will depend on the patent law in the country where the patent was granted.

> Which means it's not amateur radio.

I agree.

> Hell, even the name is a registered trademark of Icom.

The problem is that with something like AMBE, which is an algorithm,
the patents actually only apply to a few absolutely crucial operations
in the encoding/decoding but the text of the patent is as vague as
possible so that the patent can then be as widely applied as possible
and thus cover many alternative ways of doing the same thing.

It's nothing more than legalised extortion in reality, the existence
of the patent reveals very little to anybody because it's been written
to avoid doing exactly that. So the idea of the protection given
balancing the revelation of commercially beneficial information has
disappeared into the mists of time and patents are now used as a way to
tie your competitors up in legal knots even in the case of obvious and
trivial claims.

Now suppose that someone reverse engineered AMBE and made it available
to radio amateurs by putting the information into the public domain.
DVSI would have to take action to prevent this, because by not doing so
they would be undermining their own patent since failing to defend
against an infringing implementation could easily lead to the patent
becoming worthless.

GB2RS NEWS

Sunday 26th September 2010

The news headlines

1 October deadline for election nomination paperwork

Join in the Edgware Activity Periods

National Hamfest and the start of Ham Week UK

The deadline for returning election papers for the RSGB Board vacancy and the Regional Council vacancies in Regions 1, 2, 4, 6 and 12 is 1 October. Paperwork, including the supporting signatures from nominees, should be sent to Michelina Gramson, PA to the General Manager, telephone 01234 832 700 or e-mail GM.Dept@rsgb.org.uk. Full details of candidates will appear in the November RadCom.

Edgware & District Radio Society has organised the 2010 Edgware Activity Period that continues until 1 October. Held during the evening with both CW and SSB activity, the club invites all amateurs to join in. A certificate will be awarded to the station with the highest score in each of the three sections. You can find full rules and activity times at www.g4gys.btinternet.co.uk.

It's not too late to get your National Hamfest tickets and save on the `at the gate' prices. Tickets can be ordered online and collected at the gate. The national Hamfest takes place from 10am to 4pm at the Newark & Notts Showground, Newark NG24 2NY on Friday 1st and Saturday 2nd October.

There are several events taking place during Ham Week UK, starting with the National Hamfest and concluding with the RSGB Convention on 8 to 10 October. Furness ARS will be putting GB2GW on the air at Gleaston Water Mill, Ulverston from 1 to 10 October. A separate station under the club call G4ARF will be operational 4 to 10 October from land nearby using field day aerials. On Monday 4 October the club will have a barbecue, when visitors are welcome to join them. South Lancashire Amateur Radio Club is planning to hold an open night on Wednesday 6 October in the shack at Bickershaw Labour Club, Bickershaw Lane, Bickershaw, Lancashire. There will be a potato hash & peas supper on a first come, first served basis. The club will also be on the air from 8 until 10pm. All past, present and future members are welcome, along with any SWL who would like to drop in on the night.

The 15th ARDF World Championships have taken place in Opatija, Croatia. Almost 500 participants from 35 countries competed in two runs. The GB team did well, with some notable individual results. In the M40 class on day 1, Steve, RS20310 and Andrew, G4KWQ, came joint 23rd. In the M60 class John, RS20583 came 6th. In the team event in the M40 class Steve and Andrew were joined by M3WDD and they were placed 9th. In the M60 class John, RS20583, Robert, G3ORI and Bob, G3ORY were 7th. All achieved similar results on the second day of the competition. Congratulations to the whole GB team. For full results, check out the website www.ardf2010.com.

The Worked All Ireland Award has an Activity Day today, Sunday 26 September. The WAI awards are open to all amateurs and short wave listeners throughout the world who wish to participate. Membership of any specific organisation is not a prerequisite. More details on the Worked All Ireland program is available at www.irts.ie/cgi/wai.cgi.

And now for the details of rallies and events for the coming week

Today, Sunday 26 September, the Holsworthy Amateur Radio Rally takes place in the Holsworthy Community Centre, Victoria Hill, Holsworthy EX22 6JD. Details from Roger Williams on 07773 983 691.

Also today, 26 September, 50 years of amateur radio history is being offered at a garage sale. This is the sale of the estate of G3IOZ and the venue is close to junction 4 of the M40 in High Wycombe. Details from Larry, G4GZG by e-mail to g4gzg@yahoo.com.

The National Hamfest, organised by the RSGB in association with the Lincoln Short Wave Club, takes place on Friday 1 and Saturday 2 October. It's at the George Stephenson Pavilion, Newark and Nottinghamshire Showground, Lincoln Road, Winthorpe, Newark NG24 2NY, which is close to the junction of the A1, A46 and A17. There will be a large number of trade stands, including the three main manufacturers, Icom, Kenwood and Yaesu. See the October issue of RadCom for full details of the show's highlights.

The Autumn Militaria & Electronics & Radio Amateur Hangar Sale will take place at Hack Green secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL on Sunday 3 October. Doors open at 10am and admission is ?2.50. Contact Rod Siebert, 01270 623 353 for further details.

Now for the news of special events

There are many special event stations on the air this weekend for the Railways on the Air event. Galashiels and District ARS will be operating GB0WRH from Whitrope Siding, south of Hawick in the Scottish Borders on the old Waverley, Monkwearmouth Train Museum in Sunderland will be activated by the North East Special Event Group using the callsign GB4MSM. The Museum is located in North Bridge Street, Sunderland SR5 1AP and will be open 2 to 5pm today. GB2STI will once again be operating from the Railway Preservation Society of Ireland's base at Whitehead, Co Antrim. Visitors are very welcome. Hinckley Amateur Radio and Electronics Society will be operating GB4BLR from Shackerstone Station

on the Battlefield Line Railway. Bring your licence along and visitors are welcome to operate the Special Event Station.

Members of the Ripon and District Amateur Radio Society will be operating GB6VMR from the North Yorkshire Vintage Machinery Rally.

GB4GD will be on the air 2 to 9 October commemorating 79 years since the first four Guide Dogs were trained in Wallasey, Cheshire.

The Royal Naval Amateur Radio Society is celebrating its 50th anniversary this year. A special event callsign GB50RN will be on the air from 2 to 9 October. The station will operate on CW and SSB on the HF and WARC bands from 80m to 10m, and on FM on the 2m and 70cm bands. A special Anniversary Award is available to listeners and licensed amateurs who hear or contact RNARS members and the special event stations during 2010. Full details can be found on the society website at www.rnars.org.uk.

A special event station to celebrate the history of electronics in Wells, Somerset will be on the air on 2 and 3 October. Using the callsigns GB4EMI, GB8EMI and GB2SB, operation will be from the EMI Sports and Social Club in Wells. Visitors aree welcome. All contacts will be confirmed via the bureau or direct by a special multi-colour QSL card produced by Thales.

And now the HF DX news compiled from 425 DX News and other sources

David, K3LP will be active until 4 October as HI7/K3LP from Punta Cana in the Dominican Republic, which is IOTA reference NA-096. It will be a family holiday with activity on the radio limited to the local late evening and early morning hours. QSL via his home call.

Look for OZ/DJ5NN, OZ/DL2LTM and OZ/DL2TG to be active from Aro Island until 4 October. They will operate CW, SSB, FM and PSK on 80 through to 10m as well as 6 and 2 metres. QSL via home calls either direct or via the bureau.

Now the contest news

The RTTY leg of the 48 hours CQWW DX Contests finishes today, 26 September. Exchange a signal report and CQ Zone. Britain is Zone 14. Expect to work some rare countries. There are numerous entry categories.

On 28 September it's the 50MHz Activity Contest from 1900 and 2130. Using all modes, the exchange is signal report, serial number and locator.

October RSGB HF events begin with the 21/28MHz contest on Sunday 3rd. Despite being popular with its loyal band of followers, this event has not attracted a great deal of participation for some considerable time. In an attempt to boost the number of entries the Contest Committee tried changing the format, but it was to no avail so the event is being

discontinued from 2011, so make the most of the final one. Times are from 0700 to 1900UTC using both CW and SSB with the exchange being signal report, serial number and District.

Next weekend, 2 and 3 October are busy with contests. The SSB leg of the Oceania DX Contest runs for 24 hours from Saturday morning, 2 October. There are low- and high-power categories for single-op and multi-one stations, and multi-two and multi-multi categories for multi-op stations. QSOs with Oceania stations are the only ones that score points in this event. Next comes the IARU 432MHz-248GHz Contest. It runs for a full 24 hours from Saturday afternoon, the first six hours coinciding with the RSGB 1.2GHz/2.3GHz Trophy Contest. Finally the EU SSB Sprint, which runs for four hours on Saturday evening. Being a sprint contest, naturally there's a QSY rule. If you initiate a QSO, by calling CQ, QRZ etc, you are permitted to work only one station on the frequency. You must then QSY at least 2kHz before you may call another station or before you solicit another QSO.

And now the solar factual data for the period from the 13th the 19th of September, compiled by Neil Clarke, G0CAS on the 20th of September.

The solar disc had spots visible every day. On the 16th a large sunspot group rotated into view, but despite its size solar activity remained at very low levels except for the 16th and the 17th which increased to low when a small C class solar flare took place on both days. These flares had no effect on propagation. Solar flux levels increased slightly to 83 units on the 16th and the average was 81 units. The 90 day solar flux average on the 19th was 79 units, that's one unit up on the previous week. X-ray flux levels averaged B1.5 units and showed little variation day to day. Geomagnetic activity was quiet everyday, however, on the 14th the Ap reached 9 units, which is just below the threshold before activity increases to unsettled. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from a very slow 280 kilometres per second on the 13th to 490 by the 16th. Speeds then gradually declined to 320 kilometres per second by the end of day on the 19th. Particle densities were low throughout. Bz varied between minus 11 and plus 8 nanoTeslas on the 14th and no more than minus 5 and plus 6 nanoTeslas on the remaining days.

And now the solar forecast. This week solar activity is expected to be at very low levels, however, there is a chance that activity could increase to low with the occasional C class solar flare taking place. Solar flux levels should be around the 80 mark for most of the week. Geomagnetic activity should be quiet everyday. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of about 29MHz. The optimum working frequency with a 90 per cent success rate will be around 22MHz. The best time to try this path will be between 1200 and 1800 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 27 September Gloucester Amateur Radio & Electronics Society is having an informal meeting. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 27 September South Birmingham Radio Society has an aerial working party and ragchew. Contact Don, on 0121 458 1603.

On Monday 27 September Stratford Upon Avon District Radio Society is watching the HF Propagation and Contest DXpeditioning sections of the Contest University DVD. Contact G0CHO, on 01608 664488.

On Monday 27 September Wythall Radio Club continues its Advanced course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 28 September Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 28 September Mid-Warwickshire Amateur Radio Society is having a talk on APRS by Dave, G8UIO. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 28 September Wythall Radio Club has a natter night. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 29 September Bolsover Amateur Radio Society is holding a committee meeting. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 29 September Lincoln Short-Wave Club is meeting at Newark showground to prepare for Hamfest. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 29 September Midland Amateur Radio Society has a table top sale, Foundation and Morse classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 29 September South Notts Amateur Radio Club has a members-only forum. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 29 September Telford & District Amateur Radio Society is having a demo of the Picoscope by M1RKH. Contact Mike, G3JKX, on 01952

299 677.

On Friday 1 October Coventry Amateur Radio Society is having a visit by Warwickshire & Northamptonshire air ambulance. Contact John, G8SEQ, on 07958 777363.

On Friday 1 and Saturday 2 October Lincoln Short-Wave Club is running the National Hamfest at Newark Showground. For more information contact Pam Rose, G4STO, on 01427 788356, or see www.nationalhamfest.co.uk.

On Friday 1 October South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 2 October Midlands Amateur Radio Society is visiting the National Hamfest in Newark. Details from Norman, G8BHE, on 01214 229 787.

On Sunday 3 October Lincoln Short-Wave Club commences 7 days of operating special event station GB10NH from the club shack for Ham Week UK. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 27 September Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 27 September Bolton Wireless Club is having a members' show and tell evening. For details, send an email to boltonwireless@gmail.com.

On Monday 27 September Scarborough Amateur Radio Society has a talk on amateur television. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 27 September Sheffield Amateur Radio Club is having a video evening on wartime amateur radio. Contact Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 27 September South Manchester Radio and Computer Club is holding its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 27 September Workington and District Radio and IT Group is on the air. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

On Tuesday 28 September Chester & District Amateur Radio Society is conducting radio operations at Waverton Institute. Details from Barbara Green on 07957 870770.

On Tuesday 28 September Morecambe Bay Amateur Radio Society has a film night. For more information contact Martin Hazel, M0ZIF, on 01524 581381.

On Tuesday 28 September Otley Amateur Radio Society is taking part in the 50MHz UKAC. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 29 September Hornsea Amateur Radio Club is having a talk on the Club of the Year Award by Baz, G2PDA. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 29 September Chorley & District Amateur Radio Society is having a talk by Mick, M0ICK, on low cost antennas. Contact Alan, G4PF, on 07740 582316.

On Thursday 30 September South Manchester Radio and Computer Club is having a talk on railways. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 30 September Wakefield & District Radio Society starts its Advanced licence course. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 1 October East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 1 October Sheffield Amateur Radio Club is visiting the National Hamfest at Newark Showground. Contact Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

NEWS FOR NORTHERN IRELAND

Mid Ulster Amateur Radio Club will be running a Foundation radio course and exam on Friday 15 and Saturday 16 October.&#65533;A registration night will be held from 7- 9pm on Tuesday 28 September at the Place Initative, Portadown. Places are limited so please attend to book place. More information can be found at www.muarc.com or by contacting Davy on 07900 245021.

NEWS FOR SCOTLAND

On Tuesday 28 September Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 28 September Livingston & District Amateur Radio Society is having Morse code practice. Details from Norman, on 07740 946192.

On Wednesday 29 September West of Scotland Amateur Radio Society is looking at construction projects and holding licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 30 September Aberdeen Amateur Radio Society is having an introduction to the club antenna analyser project. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 1 October Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 1 October West of Scotland Amateur Radio Society has presentations, guest speakers, a raffle and a quiz. More information

from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Sunday 26 September Bittern DX Group is planning for its October meetings. Details from Linda, G0AJJ, on 01692 404154.

On Sunday 26 September Chelmsford Amateur Radio Society is attending Science and Discovery Day at Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Sunday 26 September East Kent Radio Society is visiting the sound mirror at Denge. Details from Karl Davies, M1DFM, on 01227 710120.

On Tuesday 28 September Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 28 September Dorking & District Radio Society is having a talk on using antenna analysers by Peter Dodd, G3LDO. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 28 September Edgware & District Radio Society is operating 15m for the Edgware Activity Period. More information from Mike, G4RNW, on 0208 950 0658.

On Tuesday 28 September Harwell Amateur Radio Society has a shack activity night. Contact Malcolm, G8NRP, on 01235 524844.

On Tuesday 28 September Horndean & District Amateur Radio Club is having a talk on RAYNET by Steve, G4SAC and Mark, 2E0EFA. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 29 September Chesham & District Amateur Radio Society is rebuilding the shack. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 29 September Edgware & District Radio Society is operating 160m for the Edgware Activity Period. More information from Mike, G4RNW, on 0208 950 0658.

On Wednesday 29 September Norfolk Amateur Radio Club has its members' forum. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 29 September Worthing & District Amateur Radio Club is putting GX3WOR on the air. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 30 September Lowestoft & District Amateur Radio Club is having a club night at shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 30 September Shefford & District Amateur Radio Society is having a talk by Stan, G4OAV, on World War 2 wireless intelligence and secret stations in Hertfordshire. Details from David, G8UOD, on 01234 742 757.

On Friday 1 October Crystal Palace Radio and Electronics Club is having a talk on repairing vintage radios by David, M0SXD. Contact Bob, G3OOU, on 01737 552 170.

On Friday 1 October Edgware & District Radio Society is operating 20m for the Edgware Activity Period. More information from Mike, G4RNW, on 0208 950 0658.

On Friday 1 October Mid-Sussex Amateur Radio Society is having a talk on spectrum management strategies by John, G0JBJ. Contact Peter, G4AKG, on 01444 239371.

On Friday 1 October Wey Valley Amateur Radio Group is having a talk by Roger Western, G3SXW, entitled have radio, will travel. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 2 October Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Sunday 3 October East Kent Radio Society is having a talk on Stelling Minnis. Details from Karl Davies, M1DFM, on 01227 710120.

NEWS FOR THE SOUTH WEST

On Monday 27 September Bristol RSGB Group is having a talk by Ian Greenshields, G4FSU, on millimeter waves and how they are not only for communications. Details from Robin, G3TKF, on 01225 420442.

On Wednesday 29 September Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 29 September Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 30 September South Bristol Amateur Radio Club is on the air. Contact Len, G4RZY, on 01275 834 282.

On Thursday 30 September Yeovil Amateur Radio Club is on the air and having a committee meeting. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 1 October North Bristol Amateur Radio Club is having a table sale and junk exchange. Details from Dick on 01454 218362.

On Friday 1 October Saltash & District Amateur Radio Club is having a grand junk sale at Burraton Community Centre. All are welcome. For further details contact Brian on 01752 844321.

On Saturday 2 October Saltash & District Amateur Radio Club is having a grand junk sale, to which visitors are welcome. For more information speak to John, on 01752 707508.

NEWS FOR WALES

There are a few places left on the Swansea ARS coach trip to the National Hamfest on Saturday 2 October. If you can get to the South Wales M4 corridor then you can get on board. Details of price and availability from Roger Williams, GW4HSH, on 01792 404422. Book early to avoid disappointment.

On Monday 27 September Llanelli Amateur Radio Society is having a junk sale and raffle. Contact Craig, MW0MXT, on 01269 840292.

On Friday 1 and Saturday 2 October Meirion Amateur Radio Society is running a club stand at the National Hamfest. Contact John, MW0VTK, on 07772 720099 for more information.

On Friday 1 October Newport Amateur Radio Society is assisting with the Ryder Cup operation. Details from Ross Clare, GW3NWS, on 01633 880146.

Not really. You can buy the chip that implements AMBE and use it
as part of a homebrew design.
That is really not much different from buying a power transistor to
get 100 Watts of output from your homebrew transceiver instead of
developing your own, or making your own transmitter tube.
Everyone chooses their own level of components to work from. Some
build the microcontroller for their transceivers from a Z-80, an
EPROM, a CMOS RAM and some LSTTL logic. Others use an integrated
microcontroller with everything on a chip. Still others buy a small
board with a functioning computer system on it and use it as part of
their transceiver.

> I don't know exactly why JARL chose AMBE other than because it was the

> to the other user's set up.

When the chose AMBE there really was no alternative. And even today,
you will not be able to find an open codec that offers speech quality
at the bitrate and bit error resilience that the AMBE codec does.

It is very easy to write "then lets develop that" and apparently much
harder to actually do so.

W.r.t. extensibility, it would sure be nice if codecs could be negotiated
and an alternative could be added, but it would not bring much to
D-STAR as there still would be different worlds of users that cannot
talk to eachother (those with the commercial Icom transceivers that
have AMBE and nothing else, and those with the homebrew transceivers
with open codec and no AMBE).

>> There would be no problem when amateurs could actually develop a
>> better codec than AMBE. But they have not shown they can.
>
> Well we'll see won't we? It's taken a while to find people with the

> working on it that have that expertise.

Given enough time, it could be that something is developed that is
open and does not violate patents. But I think it will take a lot
of time and there is little chance that at the end of this development
there is still a userbase left that wants to buy and use products
based on it.

>> Sometimes is it better to just admit that someone did a better job

That is your choice. But that does not mean that others are wrong.

Oh dear Rob, you must be new here! While what you say is, of course,
correct it isn't accepted by bigots.

If half of those who are so "anti" DStar got on an developed an alternative
CODEC (and it is just the CODEC which is proprietary), this debate would
have ended long ago. As it is, by the time the alternate CODEC becomes
viable, I fully expect that such systems will be so "yesterday".

Amateur radio has many facets, DStar is simply one of them. Why can't people
be left to enjoy their pet facets while others get on and enjoy theirs?

Because D-Star isn't amateur radio.

There is no experimentation involved, and can't be.

I know, but that's *exactly* what a lot of people don't want to do.

> That is really not much different from buying a power transistor to
> get 100 Watts of output from your homebrew transceiver instead of
> developing your own, or making your own transmitter tube.

I think there is. Generating RF power from a transistor is not a
patented process, although the actual device may have some patents that
apply to it. If I had the money and skills I could build my own, but
that particular battle makes no sense. Not using a component that
includes an implementation of an algorithm that I'm not allowed to see
and understand is a different level from that, there is no secret sauce
in a power transistor but there is in the program that a DSP chip runs.

Indeed.

Yet. The aim of Codec2 is to provide exactly that.

>
> It is very easy to write "then lets develop that" and apparently much
> harder to actually do so.

Of course, but there are people who can do it. I happen to care enough
to encourage them and put some money into the venture to pay for their
time.

>

I'm not interested in bringing something to D-STAR, I'm interested in
bringing something to amateur radio that provides the opportunity to
break away from a proprietary solution that doesn't offer a way of
doing the self-training bit of the licence.

>

Except that without actually achieving this it won't be possible to
tell, I'd prefer to do it and then see what happens. Part of the
attraction of Codec2 is that it doesn't only apply to amateur radio,
it's something that can be used in other free software/hardware
projects such as low cost telephony for developing countries with poor
infrastructure.

Indeed. But until everyone has the choice between something they
control and something that they cannot control now, and probably never
will be able to, it is not possible to decide which solution is the
more sensible.

I'm not trying to kill D-STAR (although I would prefer that it had
never happened in its current form), but one of its problems is that it
doesn't encourage the best implementation because it comes in one form
only. If there are alternate ways to build compatible equipment then
the path to achieving the maximum performance is opened.

I don't want to see any of the other non-open digital radio standards
come into amateur radio either, I'm not actually against anything other
than the sacrifice of our ability to create our own designs without
having to use something that isn't free (as in freedom).

Over here it is probably the mode with the most experimentation going
on in ham radio today...

Of couse not with the codec.
But in any communication system there are things that cannot be changed
or incompatability would result.
That does not mean there cannot be experiments elsewhere in the system,
or in the application of the system as a whole.

Remember packet. The AX.25 protocol was open, but it could not really be
changed because that would break compatability between the many
implementations that existed after some time. It was very clear that
a couple of critical mistakes were made in the design, and there were
proposals on how to fix them, but they never took off as it simply
wasn't practical to change AX.25
It really made no difference if it was open or closed, it was unchangable
anyway.

Yet, amateurs used it as a black-box building block in many applications
and experimented a lot with it.

I think you'll find that the only bigots involved here are the sort
that believe that amateur radio should encourage the use of closed
technology.

I believe that we should encourage the use of open technology and allow
radio amateurs to own their future. A sure way to kill amateur radio is
to make it dependent on corporations who do not share our interests at
a fundamental level.

And ultimately it failed (what's left of the packet network is a shadow
of what it was) because of that lack of flexibility.

Amateur radio has a difficult-to-overcome problem in that we always
build systems from the bottom up and don't design in the features that
allow growth and variation. D-STAR is another example of a system that
shares that same fault.

I hope that it's possible to create something that doesn't have these limitations, provides better function and allows more experimentation with all aspects of the technology.

> technology.

I think we should not encourage the use of closed technology, and I
think many agree with that.

But I also think we should not discourage developments (in the case of
D-STAR the development of a digital radio system) because in critical
places in the system open technology does not exist, and development
of such open technology is impractical.

In such cases we should allow, not encourage, the use of closed
technology.

I see the chip with the AMBE codec as a component. A component for
which we don't fully understand how it works, but we know how to
use it as part of a design.

Many amateurs have built electronics devices using components they
did not fully understand how they were designed. Or did not care.
It is possible to build an amateur radio transceiver using application
notes for integrated circuits and other devices without really knowing
what is inside the integrated circuits.

The AMBE codec is just such a circuit, just like an IF amp/demodulator
that you put in your receiver design by just copying the application note's
circuit.

I don't recall anyone seeking to only to encourage the use of closed
technology. May be some who are happy to use closed technology and those who
are happy to see that happen.

If the CODEC was open, or if the open CODEC ever comes to fruition, would
you have the knowledge / skills to undertake any meaningful experimentation
or even the remotest prospect of developing those skills?

Which is something the "anti" AMBE CODEC people ignore.

If the open CODEC happens, their scope to "experiment" with it will be
limited- unless they only want to talk to themselves or with others they've
co-ordinated experiments with.

That doesn't matter, the point is someone will have and will do so. We
can't all do everything in amateur radio, but we should not prevent
those that want to do something in particular from being able to do it.

Exactly, so let those happy with DSTAR and the AMBE CODEC use it and enjoy
it.

You can do the same with your pet interests.

Win-Win.

From a practical perspective I suppose that is the case, but it pains
me knowing that eventually the price of doing it will have to be paid.
Teach a man to fish etc.....

It is, but in the case of every other device it is possible to find out what's in there at least to a level where a full understanding is possible. And doing so would not be illegal.

>
> The AMBE codec is just such a circuit, just like an IF amp/demodulator

Well, once the legal system gets, or threatens to get, involved then I'd contend that it isn't the same as a generic component. But I think we're close enough in the discussion now that we can let it rest :)

Well the plan is that eventually any closed system becomes out evolved,
so the advantages of the open alternative become available to all. I am
more than happy to share, DVSI are not.

I have no problem with allowing evolution to decide the future, it's a
good idea to make sure that some diversity evolves to allow that to
happen.

Seems to me there's plenty of opportunity for flexibility with regards
to codecs. The protocol could be designed to allow for negotiation of
a common codec between two radios - start out with a simple
"universal" codec to get the communication started, and then
optionally switch to a different one.

Something like this is done in the commonest voice-over-IP protocol
family (SIP). There are numerous codecs available, ranging from
bog-standard telephony-style (uLaw and aLaw), to simple linear PCM, to
ADPCM, to various forms of sophisticated coding and compression. Some
of these require paid licenses (e.g. G729), some come with a
commercial- but-free license (e.g. ILBC), some are based on patents
which have now expired and can be implemented freely (e.g. versions of
GSM), and some are aggressively open-source and free-as-in-
speech-and-beer (e.g. Speex).

Protocol negotiation becomes tricker when you're dealing with a
repeater system, or a more-than-two-way simplex conversation, but
that's where the fun and experimentation comes in!

Yes, that's what's wanted, but the current D-STAR implementation
appears to have no flexibility to do this and there are no version
fields in the frame structure so it can't be made backwards compatible.
The design ought to have had this built in, but seems not to have
considered doing it.

There was nothing wrong with (A)X.25 it was designed for data over noisy channels. Same with CSMA - designed for multi use of same channel. Both open and partly developed by amateurs. Anyone remember ALOHAnet? - developed by Univesity of Hawaii and amateurs [1] not some commercial organisation like ICOM.

Maybe it's before you time Rob

Oh I don't know. APRS is a perfectly good solution, it's what AX.25 is soley
used for these days. We don't need location services and messaging tagged
onto D-STAR when AX.25 does this perfectly well.

Except digital voice doesn't work on noisy channels, which makes it pretty
useless for _REAL radio amateurs unless someone is going to stick repeaters
up every half mile. - that's gonna mean a lot of money to ICOM in my book
even if there was enough fools to fund it.

Change the record Brian, you come out with the same paragraph every time
this subject comes up - and you know the answer you're going to get.

I don't have the skills, or even the time, to take part - but it doesn't
stop me from encouraging the project as a matter of principal. A closed
codec has no place in Amateur Radio.

You won't find more than a handful of amateurs who would disagree with
that (except, of course, the ones who have already bought a D-Star rig).

In this case, you can always re-flash the chip containing your chosen
version of the codec.

Something very few had the capability to do back in the days when packet
was a big thing, and something you're expressely forbidden to do
(indeed, prevented from doing) with an AMBE DSP chip.

I just hope the RSGB is as keen to licence Codec2 based repeaters as it
has been to licence D-Star based ones.

Or will the Codec2 team have to give the RSGB huge prizes for their
Radcom competitions to get the same treatment?

Interesting analogy (pardon the pun) Walt.

DAB doesn't work for mobile use.

Neither does D-Star.

I agree, that was a bad design choice. I always like to put
field-type and field-version tags into the data structures I use...
it's a bit more work up front but saves an incredible amount of pain
further along the line!

Anybody for "Free*Star"? :-)

How slow can I go with a Vibroplex original with two weights?? Can I slow it down to 15 - 18 WPM??

Need to know before I spend the $$.

Thanks.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX RTTY Contest announcements, as well as some family commitments and attending the Cleveland Hamfest during the weekend. Also, we wanted to provide the OPDX readers with a consolidated listing of the CQWW DX RTTY Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 18th-September, through Friday, 24th-September there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V8, VE, VK, VP2E, VP2V, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Gerd, DG5MMW, will be active as 3B8/homecall from Mauritius Island (AF-049, WLOTA 0595) between November 1-6th. Activity will be possibly holiday style on the HF bands. QSL via his home callsign, by the Bureau or direct.

4O, MONTENEGRO. Arkady "Ark", UA4CC, is once again active as 4O7CC from Becici until October 2nd. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via his home callsign.

5B, CYPRUS. Serge, UT5UDX, will be active as 5B/UT0U during the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/All-Band entry. QSL via RA4LW.

5N, NIGERIA. Ivan, OM3CGN/5N7M, from Abuja, will be active during the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/All-Band entry. Ivan informs OPDX that he will probably be here for another 2-3 years. He also mentions that he hopes to fix his 160/80 meters vertical soon because in the winter season he prefers the lower bands. He is active on all HF bands, 160-6 meters using CW, SSB and RTTY. However, currently he has a problem with his Ham II rotor, the windings are bad, so he has his antenna fixed to the north. Ivan states that he is active almost everyday between 0600-0700z before he goes to work, during lunch time around 1100-1200z and after 1500z (possibly till 2300z) when he is at home. QSL via OM3CGN. His log is available at: http://www.clublog.org/charts/?c&#65533;7M#r

9A, CROATIA (IOTA/LH Op). A small group of Czech operators will be activating the Struga Lighthouse (WLOTA 0815) on the Island of Lastovo (IOTA EU-016, IOCA CI-051) between September 26th and October 2nd. The operators will sign 9A/homecall. Operators mentioned are: Jan/OK1JK, Ruda/OK1HWS and Jiri/OK1IEC. Activity will be on 40/30/20 meters, possibly 80/17/15/12/10 meters, using CW, SSB, RTTY and PSK (also ROS, Hellschreiber, Olivia and SSTV on request/sked). QSL via their home callsigns. For more details and a picture of their QSL card, see: http://jan.kepic.cz/view.php?cisloclanku 10090001

9M6, EAST MALAYSIA. Tony, KM0O, will once again be active as 9M6/KM0O from at Kinarut, Sabah (OC-088, WLOTA 0119, Zone 18, Grid Loc. OJ85AT), between November 26-30th. His main activity will be the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. Tony tells OPDX that he has work to do on the antennas for 80 and 160 meters, so he will be emphasizing those bands before and after the contest. QSL via LoTW, by the Bureau or KM0O (see QRZ.com).

C37, ANDORRA (Special Event/Contest Op). To celebrate the 30th anniversary of the Unio de Radioaficionats Andorrans (URA), an international team set up by members of URA, URE and REF will take part in the CQWW DX SSB Contest (October 30-31st) as C37N. Ruben, EA5BZ, will be the team leader during the contest. The operational site will be located in Naturlandia, the

Thematic Pyrenee mountains Ecologic Park. Operators mentioned are:
URA: Salvador/C31CT, C31JM, Josep/C31MO and Joan/C31US
URE: Carlos/EA1DVY, Joan/EA3GHZ, Gerardo/EA3HCJ, Ruben/EA5BZ,
Pasqua/EA5CEE, Raul/EA5KA and Biel/EA6DD
REF: Gerard/F2VX, Serge/F5HX, Adrian/F5VLY and Paul/F6EXV
QSL via EA4URE. For more details, visit: http://www.gdgdxc.net/c37n

CM2, CUBA. Frank, CM2IR, from Havana (IOTA NA-015 and Grid Loc. EL83TC),
informs OPDX that he will be active on the upcoming Sunday on 40 and 15
meters band using CW/SSB/PSK-31. His operating schedule is as follows:
40 meters (around 2200z): SSB - 7123, 7148 and 7170 kHz (+/- QRM)
CW - 7003, 7013 and 7025 kHz
PSK-31 - 7035 kHz
15 meters (around 2000z): SSB - between 21150-21350 kHz
CW - 21035 kHz
PSK-31 - 21070 kHz
He also plans be active as CM2IR/QRP during the CQWW DX SSB Contest
(October 31-31st) as a Single-Op/Single-Band (40m) entry, if the University
Exams leave him free time for work. QSL via his QSL Manager (ONLY DIRECT)
David, EB7DX.

CN, MOROCCO. Jim, W7EJ, will once again be active as CN2R during the CQWW
DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry.
He is expected to be active on October 21st. QSL via W7EJ. ADDED NOTE:
He will also be in the CQ WW DX CW Contest (November 27-28th) as a
Single-Op/All-Band/High-Power entry. See the station from CN2R at:
http://www.arraysolutions.com/Users/cn2r.htm

CO8, CUBA. Eduardo, CO8LY, will be in the CQWW DX RTTY Contest (September
25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via EA7ADH. Also,
look for Juan Carlos, CO8TW, to be active in the contest as a Single-Op/
All-Band/Low-Power entry. QSL via HB9SVT. His log will be on-line at:
http://www.qsl.net/co8tw

CQ SA SSB CONTEST. Augusto, PY2EB, BRContest Committee member, informs
OPDX: "To encourage greater participation of South American amateur in
international contests, we are creating a new competition to be held
October 9-10th, 2010." The complete set of rules for the "CQ South America
SSB Contest" are available at:
http://brcontest.com/modules/tinyd0/content/index.php?id

CR3, MADEIRA ISLAND (AF-014). Members of the CT3 Madeira Contest Team
will be active as CR3A during the CQWW DX RTTY Contest (September 25-26th)
as a Multi-? entry. QSL via CT3EE. Operators mentioned are: Jose/CT3BD,
Luis/CT3DL, Jose/CT3DZ, Jose/CT3EE, Antonio/CT3EN, Jose/CT3IA, Eusebio/
CT3KU, Jose/CT3KY and possibly others.

CR3/CT9, MADEIRA ISLANDS. Operators Walter/DJ6QT, Ulf/DL5AXX, Frank/
DL8WAA, Ulrich/DJ2YA, Falk/DK7YY, George/SV1RP, Dennis/K2SX and Leslie/
W2LK will be active as CR3L during the CQWW DX CW Contest (November
27-28th) as a Multi-2 entry. QSL via DJ6QT. Operators will probably be
active as CT9/homecall before and after the contest.

CR3/CT9, MADEIRA ISLANDS. Matt, DJ8OG, will be active as CR3L during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via DJ6QT. Operator will probably be active as CT9/homecall before and after the contest. Visit his Blog page at: http://www.dj8og.de

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
A52J • Bhutan; 2010 Operation
ZD9HGW • Tristan Da Cunha & Gough; 1999 Operation
ZL7/N7OU • Chatham Island; 2009 Operation

If you had cards from these operations that were rejected, please send a note to dxcc@arrl.org to have your record updated. Please check either your LoTW account, or the DXCC live daily listings for confirmation that the updates have been posted to your DXCC record.

* Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "ARRL Awards Committee Statement on Dissolution of the Netherlands Antillies:
To clarify the administrative process by which the anticipated changes to the two existing Netherlands Antilles DXCC entities will be made, the ARRL Awards Committee has determined that at 0400Z (12:00 AM local time in the islands) on 10 October 2010, the two Netherland Antilles DXCC entities will be deleted.
Commencing at 0400Z (12:00 AM local time) on 10 October, 2010, operation from the islands of Curacao, Bonaire, Sint Maarten, Saba, and St Eustatius will count for a yet-to-be-determined number of new entities under the DXCC List Criteria, and Political Entities, Rule 1 and/or Rule 2 Geographic Separation Entities. When the Awards Committee determines what Rule 1 or Rule 2 actions apply, it will announce the final disposition of the entities on the DXCC list.
The DXCC desk will not accept confirmations for these new entities until after 1 January, 2011."

EA6, BALEARIC ISLANDS. Adrian, AA5UK, will once again be active as EA6/AA5UK from Ibiza (EU-004, DIE E-023, MIA MB-003, WLOTA 0958, Grid Loc. JM09tb), October 16-27th. Activity will be holiday style on 160-10 meters using mostly SSB and various Digital modes. Also, look for satellite activity on various birds. QSL via his home callsign, by the Bureau, direct, LoTW or eQSL.

FO, FRENCH POLYNESIA. Phil, FO8RZ (F5PHW), continues to be active on the bands until August of 2011. Look for him to be active during the first 12 hours of the CQWW DX RTTY Contest (September 25-26th) as a Single-Op/High-Power entry. QSL via LoTW or direct to F8BPN. Visit his Web page at: http://f5phw.hamlogs.net/index.php?lng•

IOTA NEWS.....
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, in the CQ WW DX RTTY Contest (September 25-26th) as a Single-Op/Single-Band (??) entry. QSL via eQSL.

EU-127. Operators Joerg/DJ1JB, Christian/DM4DX and Markus/DJ4EL will be active as homecall/p from Helgoland-Duene Island (GIA N-15, WLOTA 2130) between October 8-11th. Activity will be on 40/17/12 meters. QSL via their home callsign, by the Bureau or direct.

NA-091. Rick, K6VVA, will be active as homecall/VE7 from Quadra Island (CISA BC-006) in the BC Province South Group between September 27-30th. QSL via N6AWD.

SA-046. Jim, PY7XC, will be active as PY7XC/p from Itamaraca Island (DIB-018) between September 26th and October 1st. Activity will be on 80-10 meters using CW, SSB and the Digital modes. He will be running 400 watts into wire antennas. QSL via addres on QRZ.com.

K4P, PUERTO RICO (Special Event). Esther, WP4NWP, is now active as K4P until September 30th. Activity is to celebrate "Patriots Day" in Puerto Rico. Operations will be on 80-10 meters using CW and SSB.

KH6BZF PROPAGATION FORECAST/REPORT (For September 27th-October 3rd)....
Sept 27 AN SOLAR REFERENCE KEYS
Sept 28 AN --------------------
Sept 29 AN BN - Below Normal
Sept 30 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 1 AN LN - Low Normal
Oct 2 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 3 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP2, U.S. VIRGIN ISLANDS. Operators Dennis/AI8P and Anthony/K8ZT will be active from the U.S. Virgin Islands (IOTA NA-106) during the CQWW DX RTTY Contest (September 25-26th) as a Multi-Single/Low-Power entry. QSL via the operator's instructions.

LU1, SOUTH ORKNEY ISLANDS. Mehdi, F5PFP, reports that Diego, LU1ZA, is now at the Orcadas Base station on Laurie Island in the South Orkney Island group (AN-008, WAP ARG-15). Last Sunday, September 19th, he was on the air and worked more or less 20 Europeans with 100 watts only, then the net became impossible to manage due to non-discipline operators, so he left the band. LU1ZA is expected to be on again this Saturday and Sunday (September 25-26th) between 1800-2300z. Mehdi states, "If you need Orcadas--South Orkney as an all time new one, feel free to drop me an E-mail, then I will send you in return the exact frequency where Diego will appear on air in order to run the list without any QRM makers on a clear frequency and before any spot on the cluster." QSL LU1ZA via LU4DXU.

P3, CYPRUS. Jack, R2AA (ex-RW3QC), will be active as P3N from Pachyammos during both the CQWW DX SSB Contest (October 30-31st) and CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry. Reference numbers are: IOTA AS-044, MIA MCI-002 and WLOTA 0051. QSL via RW3RN.

P4, ARUBA. Robert, W5AJ, will once again be active as P40P in the CQWW DX SSB Contest (October 30-31st). His entry TBA. Two days before the contest, look for him on all bands and modes (especially on 30/17/12m) signing P4/W5AJ. QSL both callsigns via LoTW, or direct to W5AJ.

PJ2, CURACAO (Update). Operator Jeff/K8ND and Bill/W9VA will be the first team to arrive at Signal Point Station on Curacao (SA-006, WLOTA LH-0942) between October 10-18th, just before the 10/10/10 date and operate as PJ2/K8ND and PJ2/W9VA. QSL via their home callsign. The PJ2T callsign will be used beginning at 0400z on October 10th, when the Netherlands Antilles is dissolved and Curacao becomes an autonomous country within the Kingdom of the Netherlands (and likely a new DXCC Entity). Eventually, the team will grow to 9 operators from the U.S. and Germany, and they will be there through November 2nd, and operate in the CQWW DX SSB Contest as a Multi-Multi entry. QSL via N9AG and LoTW.

PJ5 & PJ7, NETHERLANDS ANTILLES (QSL Update). Will, AA4NC, plans to activate St. Eustatius (NA-145) between October 9-15th, as PJ5/AA4NC, followed by Sint Maarten (NA-105) between October 15-18th, as PJ7/AA4NC. He states to QSL via LoTW or direct only to AA4NC. NO BUREAU QSLs.

PJ7, NETHERLANDS ANTILLES. Masa, K1GI/JN3NFQ, will be active as PJ7/K1GI from St. Maarten (NA-105) between November 20&#65533;23rd. Activity will be "family style" on 80-10 meters including 30/17/12 meters using CW, SSB and the Digital modes. His equipment will be a FT-450 using a dipole for 40/20m, Deltaloop for 15/10m and a Buddipole for 80/30/17/12m. QSL via JG2BRI, by the Bureau or direct (See detail on QRZ.com). Remember, the Netherlands Antilles will cease to exist as a country as October 10th, and St. Maarten is possibly another new entity for the DXCC Award.

CR6A Log. Algarve STAR DX Team announced that the log for the recent CR6A operation (from Natural Reserve St. Andre e Sancha, DPRN CTFF-19) is available online, as well as pictures and details about the DPPRN award on: http://algarvedx.com

PX8J/PX8L QSL STATUS. Ciro (Xavier), PY7ZY, reports that all QSLs received as of September 15th (Online Request and Direct), were sent out by September 21st. QSL cards received between September 16-29th, will be answered on September 30th. QSLs received after this date will be answered every Monday.

QSLS VIA LoTW: D4C, EM5HQ, RV6LO, S58N and VQ9LA

QSLS RECEIVED VIA MAIL: 3C0C, 3C9B, 5E50SA, 5V7DX, 5W0OU, 8R1DB, CX/N3BNA, E51NOU, E51WWB, EE3URR, FY1FL, GJ3USR, JW/OK1IEC, KH2L, PJ5/AH6HY, RV9CX, SE2T, SV2ASP/A, TF8SM, TL0A, V31SU and VP2MSJ

QSLS RECEIVED VIA THE BUREAU: EA1CCM, ED5TOM, F9IE, J28JA, JX9JKA, OX3KQ, OX3XR, RK4WWF, TF/N0HJZ, UA1AQA and YR9P

SATELLITE GRIDS TO BE ACTIVATED! Yuri, UT1FG, will be joining the "MV Mottler" (Cyprus cargo ship) on October 5th, and will be on board until March 2011! He plans to operate as UT1FG/MM on the satellites activating many grids. His first voyage will be from the Baltic Sea, and then from Riga, Latvia to Paranagua, Brasil. You can read details and see pictures or track the "MV Mottler's" voyage via the following Web pages:

http://www.digital-seas.com/vessel_search/vessel_details/on/5bqu2_mottler_q
2020575.html?tx_fleetmonportal_pi1%5Bposition%5DA543
http://www.marinetraffic.com/ais/showallphotos.aspx?mmsi!2735000

TC2010, TURKEY (Special Event). Members of TCSWAT (TC Special Wireless Activity Team) will activate special event TC2010MVF between September 25-26th. Activity was from the Motor Vessel Fenerbahce, now a part of Rahmi M.Koc Museum located on Golden Horn. For details, see:
http://www.rmk-museum.org.tr/english/index.html
Operations will be on all HF bands. QSL TC2010MVF via TA1HZ. Please do not QSL direct as the group will send out all the QSL cards at the end of December to the QSL Bureau system. TCSWAT QSLs 100%, so you do not need to worry about your card!!

UP44, KAZAKHSTAN (WFF Op). Operators Alex/UN3F, Serge/UN9FN and Anatoly/UN1F will activate the new National Park "Ertis Ormany" (WFF UNFF-027, KDA Sherbaktinskiy District F-07, Lebyazhinskiy District F-10) as UP44FFF between September 24-26th. Activity will be on 80/40/20 meters using CW, SSB, and if they have enough time the Digital modes. Operations will also be on VHF/UHF. QSL via UN3F.

V7, MARSHAL ISLANDS. Yuri, N3QQ, informs OPDX that plans are in the works to activate a new IOTA group. He states, "As of now it is a 'one-man' show. Tickets purchased, but still many 'Ifs'." Current plans are to arrive in Majuro (OC-029) on October 7th, then travel to Enewetak Atoll (OC-087) on October 9th. Probably operations from Enewetak will take place between October 12-15th and operations from Ujelang Atoll (OC-278), which

has never been activated, between October 16-19th. Everything is subject to change (weather and transportation). After his arrival in "The Republic of the Marshall Islands" (RMI), he will know more concrete dates and will inform us more. Requested callsigns (to be confirmed yet) are: V73RRC for Ujelang Island and V73QQ for Enewetak Island.

VE2, CANADA (Update/Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. Yuri informs OPDX that he will be there between October 25th and November 1st. Activity before and after the contest will be on CW and RTTY, the low bands and 30/17 meters. QSL via VE3DZ, direct or by the Bureau.

XU7, CAMBODIA. Peter, NO2R/XU7ACY, in Sihanouk Ville, will be active during the CQWW DX SSB Contest (October 30-31st) and the CQ WW DX CW Contest (November 27-28th) as a Single-Op/All-Band/Lower-Power entry. QSL via LoTW or direct to W2EN.

YB65, INDONESIA (Special Event). Members of the ORARI will activate special event station YB65C between 0900z Saturday, September 25th and 1600z Sunday, September 26th. Activity is to celebrate the 65th anniversary of Post & Telecommunication. Operations will be on 80/40/20/15/10 meters using CW and SSB. The operators mentioned are:
CW : Dudy/YB0DPO, Pri/YB0ECT and Laily/YC0TSU
SSB : Wisnu/YB0AZ, Suryadi/YB0JS, Triadi/YB0KVN, Karsono/YB0NDT, Hudi/YC0BIK, Endang/YC0DQT, Luty/YC0RAN, Wan/YC0MXV and Tommy/YD0LDT
QSL via YB1GJS, direct or Bureau: ORARI Pusat Nasional, Box 1096, Jakarta 10010, INDONESIA.

The following stations are expected to be active in the
CQ World Wide DX RTTY Contest (September 25-26th, 2010)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2010 CQWW DX RTTY Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

Don't confuse Brian with logic, he has his faith in that choice must be good
no matter who provides it or what their motives are.

It is striking how many of the proponents of development of an open codec
and opponents of a closed codec are amongst those that do not have any
idea how to develop a codec...

ROTFL

Or have even contributed to the development fund. (It was recently reported by a contributor to uk.radio.amateur that he was the first person to have sent a donation. (Stands by for the latest excuse from one of our Scottish amateurs as to why he can't cough up YETI again this month.))

Personally, I don't see the attraction of DStar like systems, regardless of the choice of CODEC. However, I'm more than happy for others to enjoy them. I just wish the bleating crew would go and make this open CODEC happen.

Not only that (I have done DSP coding for filters and modems myself),
but in this case there is the additional difficulty of finding the methods
and algorithms to code speech into very few bits. This requires lots of
knowledge and research, and what is already known is usually patented.
Often the research is done partly in a scientific research institute
or at a university, and partly in a commercial company allied to such
an institute. Lots of man-hours of highly qualified people go into this.

But the community of people who think that "WE should develop an
open codec" and "when we had more donations we could..." seems to be
thinking that this is project that a couple of amateurs could do better.

We should develop an open space rocket to propel our geostationary OSCAR
into space. Sure.

But we better admit that we cannot do that and set achievable goals.

I don't know to build a nuclear power station either - doesn't stop me
being in favour of them over wind power.

Actually, I can this month. Someone remind me who I send it to please!

Can't afford it next month cos the RSGB want their fees off me then, and
I'll be on holiday for at least a week of it too - so I'd better get it
done now.

SARL NEWS - SUNDAY 26 SEPTEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

ARRL AWARDS COMMITTEE STATEMENT ON DISSOLUTION OF THE NETHERLANDS ANTILLES

SARL MEMBERSHIP ON THE MARCH .. BUT YOU CAN SPEED IT UP!

DO NOT FORGET TO TAKE YOUR HAND-HELD TO WORK ON FRIDAY

USA SUPPORTS ALLOCATION AROUND 500 kHz

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

ARRL AWARDS COMMITTEE STATEMENT ON DISSOLUTION OF THE NETHERLANDS ANTILLES

To clarify the administrative process by which the anticipated changes to the two existing Netherlands Antilles DXCC entities will be made, the ARRL Awards Committee has determined that at 04:00 Z (12:00 a.m. local time in the islands) on 10 October 2010, the two Netherland Antilles DXCC entities will be deleted.

Commencing at 04:00 Z (12:00 a.m. local time) on 10 October 2010, operation from the islands of Curacao, Bonaire, St Maarten, Saba, and St Eustatius will count for a yet to be determined number of new entities under the DXCC List Criteria, and Political Entities, Rule 1 and/or Rule 2 Geographic Separation Entities. When the Awards Committee determines what Rule 1 or Rule 2 actions apply, it will announce the final disposition of the entities on the DXCC list.

The DXCC desk will not accept confirmations for these new entities until after 1 January 2011.

SARL MEMBERSHIP ON THE MARCH .. BUT YOU CAN SPEED IT UP!

Last week the SARL Membership stood at 1 321, which is still 21% short of the 1 600 target for the 2010/2011 financial year. If you have not yet renewed please do so in the next few days before unpaid members are removed from the database. Being removed from the member data base also means that you will not receive the September/October edition of Radio ZS and future editions, have use of the QSL bureau and other membership benefits such as discount on courses and kits. Besides all the benefits of being a member, there is the bigger issue of ensuring that Amateur Radio has a strong voice at places where it matters. Your membership of the SARL also strengthens the position of the IARU in international forums.

DO NOT FORGET TO TAKE YOUR HAND-HELD TO WORK ON FRIDAY

Friday 1 October 2010 is "Take your hand-held to Work" Day. Show your colleagues what amateur radio is about; let them have a first-hand experience. If you are retired or work from home, be active on local repeaters and share your experiences. Make it a fun Friday.

USA SUPPORTS ALLOCATION AROUND 500 kHz

The spectrum regulators for United States private sector and government users have agreed to support a secondary MF allocation to the Amateur Radio Service at 461-469 kHz and 471-478 kHz. The proposal will be tabled at the 2012 World Radio Communication Conference (WRC-12), to be held in Geneva, Switzerland, from 23 January to 17 February 2012. The Federal Communications Commission and the National Telecommunications and Information Administration officials formally presented the proposal at a meeting of the Second Permanent Consultative Committee (PCC.II) of the Inter-American Telecommunication Commission (CITEL), held from 30 August to 3 September in Fortaleza, Brazil.

According to ARRL Chief Technology Officer Brennan Price, N4QX, the proposal reconciles two widely divergent proposals for WRC-12 Agenda Item 1.23, adopted by consensus of the private sector and government users. Agenda Item 1.23 calls on WRC-12 "to consider an allocation of about 15 kHz in parts of the band 415-526,5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services. "The FCC's WRC-12 Advisory Committee had adopted a proposal for a secondary amateur allocation at 495-510 kHz, but the NTIA, acting on the advice of government maritime interests, initially supported no change from the status quo.

"I am pleased that the United States is taking an affirmative position on Agenda Item 1.23," Price said "While the proposed frequency bands differ from both what the ARRL proposed and the private sector supported by consensus during WAC deliberations, it is gratifying that government interests have backed off a no change position." Some maritime interests, both domestically and internationally, have

expressed opposition to any amateur allocation in the range 415-526,5 kHz, citing existing narrowband direct printing applications at 490 and 518 kHz, as well as future plans for the band that have yet to be fully characterized, Price explained. To the extent future maritime uses of the band have been discussed, the focus has been on the 495-505 kHz segment. Despite the lack of plans for the remainder of the range under consideration, the International Maritime Organization (IMO) has adopted a draft position of "no change" and has communicated this position to the ITU.

IARU President Tim Ellam, VE6SH, has met with IMO officials in efforts to soften this position."The road to a favorable outcome for Agenda Item 1.23 at WRC-12 remains treacherous," Price said. "The IMO is a respected organization, and their opinion carries weight. It's up to us to continue to make the case that a secondary allocation can be made while protecting existing services, both to the IMO and to the ITU Member States who will make the decisions at WRC-12."

The SARL will in the next few weeks meet with the South African maritime authorities and other role-players to formulate a South African position to be taken to SADC and the African Telecommunications Union for support of an amateur allocation.

SA AMATEUR RADIO DEVELOPMENT TRUST EXTENDS CLOSING DATE FOR ENTRY IN THE INNOVATION INITIATIVE

Following requests for an extension to submit proposals in the Innovation Competition, the Board has decided to extend the closing date for entries till 15 January 2011.

To find out more about innovation visit www.amateurradio.org.za.

COMPETITION NEWS

The Antique Wireless Association is throwing an AM/SSB Valve QSO Party. It is a phone contest over two sessions on Saturday 9 and Sunday 10 October 2010. The AM section takes place on Saturday 9 October, 15:00 to 19:00 CAT, with contacts on both the 40 m and 80 m bands for points. On Sunday 10 October from 15:00 to 19:00 CAT, the SSB section will be held with contacts on the 40 m and 80 m bands for points.

The frequencies are: 7,053 to 7,100 MHz on 40 metres. On 80 metres they are 3,603 to 3650 MHz. The exchange is a call sign, RS and consecutive serial numbers starting at 001, plus type of radio used, e.g. HT37 Tx.

Points can be scored as follows: all valve radio - 3 points per contact; hybrid (valve & solid state) - 2 points per contact; solid state radio - 1 point per contact.

On a multiplier, points will be as follows: all valve radio - 3 points per contact; hybrid (valve & solid state) - 2 points per contact; solid state radio - 1 point per contact.

Certificates will be awarded to the first three places in each category, namely AM and SSB.

Submit your logs to the Southern African Antique Wireless Association, PO Box 12320, Benoryn,1504, or e-mail them to andy.cairns@xsinet.co.za. The closing date for log submissions is 25 October 2010. Please refer to the SARL Contest Manual for any queries.

CLUB NEWS

The East Rand Amateur Radio Club is holding a flea market on 2 October 2010, from 8:00 to 11:00. Sale tables cost R20 and boot sales are also R20 per vehicle. Cold drinks, boerewors rolls and pancakes will be on sale. To book a table, contact Judy ,ZR6POP, on 074 177 0395 or e-mail her at zr6pop@vodamail.co.za. For any other info contact Francois, ZR6COI, at 079 932 7131 or email zr6coi@vodamail.co.za.

The next Pretoria Amateur Radio Club ZS6PTA mega flea market will be held on Saturday 9 October 2010 at the Pretoria Motor Club in Silverton from 08:00 to 11:00. Please also diarise 27 November 2010 for the last ZS6PTA flea market of this year. For more information or to book a table please contact Almero, ZS6LDP on 083 938 8955.

The Midlands Amateur Radio Club held their AGM on 18 September, and the newly elected committee members had their first meeting on 21 September. The following portfolios were assigned:

Chairman, HHN, Web, Email - Mike Lauterbach, ZS5ML Vice Chairman, Technical - Shaun Rudling, ZR5S Secretary, Treasurer - Ian Pearson, ZS5AZ Events, Training, PR - Shaun Fisher, ZR5SF Disaster Management - Des Mullen, ZU5DM

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1108 is fairly quiet, while Sunspot 1109 is fortunately much more active. During the week some interesting 20 m openings were noted to Hawaii from South Africa, the most distant point on earth. The effective sunspot number is expected to be less than 25 for the coming week.

20 m will provide the best opportunities for DX followed by 15 m. Conditions to India will be good from the late afternoon until after sunset. During the afternoon, conditions will be good towards Europe on 15 m, later followed by good 20 m openings. Early evening 15 m contacts with the USA are at last possible again. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings, 17 m will also be full of surprises.

For the CW and digital enthusiasts, 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the workhorse for contacts around the country with 30 m also very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

29 September - SARL 80 m digimodes club competition; 1 October - Take your hand-held to Work Day; 2 October - East Rand ARC flea market. For information phone Judy, ZR6POP, on 074 177 0395; 2 October - West Rand ARC flea market at the club house in Weltevreden Park. Contact Phillip, ZS6PVT on 083 267 3835. 9 October - Pretoria ARC Flea Market at Pretoria Motor Club in Silverton from 08:00. Contact Almero, ZS6LDP, on 083 938 8955 9-10 - October Antique Wireless Association AM/SSB Valve QSO Party; 15 October - Last day to enter your photos taken at "Take your hand-held to Work Day".

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN, The bulletin editor was Jannie, ZR6PHD.

Thank you for listening, 73.

AUSTRALIA FOR WEEK COMMENCING SEPTEMBER 26 2010

Queensland (VK4) Police warn of fake Microsoft scam

Police from the Fraud and Corporate Crime Group are issuing a warning tothe
public following a dramatic increase in reports of a fake Microsoft scam
currently targeting Queensland victims.

The scam involves a victim receiving a phone call from a personpurporting to
represent well known computer company (most commonly Microsoft or acompany
contracted by Microsoft) telling the person they have a problem withtheir
computer. The caller outlines the victim's computer is infected with avirus
that has been brought to the company's attention - often via theMicrosoft
fault reporting process.

The caller then offers to assist the victim and will "fix the problem"by
directing them to a website where the caller remotely takes over thevictim's
computer. The representative then shows the victim the "issues" withtheir

computer and suggests they pay a fee to have the problem fixed or needto purchase software to prevent this from happening in the future.

"This is all just a scam. Microsoft has confirmed they are notcold-calling members of the community regarding viruses, computer problems or anyotherissue.

Quite simply, these offenders are just looking to trick you into givingthem money," Detective Superintendent Brian Hay of the Queensland CrimeOperations Command's Fraud and Corporate Crime Group said.

"Giving someone you don't know remote access to your computer isbasically the same as handing your credit card details over to them. With this access,an offender can easily search your computer for banking or personal detailsor quite easily load Malware or Trojan software onto your computer.
You may as well give them the key to your front door while you'rethere.

OPERATIONAL NEWS -

Hi this is Lesley, VK5LOL, the ALARA Contest Manager, with a reminder toall those who participated in the recent ALARA Contest. Your logs need to bein my post box or emailed by the end of this month the 30th September. Thank you. (Lesley VK5LOL ALARA Contest Manager)

September 2-metre band SSB South-East Scramble

Its on again folks, Today Sunday 26 September 1030-1045UTC, for 15minutes of fast and furious action.

This event has a strong loyal following in the South-East of mainland Australia, and they extend a warm invitation for others to give it go.

All are welcome but please do listen on 144.150MHz before startingtime.

Want more information and the rules of the scramble? read rules and alink for more in this weeks text edition, best read at wia.org.au

USA TO HOST 2014 WORLD RADIOSPORT TEAM CHAMPIONSHIP

In 1986, Ted Turner -- in reaction to the political troubles surrounding the Olympic Games of the 1980s -- created an international sports competition that he called the Goodwill Games. The first Games were held in Moscow with more than 3000 athletes from 79 countries competing. Four years later, the Games moved to Seattle, Washington and it was at those Games that the first-ever World Radiosport Team Championship (WRTC) took place.

Besides athletics, the Goodwill Games focused on areas of cultural exchange, arts and other unique subjects, one of these being Amateur Radio -- and WRTC was born. Radio amateurs from around the world gathered in Seattle for an Olympic-style event, joining in competition and camaraderie. In 1996, WRTC moved to San Francisco, then Slovenia in 2000, Finland in 2002, Brazil in 2006 and Russia in 2010. Now 18 years later, WRTC returns to the USA.Read more here

WEIRD AND WONDERFUL
SPACE NewsSolar Sail Project

On a "light theme" the following was sent through by Tom VK7TL and is a
fascinating look at a project where light is being used to move verysmall
satellites through space.

The Planetary Society is building a spacecraft that will sail onsunlight
alone by the end of 2010. The new solar sail project, boosted by a
one-million-dollar anonymous donation, is the beginning of an innovative
program that will launch three separate spacecraft over the course ofseveralyears.

The program starts with LightSail-1, which will demonstrate thatsunlight can
propel a spacecraft in Earth orbit. LightSail 2 and 3, more ambitiousand
aim to reach farther into space.

Sailing on light pressure (from lasers rather than sunlight) is the only
known technology that might carry out practical interstellar flight,helping
pave our way to the stars. The project also has many practicalapplicationsthat include

Monitoring the Sun for solar storms, providing stable Earth observation
platforms, and exploring our solar system without carrying heavypropellants.

The solar sail propulsion is simple in concept. Light photons bounceonto a
mirror-like aluminised Mylar sail. As each photon hits, its momentum is
transmitted to the spacecraft.

Photons have no mass but lots of energy, so a solar sail space proberequires
no onboard fuel. The force acts continuously, meaning a solar sail can
eventually reach speeds five to ten times greater than any chemicalrocket.

For more information on this fascinating project take a look at the linkon
the email and internet editions of this broadcast.

http://planetary.org/programs/projects/solar_sailing/

Working DX, great fun

There's old adage that if you can hear them, then work them.

With propagation improving in the higher HF bands more DX is beingworked,
and fingers crossed, this should steadily improve in the months andyearsahead.

Ever wondered just how many DXCC entities or countries are on air at any one time?

Well, according to the Amateur Radio Cluster Network last week therewere
211 countries active out of the 338-odd DX entities listed.

Propagation will not instantly favour all of them from your QTH, but ifthey
were easy DX would not present a challenge.

With regular chasing of DX, it should be within the reach of most toachieve
the DX Centenary Club Award that requires confirmed contacts with 100 DX entities.

A number of Australian and British Foundation Licensees are activelychasingDX with some
success.

The big promise for them comes at the peak of the sunspot cycle when the
10-metre band opens up regularly and DX can be worked on 5-watts with areasonantenna.

In the meantime there are lots of opportunities. The Oceania DX phonecontest
being next Saturday and Sunday the 2nd and 3rd of October is ideal toscore
new countries while improving your operating skill.

If you're new to contesting, then read the rules to get a sense of it.

Why not set yourself a personal challenge of getting on air and seeinghow
many DX contacts you can log? Do enjoy DXing!(Jim Linton VK3PC)

The Super Springtime in VK6 is now even bigger

Last Monday the 20th of September, the special callsign for theCentenary of
Organised Amateur Radio in Australia, VK100WIA, went to air from the
Royal Perth Showgrounds.

Western Australian amateur radio groups have collaborated to pool their
resources and give the centenary celebration a real kick long both atthe
Perth Show and from Wireless Hill.

WICEN Western Australia had it from the 20th to the 22nd of September,then
following the Western Australian Repeater Group, and the West Australian
VHF Group operates from the Wireless Hill Museum next Wednesday the29th,
Thursday the 30th and Friday the 1st of October.

Super Springtime is a whopping 12 days straight.

The Scout Communication and Technology Team, which was already an
enthusiastic part of the Super Springtime, joined the VK100WIA rosterfor
the 23rd to the 25th of September.

The strong collaborative spirit being shown in the West is likely to see
2,500 contacts added to the VK100WIA online log over 12 days.

Whether it is via amateur satellite, D-Star, HF, VHF and UHF, the worldwill indeed be listening for VK100WIA from Perth and its surrounds.

Do give the now Super, Super Springtime support by making a contact ith us now, and speaking of now, Heath and I (Bob Bristow) continue this mornings WIA NEWS FROM THE SHOW GROUNDS!

WIA 100 YEARS AND STILL GROWING STRONG!

Great time had by the Port Stephens Amateur Radio Club

The club's VK100WIA rostered slot is reported in words and photographsin its Dolphin Tales newsletter.

The venue was the Coast Guard Rooms and strong winds outside playedhavoc with the wired antennas. The one antenna that worked particularly wellwasan 80m loop.

Over the three days a total of 682 contacts were entered into the online logbook.

One of the highlights was the arrival of a visitor, an ships radiooperator who spotted the Morse code key and asked if he could have a go.

This now new member of the Port Stephens Amateur Radio Club made anumber of contacts into Japan and New Zealand.

The look of delight on his face with a broad smile in recognition thathe still had the code skill after so many years.

WIA Centenary Award going strong

Another 60 award certificates have just been issued while other claimsarearriving steadily.

The first award going to India has been claimed by the Gopal MadhavanVU2GMN.

He's a director of the International Amateur Radio Union Region 3 andwas most impressed at seeing VK100WIA in action as part of the WIA Centenary Convention in Canberra.

Gopal VU2GMN has since qualified for the WIA Centenary Award. Hopefullyhe won't be the last from VU-land.

Of the 170 awards issued so far 20 have been claimed by FoundationLicensees.

The VK100WIA online logbook clearly indicates that there are many whohave the required contacts to claim the award, but have not yet done so.

Full details of the award requirements can be found in the Centenarysectionof the WIA website.

A look ahead at the VK100WIA roster

This week we review what will be the final month of operation for thespecial callsign VK100WIA by the WIA and its affiliated clubs around thenation.

Saturday the 2nd of October is the first of the three days for the Cityof Brisbane Radio Society that will be activating the callsign. The publicwill

be invited to attend and learn more about the wonderful activity ofamateurradio.

The St George Amateur Radio Society rostered from the 5th to the 7th of October, operating from the Scout Hall in Kurrajong Street, Sutherland,aiming to be on air 10am to 10pm.

Maryborough Electronics and Radio Group in Queensland is featuringVK100WIA and the Centenary at its Radio & Communications Expo & Hamfest.

The complete the month of October, VK100WIA will be in Victoria at Yarra Glen, Geelong, and Churchill plus another Scout location for JOTA, alsoMarble Hill South Australia, Plumpton New South Wales, and tail-end Charliewill be the Westlakes Amateur Radio Club.

For more details check out the VK100WIA roster on the WIA website.

Tune Into the World - Amateur Radio Gets People Talking

The WIA National Field Day on Saturday the 23rd of October will involveradio clubs and groups of individuals operating portable stations and havingdisplays in a public place, park, shopping centre, hall, markets or festivals.

The WIA is providing its strong support to them by making available theWIA's Centenary poster, Calling CQ posters and Calling CQ brochures.

Check out the full details on the WIA website which has now downloadable files to enable clubs to print affordable banners, A-frame displays ordurablelarge posters.

A range of branded clothing, Hoodies, T-shirts and Polos are alsoavailable. All adding to the neat and professional look to any display.

The WIA National Field Day, Saturday the 23rd of October is also thecover story of next month's edition of Amateur Radio magazine.

The clubs registered so far are:

The Adelaide Hills Amateur Radio Society, Victoria's Scout Radio and Electronics Service Unit, The Eastern and Mountain District Radio Club, The Peel Amateur Radio Group and Amateur Radio Victoria.

And supporting them will be home stations too!

WIA

Progress with 600-metre band activities in VK

During June 2010, the ACMA issued a number of scientific licences to theWIA to enable trials aimed at gathering data to support the WIA's preparationfor the next World Radiocommunications Conference - known as WRC-12.

WRC-12 has an agenda item to consider the making of a new allocation tothe amateur service in the vicinity of 500 kHz.

Your WIA has been working with a number of amateur operators toestablish transmissions in the band 505 to 515 kHz. The first VK station tooperate on this band was Drew Diamond VK3XU operating with the call-sign AX2VKW on 507 kHz.

Since then, stations have been established by Nick Hacko VK2DX operatingas AX2VKX on 510 kHz, Dimitris Tsifakis VK1SV operating as AX2VKY on 512.5kHz and Berndt Wulf VK5ABN operating as AX2VLB on 509 kHz.

Transmissions are mainly QRSS-3 slow morse and normal speed morsebeacons with transmission times being variable depending on operator availability.

Transmission time information is promulgated via the 600-metre bandemailreflector group at

http://groups.yahoo.com/group/600m/

This group also provides a forum for discussion and reception reports.
To add to the interest, there are also a number of ZL stations active, especially on a Thursday evening and operating on about 508 kHz.
The participants are actively seeking reception reports and wish toencourage more amateurs to listen for the transmissions - after all, the morereports that are received, the better will be the data to support the proposalforthe new amateur band.

Reception reports can also be sent direct to the WIA's projectcoordinator, Keith Malcolm by email vk1km@wia.org.au

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've beenthinking.

I look out over the property and see that the creek has burst it'sbanks. A pleasant reminder that the long drought is passing but a reminder thatthe seasonal cycle continues. As the temperature rises, the suburban chorusof lawn mowers will fill the air.

However, this is the time for us to do maintenance and ensure theamateur station is ready for the summer storm season. From the top of theantenna to the protective earth strap, from the emergency lights and back up powersystem, this is spring clean time.

Spring cleaning is not simply blowing the dust off but also checkingthat necessary items are conveniently stored and in working condition. Fuel, batteries, leads and tape...whatever you find necessary for a strongwind, a blackout or an electrical storm and not to mention the possible cyclone,should be checked and replaced if necessary. Make sure you don't forget tocheck the pantry as food that can be kept and prepared when normal services aredisrupted is as important at home as it is to the field day exercise.

The summer storm season is coming, ready or not. I'm Geoff Emery andthat's what I think...how about you?

CLUBBING -

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from Rockhampton and District Amateur Radio Club, the RadarClub.

This is Les VK4VIL reporting.

Several weeks ago I mentioned that 85 year old Radar Club member, BillVK4FGN was preparing to participate in a 570km mass cycle ride from Rockhamptonto Bundaberg via western towns.

The Club is now proud to announce that Bill, the oldest of more than1000 entrants completed the trip, arriving in the sugar city in goodshape. Poor weather conditions for some of the journey, combined with Bill'sselection of his daughter's 30 year old school bike above several pretty schmicklightweight racers which were offered, makes this feat more incredible. It wasinteresting to listen to his accounts of some short, 60 km rides- a good indicationof magnitude of the daily stages.

We may not know what is ahead of us in life but Bill gives us somethingto aim for. Hearty congratulations, mate.

And now for something a little less strenuous.

Brian VK4LH conducts the RADAR Club 80m net on Tuesday evenings at7.30pm local time on 3.613Megahertz as conditions allow. As well as the usual call infrom club members, stations from all other centres are made welcome. The net,run under club callsign VK4WIR, with varied topics discussed, normally lastsabout45 minutes.

Time and frequency again -- 7.30pm, Tuesday nights, on 3.613 Megahertz.

Check out our VK4WIR callsign on QRZ.com.

I'm Les VK4VIL on behalf of the Rockhampton and District Amateur Radio Club.

TABLELANDS RADIO AND ELECTRONICS CLUB vk4wat@wia.org.auwww.treclub.org.au

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club,TREC, in Far North Queensland.

As reported last week TREC members activated the VK100WIA Centenarycall-sign from Far North Queensland with great success.

Whilst we were at Lake Tinaroo we also held the Annual General meetingfor theclub.

The new committee for the 2010/2011 year is:

President Stu Dunk VK4SDD
1st Vice President John Roberts VK4TL
2nd Vice President Chris Gill VK4YCG
Secretary Dale McCarthy VK4DMC
Treasurer Ron Goodhew VK4EMFCommittee Members.
Dave West VK4DK
Bryan Cunnington VK4NMC

We are looking forward to a new and challenging year for TREC memberswith many radio related activities already planned.

This has been Dale VK4DMC and you are listening to the WIA news.

Open Invitation to All VK7 Amateurs

Grote Reber Museum and 3D Virtual Reality Cinema

The REAST Club invites all amateurs and their families to tour the GroteReber Museum at the Mt Pleasant Radio Observatory at Cambridge.

The museum has many wonderful artefacts and information about amateurradio operator Grote Reber (SK) and his experiments mapping the Milky Wayusing HF from his square kilometre array at Bothwell along with radioastronomy displays and a 3D Virtual Reality Cinema where you can fly in 3D to theplanetsin the Solar System.

Members from the Astronomical Society of Tasmania with their SolarTelescopes looking at the sun and seeing those elusive sun spots will be inattendance!

Saturday the 16th October 2010 starting at 1:00pm$5 per person.

As they say in the advertising - "But wait there's more!!"
The Astronomical Society of Tasmania and the University of Tasmania areholding and open night at the Mt Canopus Optical Astronomy Observatory on thenight of the 16th of October and has invited VK7 Hams along.

They will even have images from the 1 metre optical telescope beingdisplayed along with many other types of telescopes looking at stars, planets andall sorts of astronomical features.

Contact if you think you may attend, to, VK7TW@wia.org.au0439 016 622.

www.groterebermuseum.com.au(Justin, VK7TW)

ACMA NEWS

New UHF Citizen Band radio equipment standard

The ACMA is seeking public comment on a draft UHF Citizen Band (CB)equipment performance standard Radiocommunications Standard 2010. It is intendedthat the existing standard will be revoked and replaced with the proposedstandardon 1 January 2011.

>From April 2008 to April 2010, the ACMA reviewed the arrangements forthe radiofrequency spectrum in the 400 MHz band, which incorporates the UHF CB band. As a result of the review the ACMA decided to restructure the UHF CBband into eighty 12.5 kHz wide channels from the existing forty 25 kHz widechannels.

The proposed standard provides performance limits and test methods for12.5 kHz channel operation in the UHF CB band, which will transition to 12.5 kHzchannel operation over the period 1 January 2011 to 1 January 2016.

To assist with the transition to 12.5 kHz channelling the new standardis proposed to provide grandfathering arrangements for current 25 kHzchannelequipment.

Submissions should be provided by close of business on 12 October 2010.

For a copy of the revised standard and information about making asubmission take a look at the link on the email and internet editions of thisbroadcast.

http://acma.gov.au/WEB/STANDARD/pc=PC_312273

(Sourced to vk7news from the ACMA Website)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIOwww.hamcollege.com.au

The C.C.A.R.C. would like congratulate Adam Brown on passing hisfoundation licence exam at Forth in VK7 Sunday last week. He has applied to get the callsign VK7FAWB and we look forward to hearing Adam when he receiveshis new callsign. If you hear Adam then please make him welcome to the bands.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

ARRL INTRODUCES FIRST CHALLENGE COIN

To help commemorate the 75th anniversary of the Amateur Radio Emergency Service, or ARES the ARRL has introduced an anniversary Challenge Coin. This die-struck, 1.5 inch brass coin depicts the ARES 75th anniversary logo in gold with red, white and blue colour fill, while the reverse shows the ARRL diamond logo against a hemisphere of the world.

The ARRL's Emergency Preparedness and Response Manager is Mike Corey, W5MPC. He says that the Challenge Coin honours the service of ARES volunteers and all amateur radio operators who respond to the call of public service. Corey adds that the ARRL hopes that ARES volunteers will enjoy the honour of having the first Challenge Coin issued by the ARRL.

More about the Challenge Coin is on-line at tinyurl.com/2bmbr4y

HH2JR receives Golden Antenna Award

Jean-Robert Gaillard, HH2JR, has been presented with the Golden Antennaaward for his work in the aftermath of the Haiti earthquake.

He was presented with his award by Christel Somberg, Deputy Mayor of Bad Bentheim, for his efforts as the "voice of Haiti".. When in January2010 an earthquake destroyed large parts of his homeland Haiti and claimed manylives HH2JR used his amateur radio station to tell the world about thedisaster.

The town of Bad Bentheim in Germany makes an award every year to theamateur or amateur group who has made exceptional effort following accidents ornaturaldisasters (www.dnat.de/)

The RSGB is delighted to announce that the ARRL will be attending their National Hamfest at the Newark and Nottingham Show Ground on 1 and 2October.

This is the first time that the ARRL have made the trip to a UK eventfor manyyears.

You can find more information on their website
www.nationalhamfest.org.uk

WSJT BETA VER 9.0 NOW AVAILABLE

A beta release of WSJT 9.0 is available for free download on the WSJT Home Page. The new version by author Joe Taylor, K1JT, has more than a half dozennew or improved features that include enhanced performance for FSK441,calculation of EME Doppler spread caused by lunar librations and simplification and clarification of the user interface.

K1JT asks that after gaining some experience with the beta release ofWSJT 9.0, please share your views and opinions about it. Of course, bug reportsare alsowelcome

More details on this new version can be found in the on-line
WSJT 9.0 Supplement to User's Guide.tinyurl.com/wsjt9

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

WICEN Tasmania (South)

Radio saves WICEN Operator from possible fatality and an Amateur'stoolkitcame to the rescue.

An incident a few weeks back, at a horse endurance ride, clearlyhighlighted how Amateur Radio can assist in desperate situations.

It's thought that children playing with firebrands, sticks poked into anopen fire until they burn, then running around with them, spooked two horsesheld in temporary pens. The horses crashed through the fencing and spookedmore horses until about fifteen were galloping through the camp site andplaces beyond, in some cases dragging their rugs and other tackle behind them.

The last of the runaways was recovered at two in the morning fifteenkilometresaway.

Gary VK7JGD had his tent pitched between his vehicle and a fence. One ofthe runaways galloped through the narrow gap between the tent and the fenceplacing a flashing hoof on the tent right where Garry's pillow was, and headwould have been had he not been seated in his vehicle on a late HF listeningwatch.

A second horse tried to go through the same gap but became entrappedwith two hooves through one square of the heavy fence mesh and lay on its sidethrashing about only a centimetre from Garry's now collapsed tent.

Fortunately, Roger VK7ARN had his side cutters to hand and was able totest the German made cutters by cutting through the heavy gauge fence wiresand releasing the frantic horse, which galloped off into the night.

WICEN Tasmania (South) will be conducting a risk minimisation study to safeguard members from any future horse stampedes.

(Roger VK7ARN, WICEN Secretary)

SPECIAL INTEREST GROUPS - VHF AND ABOVERecords News

New VK Microwave Records, 24GHz and 47GHz VK records, had been recentlyset.

Doug Friend VK4OE and Wayne Shaw VK4WS have set a new VK4 state recordfor the 24 GHz band (170.1 km, 3 Sept 2010).

Dan Joyce VK2GG and Peter Hopkins VK2YGM have extended their 47 GHz VK2state record to 58.1 km (31 August 2010).

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 26th September 2010

WAI Activity Day

Today the 26th of September IRTS are going relaunch theWorked All Ireland Award with an Activity Day. IRTSwant to encourage operators with mobile and portablefacilities to activate squares and everybody is askedto work out their WAI square to boost activity.

The W.A.I. awards are open to all amateurs and shortwave listeners throughout, the world, who wish toparticipate. Membership of any specific organisation isnot pre-requisite.

The aim of the awards scheme is to expand thegeographical knowledge of Ireland and its offshoreislands.

1) To encourage activity in general and promote mobile and portable expedition activity on both LF and VHF bands.

2) To encourage amateurs and Shortwave Listeners to improve their operating skills by participating in or running nets.

The worked all Ireland awards were inspired by the WABawards scheme devised by the late John Morris G3ABG andare based on extensive work carried out by David JonesGI3KVD and the late Paddy McGill GM3MTH.

Tom Rea, EI2GP, and Steve Wright, EI5DD, took theoriginal work, checked the areas, made additions andcompiled the book to its present day format which isnow printed and distributed by the IRTS.

The Galway VHF Group sponsors the Certificates andmanages the awards.

Stations calling into the radio news on the 26thare encouraged to give their WAI square as well asthe report.

More details on the Worked All Ireland program isavailable in the current issue of Echo Ireland

The following Clubs have indicated there participationby holding an activity day to celebrate the re launch

Limerick Radio Club will be operating today from WAIsquare R46 at Bunratty Castle Folk Park. The club willalso be QRV for CASHOTA reference EI008/C. We lookforward to working as many stations as

possible on SSB& CW, QSL is VIA EI4GXB.

Amateur Portable Group will be QRV from SlaneCastle CASHOTA Reference EI007/C & WAI Square N97QSL via EI8JB.

DAR Theory Classes & Live Morse Tuition

Anyone interested in attending Theory Classes atDundalk Amateur Radio Society Please contact TonyEI4DIB at ei4dib /at/ ei7dar.com or via text to 086 4066660

DAR has also begun live Morse tuition on Tuesdaynights commencing at 20:40 on 145.400 FM DAR havedecided to use this frequency as it is used by a lotof Hams and SWL's locally in the North East. If thetuition nights a success DAR may eventually QSY to theDundalk 2m repeater, giving National and Internationalcoverage with the Repeater linked for live streamingon the Internet.

The idea is to send some Morse at a slow and easy pacewith good gaps between words. It is hoped to help thoseof you who are just starting out and those that want tosharpen up. So please tune in to 145.400 with pen andpaper at the ready.

More info is available on the DAR website atwww.ei7dar.com

North Cork Radio Group-Thank You

North Cork Radio Group wishes to thank everyone whoattended the first annual rally on Sun last. The rallywas a great success and the support for the group shownwas very much appreciated.

Raffle winners were:

Steven O'Connell EI1275, Limerick Mich&#xFFFD;al O'Choimea&#xFFFD;nSWL, Cork City J Sheehan, Mount Collins, Limerick

Special thanks to all the traders, IRTS and GerMcNamara EI4GXB who made time for an informal studyclass for candidates sitting the next examination, alsothank you to Gary of South East Communications for theraffle prizes and extended thanks to Liam EI7GTB forhis hard work and planning for the event.

Good News on 500 kHz fro the USA

The Federal Communications Commission and the NationalTelecommunications and Information Administration(NTIA) -- the spectrum regulators for United Statesprivate sector and government users, respectively --have agreed to support a secondary MF allocation to theAmateur Radio Service at 461-469 kHz and 471-478 kHz atthe 2012 World Radiocommunication Conference (WRC-12),to be held in Geneva, Switzerland from January23-February 17, 2012. FCC and NTIA officials formallypresented the proposal at a meeting of the SecondPermanent Consultative Committee (PCC.II) of theInter-American Telecommunication Commission (CITEL),held August 30-September 3 in Fortaleza, Brazil.

Global Amateur Radio Emergency CommunicationsConference The 2010 Global Amateur Radio EmergencyCommunications Conference (GAREC) - supported by theARRL, the IARU and all three IARU Regions, is scheduledfor October 11-12 in Curacao.

With its theme of Learning through Practicing, thisyear's conference is an opportunity for emergencycommunicators to discuss recent events, discovertechnical solutions to problems and how to cooperatewith professional partners.

One of the highlights of the 2010 conference will be anactual EmComm exercise during the conference, exploringhow information sharing across borders can be improved.

Netherlands Antillies

ARRL Awards Committee Statement on Dissolution of theNetherlands Antillies: To clarify the administrativeprocess by which the anticipated changes to the twoexisting Netherlands Antilles DXCC entities will bemade, the ARRL Awards Committee has determined that at0400Z (12:00 AM local time in the islands) on 10October 2010, the two Netherland Antilles DXCC entitieswill be deleted.

Commencing at 0400Z (12:00 AM local time) on 10October, 2010, operation from the islands of Curacao,Bonaire, Saint Maarten, Saba, and St Eustatius willcount for a yet-to-be-determined number of new entitiesunder the DXCC List Criteria, and Political Entities,Rule 1 and/or Rule 2 Geographic Separation Entities.When the Awards Committee determines what Rule 1 orRule 2 actions apply, it will announce the finaldisposition of the entities on the DXCC list.

The DXCC desk will not accept confirmations for thesenew entities until after 1 January, 2011.

Rallies

The date for the 30th Lough Erne ARC Rally is set forSunday 17 April 2011

For further details on Rallies please seewww.irts.ie/rallies

History this Week

>>appears to have no flexibility to do this and there are no version
>>fields in the frame structure so it can't be made backwards compatible.
>>The design ought to have had this built in, but seems not to have
>>considered doing it.

The exact same stupidity has long crippled the advancement of the
AX.25 protocol, and the APRS protocol, and nearly every other *amateur*
designed protocol.

Worse, AX.25 was coded into law (in the USA, and elsewhere), thus
preventing any other air protocols from even having a chance because
they could not be used, or used unattended, such as a BBS.

D*Star apparently has the same problem - it's a lot like commercial P25
(or MotoTRBO), but it's a lot different too, and there's really no way
to fix that.

And how about all those surplus TETRA radios? Yah, the USA can't currently
use TETRA for commercial/industrial radio, but the rest of the world does
and there's nothing stopping USA hams from doing so.

I sure would like to see someone make an off-the-shelf digital voice ham
radio that made use of openly-available codecs, especially if they were
flashable.

AX.25's other remaining use, that of carrying tcp/ip, has also got a
real problem: the minimum IPv6 packet is bigger than the maximum AX.25
packet. Oops.
- Brian

Ohio/Penn DX Special Bulletin No. 978.1
The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 978.1
BID: $OPDX.978.1
September 27, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and Jim Linton/VK3PC for the following DX information.

For immediate release...
Countdown to The Spratlys - 27 September 2010

With 100 days to go before DX0DX hits the ham bands there is mounting interest in making contact with the DX Special Entity, The Spratlys, over three weeks 6-24 January 2011.

DXpedition Team Leader, Chris Dimitrijevic VK3FY - DU8/VK3FY said "With equipment starting to arrive in the Philippines including the Titanex V160E vertical the excitement is mounting.

"Currently 31 operators are confirmed while a number of positions are still available should any DX operator wish to join the team.

"The authority given to the DXpedition permits a maximum of 30 operators on the island at the same time. With the DXpeditioners assigned to three separate groups on the island for different durations, the total numbers can exceed 30."

While set to maximise the QSOs the DXpedition includes medical doctors who are also making a humanitarian contribution to the island.

This is acknowledged in a 'Certificate of prior approval and consent' from the Municipality of Kalayaan, dated 14 September setting out the duration and nature of the DX0DX operation.

It is signed by the Mayor Eugenio B. Bito-Onon Jr, who is very welcoming of the DXpedition and states on the Certificate "The Municipality of Kalayaan is also in favor of the humanitarian medical mission, to provide medical checkup of all the island's inhabitants."

In other news, ICOM has announced that DX0DX will have the new IC-9100 available for the VHF/UHF station. It will be fitted with a UX-9100 23cm

module. This transceiver is to be coupled to M2inc yagi's on 6m, 2m, 70cm & 23cm.

For the sought after 6m band the antenna is the 6m7 while the 2m radiator is the 2m9ssb. These two bands will supported by the OM2006 6m amplifier and 2m with a Commander 1kW amplifier.

Also there will be beverage complete systems supplied by HiZ Antennas, which Chris VK3FY - DU8/VK3FY said, "Should provide great ears for the low bands, which is an area DX0DX will be concentrating on."

An interesting development is that some of the DXpeditioners have been downsizing through weight loss, their destination has also gotten smaller in recent years under the ravages of sea erosion.

The team, and in particular the DX0DX Station Layout Coordinator David Collingham K3LP, is awaiting the results of a new photographic high-tide survey of the latest beach conditions where the various operating camps are to be relocated.

Chris VK3FY - DU8/VK3FY said a dozen operators are tasked as an advance crew with setting up four camps on the island to enable DX0DX to have a big presence on the bands.

The CW camp is at the northern edge of the island while SSB operating will be in the south, with the other two being dedicated for RTTY/Digital and VHF/UHF.

The DX0DX.Net website online survey, after 4,600 votes, currently has 160m as the most desired band for this top forty wanted DX entity. A TITANEX V160E vertical with a minimum of 32 radials will be erected for that band right on the beach. The intended frequencies are 1824 (CW) and 1840 (SSB).

The 80m band is also highly sought and CW (3504) and SSB (3790) signals on that band will radiated from two independent 4-square antenna arrays.

The other HF bands, including the WARC '79 allocations, are fairly even in the online survey. The 6m band has a relatively strong demand and a 7-element beam is to be used for contacts on the magic band.

In relation to the preferred modes, the survey has CW remaining in the highest demand. This is of no surprise to the operators assigned to the CW camp.

With 1,400 votes cast so far, SSB and RTTY a steady in second and third place respectively, with PSK31 attracting 7% of the votes which although low will still yield thousands of contacts.

The recently announced addition of moon bounce to DX0DX also has the EME exponents thinking about the possibilities.

Funding support and individual contributions towards this major DXpedition continue to arrive and are gratefully acknowledged on the website.

Fortunately there were a couple of unused bits in the AX.25 header
that were used for AX.25 v2, DAMA, and Extended Sequence numbers.
But more flexibility would certainly have been welcome.

> AX.25's other remaining use, that of carrying tcp/ip, has also got a
> real problem: the minimum IPv6 packet is bigger than the maximum AX.25
> packet. Oops.

There is a segmentation protocol at AX.25 level (defined by Phil Karn
and used in NET/NOS) that allows the segmentation of a single IP datagram
over multiple AX.25 frames.

With a new PID it could be used for IPv6 over AX.25.

Of course, the headers of IPv4 are already considered big in the
amateur packet radio world. At the datarates typically used, one
wants to conserve on header size.

DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

DU - PHILIPPINES, OC-128
Hiro,DU1/JJ5GMJ, is working on Palawan (OC-128) since August and is
expected to stay there for half a year. He is active on 160m-6m and
wants to take part in several CW contests.
QSL cards should be sent direct to JJ5GMJ or via the JA bureau.
All QSO information will be uploaded to the LotW later.

HK - COLOMBIA
Lothar,DK8LRF, will sign HK3JCL on 20m/40m mainly during the evening
and night hours between early October and the end of November. He is
working with a TS-50 and a rhombic antenne (4x63m) from Restrepo/Meta
in the Cordillera Oriental (locator: FJ34FG).
QSLs via bureau to DK8LRF or direct (QRZ.com).
Echolink operation is possible via his station DM0ZHS-L in Isen,
node no. 249774, 144.962,5 MHz.

KG4 - GUANTANAMO BAY, NA-015
The "Virginia DX Century Club" members Tip,N4SIA (KG4AS),
Clyde,K4CQW (KG4QW), Stu,K4MIL (KG4SS), and Will,W4WV (KG4WV) will
be active in CW, SSB and RTTY on 160m-6m from Oct 5-19.
QSLs via homecalls.

LX - LUXEMBURG
Rene,PD2RKG, is going to travel through Belgium, Germany and Luxemburg
from Oct 2-10. He will sign ON/PD2RKG from Virton, DL/PD2RKG from
Reinsfeld and LX/PD2RKG from Hosingen using a Yaesu FT-897 and IC-7200
on 10m, 20m and 40m. If you work him from all three countries you can
send him an e-mail to receive a special award. All other QSLs will be
sent via bureau but direct QSLs may be requested via e-mail.

VP8/A - ANTARCTICA, AN-016
Mike,RW1AI (ex-UA1AFM), momentarily active as R1ANP from the Russian
Antarctic base Progress, will be guest OP at the Chinese Zhongshan Base

signing R1ANP/A in October and November. Mike is working with 100 watts
and a vertical. Photos of this station can be found at:
http://www.french-polar-team.fr/BY_Chinese_Stations_Antarctica.php

VP8/SO - SOUTH ORKNEY ISLANDS, AN-008
Mehdi,F5PFP, writes that Diego,LU1ZA, is working on the "Orcadas Base"
on Laurie Island (AN-008, WAP ARG-15) which belongs to the South Orkney
Islands. Diego is running 100 watts and wants to be QRV on saturdays
and sundays between 1800 and 2300 UTC. However, F5PFP will organize
a list operation for him. Mehdi is offering the special chance for
everyone who still needs the South Orkneys as a new country to send him
an e-mail (f5pfp@orange.fr). These OMs will get a special frequency
where they can work Diego shortly before the list operation.
Yet it is not known how long Diego will stay on Laurie Island.
QSLs for LU1ZA via LU4DXU.

YA - AFGHANISTAN
John Critz,KD5NOI, and Terence Lowery,K5TLL, will be in Aghanistan
between October 2010 and May 2011. John will sign T6JC and Terence will
be T6TL. He will use an IC706 and works mostly in SSB and digital modes
on 40m, 20m, 17m, 15m, 12m and 10m. Furthermore he want to test also a
folded dipole for 80m.
QSLs for T6JC via KD5NOI, QSLs for T6TL via N4FF also via LoTW or eQSL.

Z2 - ZIMBABWE
Bob,Z2/AC7GP, is expected to show up from Sep 30 and Nov 1 when he is
visiting his son in Harare. Activities will take place in SSB, RTTY
and PSK31 with 100 watts and dipoles mainly from monday to friday.
He also plans to take part in the CQWW DX SSB Contest.
QSLs via his homecall.

4O - MONTENEGRO
Becici is the QTH of Ark,UA4CC, until Oct 2. He is working as 4O7CC
in CW, SSB and RTTY on 40m-10m. QSL via homecall.

5H - TANZANIA
5H9PD is the call of Pat,W8FV, who will stay in Mwanza from Oct 2-30.
Pat is working in CW and some PSK31 mostly on 40m-10m. QSL via W8FV.

9M6 - EAST MALAYSIA, OC-133
John,9M6XRO/p, Steve,9M6DXX/p, and Gordon,9M6/G3USR, are going to hit
the airwaves from Labuan Island (OC-133) from Oct 5-8. They will work
in CW, SSB and RTTY on 160m-10m using two stations with amplifiers,
a Hexbeam, verticals and an Inverted-L for 160m.
QSLs for 9M6XRO/p and 9M6DXX/p via M0URX, 9M6/G3USR via his homecall.

CYPRUS, SPECIAL EVENT STATIONS
All HAMs on Cyprus (AS-004) may use the prefix 5B50 from Oct 1-31 to
celebrate the 50th anniversary of the Republic of Cyprus.

CZECH REPUBLIC, SPECIAL EVENT STATION
The special event station OL61IAC is working in SSB, CW, PSK31 and RTTY
on HF from the 61st International Astronautical Congress in Prague

between Sep 27 and Oct 10.
QSL via OK1TIR, via LoTW or eQSL, but all QSLs will be sent via bureau
automatically as well.

PUERTO RICO, SPECIAL EVENT STATION
K4P is the callsign of Esther,WP4NWP, in CW and SSB on 80m-10m during
the festivities of "Patriot's Day" in Puerto Rico (NA-099) till Sep 30.

WFF ACTIVITIES: Fred,IK7JWX, announces operations as IR7WFF from several
national parks in the provinces Lecce (LE), Brindisi (BR), Taranto (TA)
and Bari (BA) between Oct 1 and Dec 31. All activated national parks
are counting for the "World Flora Fauna" award. QSLs via IK7JWX.

Fred,PA0FAW, will activate the Hoge Veluwe National Park (FF-PA-005)
as PC75HV from Oct 1-28. Activities will take place mostly in CW and
digital modes but also in SSB. QSL via PA0FAW, bureau, direct or eQSL.

DXCC: In our next issue we will inform you about several upcoming activities
from the Netherland Antilles. Many DXpeditions are at the ready to
activate future DXCC entities. The islands will be granted a new
autonomy status and thus the Netherland Antilles as we know them will
cease to exist on Oct 10, 2010. St Maarten and Curacao will become
separate countries within the Kingdom of the Netherlands, while Saba,
Bonaire and St Eustatius will become special Dutch municipalities.
The only thing we know for sure ist that the two entities PJ2/4/9 and
PJ5-8 will be deleted from the DXCC entity list on Oct 10, 0400 UTC
(which is 1200am local time on the Antilles). The ARRL Awards Committee
has to determine whether rule 1 (political entity) or rule 2 (geogra-
phical separation) apply to the new entities.
St. Maarten and Curacao most likely become a new DXCC entity because
they will get the same autonomy like Aruba got 30 almost years ago.
Saba, St. Eustatius and Bonaire will become special political entities
which are situated far enough from the mother country to count as
separate DXCCs. We will see if the distance between St. Eustatius
respectively Saba and Bonaire is big enough for Bonaire to count as
a separate DXCC as well. Most people assume this is more than 800 km.
The DXCC desk will not accept confirmations for the new entities until
after Jan 1, 2011. At least then we will know how many DXCC entities
are formed by Curacao, Bonaire, Sint Maarten, Saba and St. Eustatius.
However, until then: "Work first, worry later" (WFWL).

QSL cards of A52J (Bhutan, 2010), ZD9HGW (Tristan da Cunha, 1999) and
ZL7/N7OU (Chatham Island, 2009) are accepted for DXCC credit now.

SILENT KEY: Manfred,DF1IK/AB4FT, passed away, on Sep 22, aged 60. He has
worked for the Telecom in Saudi Arabia for decades and was very active
as 7Z1AB and later as HZ1IK from Dec 2004 until May 2008.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the

VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 2: DARC Hell Contest 80m
Oct 2: European Sprint Contest
Oct 2/3: Oceania DX Contest
Oct 3: ON Contest 80m
Oct 3: Deutscher Telegrafie Contest (DTC)
Oct 3: RSGB 21/28 MHz Contest
Oct 3: DARC Hell Contest 40m

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-016, 9A, Dalmatia South Group: Ruda,OK1HWS, Jirka,OK1IEC, and Honza,OK1JK
are signing 9A/homecall from Lastovo Island (ARLHS CRO-148/IOCA CI-051)
between Sep 26 and Oct 3. QSLs via homecalls (direct/bureau).

EU-045, I*0, Lazio Region Group: Some members of the ARI Section Cinisello
Balsamo (IQ2CJ) will be active as IB0/IZ2ACD from the islands
Ponza (IIA LT-002) and Zannone (IIA LT-012) from Sep 25 until Oct 2.
QSL direct via IZ2ACD (QRZ.com).

NA-066, W, San Clemente Island: Tom,AB6Z/p, will be QRV mostly on 20m and
40m in CW and some SSB from Oct 1-28. QSL via K5OAZ.

SA-046, PY7, Pernambuco State Group: PY7XC plans an activity as PY7XC/p
from Itamaraca Island (DIB PE-01) between Sep 26 and Oct 1.
QSL via homecall (see QRZ.com).

Lighthouse activities (WLOTA/ARLHS/ILLW)

AB6Z/p LH 2332 San Clemente Oct 1-30
IB0/IZ2ACD LH 1395 Ponza Sep 25-Oct 2
IB0/IZ2ACD LH 1791 Zannone Sep 25-Oct 2

New postage rates in New Zealand

The postage in New Zealand will be increased on Oct 1. An international
standard letter costs around 1.40 US$ and airmail costs 1.76 US$. In any
case you should enclose 2 US$ as return postage.

More information can be found at: http://www.nzpost.co.nz

Yes, some have tried using Van Jacobsen header prediction to cut down on the size of the actual transmitted header - a rather nice solution, but not really workable in a lossy datagram world.

So far the best method seems to be (using a separate pid) an adaptation of the SLIP with compression and header prediction over a connected-mode (i.e, reliable stream). This adds packet framing and reduces the overhead a bit, and at 9600 bps or faster, is actually slightly faster than a carrier pigeon. It also places the burden of retries on the air link where it belongs, rather than end-to-end, which is clearly the wrong place to do it.

A number of F-S-U folks have been doing some very interesting work in real high-speed packet (230 kb/s or faster, some multi-Mb/s), and such links would easily support digital voice without much need for super-bandwidth-conserving codecs.

GSM and similar codecs are now easily available in software implementations; these work quite well at an air rate of 9600 or sometimes less. Some are free of significant encumbrances that would hinder widespread usage.

In the land mobile radio regime, the ultimate goal is to reduce the consumed bandwidth so as to stack more customers in the same band. Hams have no such need; if anything we have (shhh!) more bandwidth than we need on the VHF and up bands, so using extremely narrowband codecs just isn't something we need to do.
- Brian

878. David Zavadil, KE0ZF, Honored by National Weather Service

Newsgroup: rec.radio.amateur.misc
Date: 2010-09-28 17:14:21 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20100928140811.AA89720406@bmail.arrl.org>
Source record: 5297
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,oma.general,nebr.misc,rec.radio.info

Dave Theophilus, WØNRW, informs me that David Zavadil, KEØZF, is being honored by the National Weather Service for 22 years of outstanding service to the volunteer weather observer program. He will be receiving the John Campanius Hom Award. Only 26 such awards are being presented this year and it is the NWS's second-most prestigious award.

Here is the press release:

Recognizing 22 years of dedication, NOAA’s National Weather Service has named Crofton, Neb., resident David Zavadil a 2010 recipient of the agency’s John Campanius Holm Award for outstanding service in the Cooperative Weather Observer program. The award is the agency’s second-most prestigious, and only 26 are presented this year to deserving cooperative weather observers from around the country.

Governor Dave Heineman and Meteorologist in Charge of the Omaha office, Jim Meyer will present the award during the Winter Weather Awareness proclamation signing ceremony at the state capitol on October 6th. Observations program manager Terry Landsvork of the Omaha office nominated Zavadil for the award.

Zavadil began service at the Crofton observing site Aug. 11, 1988, reporting daily temperature and precipitation data, including snowfall, snow depth and water equivalent to the forecast office. He also provides wind reports and daily soil temperature data and is an amateur radio operator. Zavadil’s reports have provided important data to NOAA forecasters and hydrologists and climate scientists. Over the years, he has provided more than 8,000 daily reports to the National Weather Service.

The first extensive network of cooperative stations was set up in the 1890s as a result of an 1890 act of Congress that established the U.S. Weather Bureau. Many of the stations have even longer histories. John Campanius Holm’s weather records, taken without benefit of instruments in 1644 and 1645, are the earliest known recorded observations in the United States.

Congratulations David!

73, Art KØAIZ

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

September 29, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Radio Dreamin' - California QSO Party
- An Evening Out With the VHF Fall Sprints
- CQ WW Changes for 2010
- In Our Dreams
- Free Climbing Fallout
- CW NA Sprint Results
- Sporadic E Exposed!
- Get Primed, Geeks!
- About Five Years Before You Did

NEW HF OPERATORS - THINGS TO DO

This weekend's California QSO Party is the biggest of the state
contests - with terrific participation, world-wide. Check out the list
of prizes for domestic winners and have at it! This is one contest for
which super-high antennas aren't necessary and may even be a drawback,
depending on your location.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

In the last issue's item about Chinese license classes, the first
prefix in the 3rd-Class list should be BG. (Thanks, Steve W3HF)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

October 2-3

- PSK Rumble - The Fall Classic
- EPC Russia DX Contest--Digital
- Oceania DX Phone Contest
```

- EU Autumn Sprint--Phone
- California QSO Party
- RSGB 21/28 MHz Contest
- ARS Spartan Sprint--CW (Oct 5)
- Fall VHF Sprints--432 MHz (Oct 6)
- NS Weekly Sprint--CW (Oct 8)
- DX/NA YLRL Anniversary Party--CW (Oct 8)

October 9-10

- ARRL EME Contest
- Makrothen RTTY Contest
- Oceania DX CW Contest
- Scandinavian Activity Contest--Phone
- Worked All Britain HF Contest--Phone
- EU Autumn Sprint--CW
- Pennsylvania QSO Party
- Arizona QSO Party
- FISTS Fall Sprint--CW
- North American RTTY Sprint
- Straight Key Weekend Sprint
- 10-10 Sprint
- SKCC Monthly Weekend Sprint--CW (Oct 11)
- CWops Mini-CWT Test (Oct 13)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

CQ World Wide DX Contest
<http://cq-amateur-radio.com/cq_contests/cq_ww_dx_contest/index_cq_ww_dx_contest.html>
manager, Bob K3EST, notes some changes for the 2010 contests. "The CQ
WW Contest Committee will be expanding the award system for the
Assisted category...All low power and QRP Assisted entrants will be
specifically listed and eligible for awards as is already the case for
unassisted entries. A band-by-band breakdown for All-band Assisted
World, Europe and USA will be provided within the 2010 results. Lastly,
we will increase the number of plaques available to Assisted entrants
to include Europe All-band and World Single-band." Bob also reminds
Multi-Single entrants, "to declare, for each QSO in your log, which
transmitter makes the QSO: run or multiplier station." As noted in the
previous issue, log submission deadlines have been moved, as well: SSB
- Nov 21 and CW - Dec 15.

A new email reflector <http://lists.wrtc2014.org/pipermail/wrtc2014/>
has been established to facilitate communication among everyone
interested in WRTC2014 <http://www.wrtc2014.org/>. (Thanks, Doug K1DG)

QSOs made with Northern California Contest Club members in the
California QSO Party do count towards the special NCCC 40th Anniversary
award <http://www.nccc.cc/40th.html>, even though they will not be
signing /40 during the contest. (Thanks, Bob N6TV)

The 2011 W0 DX Convention <http://www.w0dxcc.com/> will be held just west of Kansas City, Kansas on July 23rd, 2011. The Convention is hosted by the Kansas City DX Club and co-sponsored by the Missouri DX/Contest Club and the Lebanon ARC. Numerous vendors will be there along with a star-studded lineup of speakers and the world-famous KCDXC CW Pile-up Contest. (Thanks, Ron K4SX)

In the recent Colorado wildfires, one of the victims who lost a home was well-known contester and station builder, John W0UN. (The fire was determined to be one of several arsons <http://www.thedenverchannel.com/news/25150509/detail.html>, set nearby and which burned about 1000 acres before it was controlled.) John expresses his thanks to all those that offered help and sympathy. He would also like to note that although he used Phillystran guy cable on his towers, the lower sections were steel and thus flame- and vandal resistant.

The "Hams With Class" column by Carole WB2MGP in the October 2010 issue of World Radio Online <http://www.worldradiomagazine.com/> leads with a nice feature on Contest University <http://contestuniversity.com/> that includes a photo of K0DXC and K3LR. Good stuff about the things that get young hams going! Another feather in the K3LR cap is Tim's receiving the Barry Goldwater Award from <http://www.arrl.org/news/tim-duffy-k3lr-to-receive-rca-s-goldwater-award> the Radio Club of America. The award is given for long service to the public through Amateur Radio.

NASA is developing a super-sized antenna launcher <http://www.networkworld.com/community/node/66243>! Well, it could be an antenna launcher. The more likely use is to accelerate spacecraft down a horizontal track, hitting Mach 10 on the way to orbit...and beyond! I'll bet it would clear the trees in my back yard easily.

The birthplace of the laser printer and the graphical user interface for computers that presaged the Macintosh, Xerox's Palo Alto Research Center (PARC) <http://www.computerworld.com/s/article/9186198/Xerox_PARC_turns_40_Marking_four_decades_of_tech_innovations> is celebrating its 40th anniversary this year. One of the nation's premier research facilities, PARC is responsible for many innovations <http://www.computerworld.com/s/article/9186338/Timeline_PARC_milestones> that we now take for granted as standard features.

EU Sprint Manager, Dave G4BUO reports problems with the European Sprint Web site, "so we have set up a new site at www.eu-sprint.com <http://www.eu-sprint.com/>. At present this just contains the rules but we are working to migrate the full site if we cannot get the old site back."

The Canadian Space Agency has just set up a camera in Yellowknife to broadcast the aurora borealis <http://www.asc-csa.gc.ca/eng/astronomy/auroramax/default.asp> to the general public. It's part of a 5-year educational initiative to raise

awareness of space weather and the sun's influence on Earth. (Thanks, Jerry VE6CPP)

Web Site of the Week - In the "We Can Dream, Can't We?" department, this story <http://www.rwonline.com/article/9882> recounts the lure of technology too strong for a contester to resist. Tom N6BT has described a similar experience of hooking up a radio to a shortwave broadcasting dipole array with more than 20 dBi of gain. Can you hear me now?

WORD TO THE WISE

Duty factor - the decimal equivalent of duty cycle which is given in percent. For example, a duty factor of 0.5 is the same as a duty cycle of 50%. Otherwise the two terms are completely equivalent in meaning.

==> SIGHTS AND SOUNDS

The video of a tower worker "free climbing" at heights over 1700 feet has been making the rounds despite the best efforts of its originator to expunge it. (Free-climbing is a violation of safety and workplace rules.) Nevertheless, hams are agog over it and if there is one benefit, the ensuing discussion reinforces the attitude of "safety first" and emphasizes the need for proper climbing gear, such as a fall-arrest harness and being attached to the tower 100% of the time.

While we're on the subject of climbing about, Chris KF7P posted a link to videos <http://www.youtube.com/watch?v=3R3-YwDZrzg> about Fred Dibnah the famous British chimney climber and steeplejack. For another "first-person climber" video, here's one from John K0IO about erecting a 1500-foot tower <http://www.wirelessestimator.com/VIDEOS/Tower_Construction.wmv> through the eyes of a rigger.

Sep 22nd turned out to be an exciting day for our nearest star, featuring a solar flare, coronal mass ejection, and magnetic filaments lifting off into space. Sounds like spring break in Florida! All of these events were captured by NASA spacecraft and can be reviewed on the Spaceweather Web site <http://spaceweather.com/>.

The Akihabara district of Tokyo is legendary for its electronics emporia all stacked together like so many surface-mount resistors in a muffin tin. Tokyo Hackerspace has published a video guide <http://www.tokyohackerspace.org/akihabara/> to the district - check out the Rocket Radio video to browse the district's largest ham radio store.

==> RESULTS AND RECORDS

September's final North American CW Sprint scores <http://www.ncjweb.com/sprintcwprelim.php> have been published. Congratulations to Trey, N5KO on his second consecutive victory. Steve, N9CK racked up another Low Power win and KA9FOX held off K1DG (operating at N1LI) in the QRP category. The Ad Hoc team won the team

competition, followed by the NCCC #1 team. (Thanks, CW Sprint Manager, Tree N6TR)

The US team brought home three medals in the recent ARDF (Amateur Radio Direction-Finding) Championships <http://www.arrl.org/news/ardf-update-three-medals-for-team-usa-at-the-2010-ardf-world-championships> held recently in Croatia. Very popular outside the US (and gaining some attention here), ARDF has a sizeable youth contingent and is a great entry activity to ham radio.

The results of the 2010 SP DX Contest <http://www.spdxcontest.info/en/index.php> have been posted online and were announced at the annual SP DX Club Convention. (Thanks, Romeo S52RU)

OPERATING TIP

Make it hard to mis-connect things, especially during the contest. Heed this example, overheard during the 2010 EME conference <http://www.ntms.org/eme> and reprinted in the Packrats <http://www.packratvhf.com/> "Cheese Bits" newsletter: ""He placed the wrong filter on the 432 amp and in short time destroyed the amp, proving that my filter worked fine."

==> TECHNICAL TOPICS AND INFORMATION

Sporadic E (Es) propagation was a major feature of the summer VHF contests this year. With more hams active on 6 meters, we are learning more and more about Es propagation patterns. Dean N6BV recommends this paper <http://www.amfmdx.net/propagation/Es.html> on the subject as good reading. Note that sporadic E on 6 meters often means 10 meters is open, as well - hint, hint!

And with each passing issue, more prognostication on the upcoming (hopefully) solar cycle 24. This article <http://news.sciencemag.org/sciencenow/2010/09/say-goodbye-to-sunspots.html> is in the Depressing-Above-15-MHz column. I know the Top Band operators are secretly rejoicing over all of this, though! (Thanks, Roger W7VV)

A giant squid? A contorted contrail? How about the amazing mobile antenna of K6ITA spotted in the parking lot of the TAPR Digital Communications Conference? (Photo by N0AX)

Doug K1DG reports and others confirm that running antenna wire over small-diameter pulleys (1" or so) causes even stranded wires to break and may accelerate corrosion (which leads to breaks). He reports higher reliability using large-diameter (3-4") plastic pulley wheels and homemade brackets.

Steve KD1JV has some advice for parts/radios/junk hoarders not unlike himself, "Don't move! It is truly amazing at how much "stuff" we can accumulate and how difficult it is to part with much of it if you do

have to move." I don't know any such individuals in ham radio, do you?

A single Google Earth file presents the entirety of the FCC broadcast license database <http://www.fccinfo.com/fccinfo_google_earth.php> - an interesting view of towers you may encounter. (Thanks, Daniel K7DGL)

The current and previous issues of QEX feature a two-part tutorial for the QuickSmith <http://www.nathaniyer.com/> software that uses the Smith Chart to work out transmission line problems. (Thanks, Nick WA5BDU)

In a multi-rivet tubing joint, place the heads of all three rivets in the holes before beginning to pop the rivets. If popping a rivet causes the tubing to shift, getting the final rivets seated properly could be difficult.

Technical Web Site of the Week - Learn the technical details of digital video in Xiph's tutorial series, "Digital Video Primer For Geeks <http://xiph.org/video/index.shtml.en>". The series begins with a basic explanation of digital audio and video fundamentals. With so much digital technology involved in contesting these days, particularly for remote station operation, this is pretty useful stuff.

==> CONVERSATION

About Five Years Before You Did

It's a common question to a more experienced ham, "What was the best time to get into ham radio?" Why is it that the answer always seems to be, "Oh, about five years before you did," or the equivalent? No matter what, there is always somebody who seems to have been around when the DXing was easier, the pileups more mannered, the bands open longer, and the homebrewing brew-ier. It never fails. (Just remember, young folks, they got the same jazz from their elders when they got started!)

Sometimes I think maybe we should have all just thrown our radios away after 1959 (or 1947 or 1932 or 1927 or...) since nothing could ever be that good again. After all, 10 meters was open 24 hours a day and you only had to sneeze into the microphone to fill your log with DX while running only 5 watts of AM from a 6L6 rig built from a kitchen bread pan and connected to a dipole in a tree. Sigh. (For the record, I got licensed in 1972.)

Who says there weren't any VE8's on the in Old Days? Looks like quite a few to me! (Thanks, Danny K7SS for the photo)

Pssst - here's a secret - every year is a golden year! I just got back from a couple of digital communications conferences and let me tell you that digital is exploding in any manner you care to evaluate; modulation, protocol, activity. For example, W0YK just checked in with a claimed score of 5024 QSOs from P49X in last weekend's CQ WW RTTY contest. A couple of years ago, the 5000-QSO level was considered fantasy for a single-op station.

Golden ages are not incremental - they stem from breakthroughs or sudden changes in the environment. The Internet and Solar Cycle 19 have a lot in common. We are seeing a dramatic convergence of technologies that are enabling an explosion of digital modes, fertilizing innovation and experimentation. The latest version of F6CTE's free multi-mode software, MultiPSK <http://f6cte.free.fr/index_anglais.htm>, has 87 different modes to choose from. That's a far cry from when I got into ham radio and it was pretty much RTTY, SSTV, and Fax warbling away around various calling frequencies.

A presentation by Bruce K6BP at this past weekend's TAPR Digital Communications Conference showcased the new Codec2 Open Source digital voice codec <http://www.rowetel.com/blog/?page_id=452> for low-bandwidth channels, such as HF ham radio. The primary developer is David Rowe, VK5DGR and his work is a significant advance in the communications state of the art, one aspect of Part 97.1's Basis and Purpose for Amateur Radio. While digital voice is not yet a contesting mode, that day will surely come.

So look around - somebody's having a golden age right now! Have you a computer with a sound card and a voice rig? You're in! Care to join the fun?

73, Ward N0AX

==> CONTESTS

29 September though 12 October

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Fall QRP Homebrewer Sprint--CW, from Sep 28, 0000Z to Sep 28, 0400Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 30 days. Rules <http://www.njqrp.org/>

PSK Rumble - The Fall Classic--Digital, from Oct 2, 0000Z to Oct 2, 2400Z. Bands (MHz): 1.8-28, 50. Exchange: Name and call area (see Web site). Logs due: Oct 31. Rules <http://www.n2ty.org/>

EPC Russia DX Contest--Digital, from Oct 2, 0400Z to Oct 3, 0359Z . Bands (MHz): 1.8-28. Exchange: EPC member nr or serial and grid square. Logs due: Sep 30. Rules <http://www.epc-ru.ru/>

Oceania DX Phone Contest--Phone, from Oct 2, 0800Z to Oct 3, 0800Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: Nov 8. Rules <http://www.oceaniadxcontest.com/>

EU Autumn Sprint--Phone, from Oct 2, 1600Z to Oct 2, 1959Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

California QSO Party--Phone,CW, from Oct 2, 1600Z to Oct 3, 2200Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial and state/prov/"DX" or CA county. Logs due: Oct 31. Rules <http://www.cqp.org/>

RSGB 21/28 MHz Contest--Phone,CW, from Oct 3, 0700Z to Oct 3, 1900Z. Bands (MHz): 21,28. Exchange: Serial and UK district. Logs due: Oct 19. Rules <http://www.rsgbcc.org/hf/rules/2009/r2128.shtml>

ARS Spartan Sprint--CW, from Oct 5, 0200Z to Oct 5, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

NS Weekly Sprint--CW, from Oct 8, 0230Z to Oct 8, 0300Z. Bands (MHz): 1.8-14. Frequencies: Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

DX/NA YLRL Anniversary Party--CW, from Oct 8, 1400Z to Oct 10, 0200Z. Bands (MHz): 1.8-28. Exchange: Serial, RST, and section/province/country. Logs due: 30 days. Rules <http://www.ylrl.org/>

Makrothen RTTY Contest--Digital, from Oct 9, 0000Z to Oct 10, 1600Z. Bands (MHz): 3.5-28. Frequencies: Multiple operating periods. Exchange: 4-char grid square. Logs due: 15 Nov. Rules <http://home.arcor.de/waldemar.kebsch>

Oceania DX CW Contest--CW, from Oct 9, 0800Z to Oct 10, 0800Z. Bands (MHz): 1.8-28. Exchange: RST and serial. Logs due: Nov 8. Rules <http://www.oceaniadxcontest.com/>

Scandinavian Activity Contest--Phone, from Oct 9, 1200Z to Oct 10, 1200Z. Bands (MHz): 3.5-28. Exchange: RS and serial. Logs due: Nov 9. Rules <http://www.sk3bg.se/contest/sacnsc.htm>

Worked All Britain HF Contest--Phone, from Oct 9, 1200Z to Oct 10, 1200Z. Bands (MHz): 14-28. Exchange: RS, serial, DXCC entity or WAB area. Logs due: Nov 1. Rules <http://www.worked-all-britain.co.uk/>

EU Autumn Sprint--CW, from Oct 9, 1600Z to Oct 9, 2000Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

Pennsylvania QSO Party--Phone,CW,Digital, from Oct 9, 1600Z to Oct 9, 0500Z and Oct 11, 1300Z to Oct 11, 2200Z. Bands (MHz): 1.8-28, 50,144, Frequencies: CW--40 kHz above band edge and 1.810; SSB--1.850, 3.825, 7.200, 14.280, 21.380, 28.480. Exchange: Serial and ARRL/RAC section. Logs due: Nov 15. Rules <http://www.nittany-arc.net/paqso.html>

Arizona QSO Party--Phone,CW,Digital, from Oct 9, 1600Z to Oct 10, 0600Z and Oct 10, 1400Z to Oct 10, 2359Z. Bands (MHz): 3.5-28, 50,144, Frequencies: Multiple operating periods - See Web site for frequencies. Exchange: RS(T) and AZ county or S/P/C. Logs due: Oct 31. Rules <http://www.azqsoparty.org/>

FISTS Fall Sprint--CW, from Oct 9, 1700Z to Oct 9, 2100Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, name, FISTS number or pwr. Logs due: 30 days. Rules <http://www.fists.org/>

North American RTTY Sprint--Digital, from Oct 10, 0000Z to Oct 10, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, QTH, name. Logs due: 7 days. Rules <http://www.ncjweb.com/>

Straight Key Weekend Sprint--CW, from Oct 10, 0000Z to Oct 10, 2359Z. Bands (MHz): 1.8-28, 50, Frequencies: Monthly on the second Sunday local time. Exchange: RST, QTH, name, member number.

Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

10-10 Sprint--Phone,CW,Digital, from Oct 10, 0001Z to Oct 10, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Oct 25. Rules <http://www.ten-ten.org/>

SKCC Monthly Weekend Sprint--CW, from Oct 11, 0000Z to Oct 11, 2359Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, SKCC nr or power. Rules <http://www.skccgroup.com/sprint/wes>

VHF+ CONTESTS

ARRL EME Contest--Phone,CW,Digital, from Oct 9, 0000Z to Oct 10, 2359Z. Bands (MHz): 50-1296. Exchange: Both call signs, signal report. Logs due: Nov 30. Rules <http://www.arrl.org/contests>

Fall VHF Sprint--Phone,CW,Digital, from Sep 28, 7 PM to Sep 28, 11 PM. Bands (MHz): 222. Exchange: 4-digit grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

Fall VHF Sprints--Phone,CW,Digital, from Oct 6, 7 PM to Oct 6, 11 PM. Bands (MHz): 432. Exchange: 6-char grid locator. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

PSK Rumble - The Fall Classic--Digital, from Oct 2, 0000Z to Oct 2, 2400Z. Bands (MHz): 1.8-28, 50. Exchange: Name and call area (see Web site). Logs due: Oct 31. Rules <http://www.n2ty.org/>

California QSO Party--Phone,CW, from Oct 2, 1600Z to Oct 3, 2200Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial and state/prov/"DX" or CA county. Logs due: Oct 31. Rules <http://www.cqp.org/>

Pennsylvania QSO Party--Phone,CW,Digital, from Oct 9, 1600Z to Oct 9, 0500Z and Oct 11, 1300Z to Oct 11, 2200Z. Bands (MHz): 1.8-28, 50,144, Frequencies: CW--40 kHz above band edge and 1.810; SSB--1.850, 3.825, 7.200, 14.280, 21.380, 28.480. Exchange: Serial and ARRL/RAC section. Logs due: Nov 15. Rules <http://www.nittany-arc.net/paqso.html>

Arizona QSO Party--Phone,CW,Digital, from Oct 9, 1600Z to Oct 10, 0600Z and Oct 10, 1400Z to Oct 10, 2359Z. Bands (MHz): 3.5-28, 50,144, Frequencies: Multiple operating periods - See Web site for frequencies. Exchange: RS(T) and AZ county or S/P/C. Logs due: Oct 31. Rules <http://www.azqsoparty.org/>

Straight Key Weekend Sprint--CW, from Oct 10, 0000Z to Oct 10, 2359Z.
Bands (MHz): 1.8-28, 50, Frequencies: Monthly on the second Sunday
local time. Exchange: RST, QTH, name, member number. Logs due: 5 days.
Rules <http://www.skccgroup.com/sprint/wes>

==> LOG DUE DATES

29 September though 12 October

September 29 - RSGB 80m Club Sprint, CW
<http://www.rsgbcc.org/hf/rules/2010/rsprint.shtml>

September 30 - AGCW Straight Key Party
<http://www.agcw.org/en/?Contests:Straight_Key_Party>

September 30 - Kansas QSO Party <http://www.ksqsoparty.org/rules/>

September 30 - Hawaii QSO Party

** VHF-DATABASE at MMMonVHF (http://www.mmmonvhf.de/dbase.php) **

Last call for your updates to the VHF-DATABASE at MMMonVHF. Bcse
of some personal work past weeks, the VHF-DATABASE (issue 2.70)
will be spread out mid of october 2010 these year! The NEW ISSUE
of our VHF-DATABASE will be spread to all DX-Cluster (and USER
which want it). So please be so kind and UPDATE IT NOW and
latetest 2010-10-03! LOGIN at MMMonVHF and follow the link to your
Account > http://www.mmmonvhf.de/usraccount.php than click on
"VHF-DATABASE Update" and update or set your info to the
VHF-DATABASE! SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** Fireball over New Mexico... **

Hi Chaps, The lightening conversation has been most interesting,
it's a pity that the paper "Characteristics of lightning echoes
observed with VHF ST radar", isn't available, seems one has to
pay for a copy! Did anyone see the footage of the "Fireball over
New Mexico" featured on Spaceweather.com this week, quite amazing
footage caught by a all Sky-Cam, something I'm hoping to establish
at our Dark Sky Site just north of Heathcote.

** PJ2T (FK52) Activity on HF and 6m **

Jeff K8ND and Bill W9VA, will be on a ham vacation to the Signal
Point contest station on the island of Curacao (SA-006, WLOTA
0942, WW Loc. FK52KG) on 8-18 October 2010. They will sign PJ2T,
and possibly PJ2/homecall. QRV on all HF bands, plus 6 metres.
QSL via home calls and LoTW. QSL PJ2T via N9AG and LoTW.
Note: The station (PJ2T) will be opened to amateurs participating
in the GAREC conference (11-12 October), as well as to any local
Curacao amateurs who wish to operate from Signal Point during the
post 10-10-10 week. The PJ2T callsign will be used beginning at
0400Z on 10 October 2010, when the Netherlands Antilles is
dissolved and Curacao becomes an autonomous country within the
Kingdom of the Netherlands (and likely a new DXCC Entity).
SOURCE: ICPO Bulletin (23-30 September 2010)

** DU - PHILIPPINES, OC-128 **

Hiro,DU1/JJ5GMJ, is working on Palawan (OC-128) since August and
is expected to stay there for half a year. He is active on 160m-6m
and wants to take part in several CW contests. QSL cards should be
sent direct to JJ5GMJ or via the JA bureau. All QSO information
will be uploaded to the LotW later. SOURCE: DXNL 1695

** Countdown to The Spratlys - 27 September 2010 **

With 100 days to go before DX0DX hits the ham bands there is
mounting interest in making contact with the DX Special Entity,
The Spratlys, over three weeks 6-24 January 2011.
... some V/UHF related infos: ...
In other news, ICOM has announced that DX0DX will have the new
IC-9100 available for the VHF/UHF station. It will be fitted with
a UX-9100 23cm module. This transceiver is to be coupled to M2inc
yagi's on 6m, 2m, 70cm & 23cm. For the sought after 6m band the
antenna is the 6m7 while the 2m radiator is the 2m9ssb. These two
bands will supported by the OM2006 6m amplifier and 2m with a
Commander 1kW amplifier. Read all details of the announcement
and more at: http://www.mmmonvhf.de/latest.php?id=3266
SOURCE: tnx to Jim Linton VK3PC Public Affairs DX0DX

** DEADLINE for your NEWS input to MMMonVHF**

Ken McPherson, VA6KM is appointed Alberta Section Training Coordinator
2010-09-28

I have been advised by National Training Coordinator Dave Drinnan,
VE9FK of the appointment of Ken McPherson VA6KM as STC for the Alberta
Section. Ken has been a Ham since 1993 but has had an interest in
radio since 1982. Ken has served in the Navy as a NCI-OP (Naval Combat
Information Operator) as well as the Armored Reserves in Ottawa. Ken's
background in training includes time as a Cadet Instructor, First Aid
Instructor and Scuba Instructor.

With this varied background, Ken hopes to help develop ARES in
collaboration with the Province of Alberta, RAC, Provincial ARES
groups, and all others that wish to help.

I know will all join me in wishing Ken the best in this. If I can
assist you in any way Ken, please let me know.

==> + AMATEUR RADIO TECHNOLOGY: SOFTWARE-DEFINED RADIO DOMINATES THE
2010 ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

The ARRL/TAPR Digital Communications Conference (DCC) was held
September 24-26 near Portland, Oregon. The ARRL/TAPR DCC is an
international forum for radio amateurs to meet, publish their work and
present new ideas and techniques. Presenters and attendees had the
opportunity to exchange ideas and learn about recent hardware and
software advances, theories, experimental results, and practical
applications. Click here
<http://www.arrl.org/news/sdr-dominates-the-2010-arrl-tapr-digital-communicat
ions-conference>
to read Ward Silver's, N0AX, take on the event.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 IN SATELLITE FINAL PREPARATION
```

Having successfully completed vibration testing this week, the ARISSat-1/RadioSkaf V satellite will soon be on its way to Russia for final preparation and launch to the International Space Station. In Russia, the Kursk experiment will be added and the satellite will undergo additional testing. A new Russian Orlan suit battery will be shipped to the ISS separately to be installed into the satellite. ARISSat-1 is scheduled to be sent to the ISS aboard Russian Progress vehicle 41P in January 2011 and deployed during EVA (extra-vehicular activity, commonly called a spacewalk) R-28 in February 2011. Read more here <http://www.arrl.org/news/arissat-1-in-satellite-final-preparation>.

==> + ARDF UPDATE: THREE MEDALS FOR TEAM USA AT THE 2010 ARDF WORLD CHAMPIONSHIPS

By ARRL ARDF Coordinator Joe Moell, K0OV

ARDF Team USA has just returned from Croatia, the site of this year's World Championships of Amateur Radio Direction Finding (ARDF). Three team members have new medals for their collections, the most medals ever earned in the World Championships by the USA. ARDF -- also called foxhunting and radio-orienteering -- requires map-and-compass proficiency, stamina and speed, as well as skill using direction-finding gear. It is done entirely on foot. Each day, the competitors set forth into a 1700 acre woods containing five "fox" transmitters in unknown locations. The foxes for each band are all on the same frequency and each one comes on the air for 60 seconds at a time in rotating sequence. Only men and women in the prime age category are required to look for all five; those in the other age/gender categories search for fewer, in accordance with International Amateur Radio Union rules. Read more here <http://www.arrl.org/news/ardf-update-three-medals-for-team-usa-at-the-2010-ardf-world-championships>.

==> + INTERNATIONAL SPOTLIGHT: INDIAN STATE TO USE AMATEUR RADIO TO ASSIST IN LOCAL ELECTIONS

In one of the remotest parts of India, there are virtually no communication sources -- no cell phone towers, no landlines, no Internet access. But in democracies, elections are the key, even in the most isolated parts of the world. The Indian state of Kerala -- located on the western side of India's southern coast near the tip of the subcontinent -- will be holding its local elections -- called panchayat -- in October. The tribal hamlet of Idamalakkudi is located in Idukki, one of Kerala's 14 districts. It is to this village where upwards of 1400 people will gather to cast their votes for their local leadership for the Idamalakkudi tribal Grama Panchayat. And as isolated as the village is, members of the Emergency Communication Society and Idukki Ham Radio Club will be on hand to assist. Read more here <http://www.arrl.org/news/indian-state-to-use-amateur-radio-to-assist-in-local-elections>.

==> + PUBLIC SERVICE: NOMINATIONS NOW BEING ACCEPTED FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

At its July 2009 meeting, the ARRL Board of Directors established the George Hart Distinguished Service Award to be given to an ARRL member whose service to the League's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System. Read more here <http://www.arrl.org/news/nominations-now-being-accepted-for-the-george-hart-distinguished-service-award>.

==> + SOLAR UPDATE

Tad "Magnificent strong Sun...so prodigally generous of pristine light <http://www.iowrock.demon.co.uk/clearspot/gascoyne.html>" Cook, K7RA, reports: Conditions were good over the past week, with the average daily sunspot numbers up more than 5 points to 45.3, and the average solar flux rising 1.5 points to 84.4. On Wednesday, September 29, the solar flux was 90.7. The last time it was nearly this high was August 7 at 90.5, and it last topped this value at 91.8 on March 13, 2010. Despite dire predictions from some for a Maunder Minimum <http://en.wikipedia.org/wiki/Maunder_Minimum> and no more sunspots, Solar Cycle 24 continues to progress. A coronal wind on September 24 provided the moderate geomagnetic activity for the week, with the planetary A index rising to 13. Look for more information on the ARRL Web site on Friday, October 1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by David Gascoyne's September Sun <http://www.iowrock.demon.co.uk/clearspot/gascoyne.html>.

==> ON THE WEB: HOW TO DELETE PAGES FROM THE "YOUR FAVORITES" FEATURE

In the past, we have discussed the "Your Favorites" feature <http://www.arrl.org/arrlletter%3Fissue%3D2010-08-26#toc02> -- a way to "bookmark" certain pages on the ARRL Web site -- and how to add your favorite pages to the "Your Favorites" drop-down menu. But what about when you want to delete these favorites? You may want to do this because you may have a duplicate Favorite listed or there's a page you no longer need to access quickly. You can delete any of your favorites in your Member Profile by following these simple steps:

- Click "Edit your profile," located just below the "Your Favorites" drop-down menu.
- Under the "Edit Info" tab, select the "Edit Favorites" section
- On the right hand side, you will see the "Remove" link next to each of your favorites. When you click on the "Remove" link, that page will then be deleted from the "Your Favorites" listing.

==> + ON THE AIR: JAPANESE AND CANADIAN AMATEURS CLAIM FIRST 2200 METER JA-VE QSO

Kunikazu Togashi, JA7NI, in Daisen, Akita, Japan, and Scott Tilley, VE7TIL, of Vancouver, British Columbia, completed a transpacific QSO on 2200 meters (137 kHz) on September 28. Tilley called this a first between Canada and Japan. The distance between CN89dk (VE7TIL) and QM09fl (JA7NI) is 7162 km. While not the DX record for 2200 meters, Tilley told the ARRL that the QSO comes in second to the distance achieved in 2004 by operators at the Wellington Amateur Radio Club Quartz Hill User Group, ZM2E, in New Zealand and Vladimir Burakov, UA0LE, in Vladivostok, Russia. Read more here <http://www.arrl.org/news/first-2200-meter-ve-ja-qso-claimed>.

==> THIS WEEK ON THE RADIO

This week:

- October 2 -- TARA PSK Rumble Contest; F9AA Cup (CW); EU Autumn Sprint (SSB)
- October 2-3 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; California QSO Party; EPC Russia DX Contest; Oceania DX Contest (SSB); International HELL-Contest
- October 3 -- F9AA Cup (SSB); UBA ON Contest (SSB); RSGB 21/28 MHz Contest; German Telegraphy Contest
- October 5 -- ARS Spartan Sprint
- October 6 -- 432 MHz Fall Sprint (local time)
- October 7 -- SARL 80 Meter QSO Party

Next week:

- October 8-10 -- YLRL DX/NA YL Anniversary Contest
- October 9 -- FISTS Fall Sprint; EU Autumn Sprint (CW)
- October 9-10 -- Arizona QSO Party; Pennsylvania QSO Party; CQ SA SSB Contest; Makrothen RTTY Contest; Oceania DX Contest (CW); Scandinavian Activity Contest (SSB); WAB HF Phone Contest
- October 10 -- SKCC Weekend Sprint; North American Sprint (RTTY); 10-10 International 10-10 Day Sprint; UBA ON Contest (CW)
- October 13 -- NAQCC Straight Key/Bug Sprint
- October 13-14 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> + SILENT KEY: FRANK CLEMENT, W6KPC (SK)

HF antenna pioneer A. J. F. (Frank) Clement, W6KPC, of Bakersfield, California, died September 23 as a result of a highway accident. He was 93 and an ARRL Life Member. A former owner of Tri-Ex Tower, Clement designed and built a number of high performance HF arrays over the course of several decades. The June 1980 issue of QST featured his article describing the Collinear Yagi Sextet. As he described it,

"[t]he antenna systems at W6KPC and OH8OS are computer controlled. The computer is programmed to search through the eight modes to see which receives the incoming signal best." His other state-of-the-art antenna projects appeared in the September 1951, May 1958 and November 1978 issues. Read more here <http://www.arrl.org/news/frank-clement-w6kpc-sk>.

==> UPCOMING ARRL DIVISION CONVENTIONS AND EVENTS

<http://www.arrl.org/multimedia>

- October 15-17, 2010 -- ARRL Pacific Division Convention <http://www.pacificon.org/>, San Ramon, California
- May 20-22, 2011 -- Dayton Hamvention <http://www.hamvention.org/>
featuring ARRL EXPO, Trotwood, Ohio
- June 10-11, 2011 -- ARRL National Convention and ARRL EXPO at the ARRL West Gulf Division Convention <http://www.hamcom.org/>, Plano, Texas

Has anyone put up the HD antennas for TV? I want to put up two Channelmaster 8bay HD antennas in different directions then split into one cable to the TV. Aim each antenna towards the different major city in my area for best reception.

anyone do this? any tips? why or why not ? any better ideas? I don't want to use a rotor as I have a tall tower and lots of height.

Thanks for any tips

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

GB2RS NEWS

Sunday 3rd October 2010

The news headlines

Major amateur radio survey launched by RSGB

USA to support MF allocation at WARC 2012

Join in Ham Week UK

At the National Hamfest in Newark over the weekend 1 and 2 October, the Radio Society of Great Britain will launch a major survey of all UK radio amateurs. The objective of the survey is to gather as much information as possible on 21st century amateur radio operation in the UK. The survey, which is internet based, will run for three months and the data collected will be used to determine the direction that amateur radio takes over the next 10 to 20 years. Full details of the survey will shortly appear in all elements of the amateur radio press, notices of invitation will be placed on all amateur radio reflectors and the RSGB website. If you want your opinions to be noted, please take part.

The ARRL reports that the United States is supporting new secondary amateur radio allocation at 461 to 469kHz and 471 to 478kHz. This after both the FCC and the National Telecommunications and Information Administration spectrum regulators have agreed to support this secondary medium frequency allocation at the 2012 World Radiocommunication Conference to be held in Geneva, Switzerland.

As part of the Ham Week UK activity, South Lancashire Amateur Radio Club will hold an open night on Wednesday 6 October at the shack in Bickershaw Labour Club, Bickershaw Lane, Bickershaw, Lancashire. They are organising a potato hash & peas supper on a first come, first served basis. The club station, M0SLR, will be on the air from 8 to 10pm. Check out the October issue of RadCom for details of the other events for Ham Week UK.

Visitors to the RSGB Convention on 10th October can sit any of the American amateur radio exams during their visit. First exams will start at 10am and you can drop in at anytime during the day, with the last candidate being accepted at 2pm. Walk-in candidates are very welcome but prior notice of interest is appreciated by email to paul.steed@ntlworld.com.

Andy, GW6JSO has decided to step down as Keeper of GB3CM after six years. In that time he has arranged funding and sourced a new repeater. Echolink was set up in 2004 and has run every day since. Andy has asked the Carmarthen Amateur Radio Club to take over the repeater but so far nobody has stepped forward. If a local amateur does not take over by 17 December, Andy will have to close the repeater down. If you are interested, please contact Andy by email to andy@gw6jso.info.

We've received the sad news that Dave Dewar, G8NTE, founder and operator of QSLFACTORY.COM is now silent key. As yet there are no details regarding any outstanding QSL cards but we will publish any information in RadCom.

To deal with the anticipated changes to the administration in Netherlands Antilles on 10 October, the ARRL Awards Committee has determined that at 0400Z (12am local time in the islands) on 10 October 2010, the two Netherland Antilles DXCC entities will be deleted. Commencing at 0400Z (12am local time) on 10 October, 2010, operation from the islands of Curacao, Bonaire, Saint Maarten, Saba and St Eustatius will count for a yet-to-be-determined number of new entities. The DXCC desk will not accept confirmations for these new entities until after 1 January 2011.

North Wakefield Radio Club is about to start an Advanced exam course to be held on Tuesdays from 7 to 10pm. Around 12 to 14 sessions are planned, leading towards an exam on 1 February 2011, although candidates can also take a later exam if they prefer. If you require further information, contact Chris Street, by email to secretary@g4nok.org.uk.

Crystal Palace Radio and Electronics Club is holding a Foundation course during November. Information and application forms can be obtained from the course leader, Victor, G1PKS on 020 8653 2946 or by email to victor@jmail.co.uk.

And now for the details of rallies and events for the coming week.

The Autumn Militaria & Electronics & Radio Amateur Hangar Sale will take place at Hack Green secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL today, Sunday 3 October. Doors open at 10am and admission is ?2.50. Contact Rod Siebert, 01270 623 353 for further details.

The RSGB Convention takes place between 8 and 10 October at Horwood House, Little Horwood near Milton Keynes. Highlights include an excellent lecture programme, the Martin Lynch & Sons 20th anniversary buffet on the 8th, the DX Dinner on the 9th and trophy presentations on 10th. Accommodation for Saturday night is now sold out, although day tickets are still available. Details at www.rsgb.org/rsgbconvention.

Now for the news of special events

On Saturday 9 October GB2WAR will be operated by Air Training Corp 2454 Warbreck Squadron at the Ribble Steam Railway Museum, home of the Central Lancashire Amateur Radio Club. Commemorating the 70th anniversary of the Battle of Britain, cadets will be on the air from

10.30am until 4pm on HF voice and PSK32 plus 2m FM. More information on GB2WAR is on QRZ.com. Live activity details will be posted at www.sk6aw.net/cluster and QSL is via M0OYG or EQSL.

GB4GD will be on the air until 9 October commemorating 79 years since the first four Guide Dogs were trained in Wallasey, Cheshire.

The Royal Naval Amateur Radio Society is celebrating its 50th anniversary this year. A special event callsign GB50RN will be on the air until 9 October. The station will be aired on CW and SSB on the HF and WARC bands from 80m to 10m and with FM on the 2m and 70cm bands. A special Anniversary award is available to listeners and licensed amateurs who hear or contact RNARS members and the special event stations during 2010. Full details can be found on the society website at: www.rnars.org.uk

On Sunday 10 October, G0FQN, G1PIE and 2E1HQY will be on the air from the Worth Valley Railway during the steam gala using the call GB5WVR. More details are on qrz.com.

And now the HF DX news compiled from 425 DX News and other sources

Originally announced to go to Sint Maarten, Paul, K1XM and others now plan to be on St. Eustatius, which is IOTA reference NA-145 on 8 to 16 October. They will operate SSB, CW and RTTY on 160 to 10 metres. QSL via KQ1F.

W8FV will be returning to Tanzania and will be active as 5H9PD from 2 to 30 October. Operation will probably be on 40 to 10 meters, depending on propagation, mostly CW with the possibility of some PSK31. QSL via his home callsign.

PJ7E is the callsign that the team on Sint Maarten will use for their 10-day operation scheduled to begin on 10 October. Further information and QSLling instructions at www.stmaarten2010.com.

Jay, VY1JA will be active in his spare time from 6 October to 9 November as VY0JA from CFS Alert on Ellesmere Island, which is IOTA reference NA-008. He will operate mainly CW running low power into wire antennas. QSL via N3SL.

Now the contest news

This month's RSGB HF events begin with the 21/28MHz contest on Sunday 3 October. Despite being popular with its loyal band of followers, this event has not attracted a great deal of participation for some considerable time. In an attempt to boost the number of entries, the Contest Committee tried changing the format, but it was to no avail. The event is being discontinued from 2011, so make the most of the final one. Times are from 0700 to 1900UTC using both CW and SSB, the exchange is signal report, serial number and District.

The 144MHz UK Activity Contest takes place on 5 October from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number

and locator.

The CW leg of the Oceania DX Contest takes place on 9 and 10 October between 0800 and 0800. using the 1.8 to 28MHz bands, the exchange is signal report and serial number. Also on 9th to 10th is the WAB HF Contest, which runs for 24 hours, from 1200 to 1200UTC. UK stations work non-UK stations, while non-UK work everyone. Using all modes on the 14 to 28MHz bands, the exchange is signal report, serial number and WAB area. The final event of the weekend is the CW leg of the EU SSB Sprint between 1600 and 2000UTC on 9th. Using bands from 3.5 to 14MHz, the exchange is both callsigns, serial number and name.

And now the solar factual data for the period from the 20th the 26th of September, compiled by Neil Clarke, G0CAS on the 27th of September.

Sunspots were visible every day, in fact a large group rotated into view on the 21st and looked rather threatening, but by the 26th had yet to produce a C class solar flare. Solar activity remained at very low levels. Solar flux levels varied little day to day and averaged 84 units. The 90 day solar flux average on the 26th was 80 units, that's one unit up on last week. X-ray flux levels averaged B1.5 units and showed little variation. Geomagnetic activity started at quiet levels, the Ap index on the 22nd was only 2 units. During the 24th a coronal hole disturbance arrived, its impact was very limited, the Ap index was only in double figures on that day at 13units. Levels quickly returned to quiet levels. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 300 kilometres per second on the 23rd to 640 by the next day. Particle densities were low except for the 23rd which increased to 26 particle densities per cubic centimetre. Bz varied between minus 2 and plus 3 nanoTeslas on the quietest day and between minus 8 and plus 12 nanoTeslas during the disturbance.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way. However, all it takes is one large sunspot group to increase activity. Solar flux levels should be around the 80 mark or just below for most of the week. Geomagnetic activity could be unsettled today and tomorrow due to a recurring coronal hole but then activity is expected to return to quiet levels for the remainder of the week. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 24MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try this path will be between 1000 and 1200 hours zulu. Just a remainder that now and for the coming winter months the daytime highs normally take place within a couple hours either side of local noon.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Sunday 3 October Lincoln Short-Wave Club starts seven days of running special event station GB10NH from the club shack for Ham Week UK. For more information contact Pam Rose, G4STO, on 01427 788356.

On Monday 4 October Bromsgrove & District Amateur Radio Club is having a talk on baluns. Contact Chris, M0BQE on 01905 776 869.

On Monday 4 October Gloucester Amateur Radio & Electronics Society is having a talk on Iona & Lundy by road, rail & sea by Brian, G4CIB. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 4 October South Birmingham Radio Society is having a contest planning meeting. Contact Don, on 0121 458 1603.

On Monday 4 October Wythall Radio Club continues its Advanced course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 5 October Friskney and East Lincolnshire Communications Club is holding a DF fox hunt. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 5 October Loughborough & District Amateur Radio Club is having a talk on station accessories by Andrew, G7SEG. More information from Chris, G1ETZ, on 01509 504 319.

ENFORCEMENT: FCC COMES TO AID OF HAM SUFFERING INTERFERENCE

The Federal Communications Commission has come to the aid of a ham
radio operator who has been suffering interference believed to be
coming from a neighbor's home. Amateur Radio Newsline's Norm
Seeley, KI7UP, is here with the details::

--

In its September 3rd letter to the unidentified homeowner, FCC's
Special Counsel Laura Smith wrote that the agency had received a
complaint that an electrical device, possibly a faulty doorbell
transformer, apparently located on the homeowners property may be
causing harmful radio interference to a near-by ham radio operators
station.

In her letter, Smith noted that the agency's rules state that if the
interference is caused by faulty consumer equipment the FCC has the
responsibility to require that such problems be rectified within a
reasonable time. She noted that under FCC rules, certain types of
equipment are classified as "unintentional radiators." These are
devices that generate radio frequency energy but do not intentionally
radiate it. Some common examples include computers, radio receivers
and television sets. She went on to note that some of these devices
are imported and do not comply with Commission certification standards,
and thereby result in interference to other radio services.

Smith continued by telling the homeowner that if the source of the
interference is an unintentional radiator and if the device has FCC

approval, that it should have a silver FCC label on the unit showing a certification number. But writes Smith, even an approved device can only be operated legally if it is not causing harmful interference to a licensed radio service.

Smith notes that the ham who filed the complaint has attempted unsuccessfully to resolve this problem and as a result the matter has been referred to her office. She goes on to warn the homeowner that while the Commission has confidence that most people are able to resolve these issues voluntarily, it wants to make the homeowner aware that this unresolved problem may be a violation of the agency's rules and could result in a monetary forfeiture or fine for each occurrence.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona

--

Smith then gave the homeowner the customary 30 days to advise her office as to what steps have been taken to correct this interference problem. The entire letter to the homeowner is on-line at http://www.fcc.gov/eb/AmateurActions/files/RFI-N10_09_21_5201.html (FCC)

RESCUE RADIO: HAM RADIO COORDINATES ARIZONA SCOUT RESCUE Authorities say a Phoenix Arizona Boy Scout troop had been rescued near the city of Prescott. This after radioing for help via amateur radio. The Yavapai County Sheriff's Office says one troop became stranded in the Pine Mountain Wilderness. The scouts were reportedly close to running out of drinking water and one scout had fallen ill when they radioed for help. According to a newspaper account, one troop leader was able to relay G-P-S coordinates to a Prescott resident received the troop's call for assistance on his ham radio station. He in turn notified county authorities. The scouts were rescued by a state Department of Public Safety helicopter on Saturday night, September 25th. Authorities say the scouts and the their leaders were all in good condition and did not require medical attention. The scouting troop included two adults and six children under the age of 15. They were in the mountains with other scout teams, learning to use signal mirrors in case of an emergency and climb different peaks to signal one another. But in the end it was ham radio rather than mirrors that lead to their rescue. Due to the ages of those involved, no names or call signs were included in news stories on this Arizona mountain rescue. (Arizona Republic, AZCentral.com, KOLD-TV)

RADIO POLITICS: DXCC AND THE DISSOLUTION OF THE NETHERLANDS ANTILLIES

Turning to the geo-political scene, when the Netherlands Antilles is dissolved on October 10th, it will have a major impact on amateur radio

in general and the ARRL's DXCC awards program in particular. Now, in a statement released by the ARRL, the League says that to clarify the administrative process by which the anticipated changes to the two existing Netherlands Antilles DXCC entities will be made, the ARRL Awards Committee has determined the following policies.

First, at 0400 UTC on October 10th, the two current Netherlands Antilles DXCC entities will be deleted. At the exact same time, operation from the islands of Curacao, Bonaire, Sint Maarten, Saba and St Eustatius will count for a yet-to-be-determined number of new entities. This, under the DXCC List Rule 1 for Criteria and Political Entities, and/or Geographic Rule 2. The latter deals with Separation of Entities. When the Awards Committee determines what Rule 1 or Rule 2 actions apply in each case, it will announce the final disposition of the entities on the DXCC list.

Finally, the DXCC desk says that it will not accept confirmations for these new entities until after January 1st, 2011. (ARRL, various DX newsletters)

RADIO LAW: HEMPSTEAD NY ALL BUT BANS NEW CELLPHONE TOWERS A town in suburban New York has imposed restrictions on the placement of new cellular telephone towers that are said to be among the toughest in the United States. The town of Hempstead, just east of New York City on Long Island, is a notable example on a list of municipalities tightening rules on where cell phone companies can place antennas. Despite a 1996 federal law prohibiting municipalities from considering health issues in approving locations for cellular antennas, a group of mothers concerned about what they consider risky cell towers outside their children's schools successfully lobbied the town of Hempstead. The town board claims that it adhered to FCC regulations to not consider possible health effects by instead describing the vote as a quality of life issue. The ordinance passed unanimously by the Hempstead town board prohibits wireless companies from installing equipment closer than 1,500 feet to homes, day care centers, schools and houses of worship, unless they submit compelling evidence that there is an absolute need. The town has also hired Richard Comi of the Center for Municipal Solutions as a consultant to review applications of cellular companies seeking to install new antennas or towers. Comi's company advises municipalities in 32 states on cellular tower regulations. A spokesman for one cellular provider told the press that ther new Hempstead ordenance effectively bans new cellular site construction in that township. Some observers believe that the cellular industry will have no choice other than to challenge the legality of this new Hempstead law through the Federal courts. And while there is no mention of any other radio service being impacted by the Hempstead ordinace there arre no exemptions either. (LINewswire, KB6NU, WV9QZB)

RADIOSPORTS: THE WORLD T-HUNT CHAMPIONSHIP

A group of transmitter hunters from the USA is returning from Croatia with some medals for their efforts. Newsline's Joe Moell, K0OV has the full report.

--

The world championship of Amateur Radio Direction Finding, also called ARDF and radio-orienteering, has just concluded. It took place in beautiful forests near the Adriatic Sea coast of Croatia. According to rules of the International Amateur Radio Union, competitors had to find up to five transmitters on courses that were up to 4 miles point-to-point. They had maps and compasses, but the transmitters weren't marked on the map, of course. 386 radio-orienteers from 32 countries took part, including 14 from the USA. Our team's ages ages ranged from 25 to 68.

On the first of two competition days, Karla Leach KC7BLA of Bozeman, Montana and Ruth Bromer WB4QZG of Raleigh, North Carolina took silver medals in the team competition for women over age 60 on the 80-meter band. They didn't actually team up on the course -- that's not allowed. Everyone must find the transmitters individually, with no help. But their combined scores were second only to the Russian team's, and that's how team winners are determined. It's an excellent showing, because the Russians and other east Europeans such as Ukrainians and Czechs have been doing this for fifty years and have help from the government and the military. On the other hand, this is only USA's 7th trip to the World Championships.

On the second competition day, George Neal KF6YKN captured a bronze medal in the category for men ages 50 through 59 on 80 meters. This is George's second medal for the USA -- he got one two years ago at the World Championships in Korea.

Team USA members earned their positions by being the best at the USA national championships last year in Boston and this spring near Cincinnati. Watch for the announcement of next year's national championships, which I will be making soon. Meanwhile, you can read more about the team and see photos of them in action at www.homingin.com. That's HOMINGIN, as one word.

>From southern California this is Joe Moell, K0OV for Amateur Radio Newline.

--

Our congratulations to the winners and all who took part in this international T-Hunting event. (K0OV, ARNewsline(tm))

**

RADIO LOSS: HAM STATION APPARENTLY CAUGHT IN COLORADO FIRE

What may have been a large contest or DX station appears to have been lost in a fire burning last week in Colorado. Those watching the Weather Channel report to have seen video footage of a house burning. As the camera on board the news helicopter widened its shot there were three towers and antennas clearly visible on the property. At airtime, there's been no conclusive identity as to whom the house and the towers belonged to. (Various sources)

**

RADIO LAW: FCC APPROVES USE OF WHITE SPACES FOR LONG RANGE WIFI

The Federal Communications Commission has approved the use of unlicensed broadcast spectrum known as "white spaces" that the agency hopes will amount to longer-range Wi-Fi-like connections for mobile devices. In a unanimous vote on Thursday, September 23rd, the five-member FCC said the unused spectrum between TV stations will be used for such mobile broadband services in the hope of providing improved service to consumers on the go.

Technology companies including Google and Microsoft had advocated the concept while it was generally opposed by broadcasters and entertainment venues. The latter had had hoped for the same spectrum for wireless microphones displaced from other bands. Instead, the Commission reserved two vacant UHF channels for wireless microphones and other low power auxiliary service devices in all areas of the country. (CGC, PostTech.com)

**
COMMUNICATIONS SCAMS: THE MALWARE SCAM DOWN UNDER

A computer scam involving criminals targeting random computer users has been discovered in Australia, but could easily spread world-wide. Graham Kemp, VK4BB, of the WIA News has the story about how these swindlers work:

-

The scam involves a victim receiving a phone call from a person purporting to represent well known computer company, most commonly Microsoft or a company contracted by Microsoft telling the person they have a problem with their computer. The caller outlines the victim's computer is infected with a virus that has been brought to the company's attention -often via the Microsoft fault reporting process.

The caller then offers to assist the victim and will "fix the problem" by directing them to a website where the caller remotely takes over the victim's computer. The representative then shows the victim the

"issues" with their computer and suggests they pay a fee to have the problem fixed or need to purchase software to prevent this from happening in the future.

This is all just a scam. Microsoft has confirmed they are not cold-calling members of the community regarding viruses, computer problems or any other issue.

Quite simply, these offenders are just looking to trick you into giving them money," Detective Superintendent Brian Hay of the Queensland Crime Operations Command's Fraud and Corporate Crime Group said.

Giving someone you don't know remote access to your computer is basically the same as handing your credit card details over to them. With this access, an offender can easily search your computer for banking or personal details or quite easily load Malware or Trojan software onto your computer.

For the Amateur Radio Newsline, I'm Graham Kemp, of the WIA news reporting frim Ausrralia.

-

The bottom line: No matter where you are in the world, if you get a call from anyone telling you that your computer has a virus or some other problem with it, just tell them to get lost and hang up the phone. And if such a warning comes in the form of an e-mail, never under any circumstances click on a provided link. Instead, simply delete the message. You, your computer and your wallet will be happy that you did. (WIA News)

RADIO HAPPENINGS: NOT A LOT OF CELLPHONE FM RADIO USE

The National Association of Broadcasters has found that very few cellular handsets that have FM radio chips in them have activated the feature. In a study commissioned by NAB's Fastroad technology advocacy program and conducted by Insight Research, the trade group wanted to know how many cell phones with activated FM radio chips were sold in the U.S. in 2008 and 2009. NAB also wanted an estimate of the prospects for FM enabled cell phones and other hand-held devices in the future.

In its findings, Insight Research estimates that in 2008, 6% of the handsets sold in the U.S. were FM-enabled. This increased to about 9.5% in 2009. A previous NAB study looked at the market in 2007 and estimated that 8% of wireless devices shipped had an FM radio chip installed, though not necessarily activated.

Though several manufacturers have integrated FM into their cell phones, the only way to know for sure the percent of handsets with an installed FM chip would be to match each handset with its associated chipset. That would require reverse engineering of all handsets on the market in

2008 and 2009. According to Insight; that was beyond the scope of this study. (RW)

RESCUE RADIO: HOMELAND SECURITY GRANT BRINGS RACES TO COUNTY DISPATCH CENTER A Home Land Security grant is making it possible for the Ionia County Michigan Radio Amateur Civil Emergency Services to acquire new equipment and move in to an office located at the County Central Dispatch Center. Roger Packard, KD8KLUI, is the RACES and Amateur Radio Emergency Services Emergency Coordinator for Ionia County. He says that this new gear gives his group the capability to talk locally, within the state and quite literally around the world. According to the Ionia Centinal Standard, equipment began arriving last week. It adds that the Ionia County Radio Amateur Civil Emergency Services is getting the gear un-boxed and ready for operation. The newspaper added that with the amateur radio groups and emergency service organizations in Ionia County working together, it allows for more information to be gathered, and this in turn helps to keep the area safe. (Ionia Centinal Standard)

**
RADIO BUSINESS: HEIL SOUND INAUGURATES LIVE CHAT SUPPORT LINK Heil Sound now has Live Chat support available. Typical on-line hours are 8:00 a.m. to 5 p.m. Pacific USA Time.

Amateur Radio Newsline talked with Chip Margelli, K7JA, who is the Vice President of Amateur Radio Sales and Marketing for Heil Sound shortly after the service came on-line He says that Heil Sound is very pleased to be able to provide this new service to its dealers and customers:

--

K7JA: "Its been really great. This morning in fact, when the service first came up we received inquiries from Canada, from France and from the UK. And it was really gratifying to - number one that people were able to pick up on it that quickly and secondly that we were able to help somebody so that they would not have to make an overseas phone call in the case of the folks from Europe."

--

Chip says that there is a Live Chat link that is located at www dot heilsound dot com stroke amateur. Just click on it and the link will take you directly to the company's support line. (Heil Sound)

NAMES IN THE NEWS: RAC ELECTION RESULTS

Radio Amateurs of Canada has announced the re-election of several of its Directors for another two year term beginning on January 1st, 2011. Elected are William Gipps, VE7ISV and VE7XS as the Radio Amateurs of

Canada Director for British Columbia and the Yukon; Derek Hay, VE4HAY as Director for Midwest; Bill Unger, VE3XT, as the Director for Ontario North East and Everett Price, VO1DK who will serve as Director for Atlantic. All ran unopposed eliminating the need for a balloted election. (VO1PRB)

**

NAMES IN THE NEWS: AA2TX REPLACES N6GHZ ON AMSAT BOD A big surprise on the AMSAT Board of Directors. This with the announcement that Bill Ress, N6GHZ, has tendered his resignation from the Board effective September 20th. In his letter of resignation Ress noted that his business demands are leaving him with very little extra time to properly serve as a member of the AMSAT Board. In accordance with AMSAT By-Laws, Tony Monteiro, AA2TX as First Alternate will immediately assume the position of Director until the next Board election in 2011. Monteiro also serves as AMSAT's Vice President of Engineering. (WA4SCA)

**
NAMES IN THE NEWS: K3LR NAMED TO RECEIVE RCA 2010 BARRY GOLDWATER AMATEUR RADIO AWARD

And the Radio Club of America has announced that Tim Duffy, K3LR, will be the recipient of its Barry Goldwater Amateur Radio Award. The Goldwater Award is given to an RCA member in recognition of a long record of service to the public through the use of Amateur Radio. Duffy joins Richard G. Somers, W6NSV, who, as reported last week has been named to receive the Radio Club of America's Special Recognition Award. Both Duffy and Sommers will receive their honors at the organizations 101st annual Awards Banquet to be held November 19th in New York City. Duffy will also be inducted as an RCA Fellow this year. THE CONTEST CORNER: PA QSO PARTY OCT 9 - 10

>From the contest corner comes word that the 2010 Pennsylvania QSO Party is literally right around the corner. Amateur Radio Newsline's Mark Abramovich, N-T-3-V is here with the details:

-

They call it "the friendly party" because operators here in Pennsylvania are helpful on the bands in letting others work rare

stations and counties, even if they happen to be holding the frequency.

Michael Coslo, N3LI, vice president of the Nittany Amateur Radio Club and manager of the PA QSO Party, says he's expecting lots of activity for the contest the weekend of Oct. 9 and 10.

Coslo says for those who have worked the PA party in the past, there is one significant change in the scoring.

"We got rid of the 1.5 point QSOs for CW. We've changed that to 2 points for each CW QSO," Coslo says.

It used to be only 80-meter CW QSOs were valued at 2 points. Coslo says the change was recommended and made because it will make it easier to log and compile the final score sheets.

Coslo says there will also be a special event station on the air worth 200 points for each contact.

"The Skyview Radio Society will be operating under K3MJW and they are celebrating their 50th anniversary this year, which is a large part of why we had them do that," Coslo says. "And, they also are recovering very nicely from disaster that hit them last year in October when they had some early snowfalls which took a lot of their antennas out."

Coslo says the club is based in Westmoreland County in western Pennsylvania, but also is planning to send out some stations to rare counties nearby.

So, if you've never worked a state QSO party, this is one worth trying out.

Hope to hear you on the air.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

RADIO IN SPACE: THE NEW SOLAR SAIL PROJECT

Turning to radio news from space, word that the Planetary Society is building a spacecraft that will sail on sunlight alone and hopes to have it completed by the end of 2010. The new solar sail project, boosted by a one-million-dollar anonymous donation, is the beginning of an innovative program that will eventually launch three separate spacecraft over the course of several years.

The program starts with LightSail-1, which will demonstrate that sunlight can propel a spacecraft in Earth orbit. LightSail 2 and 3,

more ambitious and aim to reach farther into space.

Sailing on light pressure from lasers rather than sunlight is the only known technology that might carry out practical interstellar flight, helping pave our way to the stars. The project also has many practical applications that include

The solar sail propulsion is simple in concept. Light photons bounce onto a mirror-like aluminized Mylar sail. As each photon hits, its momentum is transmitted to the spacecraft. Photons have no mass but lots of energy, so a solar sail space probe requires no onboard fuel. The force acts continuously, meaning a solar sail can eventually reach speeds five to ten times greater than any chemical rocket.

Some of the objects of the new solar sail project include monitoring the Sun for solar storms, providing stable Earth observation platforms, and exploring our solar system without carrying heavy propellants.

For more information on this fascinating project take your web browser to www.tinyurl.com/solarsailing (Planetary Society, VK7TL)

ON THE AIR: ROYAL NAVAL AMATEUR RADIO SOCIETY CELEBRATES 50 YEARS

On the air, word that the Royal Naval Amateur Radio Society is celebrating its 50th anniversary this year with the special event callsign GB50RN on the air through October 9th. The station will operate on CW and SSB on 80 through 10 meters and on FM locally on the 2 meter and 70 cm bands. A special Anniversary Award is available to listeners and licensed amateurs who hear or contact Royal Naval Amateur Radio Society members and the special event station during the remainder of 2010. Full details can be found on the society website at www.rnars.org.uk. (GB2RS, Southgate)

**

DX

In DX, K8ND and W9VA will be the first team to arrive at Signal Point Station on Curacao between October 10th and 18th, just before the October 10th date of dissolution of the Netherlands Antilles to operate stroke PJ2. The callsign PJ2T will be used after 0400 UTC on October 10th, when Curacao becomes an autonomous country within the Kingdom of the Netherlands. QSL via reach operators home callsign.

KM0O will be operational stroke 9M6 from East Malaysia between November 26th and the 30th. His main activity will be the CQWW DX CW Contest on November 27th and 28th as a Single-Operator All Band entry. QSL to KM0O via his information on QRZ.com or electronically using Logbook of the world.

AA5UK will be operational portable EA6 from Ibiza in the Baleric Islands from October 16th to the 27th. His activity will be holiday

style on 160 through 10 meters using mostly SSB and various Digital modes. Also, look for satellite operation on various birds. QSL to his home call direct, via the bureau or electronically using either Logbook of the World or eQSL.

DG5MMW will be active as stroke 3B8 from Mauritius Island between November 1st and the 6th. His operation will likely be holiday style on the HF bands. QSL to his home call direct or via the bureau. And for those of you who have been asking for a definition of the term holiday style, it means the operator is likely on vacation and will not plan an y specific hour of the day or day of the week to take to the air.

Lastly, N3QQ plans to activate two rare locations within the next few weeks. His plans are to travel to Enewetak Atoll on October 9th. He will likely operate from Enewetak between October 12th to the 15th and then travel to Ujelang Atoll which has never been on the air. He plans to activate that rock from October 16th to the 19th. His requested callsigns are 73RRC for Ujelang Island and V73QQ for Enewetak Island. N3QQ adds that plans on this one are subject to change with little or no notice. Again, QSL as directed on the air.

(Above from vartious DX news sources)

THAT FINAL ITEM: COMMUNICATIONS WITH DANCE

And finally this week, we are all familiar with the use of RF to communicate with one another using two-way radios, but have you ever thought that it can also play a part in the creative process in developing dance? Well Sonia Cillari, who is an artist in residence at the Steim Studio for Electro Instrumental Music in Amsterdam, has.

Working with a team of engineers and software programmers, Cillari is using electronics, radio frequency energy and computer control to develop a new performance based on her own thoughts, feelings and ideas, coupled with the latest in radio technology:

--

Sonia Cillari: "I use technology because it permits me to create the illusion. So usually I do not start from technology investigating technology. That is the contrary. So usually I make my own technical devices because they are for the aim of reaching that specific research."

--

Sonia Cillari is only one of a growing number of dancers and other artists around the world who are integrating the world of electronics and communications into what they create.

And less we forget, our sincere thanks to Marlon Barrios Solano and Dance-Tech Net for making the sound clip of Sonia Cillari available to us. For those interested in the arts, more on Dance-Tech Net can be found on-line at www.dance-tech.net. (Dance-Tech.net, ARNewsline(tm))

The Super Springtime racks up the contacts

VK6NE - SK - Announce

LIGHTS GO OUT IN A CALIFORNIA TOWN

SOME FIREFLIES DO GLOW TO MATE

AUSTRALIAN GEOGRAPHICAL RADIO FREQUENCY MAP.

A look at Amateur Radio magazine for October

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING OCTOBER 03 2010

WIA Centenary

The Super Springtime racks up the contacts

What a wonderful celebration of the Centenary of Organised Amateur Radio
has been the VK6 Super Springtime over 12 days, a collaborative effort of
seven groups in the west.

It put on air and public display of amateur radio through the special
callsign VK100WIA at two very high profile locations.

The Wireless Hill Telecommunications Museum at Apple Cross has plenty of
visitors who were shown amateur radio enthusiastically in action.

Plus the Perth Royal Show from Saturday the 26th of September through to yesterday, Saturday the 2nd of October.

The visitors to both locations had the opportunity to see and learn about amateur radio.

There are plans for amateur radio to return to Wireless Hill's centenary in 2012, and also be a regular at the annual Perth Show.

During the show on Wednesday, VK100WIA made its 20,000th contact.

And while talking about contacts, the total made by the Super Springtime is expected to have exceeded 2,000. Well done to WICEN, the Scout Tech Group, West Australia Repeater Group, and West Australia VHF Group, and others involved.

We are certain to hear more about it in the future, and look forward to the story in words and photographs in Amateur Radio magazine.

Amateur radio expo comes to Sydney.

The St George Amateur Radio Society will be celebrating 100 years of amateur radio in Australia with an amateur radio expo at Sutherland, south of Sydney.

The special event call sign station VK100WIA will be operating for the 3 day event on most HF bands, VHF and UHF.

The expo will be open to the public from 10 am to 10 PM daily with displays of the various aspects of amateur radio. On Wednesday evening there will be a sausage sizzle followed by a special club meeting.

The EXPO runs from Tuesday 5th to Thursday 7th October at 38 Kurrajong Street, Sutherland, a short walk from the railway station.

Tell your friends and come along to this exciting, once in a life time event.

For more information go to www.sgars.org/expo or email expo@sgars.org

This bulletin has been brought to from the news desk at St George Amateur Radio Society

PAUL, VK2GX was interviewed by The St George and Sutherland Shire Leader newspaper about the centenary celebrations of amateur radio in Australia.

Paul, president of The St George Amateur Radio Society said "Amateur radio is primarily a hobby that encompasses all of the different aspects of radio communication, everything from old radio equipment through to satellite communication.''

To read the full interview and see the photo shoot, a link has been provided at www.sgars.org/expo

Have you marked your calendar?

Maryborough Electronics and Radio Group, MERG, are throwing open the doors to the Scout Hall corner of Ariadne and Ward Streets, Maryborough next Saturday and Sunday to celebrate and demonstrate 100 years of organised amateur radio

in Australia. The commemorative radio station VK100WIA will be operated by MERG over 8th, 9th and 10th October.

Remember that the times are UTC or for us grey hairs GMT.

You are invited to join us over the two days and see VK100WIA in operation.

We'd love to eyeball you for a rag chew. For MERG, I'm Geoff, VK4ZPP.

Tune-In To The World - amateur radio gets people talking
The WIA National Field Day - Saturday the 23rd of October

With less than three weeks to go this day of promotion for amateur radio has 11 clubs all set to engage with members of their communities.

Clubs, groups and individual radio amateurs will be getting on air on the day to give their support to the unified effort of attracting new members and new radio amateurs. And that's got to be a good thing.

The 11 clubs who have so far registered will be running a Public Station in the event, and this category is also open to a group of three or more radio amateurs operating on a single callsign from a public place.

The other category is called a Private Station, with an individual operating portable, mobile or from a private residence. One of those has been registered so far.

Highly important is that Public Stations actually engage members of the public rather than just having them look on, and then walk away.
Why? Remember this is not a contest, but a marketing exercise to promote amateur radio.

Check out the WIA website for some promotional and display material that is available to clubs registered for the event.

And we recommend that orders for the range Tune-In To The World - amateur radio gets people talking brand clothing be submitted online immediately.

Will you or your radio club be involved? Check out www.wia.org.au for more information including the rules of the WIA National Field Day all happening on Saturday the 23rd of October, and join the:

Eastern And Mountain District Radio Club, Lower Murray Amateur Radio Club, Adelaide Hills Amateur Radio Society, Scout Radio and Electronics Service Unit, Peel Amateur Radio Group, WICEN South Australia, Amateur Radio Victoria, Oxley Region Amateur Radio Club, Whyalla Amateur Radio Club, the Redcliffe and Districts Radio Club, and Midland Amateur Radio Club.

VK6NE - SK - Announce

VK6FIVE in Perth, with some sad news

Around 6am this past Tuesday morning, in St. John of Gods Hospital, Subiaco. After a number of years valiantly fighting Cancer.

WIA Life Member, and past Federal President, Neil Penfold VK6NE, past beyond the veil.

Neil had been a long time member of the Amateur Radio fraternity and had served in many capacities at both a State and Federal/National level.

He was a Federal Contest Manager from 1965-1970, a WA Division Secretary from 1965-1978, a Federal Councillor from 1968 to 1993, the Federal and now National QSL Bureau Manager from 1980 until now, along with VK9/0.

Neil served as Federal President from 1994-1998

Neil was granted honorary Life Membership of the WIA in 2001 and this year was honoured with the naming of the Neil Penfold State Amateur Radio Centre at Whiteman Park, home of the Northern Corridor Radio Group.

Amateur radio has lost a true gentleman, a loyal and dedicated member of the WIA, and a friend and mentor to many. The WIA extends condolences to Neil's family and friends.

Remember to Tune in Next Week when the Northern Corridor's Radio Group plans to present a Radio Eulogy for one of Western Australia's Amateur Radio Giants.

(Geoff Atkinson VK3AFA, Secretary WIA:- VK6FIVE:- VK6POP Bob Bristow WIA Director)

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been reflecting....

In the time when we measured in feet and inches and valued in shillings and pence, I was receiving my first lessons in club organisation. This was with a national youth organisation with a long history, even then.

It was probably before the terms such as teen peer pressure had entered the pages of news reporting but one issue was very important to avoid. This was and is the growth of cliques in an organisation. The self grouping of a segment of members to assume effective control of the body to benefit that self appointed group has long been a poison to the cohesiveness and growth of all kinds of clubs.

Our hobby of amateur radio with its lofty ideals as set out in the Amateurs Code is certainly not immune to this problem.

Practically we need to tread the line of accommodating the wide interests of all our club members and providing activities, within our resources, which involve all our club members. Ignoring members, inviting a selected few to undertake special activities (pre-qualifying) and allowing things to run as a dictatorship is hardly in the spirit of the Amateurs Code.

Our WIA is encouraging us to recruit. Old hobbyists and the newly interested, we invite you all.... and as the CB craze brought us many recruits, computing and other electronic interests should be a source of new members now.

Have you told anyone about amateur radio, this week?

For QNews, I'm Geoff Emery and that's what I think.....what about you?

CONTEST NEWS FOR VK4

Peter Harding VK4OD the RD Contest Manager, advises that on the WIA Website in the RD Contest page, he has placed the provisional Scores from this year's contest, these will remain here unless they require any changes before being published in the December/ January AR Magazine.

If you have any queries with the scores please contact Peter at
vk4od@wia.org.au
before the end of October.

CLUBBING -

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

Have you marked your calendar?

Maryborough Electronics and Radio Group, MERG, are throwing open the doors to the Scout Hall corner of Ariadne and Ward Streets, Maryborough next Saturday and Sunday to celebrate and demonstrate 100 years of organised amateur radio in Australia. The commemorative radio station VK100WIA will be operated by MERG over 8th, 9th and 10th October.

Remember that the times are UTC or for us grey hairs GMT.

Entry to the Mini Ham Fest and Radio Expo is $5.00 (once only for the 2 days) and you get a useful gift as a memento.

This is the chance to enjoy some ham hospitality in the Wide Bay and catch up with old friends.

The catering is being done by the local Variety Club to support their charity work and a selection of new and pre-loved goods will be available. If you wish to have a shack clear out and raise some funds, come along and take a table for 1 or both days. Tables are free!

You are invited to join us over the two days and see VK100WIA in operation. Next week's news will be relayed from the site by Kathy, VK4KJ, and the VK4MB broadcast team.

We'd love to eyeball you for a rag chew. For MERG, I'm Geoff, VK4ZPP.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au

Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from the Rockhampton and District Amateur Radio Club,
I'm Les VK4VIL reporting.

Well, it's official! The President is coming to Rockhampton!

The Radar club is ecstatic to advise that Michael Owen VK3KI, WIA National President is visiting Rockhampton on 14th and 15th of November to meet State radio club representatives at the Queensland President Luncheon as well as inspecting RADAR club facilities, all part of the WIA Centennial celebrations.

At this time, plans are already well advanced and invitations to amateurs from clubs will be forwarded shortly, when the agenda is finalized.

Michael will have a busy schedule, arriving at Rockhampton at 11am on Sunday and immediately inspecting the radio club facility, including the radio museum, at the Regional Council's Heritage Village.
Amateurs and families will gather at the Village about 9am for the WIA News and QNEWS broadcast on 146.700 Megahertz. The RADAR club will provide morning tea for visitors.
All are welcome to visit the radio museum and also many of the village's other attractions if desired.

Michael will then be attending the Queensland President's Lunch commencing at 1pm, with social gathering expected to last well into the afternoon.
Arrangements are being made for Michael to meet with local dignitaries, particularly those associated with the Village on Monday morning prior to leaving Rockhampton for Melbourne, mid afternoon.
A visit to nearby Mount Archer, where VK4RAR repeater resides, a mere 15 minute drive, will be arranged if time permits. Magnificent views if the weather is kind.

For Queensland members keen to attend the President's lunch and perhaps use the opportunity to take in what the region has to offer, RADAR Club Secretary, Clive VK4ACC is keen to assist with information.
Note. November is a great time for a holiday here.

Please contact Clive by email, 4kvacc@wia.org.au or phone on 0429632815.

If you've missed the contact details, check out web site radarclub.org.au or VK4WIR on QRZ.com

We'd love to have you attend.

I'm Les, VK4VIL, on behalf or the Rockhampton and District Amateur Radio Club.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

Last weekend saw six TREC members provide checkpoint control and communication support for the Far North Equestrian Riders Association. The 3 day event was staged at Wondecla on the southern Atherton Tablelands in reasonably fine weather. The event went off well and there were no serious incidents.

Two metres (Ch.50) was the main frequency used with the VK4RTA repeater being available for a secondary frequency if needed.

TREC has a social morning (show and tell) followed by a management committee meeting on Saturday the 23rd October starting at 1000 hrs.

This has been Dale VK4DMC and you are listening to the WIA news.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

FOUNDATION COURSE - NEW LICENSES.

Congrats to these successful candidates.

James Duff and Rejane Belanger, presently in the Coffs Harbour area.

Lyle VK2FCVI and Josh VK2FJDH who have been issued their callsigns.

Would you like YOUR name called out as a new ham?

Well if you are listening in Central West VK2, next Weekend around 9 October there are to be exam assessments conducted at Dunedoo, that's NEXT weekend!.

The Orana Region Amateur Radio Club, in conjunction with ARNSW are providing the exams.

Dunedoo is about an hours drive north east from Dubbo or an hour north of Mudgee or a couple of hours south of Gunnedah.

To register or obtain more details contact Ken Westerman VK2AGW at Dunedoo 02 63 75 13 47, Reg Hawkins VK2TRH Dubbo on 02 68 82 43 54
or Brain Kelly VK2WBK from Tamworth on 0400 445 829.

If you missed the phone numbers they can be obtained from the text edition of this bulletin best read at wia.org.au

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

New Zealand's Government has announced that the switchover to digital television will be completed by 2013. The switchover will follow a phased four step process,
beginning with Hawkes Bay and the West Coast, followed by the remainder of the South Island, the lower North Island, and finally the remainder of the North Island.

The ZL Government is also in discussion with the television broadcasting industry and transmission providers regarding an extension to the digital terrestrial television coverage area, to support the switchover process.

The switchover to digital TV will free up the radio spectrum in the 700 MHz band for new uses, most likely to be new mobile broadband services.

MED is working on the planning and allocation issues for this band, and expects to release a consultation document in mid 2011.

Where have South African technologists gone?

That's a question being put by Hannes Coetzee, ZS6BZP, a technologist and a member of the Board of Trustees of SAARDT. Hannes was one of the principle architects of the Amateur Radio payload on SumbandilaSat.

Hannes finds it difficult to believe that only overseas entries have been received in South Africa for their Innovation in Radio Competition.

'Innovation in Amateur Radio' is an eighteen-month, South African project, aimed at promoting innovation in Amateur Radio. "While Amateur Radio is one of the oldest and still the most rewarding of all the scientific hobbies, there comes a time when one has to look at innovation, new ideas and new technologies to keep the activities relevant and exciting".

Read more about it on www.amateurradio.org.za

CALIFORNIA STATION LOOSES GROUND!

For the second time in two years copper thieves have kicked the Butte Broadcasting Company's KKXX AM transmitter site in California.

According to the Oroville Mercury Register, this time the thieves made of with about 22,000 feet of Number 10 wire from the ground system, which was apparently bundled into lengths of 10 to 20 feet and then carted away.

The Station manager said the transmitter was able to remain on the air. Thieves left just enough wire for the ground system to allow the station to continue to broadcast.

After the first wire theft in 2008, copper grounding wires were replaced and a concrete footing was poured about every 10 to 15 feet along the length of the wire in hopes of discouraging future thefts. However this time, thieves cut and removed the wires between the concrete.

According to a scrap copper website, with the worlds economy still not very stable, that kind of wire is only is fetching between $1.00 and $3.00 a pound. So the thieves went to a lot of work and risked their lives to get very little in return.

LIGHTS GO OUT AS GE CLOSE ITS LAST INCANDESCENT US LAMP FACTORY

The General Electric Company is closing its last incandescent light bulb factory in the United States, this, to comply with the US Energy Independence and Security Act of 2007.

According to news reports, the resulting savings in energy and greenhouse-gas emissions are expected to be immense.

But the move also had unintended consequences.

Rather than setting off a long predicted surge in the domestic manufacture of replacement lights such as Compact Fluorescents, many are already being manufactured overseas. Most come from China and are assembled at a low cost that domestic manufacturers both here and in the US cannot match.

NEWS FROM ARNEWSLINE

SBE FINDS ARCO COMMERCIAL TRIPS
EAS DECODERS AT RADIO STATIONS

British Petroleum has pulled an ad for subsidiary Arco that used what sounded like Emergency Activation or EAS tones. This, after members of the Society of Broadcast Engineers EAS Committee and participants in SBE's EAS Exchange identified a radio commercial as the source of unexpected triggering of EAS alert receivers.

The commercial started with effects that sounded like a shortened EAS header tone followed by the spoken phrase, "The following alert is from ARCO." The EAS like headers were partial, but contained enough information to mimic the start of an real EAS header, because it used the proper frequencies and data rate. When this commercial was played by a station that is being monitored as a local EAS source, it may cause some decoder equipment to un-mute and print a partial message.

For those not aware of how EAS messages work while the internal monitor speaker is un-muted, the alert is not relayed by the EAS unit on the monitoring station. Although the problem will only affect stations that both monitor a station that airs the ARCO commercial material and that have a particular type of EAS equipment, the SBE had recommended fpr stations check the affected commercial material.

It should be noted that the existence of EAS header data in this commercial might be considered an FCC violation when aired. Regulation 11.45 says that no person may transmit or cause to transmit the EAS codes or Attention Signal, or a recording or simulation thereof, in any circumstance other than in an actual National, State or Local Area emergency or authorized test of the EAS system.

Though the spot did not use actual EAS tones ad
agency Ogilvy and Mather Worldwide which created
the commercial stated it regretted confusion the
spot may have caused. F

WEIRD AND WONDERFUL

SOME FIREFLIES DO GLOW TO MATE

For decades, scientists have speculated about why some fireflies exhibit synchronous flashing in which large groups produce rhythmic, repeated flashes in unison. At times enough to light up an entire forest at once. Now, the first experiments on the function of this phenomenon suggest that synchronous flashing preserves female fireflies' recognition of suitable mates.

To reach this conclusion, researchers collected females of the synchronous species from the Smoky Mountains National Park in Tennessee. In the laboratory, they exposed the females to groups of light-emitting diodes meant to mimic male fireflies. Each individual LED produced the species-specific pattern of flashes for type of fly but the experimenters varied the degree to which the flashes were in synch with one another.

Their conclusion is that Fireflies which are actually a type of beetle produce bioluminescence as a mating tool. One in which males display a species-specific pattern of flashes while cruising" through the air looking for females. These patterns consist of one or more flashes followed by a characteristic pause, during which female fireflies, perched on leaves or branches, will produce a single response flash if they spot a suitable male.

Of the roughly 2,000 species of fireflies around the world, scientists estimate that only about 1 percent synchronize their flashes over large areas.

Peter Harding VK4OD the RD Contest Manager, advises that on the WIA Website in the RD Contest page, he has placed the provisional Scores from this year's

contest, these will remain here unless they require any changes before being published in the December/ January AR Magazine.

If you have any queries with the scores please contact Peter at
vk4od@wia.org.au
before the end of October.

NZART Straight Key Night.

Polish and lubricate that old Morse key and enjoy an evening of old time radio fun. This is an activity night in which everyone can be a winner with a certificate to prove it. Don't miss it on Sunday 7 November 2010, 2000-2300 NZDT.

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

Saturday 25th September 2010 bought the 1111th edition of the Stone the Crows net. The net was run by Ted VK2UI and had 11 operators on the net which went from 0600 till 0700.

(Richard Osborne. O.A.M. VK2FRKO)

Countdown to The Spratlys

With 100 days to go before DX0DX hits the ham radio bands there is mounting interest in making contact with the DX Special Entity, The Spratlys, over three weeks 6-24 January 2011.

DXpedition Team Leader, Chris Dimitrijevic VK3FY - DU8/VK3FY said with equipment starting to arrive in the Philippines including the Titanex V160E vertical the excitement is mounting.

Currently 31 operators are confirmed while a number of positions are still

available should any DX operator wish to join the team.

The authority given to the DXpedition permits a maximum of 30 operators on the island at the same time.

With the DXpeditioners assigned to three separate groups for different durations, the total number can exceed 30.

The DXpedition medical doctors are making a humanitarian contribution to the island.

This is acknowledged in a 'Certificate of prior approval and consent' from

the Municipality of Kalayaan.

The Mayor Eugenio B. Bito-Onon Jr, who is very welcoming of the DXpedition and states on the Certificate "The Municipality of Kalayaan is

also in favour of the humanitarian medical mission, to provide medical check-up of all the island's inhabitants."

Beach survey for The Spratlys DXpedition

The destination of Thitu Island for DX0DX for the three weeks 6-24 January 2011 has changed shape in recent years under the ravages of sea erosion.

The Station Layout Coordinator David Collingham K3LP, is awaiting the results of a new photographic high-tide survey of the latest beach conditions where the various operating camps are to be relocated.

The DX0DX.Net website online survey has 160m as the most desired band for this top forty wanted DX entity.

A TITANEX V160E vertical with a minimum of 32 radials will be erected for that band right on the beach.

The 80m band is also highly sought after and two independent 4-square antenna arrays will be used.

The survey also has CW remaining in the highest demand, with SSB and RTTY a steady in second and third place respectively.

PSK31 has 7% of the votes which although low will still yield thousands of contacts.

The recently announced addition of moon bounce to DX0DX also has the EME exponents thinking about the possibilities.

(Jim Linton VK3PC - Public Affairs DX0DX www.dx0dx.net)

ARRL AWARDS COMMITTEE STATEMENT ON DISSOLUTION OF THE NETHERLANDS ANTILLES

To clarify the administrative process by which the anticipated changes to the two existing Netherlands Antilles DXCC entities will be made, the ARRL Awards Committee has determined that at 04:00 Z (12:00 a.m. local time in the islands) on 10 October 2010, the two Netherland Antilles DXCC entities will be deleted.

Commencing at 04:00 Z (12:00 a.m. local time) on 10 October 2010, operation from islands of Curacao, Bonaire, St Maarten, Saba, and St Eustatius will count for a yet to be determined number of new entities under the DXCC List Criteria, and Political Entities, Rule 1 and/or Rule 2 Geographic Separation Entities.

When the Awards Committee determines what Rule 1 or Rule 2 actions apply, it will announce the final disposition of the entities on the DXCC list.

The DXCC desk will not accept confirmations for these new entities until after 1 January 2011.

Due to the passing of my friend & QSL Manager Neil VK6NE who will be sadly missed I now have a new QSL Manager who is Tim M0URX.

WIRELESS WEATHER

NEW EUROPEAN SYSTEM GIVES WARNING OF SOLAR STORMS

Researchers at the University of Bradford located in the United Kingdom say that a new method of predicting solar storms that could help to avoid widespread power and communications blackouts has been launched. Amateur Radio Newslines Norm Seeley, KI7UP, says that up to now, solar weather prediction has been done manually with experts looking at 2 dimensional satellite images of the sun and assessing the likelihood of future activity.

But a team from the university's Centre for Visual Computing has created the first online automated prediction system using 3D images generated from the Solar and Heliospheric Observatory or SOHO satellite.

Already in use by both NASA and the European Space Agency, the Bradford Automated Solar Activity Prediction system also known by the acronym ASAP identifies and classifies sun spots and then feeds this information through a model which can predict the likelihood of solar flares. The system is able to accurately predict a solar flare six hours in advance and the team is working to achieve a similar accuracy for the prediction of major solar eruptions in the near future.

Solar storms involve the release of huge amounts of hot gas and magnetic forces from the surface of the sun into space at around a million miles an hour. The next major solar storms are expected in 2012-13 as part of the sun's 11-year weather cycle. A 2008 US National Academy of Sciences report estimated that modern reliance on electronics and satellite communications means a major storm could cause twenty times more economic damage than Hurricane Katrina.

Although major solar eruptions and coronal mass ejections normally take several days to reach the Earth, the largest recorded in 1859 took only eighteen hours. Solar flares which can also cause significant disruption to communications systems take just a few minutes. Because of this, advance warning is of vital importance to enable steps to be taken to avoid the worst effects of such solar activity.

Data recovered from the system is on-line at the European Spaceweather website

AUSTRALIAN GEOGRAPHICAL RADIO FREQUENCY MAP.
http://spench.net/drupal/software/rfmap

The Australian Geographical Radio Frequency Map (RF Map) is a site that overlays all registered RF transmitters on top of Google Maps.
It is still under development, but works as a proof-of-concept.

Currently generic antenna sites are shown with the red RF icon, while mobile base stations are represented by the carrier that operates from the site (often multiple carriers do, but currently the first is chosen when determining

the icon). A mouse-over will give you the site's description, and a click will tell you who broadcasts from there, and at what frequencies.

Much more is to come...

Although people by-and-large won't be terribly interested in the positions of every antenna in the country, they might be interested in checking how close they are to their nearest mobile base station, how good a carrier's coverage is in a particular area, and for prospective spectrum purchasers to assess possible interference, etc. However, having said all that, it is primarily in the ham spirit.

Here is every transmitter site cached in the database, which is fully searchable from the web interface by location, site name, client details, frequency range, emission designator and callsign:

MEDIA WATCH

www.cq-amateur-radio.com/WorldRadio.html

A look at Amateur Radio magazine for October

There's plenty of interesting reading, including wonderful coverage of this Year's record breaking International Lighthouse and Lightship Weekend.

Turning to page 10 now, a good discussion article by Ted Thrift VK2ARA on how to prepare for the written theory assessment, plus tips on how to answer questions. This is ideal both for Foundation Licensees wishing to upgrade, and class instructors.

The cover story: 'Our inaugural national day of amateur radio Promotion? which is written by Jim Linton VK3PC who sets the scene for the Tune-In To The World - amateur radio gets people talking, public relations field day event.

Bob Bristow VK6POP has a timely article about the Jamboree On The Air. We have the ALARA 35th Birthday, plus the regular columns on DX, Short Wave Listening, VHF/UHF and Microwave ...including a new distance record achievement.

Amateur Radio magazine, a WIA membership service, with copies also available at selected newsagents.

WW SPECIAL INTEREST GROUP --- NAVAL

Special Event GB50RN - reminder

The Royal Naval Amateur Radio Society continues to celebrate its 50th
anniversary this year. The special event callsign GB50RN is operational
now until the 9th October 2010.

CW and SSB on the HF and WARC bands from 80 metres to 10 metres.
HF Frequencies used will be the Society's meeting frequencies:

CW: 3520, 7020, 10118, 14052, 18087, 21052, 24897, 28052
SSB: 3740, 7055, 14335 (or 14294), 18150, 21360, 28940

GB50RNARS continues to be aired by members of the Society from various
locations in the UK.

A special Anniversary award is available to listeners and licensed amateurs
who hear or contact RNARS members and the special event stations during 2010.

Full details can be found on the society web site at: www.rnars.org.uk

CALLING FREQUENCIES
Please QSY off the calling frequency after establishing communication.

Australian voice calling frequencies:
3.650, 7.090, 14.190, 21.190, 28.590, 52.160

World CW calling frequencies:
3.570, 7.030, 14.060, 18.080, 21.140, 24.910, 28.180, 50.160

World voice calling frequencies:
3.690 & 3.940 MHz, 7.090 & 7.190, 14.290, 18.140, 21.360,
24.960, 28.390, 50.160

Calling frequencies for Slow Scan TV (SSTV):
3.630, 7.033, 14.227

Calling Frequencies for PSK31
14.070

Special JOTA-cluster

One of the issues when supporting scouting groups, is finding another JOTA station on the amateur radio bands even though the frequencies are available on the scout web pages (and here when you read this weeks news at wia.org.au

BUT now you can also triple check on the cluster
at pi4raz.nl port 7300

The cluster will be available for scouting purposes all year round.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

WICEN NSW reminds us that the Bush Walkers Rescue Service is running a 4 day Comprehensive Remote Area First Aid course over the weekends of the 9th & 10th AND the 23rd & 24th of October.

It is VETAB accredited, so can be used in the workplace, as well as WICEN and rescue situations.

Details can be found at: www.bwrs.org.au

The Burlingame Neighbourhood Network has invited those interested in emergency preparedness in the USA to hear from some of the first emergency responders to the San Bruno pipeline explosion at the next quarterly meeting.

(9 a.m. Saturday, Oct. 9)

The meeting will highlight the role that amateur radio operators play during disasters.

Three local amateur radio experts who responded to the crisis within an hour will explain the role they played in the San Bruno incident. Dan Bennett of the San Mateo County Sheriff's Office and Gary Vielbaum, who leads the Sheriff's Communications Unit, will give an overview of what amateur radio is and how it fits into CERT, Red Cross and local government during a disaster.

Ross Peterson, assistant leader of the Sheriff's Communications Unit, will explain how you can become certified as an amateur radio operator at a one-day course.

SARL NEWS - SUNDAY 3 OCTOBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

ICASA PUBLISHED DRAFT RADIO REGULATIONS FOR COMMENT

SA AMSAT TO PRESENT AT SPACE CONGRESS

ESSAY COMPETITION TO CELEBRATE SPACE WEEK

SARL TO PETITION ICASA FOR SPECTRUM AROUND 5 MHz

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

ICASA PUBLISHED DRAFT RADIO REGULATIONS FOR COMMENT

ICASA has published the draft radio regulations in the Government Gazette number 33 590 of 26 September 2010. The Gazette is available for download from the members only section on www.sarl.org.za, click on members.

Comment are invited to be sent to ICASA before 19 November 2010.

There are some significant changes to regulations pertaining to amateur radio. The SARL will study the draft and will hold a discussion during the President's net to be held on Sunday 17 October 2010 at 19:30.

Some of the major changes are: the ZR licence will disappear and with that the requirements for one of the five upgrade criteria. Persons having passed the Class A examination will be allocated a ZS callsign.

The SARL will discuss with ICASA at the next liaison meeting the procedure for ZR's to upgrade to ZS.

There will be an age restriction on the class B license. The Class B licence will be available to persons under the age of 20. ZU licence holders are expected to write the class A examination before they reach 25 after which the Class B license (ZU) will be cancelled.

ICASA will be holding a public hearing on 1 and 2 December 2010. Soon after that the final regulations will be promulgated.

You are invited to send any comment before 10 October to armi@sarl.org.za.

SA AMSAT TO PRESENT AT SPACE CONGRESS

SA AMSAT will present a paper at the first Annual South African Space Congress

to be held in Cape Town at the SA Astronomical Observatory on 7 and 8 October 2010.

The paper entitled "Amateur Radio's significant contribution to satellite communication" will trace the many facets of Amateur Radio's involvement in space. In brief, the story of Amateur Radio and satellites is in a way a repeat of when radio was first invented. In the early 1900 Radio Amateurs pioneered the use of short waves for world-wide communication, in 1961 Radio Amateurs proved the value of low earth satellite orbits. Against this background the paper will review the major contributions made by Amateur Radio to satellite communication and focus on some of the current projects both world-wide and in South Africa. The paper will also touch on other space related activities such as SETI and Radio Telescopes. The paper will be presented by Hans van de Groenendaal, ZS6AKV, and will be available for download from www.amsatsa.org after the event.

ESSAY COMPETITION TO CELEBRATE SPACE WEEK

The Southern African Amateur Radio Satellite Association in co-operation with the South African Amateur Radio Development Trust has launched an essay competition to celebrate the 2010 International Space Week.

The theme for World Space Week 2010, which runs from 4 - 10 October, is "Mysteries of the Cosmos". Throughout history, humans have looked to the heavens and wondered about the universe and our place within it. Today, we are learning much about our universe but, with each answer comes more questions. Not only do the questions deal with the nature of the galaxies and stars, but the nature of life itself. World Space Week is a time to probe what we know, what it means, and what we have yet to learn about the mysteries of the cosmos. It is an International Celebration of Science and Technology.

The essay competition is open to all learners under the age of 18. The subject for the Essay is "If you were an astronaut on the international space station, what experiment would you like to carry out and why?". Entries must be between 600 and 1 000 words. The first prize is an Acer

Aspire 1 Netbook with several consolation prizes. Entries close on 15 December 2010. Get full details on www.amsatsa,org.za.

DATA CAPTURING EQUIPMENT FOR STUDENT EXPERIMENTS SUCCESSFULLY TESTED ON LAST WEEKEND'S HABEX BALLOON PROJECT

Last Saturday's launch of the High Altitude Experiment involving tests of the various equipment that has been designed and built to capture data from the student's projects and relay this back to ground, was a success despite some small hitches. Ancillary equipment to track the balloon and Radio Amateur experiments were also included.

Although there were issues with the launch, the main purpose of the exercise was to ensure the controller worked as required. The controller needed to be able to track itself, take measurements which included battery voltage, inside and outside air temperature and barometric pressure readings and to finally activate a release mechanism to detach itself from the balloon and return back to earth.

The project started as a Sci-Bono Discovery Centre and Radio amateur project in co-operation with the Gauteng Department of Education. An invite was sent to schools in the Gauteng area inviting interested students wishing to build experiments that could be taken into the sky via balloons to enter. 10 schools volunteered.

For more on this story visit www.hamradio.org.za.

SARL TO PETITION ICASA FOR SPECTRUM AROUND 5 MHz

This coming week the SARL will submit a petition to ICASA to consider an amateur radio allocation around 5 MHz. The original document has been updated with more propagation research carried out by Ean Retief, ZS1PR. The subject will also be placed on the November ICASA/SARL liaison committee meeting for further discussion. Members will be able to download the document from www.sarl.org.za on the members' only section.

JOIN A VERY LOW FREQUENCY PROJECT

With access to the new VLF spectrum of 135,7 - 137,8 kHz imminent, Hannes Coetzee of the South African Amateur Radio Development Trust invites radio amateurs to participate in a VLF project. If you have ideas and are interested send your details to saardt@intekom.co.za. Mark the subject line VLF. Your name will be added to a database of interested persons and once the regulations are published, you will be provided with the details of the project.

SINES CAPE LIGHTHOUSE ON THE AIR

For DX hunters the Sines Cape Lighthouse, grid IM57nx, will be on the air October 9 from 09:00 to 19:00 UTC under the call sign CS2FCS with CW and SSB on the non WARC frequencies.

More information is available from
http://wlol.arlhs.com/lighthouse/POR8.html and
http://www.unc.edu/~rowlett/lighthouse/prt.htm.

FORMATION OF LONGTOM RADIO AMATEUR CLUB

At a meeting held on Saturday 28 August 2010 at Lydenburg the Longtom Radio Amateur Club was established.

The object of the club is: to promote and encourage all direct and indirect activities pertaining to Amateur Radio as exercised by the club members; to promote and encourage interest in Amateur Radio and all its facets in the Lydenburg and surrounding community and; to promote the aims and goals of the SARL.

The first management committee was chosen as follows: Chairman: Theo van Wyk, ZS6RED; Vice chairman: Nolene Smit, ZU6NS; Secretary and Treasurer: Gabri&#65533;l Joubert, ZS6BJ.

A constitution has been drawn up and has been accepted. For further information please contact the secretary, Gabriel Joubert - ZS6BJ, at 082 793 2070 or via e-mail at zs06bj@gmail.com.

Welcome the new Club and may you have a prosperous future.

EAST RAND RADIO BRANCH NEW COMMITTEE

ZR6COI, Francois Jacobs, Chairman; ZS6MGM, Marius Mynhardt, Vice Chairman & Youth Manager; ZS6HE, Andre van Tonder, Honorary Treasurer; ZR6POP, Judy Pretorius, Secretary; ZS6COG, Chris Gryffenberg, Repeater custodian; ZS6HJF, Hampie Findt, Repeater custodian (Technical); ZS6BNM & ZS6MRG, Brain & Margolet McKenzie, Special projects; ZS6VIN, Vincent Molloy, News bulletins; ZU6RDP, Rijnhardt Kotze, News bulletins; ZS6YH, Mitchel Mynhardt, QSL manager; Deidre Kotze, Special events.

Thanks to the retiring committee members and a prosperous year to the new committee.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 109 remains a good sized sunspot and is beginning to take on a different shape. Sunspot 1 110 appears to be shrinking somewhat. The possibility for a C-Class flare remains. Sunspot 1 111 which is located towards the eastern limb remains small and quiet. The solar flux has peaked above 90 for the first time since March 13, 2010. The effective sunspot number is expected to be less than 20 for this week.

20 m will provide the best opportunities for DX followed by 15 and 10 m. Conditions to India will be good from the afternoon till after sunset. During the afternoon conditions will be good towards Europe firstly on 10 m, later followed by good 15 and then 20 m openings. Early evening 15 m contacts with the USA are at last happening again. Contacts with Australia and New Zealand are possible at sunrise on 20 m

and on 40 m after sunset. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the work horse for contacts around the country with 20 and 30-m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

9 October - Pretoria ARC Flea Market at Pretoria Motor Club in Silverton from 08:00. Contact Almero, ZS6LDP, on 083 938 8955; 9-10 - October Antique Wireless Association AM/SSB Valve QSO Party; 10 October - Last day to submit comments on draft radio regulations to armi@sarl.org.za; 15 October - Last day to enter your photos taken at "Take your hand-held to Work Day"; 17 October - President's Net at 19:30 on draft radio regulations.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE. Thank you for listening, 73.

/EX

FMTAG NOTES FOR OCTOBER 2010
PROPOSALS
Branch 33 Rotorua has applied for a 2 metre APRS Digipeater at Makatiti Dome, Topo50 map reference BH38 038.75 730.97. An engineering evaluation confirms that there will be no interference to other stations and that the transmit and receive frequency will be 144.575 MHz.
FINAL RECOMMENDATIONS TO NZART COUNCIL
Branch 26 Nelson has applied to relocate its 890 repeater to Fringed Hill North, Topo50 map reference BQ26 265.95 270.15. An engineering evaluation confirms that there will be no interference to other stations and that the repeater transmit frequency can remain on 438.900 MHz and the repeater receive frequency can remain on 433.900 MHz.
Branch 71 Rodney has applied to relocate its 730 repeater to Moirs Hill Road, Topo50 map reference AZ31 475.39 625.68. An engineering evaluation confirms that there will be no interference to other stations and that the repeater transmit frequency can remain on 147.300 MHz and the repeater receive frequency can remain on 147.900 MHz.
COMMENTS AND APPLICATIONS
Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to:
fmtag@nzart.org.nz
Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available at:
http://www.nzart.org.nz/fmtag/index.html
Completed forms should be sent by e-mail to:
fmtag@nzart.org.nz
END

Major Amateur Radio Survey Launched by RSGB
At the National Hamfest in Newark over the weekend 1 and 2 October, the Radio Society of Great Britain will launch a major survey of all UK radio amateurs. The objective of the survey is to gather as much information as possible on 21st century amateur radio operation in the UK. The survey, which is internet based, will run for three months and the data collected will be used to determine the direction that amateur radio takes over the next 10 to 20 years. Full details of the survey will shortly appear in all elements of the amateur radio press, notices of invitation will be placed on all amateur radio reflectors and the RSGB website. If you want your opinions to be noted, please take part.

****

2010 Oceania DX Contest
A reminder that the 2010 Oceania DX contest will liven up the HF bands over the next two weekends.

The aim of the contest is to promote HF contacts with stations in the
Oceania region. We are expecting a good turn out from VK, ZL and YB
stations, as well as stations from some of the rarer South Pacific entities.
Note that Oceania stations can work other Oceania and non-Oceania stations.
Non-Oceania stations can only work Oceania stations.
http://www.oceaniadxcontest.com/rules.pdf
73 and we look forward to seeing you in the pile ups!
Oceania DX Contest Committee

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 3rd October 2010

IRTS Committee Meeting

The Next IRTS Committee meeting will be held at 11am on Saturday 9th of October in the Maldron Hotel Portlaoise. IRTS would like to invite affiliated club reps to attend.

Continued Church Broadcasts on 10m

Ger EI4GXB our IARUMS coordinator would like to ask amateurs & SWL's please keep a listening watch around 28.265 FM as there have been incursions by churches on this frequency heard throughout Europe at up to 59 +20db. Recently there has also been a Church in the Dublin area transmitting on 28.030 in the CW portion of the band.

Please send details of names etc used so we can try to identify locations and report them to ComReg for investigation.

All information can be sent to Ger McNamara EI4GXB who is the IRTS IARUMS coordinator at ei4gxb /at/ gmail / com or by phone to 087 2532512.

WAI Activity on 80m

Last Sunday there was a lot of WAI activity on 3.680MHz after the Nuacht as Gaeilge. There were 2 mobile stations out making squares available. Declan EI9HQ/m was active in Co. Wicklow and Noel EI6HW/m was active in Co Westmeath and Co. Offaly.

Paddy EI7GK in Wicklow was net controller. Stations taking part were George GI4SRQ, in Co. Armagh, Mike EI2EO in Co. Galway, Peter EI4HX in co. Louth, Eddie EI3FFB in Co. Tipperary, EI2LRC/p were activating Bunratty Castle in Co. Clare (Operator Dave), Jimmy EI8FC in Co Limerick, Brendan EI0CZ in Co. Clare and Rodney EI2KD in Donegal.

The net ran from midday till 15.30 local. All stations exchanged signal reports, WAI squares Counties and book numbers.

The Galway VHF Group sponsors the Certificates and manages the awards.

Stations calling into the radio news are encouraged to give their WAI square as well as the report.

Irish Amateur Achieves 10 Band DXCC

Congratulations to Dave Deane EI9FBB who just received notification from the ARRL DXCC desk that he now holds credit for obtaining 10 band DXCC.(160M -6M)

Dave is the first EI to obtain DXCC across 10 bands. Dave has only been qrv on HF for about 6 Years & has achieved more than most Hams in a Lifetime of working DX, Well done Dave.

DAR News

Currently there are classes being scheduled for Theory Classes at Dundalk Amateur Radio Society Please contact Tony EI4DIB at ei4dib /at/ ei7dar.com or via text to 086 4066660.

DAR has also begun live Morse tuition on Tuesday nights commencing at 20:40 on 145.400 If the tuition nights become a success DAR may eventually QSY to the Dundalk 2m repeater, giving National and International coverage with the Repeater linked for live streaming on the Internet.

The idea is to send some Morse at a slow and easy pace with good gaps between words. It is hoped to help those of you who are just starting out and those that want to sharpen up. So please tune in to 145.400 with pen and paper at the ready.

The 4m (70 MHz) band is growing in the north east and Tony EI4DIB would like to suggest a 4m activity night which would start after the IRTS news on a Monday night, 8:30pm approx.

It is suggested that stations who have 4m to QSY to 145.400 MHz and 70.400 MHz (FM), after the news call ins on the DAR Repeater. Anybody wanting to do a test on 4m can call out on 2m to arrange a test. Do not worry if your 4m radio does not have 70.400 MHz as we can QSY to your frequency.

The next meeting of the Society will be held at 8.30pm this coming Wednesday the 6th October at the clubhouse in Dundalk. All are very welcome to attend.

More info is available on the DAR website at www.ei7dar.com

Amateur Radio Licence Study Group

Michael EI2GKB is starting a study group in the Naas Newbridge and Kildare area, for further details Michael can be contacted by mobile on 087 2481970 or via email miklef /at/ oceanfree.net

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th-September, through Sunday, 3rd-October there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VP2V, VP6, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4F, PHILIPPINES. Well known AM radio talk show host of the "Coast to Coast", Art Bell, W6OBB, was recently heard as 4F1AB from Manila, where he now lives. Activity was on 20 and 15 meters SSB after 1200z. Info on QRZ.com states that he is active on 40-10 meters, and he listens to 14315 kHz. QSL via his Nevada address.

4X, ISRAEL (WFF Op). Members of the Holy Land DX Group will activate Israel's Qumran National Park, October 8-9th, starting on Friday at 0700z and ending on Saturday at 1200z. Operators mentioned are: Shalom/4Z4BS, Mark/4Z4KX, Ilya/4Z1UF, Vadim/4X4FJ, Ruben/4Z5FI, Yulik/4X6HP, Ros/4Z5LA and Jan/4X1VF. They plan to operate from two WFF locations (activated for the first time ever) using two different callsigns:
4X0WFF - Main Station Cumran (4XFF-030, Holy Land Square M18YN); running
two stations CW and SSB on the WFF frequencies.
4X0WFF/M - Second Mobile station in Ein Gedi National Reserve (4XFF-016, Holy Land L21BS). They will operate SSB on 14265 kHz; the
Holy Land Mobile frequency.

QSL cards will be handled by Malik, 4X4JU, Israel's WFF Award Manager. They will also operate from several attractive squares for the Holy Land program as well (L19YN, L20YN and L20BL). Israel's Qumran National Parks has a very long and interesting history. Visit the following Web site for more details at: http://www.bibleplaces.com/qumran.htm

4Z, ISRAEL (IARC News). Mark, 4Z4KX, IARC Contest Manager, reports that the 2010 Holyland Contest results are now published on the following Web page at: http://www.iarc.org/iarc/en/Main_Page

5Z, KENYA (Update). Sig, NV7E/ZS6SIG, who has now relocated from Pretoria, South Africa, to Nairobi, Kenya, is now signing 5Z4EE for the next four years. Sig originally had the 5Z4EE callsign back in the 1980s. Activity will be on all bands 160-10 meters. Look for Sig to be in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/Low-Power entry. Please QSL via NV7E or at the address shown for 5Z4EE on QRZ.com.

9M6, EAST MALAYSIA. Hideto, JF2QNM, will activate the Langkah Syabas Beach Resort Amateur Radio Club, 9M6LSC, during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power/Assisted entry. QSL via LoTW.

C6, BAHAMAS. Dr. Rick, NE8Z, will be active as C6AEZ from Nassau, New Providence Island (NA-001) between October 11-16th. Activity will be on 80-10 meters using CW and SSB. His rig will be a TS50s w/Outbacker antenna. QSL via NE8Z.

C9, MOZAMBIQUE (Update to OPDX.976). Operators Tony/G4LDL, David/GI4FUM, Daniel/ZS6JR and possibly a couple of other ZS operators will be active as C91WW during the CQWW DX SSB Contest (October 30-31st). Entry to TBD. QSL via GI4FUM.

CE3, CHILE. Operators Sergio/CE3WDH, Alfredo/CE3WDD, Carlos/CE1CRG and Danilo/XQ4CW will be active as CE3G during the CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry. QSL via CE3WDH.

CR3, MADEIRA ISLAND (AF-014). Members of the CT3 Madeira Contest Team will be active as CR3A during the CQWW DX CW Contest (November 27-28th) as a Multi-2 entry. QSL via CQ9K.

CR6, PORTUGAL (WFF Op). Members of the Algarve STAR DX Team will be active as CR6A from S. Lourenzo Fortress located inside Ria Formosa Natural Park (CTFF-07) between Armona Island and Culatra Island (EU-145). This Fortress is totally submerged except in the lower tides on the year as October 10th. Activity will be on all bands as possible on CW and SSB. QSL via CT1GFK. The Algarve STAR DX Team will be offering a "surprise gift" to all stations who contact them on October 10th, at 1010z. All information about the activity and the Fortress is available on: http://algarvedx.com

CY0, SABLE ISLAND (Update). Randy, N0TG, provides the following update on the upcoming Sable Island operation to take place between October 21-29th (edited): "All is in place for operation to begin the afternoon of October 21st. The team has noted the frequencies chosen by the various Caribbean operations. Even though our preferred frequencies have been posted on our Web and otherwise made known for a long time, there appears to be some over-lap. However, perhaps most of the operations will end on October 22nd. For those interested in CY0, we may need to adjust our frequencies on the fly, but eventually work our way back to the advertised frequencies. Thus, 'spots' posted as to our activity will be helpful and appreciated." The CY0 Web site is at: http://www.CY0dxpedition.com

D7, SOUTH KOREA. Members of the Cheonan-Asan Ham Club and possibly other guest operators will be active as D7G20 between October 29th and November 28th. Activity is to celebrate the G20 Summit in Seoul. The "20" nations during the summit try to work together to move the world beyond the financial crisis to balance and sustainable growth. For more details, see the Web page at: http://www.seoulsummit.kr
Operations by D7G20 are expected to be on 80-6 meters using CW, SSB and RTTY. QSL via: G20 Seoul Summit 2010 Special Callsign, P.O.Box 90, Cheonan, 330-600, South Korea.

EA8, CANARY ISLANDS (Update/Correction). Look for operators Jean/ON5JV and Georgette/ON6AK to be active as EA8/homecall from Tijoco Bajo, Tenerife Island (AF-004) between November 26th and February 23rd (2011). Activity will be on 40-10 meters during their evenings using CW and SSB. They plan to use an Icom IC-706MKIIG w/100 watts into a vertical 14AVQ and dipole. QSL via their home callsigns, by the Bureau or direct.

GT1, ISLE OF MAN. Members of the Isle of Man Amateur Radio Society (IOMARS) will be active as GT1IOM from the "TT Grandstand" in the town of Douglas (EU-116, WLOTA 0449, IO74se) between October 16-17th. Activity is taking place during the "53rd Scout Jamboree On The Air". QSL via GD1MIP. For more details, see QRZ.com.

HI, DOMINICAN REPUBLIC (IOTA Op). Jose, EA3GUO, will be active as HI3/EA3GUO and HI9/EA3GUO, from Hispaniola Island (NA-096) and Cayo Levantao Island (NA-122) respectively, between October 9-23rd. Activity will be active mainly on 20 meters SSB (watch 14260 kHz). QSL via his home callsign.

IOTA NEWS.....................
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (??) entry. QSL via eQSL.

NA-140. Rick, K8GI, was expected to be active as K8GI/3 from Middle Hooper Island (ARLHS USA-377), on October 3rd, between approx. 1300-2230z. Activity is on 17 meters SSB and PSK63, 20 meters SSB, PSK63 and RTTY. QSL via his home callsign, direct or by Bureau direct preferred. (All QSOs will be uploaded to LoTW as well.)

IR7, ITALY (WFF & IFF Op). Just a reminder that Fred, IK7JWX, will be active from several national parks and reserves as IR7WFF in the Provinces of Lecce (LE), Brindisi (BR), Taranto (TA) and "may be" Bari (BA) between now and December 31st. Activity will be on 7144 kHz and 14244 kHz. All these activations will count for the "Italian Flora Fauna" (IFF) and "World Flora Fauna" (WFF) awards. QSL via IK7JWX. See some pictures on QRZ.com by searching IR7WFF.

J3, GRENADA. Wade, AA8LL, will be active as J3/AA8LL from the main island of Grenada (NA-024) between October 28th and November 5th. Activity will be holiday style, but will include a Single-Op/High-Power entry in the CQWW DX SSB Contest (October 30-31st). Operations before and after the contest will be mostly on 30/17/12 meters using CW and RTTY. After the contest Wade plans to visit Carriacou (NA-147) for a possible small activation or a scouting visit for a future operation. QSL via AA8LL, direct, by the Bureau, or LoTW.

KH2, GUAM. Operators Kiyoshi/JA7RPC and Mitsuru/JH7DFZ will be active as KH2/JA7RPC and KH2/JH7DFZ between November 5-7th. QSL is OK via Bureau.

KH6BZF PROPAGATION FORECAST/REPORT (For October 4-10th)....
Oct 4 HN SOLAR REFERENCE KEYS
Oct 5 HN --------------------
Oct 6 HN-AN BN - Below Normal
Oct 7 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 8 AN LN - Low Normal
Oct 9 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 10 AN-HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

SPECIAL NOTE FROM LEE, KH6BZF: On "Radio Havana", there is an interesting DX and propagation program every Monday at 0600z on 6.010 MHz. Give it a listen.

KH6, HAWAII (USI Awards Program Special Event Op). Look for operators Yukon John/KL7JR and his XYL Claire/WL7MY to be on the northwest corner of Maui (HI-018S), October 24-31st, to continue with USI's 16th anniversary celebration. Activity will be on 20-10 meters SSB using the callsigns "N7I" or "KH6/KL7JR". Antennas will be "vertical dipoles" and "V beams" (MFJ's mobile antennas). These antennas performed well in the Yukon (see links 1 & 2 below) and he wants to see what they will do in Hawaii! QSL via KL7JR. Look for WL7MY's "USI: 16 Years on HF" story to appear in December's QST. For more info/details on the U.S. Island Award, go to: http://www.usislands.org
Antenna Links: 1) http://www.hamuniverse.com/kl7jrhorizminibeams.html 2) http://www.hamuniverse.com/kl7jrcbverticals.html

LA, NORWAY. Finnish operators Simo/OH2HAN and Timo/OH3DF will be active as LA/homecall from the Arctic Sea in Norway in the Village of Bug&#65533;ynes, a small fishing village, between October 15-18th. Activity will be on the HF bands using SSB and RTTY. Bug&#65533;ynes was establihed on/about the year 1850, when Finnish hunger refugees moved to Norway and started to fish in the Arctic Sea for their living. Bug&#65533;ynes village is very picturesque and situated on the coast of the Arctic Sea on Varanger Fjord on the northern most part of Norway. The village is nowadays famous for King Crab or Kamtshatka Crab - which they catch and sell world-wide. Travellers are welcome to visit the village and join the fishing boat to get their own fish and crabs from the Arctic Sea. A special QSL card will be available via their home callsigns. For more details about Bug&#65533;ynes, see: http://en.wikipedia.org/wiki/Bug%C3%B8ynes

OL5, CZECH REPUBLIC. Members of the Czech DIG (Diplom Interessen Gruppe) Section will activate their club callsign, OL5DIG, between now and October 31st. Operations will be from various locations and on various bands, but only on the Digital modes, especially BPSK with respect to improve their score on the European PSK Club award list. QSL info and other details are available on QRZ.com.

OR4, ANTARCTICA. Karel, ON5TN, will once again be staying at the Princess Elisabeth Station (WAP BEL-02) in the Antarctica between November 10th and February 24th (2011). He expects to be active again as OR4TN. However, upon his arrival a lot of work needs to be done at the base, and Karel expects to be active starting only in December. QSL via ON5TN. Updates on OR4TN can be found regularly on: http://www.qrz.com/db/or4tn
For more information about the Princess Elisabeth Station, go to: http://www.antarcticstation.org

P4, ARUBA. Bill, KE5OG, will be active as P40B in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (40m). QSL via KE5OG.

P4, ARUBA. Marty, W2CG, informs OPDX that he will once again be vacationing in Aruba (SA-036, WLOTA 0033) between January 10-24th, 2011. He states that he will be using the callsign P40CG, but will be staying at a different QTH on the island than his previous trips and is not sure of the operating conditions at this time. Marty states that he will be bringing with him a rig, w/tuner and a 33 ft. collapsible vertical. Operating time will be

limited, mostly during early evening hours before dinner. Activity will be on 80-10 meters, including 30/17/12 meters, using mainly CW, but will do SSB on request. All logs will be uploaded to LoTW, and he will also QSL 100%, direct or by the Bureau via his home callsign (USA stations please SASE). He doesn't use E-QSL.

PACIFIC DXPEDITIONS IN WORKS. Eddie, VK4AN, who is expected to be active once again as 3D2A from Navua Village on Viti Levu Island (OC-016) between October 27th and November 14th (see OPDX.976), announced this past week that he is in the planning stages for two Pacific DXpeditions for next year (2011). VK4AN is first organizing a Fiji (3D2) operation to possibly activate several rare Fiji IOTAs in early 2011. His second organized operation will be from Naura (C2) in mid-2011. Eddie is looking for experienced operators to join these operations. To contact him and his group, visit the Pacific DXer's Web page at: http://pacific-dxers.com

PJ4, BONAIRE. Operators Peter/PA8A, Fred/PA8F and Rob/PA3GVI will be active as PJ4N from Bonaire (SA-006, WLOTA L1279) starting at 0400z on October 10th through October 22nd. Activity will be on all bands using the regular DX frequencies, if not in use. QSL via PA8A (SAE+ 2 USDs). The following Web pages will be use during their operation to update, livestream video and log search:
Web Blog - http://sitekreator.com/pa3gvi/pj4b-weblog.html
Livestream - http://www.livestream.com/pj4b
Online Log - http://www.clublog.org/charts/?c&#65533;4b

PJ7, SINT MAARTEN. The following press release was sent out on September 29th, by Joe/W8GEX and Craig/K9CT (edited): "We are very happy to announce that we have received permission to use PJ7E call for our 10 day DXpedition. Our cargo has been picked up and is heading towards Sint Maarten. Our Web site <http://www.stmaarten2010.com> is constantly being updated by our Webmaster K6MM. We have also set up accounts on FaceBook - PJ7E, and a Twitter account - http://twitter.com/PJ7E. Updates will be posted on these accounts as things progress, and we encourage you to communicate with us via these links. In addition, if you wish to donate, you may do so by PayPal through the Web site, or to our treasurer Tom, N4XP, at his call book address. Once we are on the air, we plan to upload our logs twice daily, around 8 am and 8 pm. We hope to be active before 10-10-10 in case anyone needs PJ7 as a new one before it is deleted. We would then be operating as /PJ7."

QSL TM10HH to: Radio Club Didier Gaude, 100 Rue de Lille, 59200
Tourcoing,
FRANCE.

QSL 3V8SA and TS7TI via I8LWL. Activity was by Fred/IK7JWX and Ivo/9A3A
from Raf Raf City. Logs for TS7TI (Tunisia) and TS7TI/p (AF-091 and
AF-092) are now available online at: http://www.i8lwl.it

NEW QSL MANAGER. The North of Scotland Contest Group (GM7V and GZ7V)
has a new QSL Manager: Kim Larson, N3SL, 22 N Hidden Acres Drive,
Sioux City, Iowa 51108-8641 U.S.A. Please send all QSLs to N3SL, and
not to M0CMK.

Randy, W5UE, reports that QSLs for the 2010 CQWW DX RTTY and pre-contest
activity for HC8/K6AW will be via W5UE. For more info, see:
http://w5ue.net/qsl-w5ue.html

NEW QSL MANAGER. Hugo, K2DER, is now the New QSL Manager for the
following stations: WP3A, NP3X, KP2B and NQ2A. Send QSL card via
direct to info on QRZ.com.

NOT THE QSL MANAGER! Joey, W5TFW, reports that he is "NOT" the QSL
Manager for A92GR. Please check your data base. QSL A92GR via direct
(see QRZ.com).

K8YSE Lake Superior QSL card! John, K8YSE, reports that the "Lake
Superior Grid Expedition" QSL cards have been printed and have been
received from the printer. John expects to have some QSLs ready before
the AMSAT Symposium. If you worked John on his trip and plan to attend
the Symposium, please drop him an E-mail and he will bring the cards
to Chicago and give them to you in person. There will be 11 different
cards for the various locations. A picture of the Minnesota card is

on his Web site, papays.com/sat and QRZ.com. There were about 350 unique callsigns out of 2069 QSOs. John states, "This is a good indicator that it's not just a handful of stations that are operating on the birds. There is a growing interest in satellites and many of the newer operators are working towards their Satellite VUCC!"

QSL MW2I via WW2R. Activity was during the CQ WW DX RTTY Contest (September 25-26th).

NEW QSL MANAGER. Stuart, VK8NSB, reports that due to the passing of his friend and QSL Manager Neil, VK6NE (SK), [who will be sadly missed] he now has a new QSL Manager who is Tim, M0URX. Tim states, "New QSL cards will be available very soon. Please be patient while we print new cards. I have uploaded the log for VK8NSB onto my logsearch. QSL is direct via M0URX or Bureau via my "Online QSL Request Service. Any QSL cards already in the Bureau system will be rerouted." Tim's Blog page is at: http://www.m0urx.com

VB1H (NA-126) QSL STATUS. Nenad, VE3EXY, reports: "I received QSL cards from the printer and I am starting processing immediately. Expect something in your mail box in a week or two. Have not received any Bureau request outside Canada so far!"

QSLS VIA LoTW: 9M6DXX/P, CU3AN, GW0TKX, HG7T, HH2/HB9AMO, HP1/IZ6BRN, JY9QJ, KH6J, MW0AMW, PV8DX, PY3VK, TI2HAS, UN1L, VQ9LA and Z21BB

QSLS RECEIVED VIA MAIL: 3C0C, 3C9B, 4S7NE, 5V7DX, DU9/DL5SDF, JA1NLX/VK4, PR5D, PY2XB, R1ANB, RA9LI/0, T2A, VU2JOS, VU2PAI, XU7ACY and YU40ED

QSLS RECEIVED VIA THE BUREAU: 3V3S, 5Z4/DL8NBE 9A4W, 9M2/PG5M, 9X0R, A7/M0FGA, CE1W, CU2M, DH0GHU, E44M, HB9DHG, HC8L, HC8N, HK0GU, IY1TTM, J28JA, JY4NE, OX/EA4NA, S51WO, S58AL, S04R, UA2FCB, UA3DGG, TO8YY, TX5SPA, XR1H, XR7A, XR7W and ZK2V

S7, SEYCHELLES. Operators Nob/JA2AAU (S79AU), Iwao/JA2LSS (S79SS), Seiji/JA2ATE (S79TE) and Mori/JA2ZS will be active from Mahe Island (AF-024) between November 19-27th. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL via their home callsign, direct or by the Bureau.

TOP 40 BLOGS ON HAM RADIO. Sheryl Owen, informs OPDX that our readers might be interested in having a look at, "40 Top Blogs About Ham Radio" at: http://www.satellitedish.org/blog/2010/40-top-blogs-about-ham-radio

V7, MARSHAL ISLANDS (Update). Just a reminder that Yuri, N3QQ, will start his "one-man operation" first from Majuro (OC-029) on October 7th, then travel to Enewetak Atoll (OC-087) on October 9th. Activity from Enewetak will take place between October 12-15th. Operations from the uninhabited Ujelang Atoll (OC-278), which has never been activated before, will be between October 16-19th. Callsigns are: V73RRC for Ujelang Island and V73QQ for Enewetak and Majuro Island. Yuri plans to be active on 40-6 meters using CW and SSB. He will use an IC-7600 w/600w amp, vertical dipoles and a 1/4 wave for 40m. QSL via N7RO. For updates and more info, see: http://oc-278.ucoz.com

VC2, CANADA. Operators Noel/VE2BR and Gregg/VE3ZZ will once again be in this year's CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry using the special callsign VC2Z. Their QTH will be Mercier, Quebec (in Zone 5, Grid Loc FN35dh). QSL via VE2BR. Gregg states, "Tnx to all those who called us last year allowing us to take 1st place in Quebec (VE2)."

VK6, AUSTRALIA. Bernd, VK2IA, will be active as VK6AA during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via DL8YR. Activity will be in memory of Neil Penfold, VK6NE (SK), and from the Northern Corridor Radio Group's (VK6ANC) club station situated about 20 km north from the city center in Perth, Western Australia. See the station at: http://www.ncrg.org.au

VK9N, NORFOLK ISLAND. Operators Alan/VK3XPD, Kevin/VK4UH and Mike/VK3KH, will once again be active as VK9NA between January 7-21st, 2011. This is the same group that did a VHF, UHF and Microwave DXpedition earlier this year. More details are forthcoming, so look for details and updates at: http://www.vk9na.com/index.html

VK9X, CHRISTMAS ISLAND. A group of JA operators plan to take a DX holiday on Christmas Island (OC-002) between January 14-20th (2011). Operators mentioned (with their own VK9X callsign) are: Takeo/JA3BZO (VK9XA), Hiroko/JH3PBL (VK9XL), Shimatake/JI3DNN (VK9XN), Masumi/JA3AVO (VK9XO), Nakasako/JA3UJR (VK9XJR), Kunio/JA1CJA (VK9XXY) and Nishimura/JA3HJI (TBD). Both bands and modes of activity have not yet been announced. QSL via the operator's home callsign. A Web site is currently under construction at: http://www.nakade.jp/vk9x.htm

VP5, TURKS AND CAICOS ISLANDS. Dave, W5CW, will once again be active as as VP5/W5CW from the VP5JM Hamlet on the Island of Providenciales (NA-002, WLOTA 1476) between November 24th and December 14th. Activity will include entries in three contests: CQWW DX CW Contest (November 27-28th), ARRL 160m Contest (December 3-5th) and the ARRL 10m Contest (December 11-12th). QSL via his home callsign (QRZ.com address).

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, continues to be active most days on 40/17/15 meters SSB (various frequencies) between 1000-1930z and 0300-0500z. He has also released his October newsletter from Marion Island were he provided more pictures, along with more details about his set up and activities on the island. Pierre also talks about his contacts and the QRMers. He states, "I have now reached just more than 4700 contacts. Thanks to those who continue to request a QSO who also operate considerately..... BUT .... The QRM makers out of Europe are still a massive problem." For more details, read his newsletter online at: http://www.iz8epy.it/html/zs8m.html

903. FA: Vintage Ham Radio Gear ... super nice

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-04 04:15:09 UTC
From: OldGold <sharknews@aol.com>
Message-ID: <d84c5319-1acb-4e66-9dff-783c9c583aaf@x7g2000yqg.googlegroups.com>
Source record: 5322

I have the all the gear from a vintage Ham Shack for auction. Mostly vintage Drake gear. Really super clean and nice.

Drake L - 4 B Linear Amplifier + L-4 PS Power

Drake MN - 2000 Matching Network ~ Ham

Drake R-4C Ham Receiver

Drake T-4XC Transmitter ~ Ham

DRAKE FS4 SYNTHESIZER ~ Ham

Drake MS-4 Speaker + Drake AC-4 Power Supply

CDE Transmit Receive Direction Control ~ Ham

Shure model 444 Base Microphone Ham

Follow the link for photos and a full descriptions of each piece of gear....

http://members.ebay.com/ws/eBayISAPI.dll?ViewUserPage&userid=iam30

Thanks

EDITOR'S NOTE:
On the occasion of the independence of the Netherland Antilles there will
be a special edition of the DX Newsletter published in two days. So you will
not miss any announcement.

FJ - ST BARTHELEMY, NA-146
Lot,DJ7ZG, and Babs,DL7AFS, are going to hit the airwaves as TO7ZG from
St. Barthelemy (NA-146, DIFO FJ-001, WLOTA LH-0377) from Oct 6-20.
Operation will take place mainly in RTTY, PSK and SSB on 80m-10m.
As usual the QSLs will be sent very reliably via DL7AFS, direct or
via bureau. More information and a logsearch are available online at:
http://www.qsl.net/dl7afs

GJ - JERSEY, EU-013 / GU - GUERNSEY, EU-114
Kasimir,DL2SBY, will activate the channel islands as follows:
Oct 7-9: Jersey (EU-013) as MJ/DL2SBY
Oct 9-16: Guernsey (EU-114) as MU/DL2SBY.
Activities will take place in SSB, CW and RTTY on 80m-10m. Kasimir will
also watch the DX cluster spots on 6m and 2m and if possible will be
QRV there as well. He uses following equipment TS-2000, FT-900AT,
Acom 1010, an HF9V Butternut antenna for HF and yagis for 6m/2m.
Kasimir is a fan of paper QSL cards and therefore confirms only direct
or via the DARC bureau.

OJ0 - MARKET REEF, EU-053
Pertti,OH2PM, and Ilmo,OH2BO, are planning an activity as OJ0B from
Market Reef (EU-053) mainly in CW on 160m-10m from Oct 2-11, if the
weather permits. They will work in SSB during the Scandinavian Activity
Contest. QSLs via OH2BH, bureau ok.

V7 - MARSHALL ISLANDS
Yuri Sushkin,N3QQ, will show up from several IOTA islands in October.
His travelling schedule looks like this (but may change due to uncer-
tain connections):
Majuro (OC-029) on Oct 6,
Enewetak atoll (OC-087) Oct 12-15 and Oct 20/21, applied call: V73QQ
Ujelang atoll (OC-278) Oct 16-19, applied call: V73RRC.
His QSL manager is N7RO. Further information and updates can be
found on his website: http://oc-278.ucoz.com

VP5 - TURKS AND CAICOS ISLANDS, NA-002
During the months of October and November Peppe,VP5/I8UZA, plans to
become QRV from Providenciales Island (NA-002, WLOTA 1476) in SSB and
maybe also in RTTY on all bands (except WARC). He will also join the
CQ WWDX SSB Contest as VP5I as single OP/single band (15m). Peppe will
use a K3 transceiver with an AL-1500 amplifier, a 3ele 153BA yagi,
a vertical on the beach and maybe also a 2ele Quad.
QSL cards for both calls should be sent to his homecall.

ZD8 - ASCENSION ISLAND, AF-003
Tom,K7ZZ, is going to activate Ascension Island (AF-003) in CW and SSB
signing ZD8ZZ from Oct 6-19. His QTH will be the Green Mountain (701m).
Tom will use a 2ele phased vertical array on 160m-10m during this
"micro lite" operation. QSLs direct via K7ZZ or via LoTW.

CZECH REPUBLIC, SPECIAL EVENT STATION
The Czech DIG Club (OK1KIG) is using the special event callsign OL5DIG
from Oct 1-31. They are working only in digital modes (especially in
BPSK) on several bands from different QTHs. QSL via OK1AR.

ENGLAND, SPECIAL EVENT STATIONS
The British Royal Naval Amateur Radio Society (RNARS) is celebrating
its 50th anniversary by activating the special callsign GB50RN in CW
and SSB on 80m-10m from Oct 2-9. The special event station GB50RNARS
is very active as well and also activated by several members of the
club. A special award is available for HAMs and SWLs. More information
can be found on the website of the RNARS: http://www.rnars.org.uk

EL SALVADOR, SPECIAL EVENT STATION
YS0IARU is activated during the IARU Region 2 General Assembly until
Oct 8. All participants may use this station which is equipped with
100 watts and dipoles for 20m and 40m. QSLs via YS1GMV.

WFF ACTIVITIES: Some members of the "Holyland DX Group" will activate the
"Qumran national park" (4XFF-030) on Oct 8/9. The team consists of
Shalom,4Z4BS, Mark,4Z4KX, Ilya,4Z1UF, Vadim,4X4FJ, Ruben,4Z5FI,
Ros,4Z5LA, Jan,4X1VF, and Yulik,4X6HP. They will work with two stations
in CW and SSB signing 4X0WFF. Another mobile station will activate the
"Gedi National Reserve" (4XFF-016) as 4X0WFF/m on 14265 kHz.
QSL cards are managed by Malik,4X4JU, the WFF awards manager of Israel.
See also: http://www.bibleplaces.com/qumran.htm

VU2JHM, VU2UR, VU2LX and VU2LU have been spotted as VU0WFF from the

"Daroji Sloth Bear Sanctuary" from where they are working until Oct 10.
Operation takes place mainly in CW running 30 to 40 watts into a multi
band dipole. QSL via VU2JHM.

SILENT KEYS: OM Gerhard,DK2UA, wellknown DXer (DXCC Honor Roll) and IOTA
hunter passed away after a long illness already on Aug 24.
Neil Penfold,VK6NE, died on Sep 27 shortly before his 77th birthday.
Neil was a former president of the WIA Western Australia and the
QSL manager of the club.
Robert "Bob" Earhardt,YS9RVE, aged 70, passed away on Sep 21 suffering
a heart attack. Bob was an outstanding personality of the DX scene in
El Salvador between 1975 and 1990.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 9/10: CQ SA SSB Contest (see http://www.brcontest.com)
Oct 9/10: Scandinavian Activity Contest (SAC), SSB
Oct 1-7: CW activity weekend of the DTC
Oct 8-10: ADX/NA YL Anniversary Contest
Oct 9: European Sprint Contest
Oct 9: The Makrothen Contest (part 1 and 2)
Oct 10: The Makrothen Contest (part 3)
Oct 10: ON Contest 80m

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-127, DL, Schleswig-Holstein State SW Group: Markus,DJ4EL, Joerg,DJ1JB,
and Christian,DM4DX, are planning an activity from the island
Duene (WLOTA LH-2130, ARLHS FED-103) near Helgoland from Oct 8-11.
They want to work in SSB on 10m-40m (incl. WARC). QSLs via homecalls.

NA-015, KG4, Cuba (main): KG4AS (N4SIA), KG4QW (K4CQW), KG4SS (K4MIL) and
KG4VW (W4VW) will be QRV from Guantanamo Bay from Oct 5-19.
QSL via homecall (direct/bureau).

OC-137, VK4, QLD State South Group: Ray,K9LUK/VK4, will activate the island
North Stradbroke from Oct 8-16. QSL direct (QRZ.com).

RAC Bulletin 2010-019E - President’s Bulletin from El Salvador
2010-10-03

As Vice-President International Affairs Lamoureux, VE2KA has pointed out the two of us are in El Salvador.

What are the key issues that would bring us here? Every three years the Assembly that governs Region 2 of the International Amateur Radio Union [IARU] [encompassing all of the Americas] meets to strategize on key issues effecting amateur radio. Of particular interest to Canadians is that we are profiling the recent non amateur use of amateur frequencies in the recent ProTour Bicycle Race in Quebec as an unwarranted intrusion into amateur frequencies. Canadians will also be interested in HF band planning in 40M [now that short wave commercial stations have left the band] strategies to enhance effective response to hurricanes and other emergencies that require amateur radio support. Vantroi Pena HI8VP of the Republica Dominica will add a very human touch to that discussion as he was one of the Republica Dominica amateurs that set up 2M repeaters at the Haitian/Dominica Border and crossed into Haiti to provide assistance during that calamitous earthquake. Galdino Besomi, CE3PG, and Dagoberto Arcos Rojas, CE5COX will share their experiences during the Chilean earthquake.

Vice-President Lamoureux, VE2KA, is also a Director of IARU Region 2 and his expenses are being paid by IARU. Mr. Bawden, VE4BAW is in El Salvador at no expense to the Radio Amateurs of Canada.

Geoff Bawden VE4BAW
President and Chair, RAC

RAC Bulletin 2010-021E - IARU R2 Conference opens.
2010-10-06

Oct 5, 2010
Salinitas, El Salvador.

On Monday morning, the usual guests did the usual speaches to officially open the XVII IARU Region 2 Triennial Conference. The country Superintendant of Communications surprised everyone at the end of his speach by announcing that El Salvador had decided to sign the IARP agreement Amendment. This very significant news means that shortly the IARP and the CEPT Intenational Amateur licences will be harmonized and become one.

This is the first concrete step towards a worldwide international roaming permit that has long been wished for by the IARU as well as in the Amateur community.

Special thanks to the Club Radioafficionados de El Salvador (CRAS) for their fruitfull efforts.

Daniel Lamoureux, VE2KA
Vice President International Affairs
Radio Amateurs of Canada

**************************************
The ARES E-Letter

Published by the American Radio Relay League
**************************************

October 6, 2010

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY
```

Flagler County Emergency Services, the governmental agency responsible for the management of the large county EOC, has elected to change the way it coordinates with volunteer groups, including several emergency communications groups. ARES® will be incorporated under this new structure. Instead of having volunteer communicators and operators serve the EOC via liaison with leaders of the volunteer groups, emergency management will now seek to manage the volunteers directly by having each volunteer apply for and be trained for specific duties under the direct supervision of EM officials.

```
>From the EM Web site: "Without trained and organized volunteers
government cannot properly respond to or recover from the impacts of
large disasters. Flagler County Emergency Management is accepting
applications for volunteers under the Division's new volunteer program.
The Flagler Emergency Management Volunteer (FEMV)
<http://www.flagleremergency.com/pages.php?pid=75> organization will be
open to all residents of Flagler County. All volunteers in this
organization will be trained, issued uniform shirts and an
identification badge. FEMV members will be under the direction of
Flagler County Emergency Management . . . for preparedness, response,
recovery and mitigation efforts. Volunteers who have previously
provided services to Flagler County, whether direct or through a
volunteer agency, are requested to complete an application immediately.
Recruitment and training dates will be posted . . ."
```

Our job as ARES® operators in the county is to continue to support the EOC to the best of our abilities and training, under the new management approach. There is, of course, the continuing role of our EC Robbie Creal, KG4HUF, to provide internal leadership, recruitment and training for our ARES® organization.

```
------
```

Early indications are that the massive communications support effort
for this past weekend's major MS-150 event here in northeastern Florida
was a huge success, according to EC KG4HUF. More on the effort in next
month's issue.

==> ARES® DIGEST

Congratulations to Douglas County (Oregon) EC Jerry Eifert, AE7ER, of
Roseburg, who has won the Oregon Volunteer of the Year Award. A fine
newspaper article tells the story here
<http://www.nrtoday.com/article/2010100929984>.

2010 Atlantic Hurricane Season

With nine tropical storms and four hurricanes, the 2010 season has been
a busy one. Beginning with Hurricane Alex in June, hams at WX4NHC
<http://www2.fiu.edu/orgs/w4ehw/> -- the Amateur Radio station at the
National Hurricane Center in Miami, Florida -- and weather spotters
around the country have kept an eye on these storms. Hurricane Earl
came in late August and early September, Hurricane Karl in September
and then Hurricane Igor made its way across the Canadian Maritimes. The
2010 Atlantic hurricane season officially began on June 1 and will
continue through November 30. Read more here
<http://www.arrl.org/news/2010-atlantic-hurricane-season-proves-to-be-a-busy-one-for-hams>
.
- ARRL Letter, September 23, 2010 issue

Southeast Plans Major SET Effort

For two years in a row, Alabama has finished fourth in the country out
of 52 participating sections in the annual ARRL Simulated Emergency
Test (SET)
<http://www.arrl.org/news/get-ready-for-the-2010-simulated-emergency-test>.
Jefferson County alone scored 555 points in 2009, placing the county in
fourth place in the country out of 330 county/local level participating
groups. Jefferson County's score alone was higher than the scores of 27
states/sections. However, despite Calhoun and Jefferson counties both

scoring over 500 points in 2009, Alabama's total fell by over 900 points. This appears to be due to fewer groups participating (14 in 2008, 12 in 2009) and lower scores (11 groups scored 168 or higher in 2008, only five scored 168 or higher in 2009).

So Jefferson County EC Hub Harvey, N4HUB <n4hub@arrl.net> is asking his operators "what are you doing to be ready, resilient and responsive"? His organization plans to participate with Shelby County as a partner this year in a "Metropolitan SET." They will activate several served agency stations and are asking nine Jefferson County hospitals with Amateur Radio equipment to participate.

This year's SET will be like no other: The Alabama, Northern Florida and Georgia Sections are all participating together in an exercise dubbed "Hurricane Jay." The Alabama State EMA will be participating, with EC Les Rayburn, N1LF, activating the State EOC. Jefferson, Shelby, Talladega, and Calhoun counties are all on board with plans for this year's SET. Harvey asks, "can we be number ONE in more than just football this year"? -- Hub Harvey, N4HUB <n4hub@arrl.net>, Alabama Emergency Manager, Jefferson County ARES® Emergency Coordinator [Harvey was recently awarded Advanced Level Professional Certification by the Alabama Association of Emergency Managers - ed.]

==> ARRL INTRODUCES FIRST CHALLENGE COIN

This month, ARRL and the Amateur Radio community celebrate the 75th anniversary of ARES®. To help commemorate this milestone, ARRL has introduced an anniversary Challenge Coin. The die-struck, one and one half inch brass coin depicts, on one side, the ARES® 75th anniversary logo in gold with red, white and blue color fill. The other side of the coin includes the ARRL diamond logo against a hemisphere of the world. "Around the perimeter of the ARES® logo are the words READY, RESILIENT and RESPONSIVE," said Emergency Preparedness and Response Manager Mike Corey, W5MPC. "These words represent the critical need that ARES® activities have provided, and will continue to provide into the future. The Challenge Coin honors the service of ARES® volunteers and all Amateur Radio operators that respond to the call of public service. We hope ARES® volunteers will enjoy the honor of having the first Challenge Coin issued by ARRL", said Corey.

While there are many stories about the origin and history of challenge coins <http://www.wikipedia.org/wiki/Challenge_coin>, these medals have been popular with organizations and leagues for decades. Marketing Manager Bob Inderbitzen, NQ1R added, "Challenge Coins are probably most common among the military and civil service organizations. These mementos are often used to commemorate a special occasion or to show loyalty among individuals that share pride and affinity for a particular service or agency. The coins are even popular among police, fire and EMS officials." The coin is struck with the year-of-issue, which in this case is 2010. Five diamond shapes on the coin's head signify the five ARRL pillars: public service, advocacy,

education, technology and membership. "We hope this is the first of a series of Challenge Coins for ARRL," said Inderbitzen. The ARES® 75th Anniversary Challenge Coin, as well as commemorative t-shirts and mugs, are available directly from ARRL http://www.arrl.org/shop/Emergency-Communications/ <http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fwww.arrl.org%252Fshop%252FEmergency-Communications%252F>.

==> MAJOR NEW NORTHERN FLORIDA PLAN UNVEILED

A Herculean effort by a panel of leading Florida radio amateurs has resulted in a new emcomm plan for the large and disaster-prone ARRL Northern Florida section. The new plan was announced by Section Manager Paul Eakin, KJ4G, reflecting changes in emergency management and radio communications over the course of the past few years.

The major change is that the new plan is centered on NIMS <http://www.fema.gov/emergency/nims/AboutNIMS.shtm> ICS <http://training.fema.gov/EMIWeb/IS/is100a.asp> protocols. It refers to a section-wide ARES® data base that meets the requirements of the section's major served agency: the Florida State EOC <http://www.floridadisaster.org/eoc/update/home.asp> at Tallahassee. The data base includes records of NIMS, ICS and ARRL course certifications, FCC addresses, resource typing for filling deployment assignments, contact information for next of kin, and limited medical data. (More on the data base below).

As an example of standardization, plan co-author David Miner, W4SKG, the Assistant DEC of the Capital District, reworked the Incident Command System message form ICS 213 <http://training.fema.gov/EMIWeb/IS/ICSResource/assets/ics213.pdf> to incorporate the ARRL Radiogram format. "The Northern Florida Section is adapting this form as our official message form," said Eakin. "The Florida State EOC has stated that all traffic coming into and going out of the facility will be required to have a contact person, authority notation and phone number to be accepted as valid." "This is for tracking purposes; our new integrated form has provisions for phone numbers and authority positions," Eakin said.

The Plan

The new Northern Florida ARES® Emergency Communications Plan <http://www.arrl.org/sections/view/northern-florida> (download at bottom of page) serves the local Emergency Manager and the local community Amateur Radio operator to promote relationships that will best serve the emergency communication needs of their communities under the ARES® banner. The plan has two purposes: The first is to provide professional Emergency Managers with an understanding of who, what, and how Amateur Radio volunteers can assist in the emergency communications function. The second is to provide a systematic method for Amateur Radio operators to voluntarily deliver supplemental radio communication

services when requested by local, state and national-level Emergency Managers. The plan provides Amateur Radio operators with a consistent, effective and scalable communications response framework under the ARES® program.

The plan recognizes that the National Incident Management System <http://www.fema.gov/emergency/nims/AboutNIMS.shtm> (NIMS) is the national standard that promotes interoperability among the various disciplines and agencies. ARES® members are expected to have an Incident Command and management organization that emergency managers and responders in the field can easily recognize and work with. In emergency situations, the ARES® organization serves that purpose by having various section officers and appointees assume emergency response duties. Each local ARES® (city or county) should consider adopting an emergency organization structure that conforms to the NIMS standard also.

The plan delineates different levels of response: Local (city or county) level; State level; and National level. To facilitate responses, the Northern Florida section maintains the Northern Florida ARES® Data Base <http://www.arrl-nfl.org/nfldata/register.php> (NFLDB) of Amateur Radio operators who have registered to serve at the state level in times of communication emergencies. The data base contains a formal record of each volunteer's demonstrated radio communication performance capabilities, education courses successfully completed, and stated personal deployment requirements so that assignment of individual operators to emergency deployment missions can be made. When state level requests for services are received by the Section, this data base will be the only repository from which deployment selections will be made.

Activation Levels

As for levels of activation, "No Alert" is the normal situation for Amateur Radio communications: No state of alert or emergency exists.

When a situation arises, affected ECs and DECs may declare any of three levels of alert of their organization. Level III is the "monitoring phase" and alerts operators in a specified area or functional unit (such as a net) that their services may be needed on short notice in the next 24-48 hours.

Level II is a "partial activation" and constitutes an operational status.

Level I is the highest possible level of alert in an emergency communications operation. It is useful for controlling HF circuits when heavy traffic and large numbers of stations may increase channel load on nets.

When distress traffic is being handled on any emergency net or frequency, the activated level is automatically Level I and remains so

until all distress traffic has been cleared.

"Full Scale Activation" can be declared at the Section level only by the SM, by issuance of a Priority bulletin to be transmitted on all active net frequencies. It applies solely to nets and geographic areas designated in the formal order.

The "Stand Down Phase" authorizes DECs and ECs to begin the stand-down process of the activation. Stand Down is permissive only; it does not require that operations be shut down in the specified area. It simply advises the designated DECs and/or ECs that no apparent reasons exist for continuing operation unless they have local requirements.

Any portion of the Section Plan can be activated in support of any incident in the State of Florida and/or whenever the FEOC is activated, and specifically when mid-state relay is necessary to support operators in other ARRL sections requiring relay to/from the FEOC.

Net Operations

The plan calls for use of both the NTS standard ARRL message format and the ICS-213, as they are similar in purpose, but remain different in structure. Emergency Management and EOC personnel are going to be using the ICS-213 format, but messages received from other sources will likely be in the standard ARRL format, unfamiliar to Emergency Management officials. The ARES® operator should place the ARRL-formatted message into the body section of the ICS-213 before delivering it. Thus the ARRL message remains intact, and the Emergency Management official has a document he understands. Using these procedures will enable the uninterrupted flow of message traffic, and the messages will be in a format familiar to the users and recipients.

State EOC Messages Protocol

The Florida State EOC accepts any and all messages from any source. However, its staff prefers an Amateur Radio liaison of only one licensee, regardless of where in the state an incident might occur. For practical purposes, the contact person is the Northern Florida Section Manager or his/her designate.

Amateur Radio operators will be deployed to the FEOC only upon the EOC's request, and these amateurs will be trained by the FEOC, the STM and the Capital DEC.

Given the size of Florida and the fact there are three ARRL Sections within the state, there are times when an incident might occur and not impact the Northern Florida Section. In such cases, the Florida EOC will need to establish amateur communications with the Section where the incident is located, and the Northern Florida Section will need to mobilize to support such communications.

"Mid-State Relay" Stations

When HF conditions are poor, stations in the central part of the state (along the I-4 corridor) will be used as "Mid-State Relay" stations. They will stand by on a selected HF frequency to assist in communications when the Florida EOC needs direct contact with a station too weak to copy in adverse conditions.

The GATEway Voice Network System

The "GATEway Stations" are a group of operators who are in constant VHF/UHF contact with the Florida EOC, regardless of where in the state an incident might be. The FEOC prefers all traffic to come through the gateway system, properly formatted and identified. These operators are an elite group. They are WINLINK-qualified, hold FEMA certifications and are all appointed as ARRL Official Relay Stations (ORS). Their function during any activation is to serve as a liaison point to the FEOC, using whatever mode(s) is mandated by the FEOC for that incident.

The "GATEway Network" is comprised of selected HF voice stations that also have access to local VHF/UHF voice networks. When alerted, typically, each District will have a GATEway Station available on the HF North Florida Emergency Net (NFEN) and on the District VHF voice network.

A GATEway cannot function without VHF links to the County EOC and other local points designated by the EC or DEC. ECs are strongly encouraged to use the County and District VHF nets and avoid using HF at all, if possible, for local communications. This reduces congestion and confusion on the HF Emergency Net and expedites all traffic.

Vetting by Local and State Agencies

ARES® operators are subject to a criminal background check. To qualify for official deployment requires the operator to provide a Florida Driver's License ID number when registering in the Northern Florida Section Database. Deployment for emergencies directed by the Northern Florida Section will not be authorized unless the operator has voluntarily submitted the necessary information to be officially listed in the Northern Florida Data Base.

ARES® Training Requirements

In Northern Florida, the following course certifications are required:

1. ARRL Amateur Radio Emergency Communications Courses
<http://www.arrl.org/online-courses>

o Introduction to Amateur Radio Emergency Communications (EC-001)
<http://www.arrl.org/emergency-communications-training>

o Advanced Emergency Communications (Combined L2 and L3). Requires SM recommendation and approval. For DECs and above.

2. National Incident Management System Courses
<http://training.fema.gov/is/crslist.asp>

o IS-00100 - Introduction to the Incident Command System (ICS 100) <http://training.fema.gov/EMIWeb/IS/IS100A.asp>

o IS-00200 - IS for Single Resources and Initial Action Incidents (ICS 200) <http://training.fema.gov/emiweb/is/is200a.asp>

o IS 00700 - National Incident Management System (NIMS) an Introduction (ICS 700) <http://training.fema.gov/emiweb/is/is700a.asp>

o IS-00800 - A National Response Plan (NRP,) an Introduction (IS 800) <http://training.fema.gov/emiweb/is/is800b.asp>

o IS-00802 - Emergency Support Function (ESF-2) -- Communications <http://training.fema.gov/EMIWeb/IS/IS802.asp>

The new plan was drafted by a fantastic team and reviewed by Florida State EOC staffers John Fleming, WD4FFX, and James Montague, K4IMO. The team leader for the project was Andy Gausz, KG4QCD, from the Lake Monroe Amateur Radio Society (LMARS <http://www.lmars.org/>) club, who worked many hours coordinating, composing, proof reading, researching facts and working with the whole team. Other team members were Rick Harrelson, WB4ULT; Ron Mettler, WB4GHU; bud Thompson, N0IA; Mike Lee, WB6RTH and David Miner, W4SKG. There were several amateurs who, after reading the first published edition, sent in valuable corrections that will enhance the document: W3EQJ; Carl Zelich, AA4MI; Neil Lauritsen, W4NHL; and Alan McGrew, KC4MTS. [Congratulations on a superb job, gentlemen. -- K1CE]

==> JUNIOR ARES® PROGRAM IN FLORIDA

The Duval County (Jacksonville, Florida) ARES® organization has found a way to incorporate the growing number of young hams into their activities. The entry level path there is through their Junior ARES® program. It serves effectively as a method to train and retain those who are under 18 but still want to be involved in ARES® functions. Check out the Duval County Junior ARES® Program <http://www.jrares.org/> Web site, or contact General Dailey, KD4VVZ, for more info. This type of operation might just be what your group needs as well. - Northern Florida Section News <http://www.arrl.org/sections/view/northern-florida>, Paul Eakin, KJ4G, Northern Florida Section Manager

==> IDEA: NEIGHBORHOOD HAMWATCH PROGRAM

The goal of the Neighborhood HamWatch <http://www.myhamshack.com/blogs/795/Neighborhood-HamWatch.html> program is to provide a way for every capable Amateur Radio operator who isn't involved in a deployed active ARES® operation to serve his/her community in an emergency communication role. HamWatch amateurs are good communicators, and have ample stations with emergency power they can use during periods of extended communication outages that often follow major disasters. These amateurs augment the active ARES® volunteers and are active participants of the emergency communications

system at the neighborhood level.

Program objectives include: 1) Communicate neighborhood conditions to local EOCs. Emergency Managers will be provided access to first-hand information. They will handle heath and welfare messages, report crime and fulfill other communications needs. 2) Relay information from local Emergency Managers back to their neighbors so they are better informed of relief efforts.

Participation in the program requires operators to have the desire and capability to use their licenses to help their neighbors. There is no special training or equipment burden necessary. A valid license and a 2-meter/UHF radio and/or HF rig will do the job.

Neighborhood HamWatch operators also communicate with ARES® stations that are in direct contact with local government EOCs. Because of commercial outages, this may be the only link to the outside world for a neighborhood. Operators describe neighborhood conditions, medical needs, and dangerous situations to Emergency Managers and staff. Emergency Managers can relay messages back to neighborhoods.

How to get started? An informational brochure is available here <http://richhand2.home.comcast.net/%7Erichhand2/Universal-Brochure.pdf>, which will help explain the program and can be printed by local hams and distributed to their neighbors. This will acquaint neighbors with their next-door Amateur Radio operators and establish the Neighborhood HamWatch groups. ARES® ECs, and NCS's can help by including a check-in option for Neighborhood HamWatch operators during or immediately following training nets so participating hams can begin establishing contact familiarity.

For more information contact: Andy Gausz <KG4QCD@arrl.net>, KG4QCD, President, Lake Monroe (Florida) Amateur Radio Society; Neighborhood HamWatch Coordinator, from Northern Florida Section News <http://www.arrl.org/sections/view/northern-florida>, Paul Eakin, KJ4G, Northern Florida Section Manager

==> LETTERS

[Ralph Phillips, P.E., KE5HDF, of Houston, Texas, responds to the comments of Jeff Sabatini, KI6BCX, Redlands, California, in the last issue. - ed.]

Jeff Sabatini, KI6BCX, made some very good comments about my hurricane plans discussed in the August 11, 2010 issue <http://www.arrl.org/ares-el?issue=2010-08-11>, and I appreciated them. I do need to re-think the use of pool shock to convert pool water to drinking water. The mix I use lists the only ingredient as calcium hypochlorite. Bleach uses sodium hypochlorite. I will contact the manufacturer to ask about other "inert" ingredients. Jeff's other points were valid also, and I have taken them into consideration:

• I store 10 gallons of drinking water before the storm (some people store up to 50 gallons for a family of four).

• I freeze as much water as I can in plastic bottles and tubs. It helps preserve my food and provides cool water to drink as it melts.

• Filtering: 4-5 layers of cheese cloth removes almost anything non-microbial. Coffee filters do well also.

• Sewage and hydrocarbons: My home sits on the highest point for a mile or more; storm water has never risen past the curb of the street, even during TS Allison, which flooded 80% of the city. There is very little chance of contaminated water entering my swimming pool.

• My plan is to drink the stored water first and use pool water only if the outage lasts beyond 3-4 days.

• I have a propane grill with 2 large bottles of gas, plus a natural gas line I can hook up (I can convert the grill easily).

I do appreciate Jeff's insights and comments. Even though my location is safe from flood water, others will not be so lucky and need to be made aware of the hazards you mentioned. I will write back with what the pool shock manufacturer says about using it to sterilize drinking water. -- Ralph E. Phillips, KE5HDF, Houston, Texas

==> K1CE FOR A FINAL

Congratulations to the framers of the major, new rewrite of the Northern Florida Emergency Communications Plan. It not only provides an excellent platform for section activations, but also serves as a fine template and model for local, county, and other section efforts.

I'd like to hear from other groups around the country who have had their local or county EOCs change to direct management of volunteers, like Flagler County recently did, discussed above in "The View from Flagler County." What were the impacts on your local ARES• programs, the good, the bad and the ugly?

See you next month! 73, Rick, K1CE, Flagler County, Florida

** MS Prediction from MMMonVHF - October 2010 **

Major shower this month is Orionids, peaking October 21st.
This shower has produced strong rates in 2006, 2007 and 2008,
with lot of bright meteors. A 12-years periodicity in Orionids
stronger returns, extrapolated from old observations, suggests
that relatively good Orionids rates are expected even in 2010.
Some other minor showers, combined with good sporadic meteor
rates, will provide favorable conditions for MS DX-ing. Have a
look to shower predictions for October 2010 at our MMMonVHF
MS-Propagationpage: http://www.mmmonvhf.de/ms.php

Lance W7GJ and Bob ZL1RS still be operating from 3D2 Fiji on 6M
(3D2LR) and 2M (3D2RS) during the days 27 Sept. until tomorrow!

LATEST NEWS from 3D2 Team, dated 2010-10-06: Looking for Europe Oct 6th, 0230 UT until Moonset at 0410 UT and on Oct 7th from 0330 UT until Moonset at 0510 UT. Oct 6th 1650 UT for 2 hours NA, SA, Pacific and JA. We have excellent Moonrise Groundgain over Salt Sea Water! Well, the Degradation is starting to climb back up, and the hours are numbered for the operation here. If you have been waiting until an opportune time to get on 6m or 2m, please try to get on in the next 24 hours! 44 contacts (6m) and over 190 contacts (2m) in the log so far, including a number of single yagi stations. Remember its their LAST DAY to be qrv!

Dear EME friends... During upcomming JOTA (Jamboree on the air) we are planning to be active with a small EME station. Last week I gave a short Ham radio presentation to a group of scouts and I also mentioned EME . That got a large group of scouts interested yes ideed something different than your average MSN / youtube / facebook kind of communication.. We plan to be active on saterday 16 october from 16:00 UTC till 20:00 UTC Station set up 17 ele (old cushcraft 17B2) with elevation , LNA , and about 300 watt on 144 Mc using JT65. I would like to set up some skeds with QRO stations to make a few EME contacts during the JOTA. We do have internet available so I will be doing some " self-spotting " on the EME -reflctors , but I would like to have some pre-arranged skeds Anybody with a good amout of QRO and good ears on 144 mc interested ?? Please let me know 73's Rick , PA1BVM (during Jamboree we will use PA1BVM/J)

Norfolk Island (RG30XX) DX Expedition, 2011
The same 2010 Team of Michael - VK3KH, Kevin - VK4UH & myself Alan
VK3XPD will be back on the Island from January 7-21, 2011.
Accomodation and Flights have already been Booked ! As an added
bonus, our 2011 DX Expedition will be running MORE POWER on several
Bands and it also encompasses the VK VHF-UHF Summer Field Contest
weekend of January 15th and 16th, 2011. Our prime focus this time
around are the elusive Microwave QSO's on 2.4 Ghz thru 10 Ghz back
to VK and across the "pond" to ZL however, we will again have
6 Metres, 2 Metres, 70 cm & that magic Band of 1296 Mhz.. We will
have a Team of serious Microwavers from VK5 who will be place at
TBA on the VK2 Coastline. There's Colin - VK5DK, Trevor - VK5NC
& Les Janes - VK5??. In ZL, Steve - ZL1TPH will again be operating
Portable with his Microwave gear from Cape Reinga on the northern
tip of ZL. Because of the sizeable Distances involved and the
finicky nature of the Propagation, the WSJT Digital Modes will
more than likely offer us the best piossible chace of success.
However, 2, 70 & 23cm via Tropo will be used as Indicators of the
possibilities for the Microwaves. So.. get your DIGI skill's up,
smarten up your Terrestrial statis and we will look forward to
working as many of you as possible over this 2 week period.
Cheers from the VK9NA Team. SOURCE: www.vk9na.com/Update.html

** GB50RN will be on the air for the 50th Anniversary **

The Royal Naval Amateur Radio Society is celebrating its 50th
Anniversary this year. A special event callsign GB50RN will be
on the air from 2 to 9 October 2010. The station will operate
on CW and SSB on the HF and WARC bands from 80m to 10m, and on
FM on the 2m and 70cm bands. A special Anniversary Award is
available to listeners and licensed amateurs who hear or contact
RNARS members and the special event stations during 2010.
QSL via RNARS QSL bureau/G0TOC. Full details can be found on the
society website at: http://www.rnars.org.uk/
SOURCE: [GB2RS] via [ICPO] ICPO Bulletin (01-08 October 2010)

** S7, SEYCHELLES, HF and 50 MHz Operation **

Operators Nob/JA2AAU (S79AU), Iwao/JA2LSS (S79SS), Seiji/ JA2ATE
(S79TE) and Mori/JA2ZS will be active from Mahe Island (AF-024)
between November 19-27th. Activity will be on 160-6 meters using
CW, SSB, RTTY and PSK. QSL via their home callsign, direct or by
the Bureau. SOURCE: Ohio/Penn DX Bulletin #979

** Sines Cape Lighthouse (IM57NX) qrv on 50 MHz **

Miguel, CT1ETL has informed me that the A.R.L.A. will have a
50MHz station operational from the Sines Cape Lighthouse IM57NX
on Saturday 9th October 2010 from 0900 UTC until 1900 UTC. The
operating frequency will be 50135.0 mode will be SSB. The station
will also be operating a HF station as well. He informs me that
this is the very first ever activation from POR 008...

I have the all the gear from a vintage Ham Shack for auction. Mostly vintage Drake gear. Really super clean and nice.

Drake L - 4 B Linear Amplifier + L-4 PS Power

Drake MN - 2000 Matching Network ~ Ham

Drake R-4C Ham Receiver

Drake T-4XC Transmitter ~ Ham

DRAKE FS4 SYNTHESIZER ~ Ham

Drake MS-4 Speaker + Drake AC-4 Power Supply

CDE Transmit Receive Direction Control ~ Ham

Shure model 444 Base Microphone Ham

Follow the link for photos and a full descriptions of each piece of gear....

WIA Centenary

Only two more weeks till the WIA National Field Day
Tune-In to the world - Amateur Radio Gets people talking.

Now with over 20 clubs registered and more in the pipeline this is going to be one fantastic event publicly promoting the hobby of amateur radio. Are you passionate to see the hobby grow, getting "new blood" in as people so often say? Well this is the golden opportunity it's one day set aside each year with the specific aim and a focus on promoting the hobby of amateur radio to people, yes real living walking talking people who have yet to discover the worlds best hobby.

Now if you have not already done so, consider getting your radio club or a group of your friends together, come up with a great idea for a public event or a place for a public display of amateur radio, jump online on the WIA website and register your event.

It's going to be one very special day. Catch you on the air during the WIA National Field Day - Tune-In to the world - Amateur Radio Gets people talking.

VKC Roundup http://www.police

Sunday 24th October is the date for the Annual Ballarat Hamvention. It is held at the Ballarat Greyhound Racing Club in Rubicon st, Redan with doors opening at 10:00AM. Pre sale of entry admission and door prize tickets will occur before that time.

Traders will be admitted from 0800 till 0945.

Costs of a table is $15 (1.8M) same as last year and includes ONE entry person. All others admissions cost $6.00 [same asl last year also] Children under 15yrs will be admitted free. Light lunch meals will be available from the in-house catering bar. Tea & coffee from 0800 all day.

To book a table[s] ring Bill Wells VK3PAL on 03 5352 3662 or Email to wilton@netconnect.com.au or using snail mail P.O. Box 1261 Mail Centre Ballarat Vic 3354

Please allow for delay using the PO box though. See insert to October AR magazine.

Also the BARG is conducting its annual HOMEBREW CONSTRUCTION COMPETITION.
Look up the BARG website for details and prizes. www.barg.org.au

The club also has a set of coloured graphics [cartoon style] limited numbers
for sale from its Club Sales table . These were drawn by a club member now SK
and are very collectable. Make sure you have a look and purchase a set.

Cheers

Craig VK3CMC
BARG President.

'Arena of Wonder' Wires to Wireless

The Melbourne based Prahran Mechanics Institute 'Throughout History Week'
is an annual event held at the groups Prahran offices. The 2010 display
will take place over the week of the 25th to the 30th of October and features
a WIA Centenary display prepared by well known WIA historian Peter Wolfenden
VK3RV.

The display titled 'Arena of Wonder' from Wires to Wireless is advertised as
an extraordinary collection of wireless equipment and memorabilia marking
the 100th anniversary of the Wireless Institute of Australia. Many of the
items included in the display are to be from Peter Wolfenden's own personal
collection. You are encouraged to visit and view this most fascinating display.

The display will be open to the public Monday through Friday 9.30am
till 4.30pm and on Saturday 9.30am 1.00pm. There is no charge for entry.

The Prahran Mechanics Institute is located at 140 High Street, Prahran
(Melway reference 2L H12 and 58 D6)and located close to the Prahran
Station (Sandringham line), Chapel Street trams (Nos. 78, 79) High
Street tram (No. 6) If coming by car, there is 1 hour parking on High
Street, and 3 hour parking on Thomas Street.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

For nearly 3 months I have been attempting to get some information regarding
a program which was announced over a year ago. News of this program's
implementation had been passed onto members in the usual manner until about
6 months ago. Then the final phase of this scheme was announced as being put
in place within a couple of months.

Well this time passed and the news of the program was lost in seemingly
eternal silence. That's when I tried to find out what was happening and
finally, this week, some news. It seems that the project was dependant
on a funding source that didn't eventuate. Well these things happen and
being able to resource projects in an alternative way should always be
part of the contingency "plan B".

The frustration is that many people have been waiting on news of something happening and nothing did. Surely this is the proverbial public relations disaster. For the sake of explaining how the scheme was to be implemented and keeping the membership apprised of developments, this could have been avoided.

However, this is an object lesson in project management amongst any volunteer body, even our own radio club. The moral is we need to let people know.

I'm Geoff Emery and that's what I think.....how about you?

New aerospace research centre takes flight

Flying will be a lot safer and more efficient thanks to breakthrough collision avoidance, emergency landing and separation management technologies being developed at a new joint Queensland University of Technology and CSIRO aerospace research centre.

The technologies could also allow unmanned aircraft to perform beneficial operations such as search and rescue, bush fire fighting and monitoring ash clouds from volcanoes as well as power line inspection and crop monitoring.

The Australian Research Centre for Aerospace Automation (ARCAA) in the Da Vinci Precinct at Brisbane Airport houses more than 35 aviation research scientists and support staff. It was opened by Queensland Treasurer Andrew Fraser as another step in the consolidation of Queensland as a global aviation and aerospace hub.

ARCAA researcher and QUT lecturer Dr Luis Mejias said the new ARCAA facility provided researchers with the tools for leading edge research.

"We are focussing on aviation technologies which will save lives and improve the efficiency of the aviation industry," Dr Mejias said. "For example, mid-air collisions between light planes over Australia have caused the death of eight people in the past five years. ARCAA is developing a Dynamic Sense-and-Act (DSA) system which could provide a cost-effective early warning solution to this problem.

IOTA OC-137, VK4, QLD State South Group:

Ray,K9LUK/VK4, is active until Oct 16 from North Stradbroke Island. Who ever would have thought "Straddy" was a rare one!

ACMA NEWS

The Australian Communications and Media Authority will host a one-day tune-up in Sydney on 3 November 2010 as part of its digital dividend consultation process.

The Digital Dividend Spectrum Tune-Up will be an opportunity for industry and government to discuss the issues related to reassigning the digital dividend spectrum (694-820 MHz) freed up from the switchover of analogue to digital TV broadcasting technology.

For further information, or to register for the event, contact:
Nicole Lawler on (02) 6219 5136 or rls@acma.gov.au

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO

or regemm at ozemail.com.au

(Reg VK7KK, REAST Education Officer and Assessor)

SILENT KEY VK6NE

Keith Bainbridge VK6RK President of the Northern Corridor Radio Group offered the eulogy at VK6NE's Neil Penfold's funeral Saturday Oct 2.

There was a good turnout of hams attending and the N.C.R.G. club formed a guard of honour as the casket was brought into the chapel.

I'm at a bit of a loss where to start this tribute to a dear friend and one of Amateur Radio's true personalities.

I suppose some background to his amateur radio career would be a good place to begin.

First licensed in 1962, Neil soon found an interest in the administration of the hobby of Amateur Radio. From 1965 onwards he had spells as VK6 Divisional Secretary, Councillor, Vice President, President and Federal Councillor, before moving on to the national positions of Federal Director and Federal President, roles he held for many years.

His leadership skills and powers of persuasion are legendary. He was made a Life member of the WIA VK6 division in 1976 and was a winner of the GA Taylor medal.

It wasn't only administration side of Amateur radio that interested him, he was a dedicated DX'er and achieved some of the highest operating awards available in Amateur radio. I think it was his interest in DX'ing that led to his passion for QSL cards and QSLing.

I remember accompanying him to the late Jim Rumble VK6RU's house to take over the running of the VK6 QSL bureau, and the assistance, given reluctantly I might add, by my then two young daughters in sorting out the cards for Neil over several months. The QSL bureau gave him the opportunity to study the amount of dx worked by local amateurs and enabled him to encourage others to get on the bands and work more overseas stations. As a result of his qsl activities he was approached by many amateurs to be their qsl manager, and I believe he was in fact manager for over 33 callsigns and of course the VK9/ VK0 bureau manager.

He was actively involved in assisting two Heard Island Dxpeditions and made many friends around the world whilst doing so.

He also managed several contests over the years.

When the NCRG was forced out of Carine college and went looking for new premises, Neil suggested we look at Whiteman Park and went off to investigate. He managed to secure a sub-lease and things started to take shape. This became his passion, the "Manager "was born. Neil took it on himself to lay out the floor plan, co ordinate the construction and to generally manage the construction project. It allowed him to exercise his formidable leadership skills and gave us a leader with time and vision to push the project forward.

We were given regular email updates, affectionately known as Pastoral Letters or Plonky's Ponderings , highlighting the achievements of the past week and urging us on to better things.

We also coined a new nickname for him as the project came close to finishing. As Neil took it upon himself to keep the place tidy, he became "Sadie the cleaning lady " Woe betide anyone who trampled sand onto his clean floors.

The WIA centenary celebrations were held in March this year and the club decided it would be an appropriate time to have an official opening day for our virtually complete Whiteman Park premises.

We also decided that Ham Heaven, whilst accurate, was not really the most appropriate name for it, and the idea for the "Neil Penfold State Amateur Radio Centre" was born. So on the 14th March 2010 almost 100 years to the day after the Wireless Institute of Australia was founded, we chose to honour Neil and his efforts by naming the club premises after our beloved Plonky! And it certainly made his day - he said he had never been more proud of any of his other achievements in Amateur Radio - and even shed a tear or two as he cut the ribbon!

We also decided to treat him to a little present, so several members got together and purchased the number plate " VK6NE" for his car. It must have had an effect because he actually put a 2 metre radio in there and used it!

Neil took it on himself to organise the mezzanine floor at the club into a Museum of Vintage radios and he spent countless hours almost every day on his own out there building shelves and display units to house this comprehensive collection. It's still a work in progress but Neil, honestly, we promise it will be finished soon!.

Another silent key and an old friend of Neil's was Dave Couch VK6WT. Dave's collection of morse keys and associated equipment was legendary and Neil suggested to me personally to track it all down and put it on display at the club premises. This has now become a reality and I owe it all to Neil's encouragement.

I didn't get to visit Neil in hospital as I was full of the flu and didn't want to risk passing it on but Wayne tells me that he was frustrated being there, stuck in hospital on a Sunday morning and wondering who was cooking the snaggers and were there enough onions!

We are going to miss you old fella, the place just won't be the same on a Sunday morning and I will finish with a comment from a friend of his for many years:

Neil Penfold.... A man of few words who would always take the time to consider what he had to say then deliver it with a minimum of fuss.

73 old man, now exclusive QSL Manager to Marconi and St Peter, all others via the bureau.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Seminar on Future Wireless Technologies - 4 November 2010

The NZ Ministry of Economic Development is convening a seminar on Future Wireless Technologies, including Cognitive Radio, Software Defined Radio and Future Mobile and Broadcast Technologies to be held Thursday 4 November.

A similar event was held in September last year which highlighted the importance of sharing information on the progress of such initiatives and developments in this area.

This year's seminar will be held in the Waitemata Ballroom at the Langham Hotel in Auckland and is expected to run from 10 am - 5 pm, immediately following the 16th Asia Pacific Communications Conference (APCC'10) being held at the same venue from 30 October to 3 November 2010.

The purpose of the seminar is to share knowledge among wireless equipment manufacturers, research institutions, service providers and government about emerging developments and identifying the areas on which to focus future technical and regulatory work.

They welcome your participation and invite you to make a presentation at this seminar. If interested, please email radiospectrum@med.govt.nz with "Future Wireless Seminar" in the subject heading.

The programme, once developed, will be published in the next few weeks on the Radio Spectrum Management website.

More information on APCC'10 can be found at: http://apcc2010.aut.ac.nz/

An army of swarming robots could save you after a disaster.

E.P.F.L. in Switzerland has developed SMAVNET, a swarm of small flying machines that can establish a wireless communication network to help rescue workers communicate.

The micro aerial vehicles look remarkably like remote control planes, but are programmed to fly autonomously. Researchers at EPFL wanted the MAVs to be able to quickly spread out and establish a network even if they didn't have GPS data, so SMAVNET was taught a trick used by army ants.

MAVs paint each other with 'virtual pheromones' and use these markers to let them know where they should explore - similar to how ants locate food and direct others to it.

>From a software perspective, controllers allow flying robots to work together. For swarming, robots react to wireless communication with neighbouring robots or rescuers.

(http://lis.epfl.ch/)

(published reports from epfl)

The Administrative Council of the International Amateur Radio Union held its annual meeting on 1-2 October in El Salvador.

Among the discussions and actions.

It was noted that the Papua New Guinea Amateur Radio Society (P.N.G.A.R.S.) and Burma Amateur Radio Transmitting Society (BARTS) are deemed to "no longer exist."

The theme "Amateur Radio: The first technology-based social network" has been adopted for the next World Amateur Radio Day, April 18, 2011.

The DX Code of Conduct Project, a group of amateur radio operators who have taken the initiative to improve on-the-air operating practices and The Arcala Project which has developed an innovative program to reach young people were thanked for their efforts and encouraged to continue their work.

So, just what is this "DX Code of Conduct"?

I will listen, and listen, and then listen again before calling.

I will only call if I can copy the DX station properly.

I will not trust the cluster and will be sure of the DX station's call sign before calling.

I will not interfere with the DX station nor anyone calling and will never tune up on the DX frequency or in the QSX slot.

I will wait for the DX station to end a contact before I call.

I will always send my full call sign.

I will call and then listen for a reasonable interval.

I will not call continuously.

I will not transmit when the DX operator calls another call sign, not mine.

I will not transmit when the DX operator queries a call sign not like mine.

I will not transmit when the DX station calls other geographic areas than mine.

When the DX operator calls me, I will not repeat my call sign unless I think he has copied it incorrectly. I will be thankful if and when I do make a contact.

I will respect my fellow hams and conduct myself so as to earn their respect.

==========

NEWS FROM ARNEWSLINE

HAM RADIO COORDINATES ARIZONA SCOUT RESCUE

Authorities say a Phoenix Arizona Boy Scout troop had been rescued near the city of Prescott. This after radioing for help via amateur radio.

The Yavapai County Sheriff's Office says one troop became stranded in the Pine Mountain Wilderness. The scouts were reportedly close to running out of drinking water and one scout had fallen ill when they radioed for help.

According to a newspaper account, one troop leader was able to relay G-P-S coordinates to a Prescott resident received the troop's call for assistance on his ham radio station. He in turn notified county authorities. The scouts were rescued by a state Department of Public Safety helicopter on Saturday night, September 25th. Authorities say the scouts and the their leaders were all in good condition and did not require medical attention.

The scouting troop included two adults and six children under the age of 15. They were in the mountains with other scout teams, learning to use signal mirrors in case of an emergency and climb different peaks to signal one another. But in the end it was ham radio rather than mirrors that lead to their rescue.

Due to the ages of those involved, no names or call signs were included in news stories on this Arizona mountain rescue.

FCC APPROVES USE OF WHITE SPACES FOR LONG RANGE WIFI

The Federal Communications Commission has approved the use of unlicensed broadcast spectrum known as "white spaces" that the agency hopes will amount to longer-range Wi-Fi-like connections for mobile devices. In a unanimous vote on Thursday, September 23rd, the five-member FCC said the unused spectrum between TV stations will be used for such mobile broadband services in the hope of providing improved service to consumers on the go.

Technology companies including Google and Microsoft had advocated the concept while it was generally opposed by broadcasters and entertainment venues. The latter had had hoped for the same spectrum for wireless microphones displaced from other bands. Instead, the Commission reserved two vacant UHF channels for wireless microphones and other low power auxiliary service devices in all areas of the country.

K3LR NAMED TO RECEIVE RCA 2010 BARRY GOLDWATER AMATEUR RADIO AWARD

The Radio Club of America has announced that Tim Duffy, K3LR, will be the recipient of its Barry Goldwater Amateur Radio Award.

The Goldwater Award is given to an RCA member in recognition of a long record of service to the public through the use of Amateur Radio. Duffy joins

Richard G. Somers, W6NSV, who has been named to receive the Radio Club of America's Special Recognition Award.

Both Duffy and Sommers will receive their honours at the organizations 101st annual Awards Banquet to be held November 19th in New York City.

Duffy will also be inducted as an RCA Fellow this year.

DX

In DX, K8ND and W9VA will be the first team to arrive at Signal Point Station on Curacao between October 10th and 18th, just before the October 10th date of dissolution of the Netherlands Antilles to operate stroke PJ2. The callsign PJ2T will be used after 0400 UTC on October 10th, when Curacao becomes an autonomous country within the Kingdom of the Netherlands. QSL via reach operators home callsign.

KM0O will be operational stroke 9M6 from East Malaysia between November 26th and the 30th. His main activity will be the CQWW DX CW Contest on November 27th and 28th as a Single-Operator All Band entry. QSL to KM0O via his information on QRZ.com or electronically using Logbook of the world.

DG5MMW will be active as stroke 3B8 from Mauritius Island between November 1st and the 6th. His operation will likely be holiday style on the HF bands. QSL to his home call direct or via the bureau. For those of you who have been asking for a definition of the term holiday style, it means the operator is likely on vacation and will not plan any specific hour of the day or day of the week to take to the air.

COMMUNICATIONS WITH DANCE

We are all familiar with the use of RF to communicate with one another using two-way radios, but have you ever thought that it can also play a part in the creative process in developing dance? Well Sonia Cillari, who is an artist in residence at the Steim Studio for Electro Instrumental Music in Amsterdam, has.

Working with a team of engineers and software programmers, Cillari is using electronics, radio frequency energy and computer control to develop a new performance based on her own thoughts, feelings and ideas, coupled with the latest in radio technology:

Sonia Cillari: "I use technology because it permits me to create the illusion. So usually I do not start from technology investigating technology. That is the contrary. So usually I make my own technical devices because they are for the aim of reaching that specific research."

Sonia Cillari is only one of a growing number of dancers and other artists around the world who are integrating the world of electronics and communications into what they create.

And less we forget, our sincere thanks to Marlon Barrios Solano and Dance-Tech Net for making the sound clip of Sonia Cillari available to us. For those interested in the arts, more on Dance-Tech Net can be

found on-line at www.dance-tech.net

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

QST ARTICLE SPARKS NEW UNIVERSITY PROGRAM

It all started with the June 2009 issue of QST. Larry Barr, K5WLF -- Planetarium Manager at Tarleton State University in Stephenville, Texas -- was reading QST when he came across an article about exploring the basics of radio astronomy through a homebrew, easy-to-construct radio telescope.

The article -- written by ARRL Education and Technology Program Coordinator Mark Spencer, WA8SME -- showed how to turn an everyday satellite TV dish into an instrument that can be used to not only broaden horizons and expand the understanding of our universe, but to marry the magic of Amateur Radio and astronomy.

Barr quickly got to thinking. He showed the article to his supervisor, Dr Shaukat Goderya, the Director of the Astronomy Education and Research Program at TSU. Barr and Goderya began brainstorming on how they could do something like that in the department. And thus began the latest research program in radio astronomy for the Tarleton Observatory.

November through March 0900 UTC 7.068 MHz

OSCAR-11 has now achieved 26 years in orbit. It was designed, built and launched within a period of six months, using commercially available 'off the shelf' components.

Clive Wallis G3CWV provides an excellent web page on the Amateur Radio satellite Oscar 11, well worth a surf.

Excellent signals have been reported from stations located around the world, and good copy obtained from decoded telemetry frames.

OSCAR 11 appears to be operating for ten days on, followed by ten days off, so it should start transmitting again today, around 09 October.

The Beacon frequencies are -

VHF 145.826 MHz. AFSK FM ASCII Telemetry

UHF 435.025 MHz. OFF

S-band 2401.5 MHz. OFF

(g3cwv@amsat.org)

Amateur radio satellite resumes operation

After a software crash on September 26 aboard AO-51 which took it off the air, Ground Station Mark Hammond, N8MH has reported 'The reloading of AO-51 is essentially complete; the bird is in good order.'

The AO-51 Command Team configured the satellite for simultaneous operation of both the S-band and U-band transmitters. The trade-off is that U-band will be low in power-around 250 mW or so. Also, please notice the use of the 145.880 MHz uplink!

Check the Command Team and Operations Group AO-51 News web page for the latest

==> + INTERNATIONAL SPOTLIGHT: IARU ADMINISTRATIVE COUNCIL UPDATES
WRC-12 PLANS

The Administrative Council (AC) of the International Amateur Radio
Union held its annual meeting on October 1-2 in Salinitas, El Salvador.
The AC is responsible for the policy and management of the IARU and
consists of the three IARU international officers and two
representatives from each of the three IARU regional organizations. The
IARU Region 2 General Assembly -- held October 4-8 -- also in
Salinitas, immediately follows the AC meeting. Read more here
<http://www.arrl.org/news/iaru-administrative-council-updates-wrc-12-plans>.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL TEACHERS INSTITUTE EXPANDS
TO INCLUDE SPACE, ELECTRONICS IN THE CLASSROOM
```

This summer, the ARRL offered two advanced ARRL Teachers Institutes on Wireless Technology (TI-2) sessions. One session focused on how to integrate space into the classroom, while the other concentrated on basic and more advanced electronics concepts and ham radio operations. "As we gain experience as to what content is need to help teachers to better integrate basic electronics, the science of radio, microcontrollers and robotics into their curriculum, the TI program continues to be refined and expanded," said ARRL Education and Technology Program Coordinator Mark Spencer, WA8SME. "The TI-2 program is an offshoot of that effort and provides a 'graduate level' opportunity for graduates of the regular Teachers Institute sessions." Read more here <http://www.arrl.org/news/arrl-teachers-institute-expands-to-include-space-electronics-in-the-classroom>.

==> AMATEUR RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES GRANT FUNDING FOR SEVEN SCHOOLS

In May 2010, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program, awarding nearly $6400 to seven schools. More than 475 schools across the country have received support from the ETP in the form of grants for equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology. The Executive Committee reviews applications for equipment and resource grants twice each year, in December and May. Read more here <http://www.arrl.org/news/arrl-executive-committee-approves-grant-funding-for-seven-schools>.

==> + AT THE WORKBENCH: GET READY FOR THE ARRL HOMEBREW CHALLENGE III

The ARRL has sponsored two Homebrew Challenges in the past, designed to test our members' design and construction skills by making useful amateur gear at low cost -- and sharing their results with our members. Our first ARRL Homebrew Challenge, announced in QST for August 2006, required the construction of a 40 meter, 5 W voice and CW transceiver built for less than $50 of new parts. The Second Homebrew Challenge, announced in February 2009, resulted in a number of creative designs of low cost 50 W linear amplifiers to follow the transceiver -- two for about $30, as well as a multiband amplifier with many features for somewhat more.

This time, we announce a challenge to build a transceiver in celebration of the (slow) return of sunspots. This challenge will be in two parts and readers can enter into either or both:

- A single band 25 W SSB and CW transceiver for 10 or 6 meters (Option 1), with a prize of $200.
- A 25 W SSB and CW transceiver that can be switched between 10 and 6 meters, using one or two switches (Option 2), with a prize of $300.

Read more here <http://www.arrl.org/news/get-ready-for-the-arrl-homebrew-challenge-iii>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of September -- includes seeking protection of amateur frequencies with the FCC, representing the ARRL at the local, regional and national level, training Field Organization leaders, administering ARRL awards programs and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-26>.

==> AMATEUR RADIO IN SPACE: SUMBANDILA OSCAR 67 SATELLITE ACTIVE OVER THE AMERICAS

The FM repeater aboard the South African Sumbandila OSCAR 67 (SO-67 <http://www.amsat.org/amsat-new/satellites/satInfo.php?satID=71&retURL=/satellites/status.php>)
satellite will be activated over North and South America until Sunday, October 10. According to the announcement from AMSAT-NA Vice President of Operations Drew Glasbrenner, KO4MA, the repeater will be available for 15 minutes beginning at the following times (UTC):

- October 7: 11:55, 14:51 and 17:57
- October 8: 13:04, 16:06, and 19:10
- October 9: 11:18, 14:14 and 17:20
- October 10: 10:58, 13:56 and 17:02

The SO-67 repeater receives at 145.875 MHz FM (233.6 CTCSS) and re-transmits at 435.345 MHz FM. Local pass predictions are available from AMSAT-NA's online calculator <http://www.amsat.org/amsat-new/tools/predict/>. -- Activity periods calculated by Ed Clayo, N8BBQ

==> DX NEWS: PJ PANDEMONIUM -- OPENING OCTOBER 10 ON AN HF BAND NEAR YOU

By H. Ward Silver, N0AX

No, it's not a colorized re-release of a 1960s B-grade beach movie <http://en.wikipedia.org/wiki/B_movie>. On Sunday, October 10, five islands in the Caribbean are all changing their governmental status at the same time: Saba, St Eustatius, Bonaire, St Maarten and Curacao. Known collectively as the Netherlands Antilles, these islands have up to now been an autonomous part of the Kingdom of the Netherlands. Some will remain within the Netherlands as "special municipalities" and some will become independent nations within the Kingdom of the Netherlands, just as the island nation of Aruba did back in 1986. What this means for the HF bands is a lot of interference as the new DXCC entities are born: Two DXCC entities (the island pair of Bonaire & Curacao and the three-island group of St Maarten, Saba and St Eustatius) will be deleted from the DXCC list of active entities and be replaced by up to five new entities! Read more here <http://www.arrl.org/news/pj-pandemonium-opening-october-10-on-an-hf-band-nea

r-you>.

==> + PUBLIC SERVICE: NOMINATIONS NOW BEING ACCEPTED FOR THE 2010 ARRL INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2010 ARRL International Humanitarian Award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. Read more here <http://www.arrl.org/news/nominations-now-being-accepted-for-2010-arrl-humanitarian-award>.

==> + ON THE AIR: AMATEURS ARE ON THE AIR IN CELEBRATION OF NATIONAL WILDLIFE REFUGE WEEK

Amateur Radio operators will be on the air in observance of the 2010 National Wildlife Refuge Week <http://www.arrl.org/news/nwrweek-radio.info>, scheduled for October 9-17. This event will coincide with festivals and special events at refuges that help connect people with nature at the country's more than 500 National Wildlife Refuges. Combining Amateur Radio's communication capabilities with enjoyment of the outdoors to help others learn about the National Wildlife Refuge System (NWRS) is the goal of the amateur stations participating in the nine-day event. Hams begin operating from a number of wildlife refuges this week under guidelines established in cooperation with the US Fish and Wildlife Service (USFWS). Only those stations that have authorized, responsible access to refuges are sanctioned by this event. For the first time, the US Senate has passed a resolution officially recognizing National Wildlife Refuge Week. The resolution "recognizes the importance of national wildlife refuges to wildlife conservation and the protection of imperiled species and ecosystems" and "reaffirms the support of the Senate for wildlife conservation and the National Wildlife Refuge System." Visit the National Wildlife Refuge Week Ham Radio Web site <http://nwrweek-radio.info> for more information and a list of participating ham radio stations.

==> + SOLAR UPDATE

Tad "Here comes the Sun King; everybody's laughing, everbody's happy <http://www.youtube.com/watch?v=tgLCGurproA>" Cook, K7RA, reports: Solar activity quieted over the past week. There were no sunspots on Wednesday, October 6, and the average daily sunspot number declined nearly 18 points to 27.6, compared to the previous week. The average daily solar flux values were off more than 3 points to 81. The predicted solar flux for the next 10 days -- October 7-16 -- is 75, 76, 78, 78, 80, 79, 80, 80, 82 and 81. Looking at the STEREO image early Thursday morning <http://stereo.gsfc.nasa.gov/> shows an active region in our Sun's southern hemisphere, just over the eastern horizon.

Perhaps this will bring more sunspots. Look for more information -- including an updated solar forecast and reports on 15 meter activity -- on the ARRL Web site on Friday, October 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Lennon's Here comes the Sun King <http://www.youtube.com/watch?v=tgLCGurproA>.

==> ON THE WEB: HOW TO SUBMIT A NEWS STORY

Visit the News Tips <http://www.arrl.org/news-tips> page on the ARRL Web site to submit a news story to our Editorial team. Your Amateur Radio-related news tip could end up in QST, online or in The ARRL Letter.

Here are a few hints from QST Managing Editor Joel Kleinman, N1BKE:

- Include contact information: If the person sending the tip isn't the main point of contact, be sure to include that person's contact information.
- Photos: When a story has a photo or two included, attach it to an e-mail message addressed to news@arrl.org and include caption information, as well as the name and call sign of the photographer.

For those submitting a complete item rather than just a tip, it's best to include the usual suspects:

- Who? Who was involved?
- What? What happened (what's the story)?
- When? When did it take place?
- Where? Where did it take place?
- Why? Why did it happen?
- How? How did it happen?

==> THIS WEEK ON THE RADIO

This week:

<http://www.arrl.org/multimedia>

- October 8-10 -- YLRL DX/NA YL Anniversary Contest
- October 9 -- FISTS Fall Sprint; EU Autumn Sprint (CW)
- October 9-10 -- Arizona QSO Party; Pennsylvania QSO Party; CQ SA SSB Contest; Makrothen RTTY Contest; Oceania DX Contest (CW); Scandinavian Activity Contest (SSB); WAB HF Phone Contest
- October 10 -- SKCC Weekend Sprint; North American Sprint (RTTY); 10-10 International 10-10 Day Sprint; UBA ON Contest (CW)
- October 13 -- NAQCC Straight Key/Bug Sprint
- October 13-14 -- CWops Mini-CWT Test

Next week:

- October 16 -- Iowa QSO Party; Feld Hell Sprint; Microwave Fall Sprint (local time)
- October 16-17 -- New York QSO Party; JARTS WW RTTY Contest; ARCI Fall QSO Party; Worked All Germany Contest; PODXS 070 Club 160 Meter Great Pumpkin Sprint (local time)
- October 17 -- Asia-Pacific Fall Sprint (CW)
- October 17-18 -- Illinois QSO Party; Run for the Bacon QRP Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS AND EVENTS

- October 15-17, 2010 -- ARRL Pacific Division Convention <http://www.pacificon.org/>, San Ramon, California
- May 20-22, 2011 -- Dayton Hamvention <http://www.hamvention.org/>
featuring ARRL EXPO, Trotwood, Ohio
- June 10-11, 2011 -- ARRL National Convention and ARRL EXPO at the ARRL West Gulf Division Convention <http://www.hamcom.org/>, Plano, Texas

Ohio/Penn DX Special Bulletin No. 979.1
The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 979.1
BID: $OPDX.979.1
October 7, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Bill/NC1L, Lee/KH6BZF and Jarmo/OH2BN for the following DX information.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that
the following operations are approved for DXCC credit:
The following operations are approved for DXCC credit:
9Q50AR • Democratic Republic of the Congo (Club Station all operations)
9Q50ON • Democratic Republic of the Congo; 2010 Operation

If you've had credits rejected for these operations please send a note to dxcc@arrl.org. Results will appear in LoTW accounts, or, please view your numbers online on the live, daily listings at www.arrl.org/dxcc.

PJ ACTIVITY. During the next three weeks (starting 10/10/10), DXers will be treated to something special that they have never seen before - multiple new DXCC entities. Expect huge pileups and probably plenty of confusion. It is suggested to "PLEASE be patient", "LISTEN" and "KNOW" who/what you are working. Even though the PJ islands are expected to be new DXCC entities, they will NOT be totally rare ones and will be easily accessible for future operations. With over 11 operations expected to be on the air during the next month, observe/listen first and then have fun working them.

STATIONS EXPECTED TO BE ON THE AIR 10/10/10:
PJ2T - Curacao Island; October 10th-November 2nd
PJ4B - Bonaire Island; October 10-22nd
PJ4I - Bonaire Island; October 10-22nd
PJ4N - Bonaire Island; October 10-22nd
PJ5/AH6DX - St. Eustatius; now through October 15th
PJ5/AA4NC - St. Eustatius; October 9-15th
PJ6A - Saba Island; October 10-22nd
PJ7E - Sint Maarten; October 10-20th
PJ7/AA4NC - Sint Maarten; October 15-18th
PJ7/AH6DX - Sint Maarten; October 15-22nd

STATIONS EXPECTED TO BE ON THE AIR LATER IN NOVEMBER:
PJ4A - Bonaire Island; November 23-30th
PJ5/SP6IXF - St.Eustatius; November 18th-December 3rd
PJ5/SP6EQZ - St.Eustatius; November 18th-December 3rd
PJ7/K1GI - Sint Maarten; November 20-23rd

Special thanks to OPDX's Propagation Guru Lee, KH6BZF, for providing
the following longitudes and latitudes of the following dutch islands:
PJ2 - Curacao Island 68-Deg. 59' W and 12-Deg. 10' N
PJ4 - Bonaire Island 68-Deg. 28' W and 12-Deg. 15' N
PJ5 - St. Eustatius Island 62-Deg. 58' W and 17-Deg. 30' N
PJ6 - Saba Island 63-Deg. 14' W and 17-Deg. 38' N
PJ7 - St. Maarten Island 63-Deg. 3' W and 18-Deg. 1' N

SPECIAL NOTE: Bill Moore, NC1L, Awards Branch Manager, informed the
DXCC QSL Checker on October 6th (edited): "As you know on 10/10/10
Bonaire, Curacao and Sint Maarten, et al, will become deleted entities
on the DXCC list. Other changes will occur and a full news release will
be made at the appropriate time.
For card checking purposes, DXCC will not be accepting any contacts
for the new entities until January 1, 2011. If you receive applications
with the deleted PJ's, these can be checked until December 31, 2010.
However, if your applicant asks, this entity will still count but as
a deleted entity. (effective 10/10/10).
If someone brings to you a QSL dated 10/10/10 or after, but before
January 1, 2011, this card must be returned to them, unprocessed. The
new entities will not even be added to the DXCC computer until January 1,
2011, so submitting them will result in nothing credited."

Press Release from Helsinki - October 7, 2010

SCANDINAVIAN ACTIVITY CONTEST (SAC) THIS WEEKEND, OCTOBER 9-10

SAC is a fast-track race where the Nordic countries - LA, OH, OZ, SM and
TF - are in serious annual country-level competition while also seeing
individual muscle flexing on all bands except 160M from 1200 UTC Saturday
through 1200 UTC Sunday on SSB.

Radio Arcala, OH8X is an alliance of young and seasoned contesters who
do things together with their associates, bringing youthful energy and
old wisdom into the game and working together to secure needed resources
and always topped with innovations.

This is to introduce the Radio Arcala SAC team and their four operating
locations:

OH8X - the mother station in Northern Finland will be piloted by Toni,
OH2UA. He is a young and skillful operator and the current holder of
CQWW European records on both CW and SSB. <http://www.radioarcala.com/>
Toni's self-confidence is boosted by two 100-meter rotating towers and
large antennas challenging the Northern Lights as well as imminent ice
and snow!

OJ0B - on Market Reef, two brave men, OH2BO and OH2PM, have decided to weather the storms and hold on to the reef to put this rare counter into SAC. They have racked up an impressive score on low bands this week and they will keep on running the low bands and 17M until the SAC starting bell, with some equipment challenges. Pertti, OH2PM will pilot SAC single-handedly. <http://www.majakkaseura.fi/>

OH0B - Aland Islands, with Martti, OH2BH to offer an OH0 in SAC from the Brando cottage that has provided reliable service as a contest multiplier for more than 30 years sporting a variety of OH0 callsigns. This is Martti's annual October outing, taking Mom on a trip to a wonderland which they discovered in 1979. There's a new 80M beam which may put Martti on a par with OH8X and OJ0B as a rare country attraction.

OH2BH - from Southern Finland, Ilkka, OH1WZ will air the newly refurbished OH2BH contest site, using a pair of Yaesu FTdx5000's. As a serious contester, Ilkka is also the highly acclaimed Contest Club Finland (CCF) PileUp Magazine's Chief Editor. You are very welcome to download your PU copy with interesting reading plus a link to SAC rules. Ilkka is hammering alongside the others but is determined to cut the finish line ahead of them. <http://www.helsinki.fi/~korpela/PU/PU34_2010.pdf>

Radio Arcala has set as its target to offer you a lot of fun and to see the four stations placing among the Scandinavian Top Six, single op - all bands. You can follow their performance by tracking the serial numbers of old and young Arcalians racing in full harmony.

QSL OH8X via OH2UA. Others via OH2BH.

RADIO POLITICS: IARU ADMINISTRATIVE COUNCIL UPDATES WRC-12 PLANNING
The Administrative Council of the International Amateur Radio Union or
IARU held its annual meeting on October 1st and 2nd in El Salvador.
Amateur Radio Newsline's Norm Seeley, KI7UP, takes a look at what was
accomplished:
--
The Administrative Council is responsible for the policy and management
of the IARU. It is made up of the three IARU international officers
and two representatives from each of the three regional organizations.
And this group covered a lot of ground in the two days that they were
allotted to them. Perhaps most important issue faced was the IARU
positions on relevant agenda items for the 2012 World
Radiocommunication Conference also known as WRC-12. These items were
reviewed and updated in light of developments since the 2009
Administrative Council meeting. Desired agenda items for future World
Radiocommunication Conference were also considered while progress on
the action plan for developing support for amateur radio frequency
allocations were reviewed and the plan updated for the period through
the WRC-12 meeting. With electromagnetic compatibility issues becoming
more and more of a problem for radio amateurs world-wide, a need was
identified for an IARU coordinator to handle this issue. A
sub-committee of the Administrative Council will develop suitable terms
of reference for this. Future involvement by the IARU in the Global
Amateur Radio Emergency Communications or GAREC Conference was
discussed. The decision was to request additional information from the
conference organizers. The theme "Amateur Radio: The first
technology-based social network" was adopted for the next World Amateur
Radio Day. That's slated for April 18, 2011. Lastly, a report was
received from the IARU 2025 Committee, which is developing a concept

for a new organizational structure for the IARU. The committee was asked to refine its report into a form that can be presented to member-societies for their consideration. This is only a quick overview of what was discussed at the conference. For a more detailed report, please take your web browser to tinyurl.com/2ayetpw For the Amateur Radio Newsline, I'm Norm Seely, KI7UP, watching the ham radio political scene from Scottsdale, Arizona.
--
The next scheduled in-person meeting of the IARU Administrative Council will be held in the vicinity of Sun City, South Africa, on August 19th and 20th of 2011. This, in conjunction with the IARU Region 1 Conference that will take place August 13th to the 18th at or near the same location. (Southgate)
**
RADIO POLITICS: WORLD HAM RADIO LICENSE MAY BE ON ITS WAY

In other news out of the conference, Radio Amateurs of Canada reports that a true world wide ham radio license could be in the hobby's future.

Daniel Lamoureux, VE2KA, is the Vice President International Affairs for Radio Amateurs of Canada. He says that El Salvador's Superintendent of Communications surprised everyone at the end of his speech by announcing that his nation had decided to sign the International Amateur Radio Permit or IARP Agreement.

For those of you not aware, the IARP Agreement is designed to allow ham radio operation in certain countries of the Americas without seeking a special license or permit to enter and operate from that country. According to Lamoureux, this move by El Salvador is a very significant and means that in a short time the IARPand the pan-European Conference of Postal and Telecommunications Administrations or CEPT International Amateur licenses might be harmonized and become one. (RAC, VE2KA)

**

RADIOS FUTURE: MAJOR SURVEY OF UK HAMS LAUNCHED BY RSGB

At the recent Radio Society of Great Britain National Hamfest the U-K national society announced the launch a major survey of all United Kingdom radio amateurs. The objective of the survey is to gather as much information as possible on 21st century amateur radio operation in that nation.

According to the announcement, the survey, which is internet based, will run for three months. The data collected will be used to determine the direction that amateur radio takes over the next 10 to 20 years.

Full details of the survey will shortly appear in the amateur radio press while notices of invitation will be placed on all amateur radio reflectors and will appear shortly on the RSGB website. (RSGB)

**

RESTRUCTURING: SOUTH AFRICA FACES MAJOR LICENSE STRUCTURE CHANGES

A new round of amateur radio license restructuring appears to be taking pace in South Africa. This, with word that ICASA, the Independent Communications Authority of South Africa has published the draft of proposed changes to that nations radio regulations in the September 26th Government Gazette. We have more in this report from Bruce Tennant, K6PZW:

--

According to the South African Radio League, there are some significant changes to regulations pertaining to telecommunications in general and amateur radio in particular contained in the Independent Communications Authority of South Africa draft rules revision proposal. These include the disappearance of the Zed R license prefix and, with that, the requirements for one of the five upgrade criteria.

Those having passed the Class A examination will be allocated a Zed-S callsign. The South African Radio League says that it plans to discuss with ICASA the procedure by which Zed-R license holders will be able to upgrade to Zed-S at the next liaison meeting.

But this is not where the restructuring will end. If placed into communications law, there will be a new age restriction placed on the South African class B license. The Class B license will be available only to those under the age of 20. Holders of this license will be expected to take and pass the nations class A examination before they reach age 25. After that, the Class B license along with its Zed U prefix will be cancelled.

As to reaction from the South African ham radio community? The South African Radio League says that these are significant changes to regulations affecting to amateur radio in that nation. It says that the organization will study the draft regulations and will hold a discussion during the President's Net. That's slated to be held on Sunday, October 17th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles

--

The Independent Communications Authority of South Africa says that it will be holding a public hearing on the new rules on December 1st and 2nd. Soon after that date the final regulations are expected to be enacted into law. (SARL)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N3EVW repeater serving Scranton, Pennsylvania.

(5 sec pause here)

**
RESCUE RADIO: NEW NEVADA RADIO STATION TO INCLUDE HAM STATION A tower is in place for a new broadcast radio station that will have a ham radio connection. Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:
--
The station is KQLN on 91.3 MHz FM and will serve Alamo, Nevada, in the Pahranagat Valley. This, from a site that sits on Nevada Highway 93 with coverage expected to be 50 miles in all directions. The owner of KQLN is Harvey Caplan, KD7FJJ. Jerry Fuge, KC6ILH the Emergency Coordinator in Nevada's Northern Nye County says that Caplan is a member of the regions ARES/RACES organization that already has a repeater located at another of Caplan's radio stations. That one is located in the town of Pahrump. Thats a city made famous by overnight talk show host Art Bell, W6OBB. In a recent interview, Caplan told the Lincoln County Record that the stations transmitter site will house both KQLN along with an amateur radio station that will have coverage over most of the populated area of the valley. The ham station will be battery-powered and charged by a solar power panel. Caplan told the newspaper that almost everyone associated with the station called Alamo Radio is not only a licensed amateur radio operator, but also a member of Amateur Radio Emergency Service. He describes ARES as a national organization trained to respond to community emergencies by setting up two-way radio stations in hospitals, public safety areas, or even on mountain tops. Kaplan notes that amateur radio can get messages through when conventional public safety radio systems fail, or to help when such systems may become overloaded. He says that some messages can be urgent, to fire or police, or simply relay health and welfare information to relatives of those in a disaster zone. Either way says Caplan, they could be life saving. For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.
--
In the newspaper article Caplan added that he hopes that others will want to serve the community and the valley by becoming licensed radio amateurs. He also looks forward to having KQLN-FM operating by the time of the November elections if at all possible. (Lincoln County Record, Nevada ARES)

**

ENFORCEMENT: TWO BOSTON UNLICENSED BROADCASTERS FINED $15000 EACH

The FCC fined two Boston area men for operating an unlicensed station on 99.7 MHz.

The story goes back to the fall of 2009. That's when the local FCC office received a complaint from one of the city's licensed stations about the unlicensed stations operation. Field agents traced the signal to an apartment building in the Mattapan neighborhood of the city. The agents saw a roof mounted antenna with its coaxial feed line leading to a basement window. The agents took field strength measurements and

determined that the signals exceeded the limits for unlicensed Part 15 operation.

Some time later, two men identified as Lloyd Morris and Robert Brown, met with the FCC agents. According to the agency, it was at that meeting that the pair admitted they owned and operated the station. The agents explained the potential penalties for such a violation and Morris and Brown agreed to shut off the transmitter and did.

On October 15th of 2009, the Boston Office issued Notices of Unlicensed Operation to Morris and Brown by mail. According to the FCC it never received a response from either man. And that's where the matter stood until this past February when the FCC again receiving complaints that the same unlicensed station was back on the air. Agents located the source as the same building and again documented the antenna on the roof, he coaxial downlead and the stations signal strength as again exceeding what is permitted by Part 15 of its rules.

Now, acting on the evidence before it the FCC has issued Morris and Brown each a Notice of Apparent Liability to Monetary Forfeiture in the amount of $15,000 each. The two were given the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: HELP NEEDED IN FINDING CHURCHES ON 10 METER FM Illegal broadcast transmitters in churches are again being heard across the great Atlantic pond, and your help is needed to find them. Ger McNamara, EI4GXB, is the Irish Radio Transmitters Society's IARU Intruder Watch coordinator. He is asking hams and SWL's to again keep an ear on 28.265 FM. This, based on incursions by churches on this frequency heard throughout Europe with signals equaling 59 +20db. In addition, McNamara days that there have also been reports of a Church in the Dublin area transmitting on 28.030 Mhz. This is in the CW portion of the 10 meter band. No matter where in the world you are, if you hear either of these illegal operations, please send a detailed report to EI4GXB. His e-mail is ei4gxb (at) gmail (dot) com. If you live in Ireland please also copy your report to telecommunications regulator ComReg as well. (IRTS)
**
RADIO LAW: SENATE BACKS HOUSE ON TV VOLUME LAW The United States Senate unanimously passed a bill late Wednesday, September 27th to require television stations and cable companies to keep commercials at the same volume as the programs they interrupt. The legislation, sponsored by Senator Sheldon Whitehouse of Rhode Island requires the FCC to adopt its recommendations as regulations within a year and begin enforcing them a year later. The House of Representatives had already passed similar legislation. Before it can become law, minor differences between the two versions have to be worked out when Congress returns to Washington after the November 2nd election. Oh yes, the title of this law is the Commercial Advertisement Loudness Mitigation Act, better known by the acronym CALM. (Published reports)

**

EMERGING TECHNOLOGY: CCTC IMAGE PROCESSING TO COUNTER TERRORISM

The VTT Technical Research Centre of Finland is developing image processing technology that will improve surveillance of abandoned luggage in public places.

Its well known that across Europe there are numerous Closed Circuit TV systems in use in public places. These installations have the ability to gather large amounts of image material. But at this time there are no effective ways to analyze the mass of video data automatically and recognize potential risk situations.

Now comes VTT which is involved in a European Union research project called SUBITO. SUBITO is aimed at developing Information Technology or I-T solutions. An example might be luggage left in a public place which may contain explosives or other dangerous substances. Terror attacks based on this tactic have already claimed taken place. Now, with the help of an application developed as part of the project, cameras recognize abandoned luggage automatically and rapidly identify, locate and track the person who left it there.

VTT says that SUBITO enhances security in a cost-efficient manner, since the new technology can be built on the foundations of existing Closed Circuit TV systems. Individual privacy issues are thus easier to take into account, because the end users must already take note of them in operating the system. (Science OnLine)

**

RETRO RADIO: 6 METER AM IN THE SACRAMENTO VALLEY

If you operate 6 meter AM on the Pacific Coast, then you might want to point your beam toward the central part of the state of California. Larry Hogue, W6OMF, reports over the VHF Reflector that Mondays at 7 PM Pacific time there is a gathering of the AM enthusiasts on 50.4 Mhz. Most stations are in the Sacramento valley area with net control in the town of Camino. And if 6 meters magically opens up as it does from time to time, this is a chance to snag what's quickly becoming a historic mode of VHF's past. (VHF Reflector)

**

NAMES IN THE NEWS: TALK RADIO HOST ART BELL W6OBB REPORTED ACTIVE FROM MANILA

Some names in the news. First up this week is famed overnight talk radio host Art Bell, W6OBB. The Ohio Penn DX Newsletter reports that Bell has recently been heard as 4F1AB from Manila, in the Philippines where he now lives. His activity seems to be on 20 and 15 meters SSB after 1200 UTC. Information on QRZ.com states that he is active on 40 through 10 meters, and he often listens on 14.315 MHz. QSL's go to W6OBB via his Nevada address. (OPDX)

**

NAMES IN NTHE NEWS: VA6KM APPOINTED AS RAC ALBERTA SECTION TRAINING COORDINATOR

And Ken McPherson VA6KM has been appointed as Radio Amateurs of Canada's Training Coordinator for the organizations Alberta Section. McPherson has been a radio amateur since 1993. He served as a Naval Combat Information Operator as well as in the Armored Reserves in Ottawa. His background in training includes time as a Cadet Instructor, First Aid Instructor and Scuba Instructor. (RAC)

THE CHANGING OF THE GUARD: FORMER TRI-EX TOWER OWNER FRANK CLEMENT, W6KPC, S.K.

The changing of the guard continues with the sad news that High Frequency antenna pioneer Frank Clement, W6KPC, of Bakersfield, California, has become a Silent Key. Clement, age 93, died on September 23rd as a result of a highway accident.

Frank Clement, W6KPC, was best known in ham radio circles as the former owner of Tri-Ex Towers. He also designed and built a number of high performance High Frequency antenna arrays over the course of several decades.

In 2006, The Radio Club of America honored W6KPC with its Barry M. Goldwater Amateur Radio Award. The award recognized his accomplishments in designing and manufacturing towers and designing and constructing his famed Yagi Sextet. The Sextet was once described as North America's largest amateur radio phased HF Yagi system.

Frank Clement is survived by his wife, Chong Ye. A graveside service was held on October 4 in, Delano, California. Memorial contributions can be made to The A. J. F. Clement Memorial Fund, Kern Schools Federal Credit Union, PO Box 9506, Bakersfield, CA 93389. (QCWA, RCA, ARRL, others)

**
HAM RADIO IN SPACE: INDONESIA TO LAUNCH TWO HAMSATS A news report out of Jakarta says that the Indonesian National Institute of Aeronautic and Space will launch two satellites carrying amateur radio transponders in the second quarter of 2011. Known as LAPAN-A2 and

LAPAN-ORARI,, the report appears to indicate that the satellites will be carried to orbit on board a domestic Indonesian manufactured rocket. An earlier report in February indicated that LAPAN-ORARI would be launched from India. But the article comments on the effect of import restrictions which has led the National Institute to develop local production to enable the country to have an independent rocket launch facility. The entire report is on-line at tinyurl.com/lapan (Southgate, others)

HAM RADIO IN SPACE: AO-51 BACK ON LINE

The AMSAT OSCAR 51 ham satellite is back on the air following a software crash on September 26th. According to control station Mark Hammond, N8MH, reloading software was completed and as of September 29th, and the bird is in good operating condition.

According to AMSAT, the AO-51 Command Team has configured the satellite for simultaneous operation of both the S-band and U-band transmitters. The tradeoff is that U-band will be low in power at around 250 milliwatts.

Also, please notice that 145.880 MHz is being used as the uplink. However, the satellites operational configuration could be updated or changed without much advance notice. (AMSAT)

**

DX

In D-X, word that members of the Algarve STAR DX Team will be active as CR6A from South Lourenzo Fortress located inside Ria Formosa Natural Park between Armona Island and Culatra Island. Activity will be on all bands as possible on CW and SSB. This Fortress is totally submerged except in the lower tide. QSL via CT1GFK.

NE8Z will be operational as C6AEZ from New Providence Island between October 11th and the 16th. Activity will be on 80 through 10 meters using CW and SSB. QSL via NE8Z.

Members of the Isle of Man Amateur Radio Society will be active as GT1IOM from the town of Douglas between October 16-17th. This operation is taking place during the 53rd Scouting Jamboree on the Air. QSL via GD1MIP.

Lastly, the South Korea's Cheonan Asan Ham Club and possibly other guest operators will be active as D7G20 between October 29th and November 28th. This, to celebrate the upcoming G20 Summit Meering in Seoul. Operations by D7G20 are expected to be on 80 through 6 meters using CW, SSB and RTTY. QSL to the G20 Seoul Summit 2010 Special Callsign, P.O. Box 90, Cheonan, 330-600, South Korea.

THAT FINAL ITEM: ELECTRONIC ARCHIVING: YOUR ARCHIVE MIGHT BE FADING

If you store important documents, sounds and photos on optical disc's, your history may be fading away with no way to restore it. In fact, some of the worlds most precious artifacts have already been lost as we hear from Amateur Radio Newsline's Fred Vobbe, W8HDU:

--

W8HDU report here: Audio only. Please download the MP3 version of this newscast at www.arnewsline.org to hear it

--

Fred will be back next week to detail what needs to be done to keep all of these audio files alive for future generations to enjoy. Meantime, for more information on this story, please visit www.loc.ggov. (W8HDU)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Library of Congress, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm David Black, KB4KCH, at the South-East bureau in Birmingham, Alabama, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 10th October 2010

The news headlines

Encouraging response to RSGB questionnaire

Church broadcasts affecting 28MHz

4th Buildathon planned

The survey of amateur radio within the UK was formally launched last weekend at the National Hamfest with a personal questionnaire for all radio amateurs. In its first week nearly 600 questionnaires have been completed. 69% of those completing the questionnaire have been RSGB members, but it is encouraging to note that 18% were from radio amateurs whose membership of the RSGB had lapsed and the remainder had never been members of the National Society. The survey will be active until 31st December and all radio amateurs are encouraged to participate as well as give help to those who find difficulty in accessing the internet or using computers. There will be an opportunity to complete the Questionnaire at this weekend's RSGB Convention. The survey can be found online at www.rsgb.org/survey.

The Irish Radio Transmitters Society has asked amateurs and SWLs to keep a listening watch around 28.265MHz FM as there have been incursions by churches on this frequency heard throughout Europe at up to S9+20dB. Recently there has also been a church in the Dublin area transmitting on 28.030MHz in the CW portion of the band. Please send details of names etc used so IRTS can try to identify locations and report them to ComReg for investigation. All information should be sent to Ger McNamara, EI4GXB, the IRTS IARUMS coordinator, by email to ei4gxb@gmail.com.

The 4th Bath Buildathon is planned for Saturday 8 January. The project looks like being a superhet receiver for 20m, but that is still to be confirmed. The Buildathon group are also running another Intermediate course to start on Thursday 4 November. The classes are held close to Bath city centre between 7 and 9pm every Thursday. Enquiries for both the Intermediate course and the Buildathon should be directed to Steve, G0FUW, on 01225 464394 evenings 7-9pm, except Thursdays, or via email to g0fuw@tiscali.co.uk.

ZS8M from Marion Island has been approved for DXCC credit. Those who have had cards rejected for this operation can e-mail dxcc@arrl.org for an update to their DXCC account. Please refer to your LoTW account or

the live daily listings for confirmation that an update has been done.

Crystal Palace Radio and Electronics Club is holding a Foundation course during November with the exam planned for 4 December. Cost per student will be ?40, including a copy of Foundation Licence Now! and the exam itself. Information and application forms can be obtained from the Course Leader Victor, G1PKS, by phone on 020 8653 2946 or by email to victor@jmail.co.uk.

Porthmadog and District Amateur Radio Society is taking part in Jamboree on the Air and Jamboree on the internet. This year's theme is The Right to be Heard and they'll be exploring freedom of speech across the world. The event in Bangor is being hosted by The Bangor University Guides and Scouts of Bangor Students from 10am to 6pm on the 16th and 17th of October. All local Guides and Scouts are invited to the PADARS JOTA station at Bangor University's Ffriddoedd site to share experiences and ideas.

And now for the details of rallies and events for the coming week.

Today, Sunday 10 October is the final day of this year's RSGB Convention at Horwood House, Little Horwood near Milton Keynes. Lectures continue until 3pm. Details at www.rsgb.org/rsgbconvention.

The Moray Firth Amateur Radio Society holds its Autumn Junk sale at the Scout Hall Christie Place Fochabers in Moray on Saturday 16 October from 12 noon. The doors are open for setting up tables from 11am. Entry is ?1 and a raffle will be drawn around 1pm.

Galashiels and District ARS will be holding its Annual Radio and Computer Rally in The Volunteer Hall, St John's Street, Galashiels TD1 3JX on Sunday 17 October. Doors open 11am and admission is ?2.50. There will be traders, Bring and Buy and Refreshments. Details from Jim, GM7LUN on 01896 850245.

Also on Sunday 17 October, the Blackwood and District ARS Rally will be held at Coleg Gwent, Risca Road, Cross Keys NP11 7ZA. Doors open at 10.40 and admission is ?2. There will be trade stands, a Bring & Buy, special interest groups and catering. Details from Dave, GW4HBK, on 01495 228 516.

The Hornsea Amateur Radio Club Rally will take place in Floral Hall, 7 The Esplanade, Hornsea, East Yorks HU18 1NQ on Sunday 17 October. Doors open at 10.30am. There will be trade stands, a Bring & Buy, special interest groups and an RSGB bookstall.

Advance notice now for the G QRP Club Mini Convention in conjunction with the Halifax Radio Society on Saturday 23 October at Rishworth School, Ripponden. Doors open at 10am and admission is ?2. Lectures on QRP subjects, Bring & Buy, surplus and junk, components, kit traders and much more. A full programme of lectures in the purpose built lecture theatre will also take place.

Now for the news of special events

Today, 10 October, G0FQN, G1PIE and 2E1HQY will be on the air from the Worth Valley Railway during the steam gala using the call GB5WVR. More details are on qrz.com.

On Saturday 16 October, Jack, G0FQN, Mark, G1PIE and Pam, 2E1HQY will be on the air from Ribblehead Station celebrating 175 years of the Great Western Railway using the callsign GB4SCL. Details are on qrz.com.

GB5BUS will be on the air from Bangor University's Ffriddoedd site Common Room, Bangor on 16 and 17 October as part of JOTA between 10am and 6pm each day. There will be talk in on 145.550MHz, S22, during these hours.

And now the HF DX news compiled from 425 DX News and other sources

A team will be active from Bilene, Mozambique between 15 and 31 October with a variety of C91 callsigns. For Jamboree On the Air on 16 and 17 October they will operate as C91MS while during the CW WW DX SSB Contest they will operate as C91WW. Between these two events they will operate under their individual callsigns. Most activity will be SSB, although they may be able to do some CW, PSK31 and RTTY. The QSL manager for the expedition is GI4FUM. Further information at www.3da0ss.net.

Arnaud, F4FOO and the F6KJG Radio Club will be active as TM40FO from the Foret d'Orient Regional Nature Park on 15 to 17 October. QSL via F4FOO, either direct or via the bureau.

Now the contest news

On 12 October, the 432MHz UKAC takes place between 1900 and 2130UTC. Using all modes the exchange will be signal report, serial number and locator.

14 October sees the CW leg of the 80m Club Sprint taking place between 1900 and 2030. The exchange is serial number and name.

Next weekend, on 17 October, the second 50MHz Contest takes place from 0900 to 1200UTC. Using all modes, the exchange will be signal report, serial number and locator.

Advance notice now for the UHF UK Activity Contest on 19 October between 1900 and 2130UTC. Using the 1.3 and 2.3GHz bands, the exchange will be signal report, serial number and locator.

And now the solar factual data for the period from the 27th of September to the 3rd of October, compiled by Neil Clarke, G0CAS on the 4th of October.

The solar disc had spots visible every day, in fact, three groups were present most days. However, solar activity was very low except for the 28th when a small C class solar flare took place. Solar flux levels increased from 83 units on the 27th to 91 by the 29th, but then gradually declined to 80 by the 3rd. The average was 86 units. The 90

day solar flux average on the 3rd was 81, that's one unit up on last week. X-ray flux levels declined from B1.4 units on the 29th and the 30th to A8.7 by the 3rd. The average was B1.1 units. Geomagnetic activity was quiet with the Ap index in single figures every day. The most disturbed was the 28th with an Ap index of 7 units. The average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 580 kilometres per second on the 29th to 290 by the 3rd. Particle densities were low throughout. Bz varied between minus 8 and plus nanoTeslas on the 28th and between minus 2 and plus 3 on the quietest day which was the 30th.

And now the solar forecast. This week the active side of the Sun is expected to be rotating into view. Solar activity should be mostly very low but later in the week activity could increase if any C class solar flares take place. Solar flux levels are expected to increase from around the 80 mark at first to approaching the 90's towards next weekend. Geomagnetic activity should be mostly quiet this week with no coronal holes facing Earth. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows are expected to be around 10MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 31MHz. The optimum working frequency with a 90 per cent success rate will be about 25MHz. The best time to try this path will be between 0900 and 1600 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Sunday 10 October Wythall Radio Club has the Lord Pettitt Shooting Competition. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Monday 11 October Bromsgrove & District Amateur Radio Club is looking at filters. Contact Chris, M0BQE on 01905 776 869.

On Monday 11 October Gloucester Amateur Radio & Electronics Society is having a workshop evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 11 October South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Monday 11 October Stratford Upon Avon District Radio Society has a talk on the Arduino electronics prototyping platform by G Bulmer. Contact G0CHO, on 01608 664488.

On Monday 11 October Sutton Coldfield Amateur Radio Society is having a talk on D-Star by Paul Smith of Tamworth Radio Club. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Monday 11 October Wythall Radio Club Advanced Course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 12 October Eagle Radio Group is having a talk on the radio side of Wi-Fi by Charles, G0CBM. Details from Terry, G0SWS, on 01507 478590.

On Tuesday 12 October Loughborough & District Amateur Radio Club is holding its AGM. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 12 October Mid-Warwickshire Amateur Radio Society is having a technical topics evening. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 12 October Wythall Radio Club is holding a committee meeting. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 13 October Lincoln Short-Wave Club has a surplus equipment sale, booking in from 1930. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 13 October Midland Amateur Radio Society has Foundation and Morse classes plus a committee meeting. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 13 October Telford & District Amateur Radio Society is following up on the Members' project. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 14 October Brigg & District Amateur Radio Club is having a lively talk on linear amplifiers by Dave, M0OGY. Details from John, 2E0III, on 01652 632938.

On Thursday 14 October Salop Amateur Radio Society is having a natter and pre-AGM night. Details on the web at www.salop-ars.org.uk.

On Friday 15 October Melton Mowbray Amateur Radio Society is having a talk on solar panel design and installation by Shaun Mowlem. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 15 October Nunsfield House Amateur Radio Group is holding an egg race with Ken Clarke. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Saturday 16 October Coventry Amateur Radio Society is holding a quiz night. Contact John, G8SEQ, on 07958 777363.

On Saturday 16 October Lincoln Short-Wave Club G5FZ on air from the shack and jobs around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 16 October Sutton Coldfield Amateur Radio Society commences its JOTA weekend event at Banners Gate, Sutton Park. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Monday 11 October Angel of the North Amateur Radio Club is having a talk on homebrew D-Star repeater node GB7NE by David Stansfield. Contact Nancy Bone, G7UUR, on 0191 477 0036.

C6 - BAHAMAS, NA-001
Rick,NE8Z, will show up as C6AEZ from Nassau (NA-001) from Oct 11-16.
He plans to work in CW and SSB on 80m-10m using a TS50 and an Outbacker
antenna. QSL via homecall.

DU - PHILIPPINES, OC-042
Art Bell,W6OBB, a wellknown radio host in the USA, has moved to Manila
and is now active as 4F1AB. He has been spotted in SSB on 15m and 20m
after 1200 UTC so far. His preferred frequency is 14315 kHz.
The QSL route is Art Bell, 9041 Desert Ln, Pahrump, NV 89048, USA.

VP8/SO - SOUTH ORKNEY ISLANDS, AN-008
Mehdi,F5PFP, who is organizing list operations fro Diego,LU1ZA, has
been spammed with tons of e-mails after his announcement in the major
DX publications. Please contact Mehdi only if South Orkney (AN-008) is
an all new DXCC for you. He asks everybody else to wait for the
upcoming major DXpedition scheduled for February 2011.
You can find some nice photos of the Orcadas base online at:
www.french-polar-team.fr/LU_Orcadas_Station_Laurie_Island_South_Orkney.php

ZD9 - TRISTAN DA CUNHA, AF-029
Ulli,DL2AH, will show up as ZD9AH from Tristan da Cunha (AF-029)
between Oct 10 and Dec 6. Please keep in mind that this is a holiday
and NOT a DXpedition. Nevertheless he plans to take part in the
WAG Contest, the CQ WWDX contests and the JADX Contest. His equipment
includes a Yaesu FT-897 (barefoot) and a Windom antenna. Ulli works in
SSB most of the time but promised to be active also in RTTY by the end
of November. The QSLs will be sent out after his reurn home in January.
QSL cards can be sent either via bureau or direct to DL2AH.

5V - TOGO
An Italian team comprised of Alfeo,I1HJT, Carlo,IK1AOD, Vinicio,IK2CIO,

Angelo,IK2CKR, Marcello,IK2DIA, Stefano,IK2HKT, and Silvano,I2YSB,
announced to become active as 5V7TT from Oct 10-23. Operation will
take place in CW, SSB and RTTY on 160m-10m with up to three stations
at the same time. The pilot station will be Arturo, IK7JWY.
Their preferred frequencies are:
CW: 1822, 3505, 7005, 10106, 14025, 18075, 21025, 24895, 28025 kHz
SSB: 3780, 7056/7180, 14195, 18145, 21295, 24945, 28495 kHz
RTTY: 7040, 10140, 14080, 18103, 21080, 24920, 28080 kHz.
QSL via bureau to G6BMY or direct via I2YSB.
For more information visit the websites: http://www.i2ysb.com or
http://www.hamradioweb.org/forums

5Z - KENYA
Sig,NV7E/ZS6SIG, was working in Pretoria/South Africa the past time but
will live in Nairobi for the next four years. He was already licensed
before as 5Z4EE in the 1980s and now got this callsign allocated again.
Sig will be active on all bands from 160m-10m. He is also an avid
contester and plans to join the CQ WWDX SSB Contest in the single OP/
allband/low power category.
QSL via NV7E or via the address of 5Z4EE at QRZ.com.

WLOTA: The "Radio Club Venezolano" will be QRV as YW1AJ from Falcon state
working in all modes on 6m-80m from Oct 8-12. Their QTH will be the
Punta Macolla lighthouse (ARLHS VEN-018). This operation counts for the
"DEV award" (Venezuelan states, www.radioclubvenezolano.org/devru.htm)
and for the "DFV award" (Venezuelan lighthouses,
http://www.radioclubvenezolano.org/dfvru.htm).
QSLs via bureau or direct to YV5AJ.

NETHERLANDS ANTILLES

The already announced change of the constitution of the Netherlands Antilles
will take place, as previously reported, on Oct 10, 2010.
It is a reconstitution of the Netherlands Antilles. Curacao and Sint Maarten
will become a country within the Kingdom of the Netherlands (like Aruba
already is) while Bonaire, Saba and St. Eustatius even lose some degree of
previous independence and become "Kingdom Islands". This moves them closer
to the Netherlands. The Netherlands Antilles are not becoming independent -
even Aruba is still a dependent territory of the Dutch kingdom (overseas
territory with special status). Converning the DXCC status please refer to
the DXNL last week. A frequency table of all major activities can be found
below.

PJ2 - NETHERLANDS ANTILLES, CURACAO, SA-006
Jeff,K8ND, is the team leader of a group which will sign PJ2/K8ND and
PJ2T from Curacao (SA-006, WLOTA LH-0942) in CW and SSB on all bands
from Oct 8-18. QSL via K8ND or LoTW.
This team will be replaced by a group of nine from the USA and Germany.
This group will be active in all modes on all bands until Nov 2 inclu-
ding the CQWW SSB Contest (multi/multi).

PJ4 - NETHERLANDS ANTILLES, BONAIRE, SA-006
PJ4GT, Jan,DJ8NK, Andreas,DL9USA, Peter,PJ4NX, Hans,PJ4LS, Peter,PA8A,
Fred,PA8F, Rob,PA3GVI, Bert,PE2KY, Marco,PE2MC, Jo,PA9JO, Henk,PD5TS,
Michiel,PG4M, Kelly,N0VD, John,K6AM, Ken,W0LSD, Scott,W4PA, and
Jan,WP3UX, will activate Bonaire (SA-006, WLOTA LH-1279) in SSB, CW and
digital modes on 160m-10m for two weeks starting on Oct 10. The team
has two special calls PJ4N (QSL via DJ8NK) and PJ4B (QSL via PA8A) and
they are allowed to use the antennas of Radio Netherlands when the
station is not transmitting from 1230-1830 UTC. Expect outstanding
signals on 30m, 20m, 17m and 15m!
All QSOs will be confirmed automatically via bureau.
More news and an online log can be found at: http://www.bonaire2010.com

PJ5 - NETHERLANDS ANTILLES, ST EUSTATIUS, NA-145
Paul,K1XM, is leading a group of the "Yankee Clipper Contest Club"
which plans to show up from St. Eustatius (NA-145) in SSB/CW/RTTY on
160m-10m from Oct 8-16. QSLs also via bureau to KQ1F.

PJ5 - NETHERLANDS ANTILLES, ST EUSTATIUS, NA-145 / PJ7, SINT MAARTEN, NA-105
David,AH6HY, is planning an activity from St. Eustatius (NA-145) as
PJ5/AH6DX from Oct 6-15. His next stop will be Sint Maarten (NA-105)
from where he will sign PJ7/AH6DX from Oct 15-22. QSLs via homecall.

Bill,AA4NC, wants to become QRV from two Dutch Antilles islands as
well. At first he is going to hit the airwaves as PJ5/AA4NC from
St. Eustatius (NA-145) from Oct 9-15 followed by an activity as
PJ7/AA4NC from Sint Maarten (NA-105) from Oct 15-18.
The QSL cards should be sent either direct to AA4NC or via LoTW.

PJ6 - NETHERLANDS ANTILLES, SABA, NA-145
Two teams, comprised mostly of members of the Southeastern DX Club
(SEDXC) and K5D team members, will operate as PJ6A from two different
QTHs on Saba (NA-145) over a two-week period from Oct 10-22.
Dave,K4SSU, Bob,K4UEE, Ralph,K0IR, Don,N4HH, Bill,N4NX, Steve,VE7CT,
Chaz,W4GKF, and Gregg,W6IZT, will be on Saba during the first week
from Oct 9-15 followed by Bob,K4UEE, Tim,K5AC, Wey,K8EAB, Wayne,KU4V,
Hal,N4GG, Gordon,N4LR, Steve,VE7CT, and Ralph,VE7XF, in the second week
from Oct 16-22. QSLs may be sent either direct to N4NX or you request
a bureau QSL with an online request on: http://www.saba2010.com
The log data will be uploaded to the LoTW already during the operation.
The log search on their website will be updated twice a day.

PJ7 - NETHERLANDS ANTILLES, SINT MAARTEN, NA-105
An international team of Franz,DJ9ZB, Max,I8NHJ, John,K6MM, Dave,K4SV,
Kevin,K6TD, Ralph,K9ZO, Bill,N2WB, Charlie,NF4A, Charlie,K6KK,
Bruce,W6OSP, and the team leaders Joe,W8GEX, and Craig,K9CT, will show
up as PJ7E from Sint Maarten (NA-105) from Oct 10-20. All participants
will be QRV as PJ7/homecall before Oct 10. Updates, a logsearch and an
online QSL request system can be found on: http://www.stmaarten2010.com
They want to work in CW, SSB and RTTY on all bands with four stations
simultaneously with an option of two more if needed. Both QTHs on the
eastern and western side of the island provide a good skip to Europe

and North America.

NETHERLANDS ANTILLES - PRESS RELEASE AND BANDPLAN

JOINT PRESS RELEASE

>Date: Sept. 30, 2010
>From: DXpedition leaders/teams participating in DXpeditions to new DXCC
entities beginning 10-10-10
To: ALL interested DXers worldwide

Due to the unprecedented number of potential new DXCC entities and numerous
planned DXpeditions commencing 10-10-10, we felt it was prudent to establish
a band plan to try to minimize interference between DXpeditions and their
pileups. The following band plan is the result of discussions that have
been ongoing for several weeks. It is a plan.... However, without the
cooperation of DXers, the plan will not work. It is extremely important that
DXers call DXpeditions only within the specified frequency ranges. If you do
not, you will not work the station you are calling and you will likely
interfere with another DXpedition on another island. This will require
cooperation and discipline.

Success of this plan also requires that DXers help spread the information
about the band plan to their fellow DXers and DX Clubs. WE NEED YOUR HELP!
But if we work together, we will be able to get many, many DXers into our
logs!

Thanks for your cooperation!

Bob, K4UEE - Saba - PJ6A
Jeff, K8ND - Curacao - PJ2T

921. SARL NEWS - SUNDAY 10 OCTOBER 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-09 19:00:13 UTC
From: website@sarl.org.za
Message-ID: <20101009190007.0D1DB33CC8@panix2.panix.com>
Source record: 5340
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 10 OCTOBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

SILENT KEYS

It is with regret that w&#65533; have to announce that the keys of two radio amateurs became silent recently, that of: Hill Mason, ZS5HL, on Sunday 3 October 2010 after having been very ill for the past nine weeks, he is survived by his XYL Iona. The second one was Nick van Zyl, ZS6BOM, in the age of 78 years after having suffered from cancer for a number of months on Tuesday 5 October. H&#65533; leaves his XYL, Tina, ZS6BVG, and a son.

Our sincerest condolences to their relatives and friends.

(PAUSE)

In the news today:

IARU ADMINISTRATIVE COUNCIL REVIEWED ITS STRATEGY FOR WRC-12

SARL CONSTRUCTION KITS AVAILABLE SOON

PRESIDENT'S NET ON THE AIR NEXT SUNDAY

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

IARU ADMINISTRATIVE COUNCIL REVIEWED ITS STRATEGY FOR WRC-12

In light of developments since the 2009 Administrative Council (AC) meeting, the Council reviewed and updated International Amateur Radio Union (IARU) positions on relevant agenda items for the 2012 World Radio Communication Conference (WRC-12), as well as desired agenda

items for future WRCs.

The AC reviewed the progress on the action plan for developing support for amateur radio frequency allocations, and the plan was updated for the period through WRC-12. The AC of the IARU held its annual meeting on October 1 and 2 in Salinitas, El Salvador.

The AC is responsible for the policy and management of the IARU and consists of the three IARU international officers and two representatives from each of the three IARU regional organizations. SARL President, Dennis Green, attended in his position as IARU Region 1 Secretary. The AC also identified the upcoming meetings of the International Telecommunication Union meetings where IARU representation will be required, and reviewed the plans for representation at these meetings, as well as at WRC-12.

The AC reviewed and updated the working document that sets out the spectrum requirements of the Amateur Radio and Amateur Satellite Services. They identified the need for a new strategy with regard to retaining access to bands above 148 MHz and agreed that a committee of experts will be formed to develop recommendations for the AC.

The full report of the AC meeting will be available for download on www.sarl.org.za from Monday morning.

SARL CONSTRUCTION KITS AVAILABLE SOON

Shortage of supply of some critical components is one of the main reasons for the delay in the supply of the SARL construction kits. These problems have now been overcome and packaging of the kits has been started. As some of the components have to be individually packaged for easy identification by the constructor, this process will take considerable time. It is now expected that the first kits will be available for shipping in early December. As soon as supplies arrive, the pre-paid orders on hand will be shipped first. Once this has been completed will an announcement be made and new orders will then be accepted. SARL NEWS will keep listeners informed. The SARL apologizes for the delays.

PRESIDENT'S NET ON THE AIR NEXT SUNDAY

The SARL President's Net is on the air next Sunday at 19:30. Dennis Green will report back on the IARU Administrative Council meeting and discuss the proposed Radio Regulations which have been posted on the member's section of the SARL Web.

Judging from comments received by the SARL, it appears that many do not understand the process of how regulations are developed and implemented. ICASA follows a process of consultation. It starts with the development of regulations by an ICASA Committee. Once the first draft is compiled it is vetted by the ICASA Legal department and once the legalization has been sorted out, the draft is submitted to the ICASA council. After approval by the ICASA Council the draft

regulations are published in the Government Gazette for comment. This is the stage at which we are at now. It is now the opportunity to make comment and raise objections to any of the provisions in the draft regulations.

As some of the proposed new regulations change the composition of licenses the SARL has received many questions. What happens to current ZU licence holders who are over 25? Will they lose their licence? The SARL cannot answer this question and will raise this issue in the submission that will be made to ICASA and at the next liaison meeting.

Another misconception is the question of ZRs being converted to ZS and the access to high power. Currently there is a marginal difference in the transmit power of a ZR licence holder and a ZS licence holder. Currently a ZR is permitted 29 dBW and a ZS 26 dBW. The major difference is access to the full amateur radio frequency spectrum. If there is any issue then it is in the area of operating procedure; an issue that has long been discussed for both ZR and ZS licensees. Instructors should perhaps spend more time on operating procedure and perhaps the HF assessment should be sharpened up. All these are issues to be discussed next Sunday evening.

If your club wishes to link the local repeater to the network, please send a request to armi@sarl.org.za by Monday afternoon including details of the telephone number and repeater frequency and area. Only Telkom landlines can be connected.

If you cannot take part in the discussion on the President's net, you are invited to submit your views and concerns by email to armi@sarl.org.za. Please raise issues in global manner and not personal issues.

OCTOBER 2010 RAE CANDIDATE NUMBERS PUBLISHED:

The SARL is pleased to publish the October 2010 RAE candidate examination numbers on the web.

In total there are 122 candidates that have enrolled for the examination.

Your examination number can be obtained by following the links on the SARL web page to the RAE Examination and then click on the link to Candidate Examination Numbers.

Any queries must be directed to the SARL office for assistance.

CONTEST RESULTS

SARL 80 m Club Contest. The committee received 5 logs for the 80 m digital club contest held on 29 September.

1st West Rand ARC, 31 points 2nd Cape Town ARC, 7 points

The results of the past 5 contests are:

1st West Rand ARC, 331 points 2nd ZS Contest Group, 186 points 3rd Antique Wireless Association, 154 points

SARL HF CW Contest. The results will be released in next week when Dennis, ZS4BS, is back in South Africa.

The last Club Contest is the CW contest on Wednesday 24 November 2010.

CQ Hou Koers, the Voortrekkers' radio communications day, will take place from 08:30 until 12:00 (CAT) on Saturday the 16th of October. Please support this event and have a few QSO's with the young people. The calling frequency will be 7,070 MHz. Echolink will be available by connecting to ZS0JPL-R and IRLP 8719.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The sun is currently blank of sunspots, but that could change soon. Old sunspot region 1 106 is about to rotate back into view on the eastern limb. The effective sunspot number is expected to be less than 20 for the coming week.

20 m will provide the best opportunities for DX followed by 15 and 10 m. Conditions to India will be good from the afternoon till after sunset. During the afternoon conditions will be good towards Europa firstly on 10 m, later followed by good 15 and then 20 m openings. Early evening 15 m contacts with the USA are at last happening again. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

10 - October Antique Wireless Association AM/SSB Valve QSO Party; 10 October - Last day to submit comments on draft radio regulations to armi@sarl.org.za; 15 October - Last day to enter your photos taken at "Take your hand-held to Work Day"; 16 October - CQ Hou Koers; 17 October - President's Net at 19:30 on draft radio regulations.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to

www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE. Thank you for listening, 73.

/EX

922. Question about Yaesu FT- 890

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-10 03:38:42 UTC
From: jon boy kg4gfu <jonrev1978@gmail.com>
Message-ID: <0206d9fd-13b2-440d-a650-2839efafb085@n16g2000vbg.googlegroups.com>

Greetings All!
I just got a Yaesu FT- 890 without the power cord. Someone told me that the power supply and cord from my Icom IC-730 and PS 15 with the same 6 pin molex connector would work. Is that true? I have no idea whether this radio even works as it came from a large estate untested. If anyone knows I would appreciate an answer. Have a great weekend! Jon Boy. kg4gfu.

AREN Net

AREN hold a net on the 7th and 21 st of the month at 1930 local on 3560 plus or minus. This is a training net for AREN members. However anyone interested in finding out more about AREN activities is more than welcome to call in once the net is established. Last Thursday's net involved the accurate passing of sample messages from Laurent EI9JV in Donegal to John EI7IG in Waterford.

Due to difficult 80m conditions with heavy European QRM, the message had to be routed via Paul EI2CA in Slane, to Tim EI2KA in West Cork and eventually back to John in Waterford. Next month AREN will be participating in an international HF emergency message handling exercise called Globalset.

Further information on AREN activities can be found on www.AREN.ie

CQ CQ calling news items

As is common through the year we have occasional lulls in news. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

Missing Person

Below is request received from a member of the public trying to locate a missing uncle, It is read in its entirety to try to piece together the possible whereabouts and touch on any hobbies or interests that he may have had.

SEARCHING FOR MISSING PERSON PATRICK DOLAN - CAN YOUHELP?

Patrick Joseph Dolan, 'disappeared' in Auckland some time between 1959 and 1969 and his mother, brothers and sisters never stopped looking for him. His sister searched for him years ago and involved the Salvation Army back in the 70s but apparently they found no record of him. Presumably they would have checked down and out hostels, hospitals, prisons, etc. His brother Philip, sadly died last January and his

sister Maureen died a few weeks ago. Patrick has one remaining sister and brother, Margaret (Peggy) and Michael. They would love to know whatever happened to their older brother. As longevity runs in the family, and there is no record of his death, Patrick may well be alive....he would be 91.

Here are some details about him:

Patrick Joseph Dolan was born in Ireland, in Dun Laoghaire, a coastal suburb of Dublin, in 1919. He had red hair! He was well educated (for the times), and he had a great sense of adventure. Apparently he was clever and well read and always had a book in his hand. We think he had a good sense of humour and he was also fond of a drink. His hobbies were unusual so someone might have met him through one of these. He read Morse code and he was interested in Esperanto and we have made contact with the Amateur Radio Group and the New Zealand Esperanto Association.

Pat (or Paddy), as he called himself, joined the Great Southern Railways in Ireland when he left school and worked first as a cashier in Galway and then as paymaster in Sligo. He then returned to Dublin to work with the same company, when it changed its name to C.I.E., for a while before he left to travel the world in late 1953 or early 1954 at the age of 34. He first headed to Toronto in Canada with friends, also from Dun Laoghaire. In Canada he worked for a large department store (probably Eaton's) but we don't know in what capacity - possibly a clerk or in accounts.

Apparently he left Toronto after one or two years and then moved to New Zealand. He may have gone to Wellington first but some time between 1959 and 1969 (although it may have been as early as 1955) he was living in Auckland, so he would have been between 34 and 49 years old at this stage. Pat sent a Christmas card home during this period (the card depicts the Harbour Bridge with 4 lanes, which is how we know the time period!). In this he gave an address of 82A Grafton Road (now part of the university) and prior to that he had provided an address at Wellesley House, Wellesley Road - perhaps they were both boarding houses? In the card he said he would be home for good in two years and signed off with 'Hasta la vista'..... nobody has heard a word since and further letters to him were returned to sender!

Apparently the 50s and 60s were the heydays of rail transportation in Auckland and we feel that, given his background, he may well have obtained employment with the New Zealand Railways Dept. and whilst there are archived employee records unfortunately they are held in Wellington and not available on line. However, maybe he worked in a department store or at something totally different.

Perhaps he moved on again from New Zealand in the early 60s to Australia, the USA or somewhere else although as he was getting older then it doesn't seem too likely. Maybe he fell on hard times and didn't want family back home to know.

He is not listed in the New Zealand death records. The electoral rolls aren't on line though he may not have registered anyway. It is also unknown if he ever married.

Patrick has 4 nieces, 2 nephews, 5 grandnieces and 6 grandnephews, the latter range in age from 16 to 28 most are in Ireland, but also in Canada and Mozambique!

Does anyone have any information at all? Did anyone know him or what happened to him Thank you for taking the time to read / listen to this request and any response will be greatly appreciated?

Helen Dolan Pat's Niece would appreciate any information that may help tracing her Uncle's footsteps. Helen can be contacted at 086 8236954 of via email to helendolan /at/ ireland.com

---

Amateur radio satellite resumes operation

After a software crash on September 26 aboard the amateur radio satellite AO-51 which took it off the air, Ground Station Mark Hammond, N8MH reported that as of September 29, 'The reloading of AO-51 is complete.

Amateur radio DXpedition to Bonaire Oct 10-24

As you may have read today October 10, 2010 the Netherlands Antilles will cease to exist as a country within the Kingdom of the Netherlands and the status of the individual islands will change as follows:

St. Maarten and Curacao will become independent countries within the Kingdom and will be granted the same status that Aruba attained in 1986.

Bonaire, Saba and Saint Eustatius will be given the status of a public body (a kind of special municipality) in the Netherlands and will therefore fall directly under Dutch rule.

To mark the occasion, a group of 15-20 radio amateurs from several countries have joined forces to activate special transmissions from Bonaire between October 10-24, 2010. The primary focus will be all HF bands from 160 to 10 meters including the WARC bands.

The team will focus on all modes including SSB, CW and various digital modes. Further information about the callsigns to be used will be published on the special website www.bonaire2010.com.

Sable Island DXpedition

Randy, N0TG, provides the following update on the upcoming Sable Island operation to take place between October 21-29th (edited):

"For those interested in CY0, we may need to adjust our frequencies on the fly, but eventually work our way back to the advertised

frequencies. Thus, 'spots' posted as to our activity will be helpful and appreciated."

The CY0 Web site is at: http://www.CY0dxpedition.com

Rallies

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as 2M1EUB between October 9-23rd. He will be active on all the satellites from northeast Scotland in the Cairngorms National Park. Also, look for him on 160 and 80 meters. During the the last 7 days, Paul will be active from the northwest coast, activating a new Grid Square. Checkout QRZ.com

under 2M1EUB for more info.

2U1/GU3/MU3, GUERNSEY. Operators Dave/G1OCN (GU1OCN), David/M3IOP (MU3IOP) and Carol/2E1DQZ (2U1DQZ) will be active from the Island of Alderney (EU-114) between October 29th and November 5th. QSL via G1OCN.

4L, GEORGIA. Operator Andi, UU0JM, will be active as 4L0A from Obcha during the CQWW DX SSB Contest (October 30-31st) a Single-Op/All-Band/ High-Power entry. QSL via LoTW.

5Z4, KENYA. Sam, G4OHX, is currently active as 5Z4/G4OHX near Mombasa. His length of stay is not known. Activity has been mainly CW on 20 and 17 meters. QSL via his home callsign.

9M2, WESTERN MALAYSIA. Operator Rich, G4ZFE, will be active as 9M2CNC from Kuala Lumpur during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (20m) entry. QSL via G4ZFE, by the Bureau or direct. All QSOs will be confirmed via eQSL and LoTW.

9Q50, DEM. REPUBLIC OF CONGO. Patrick/ON4HIL will once again return but with Theo/ON4ATW, Marc/ON6CC, Luc/ON4IA, Wim/ON4CIT and Ron/PA3EWP and activate 9Q50ON from Kinshasa between December 3-13th. The special event callsign is to celebrate the 50th anniversary of the independence of the Democratic Republic of Congo. Activity will be on 160-6 meters using CW and SSB. QSL via ON4BR, by the Bureau or direct. For more details, updates and suggested frequencies, visit: http://www.9q50on.be

AT10, ANTARCTICA. Time is running out to work Bhagwati, VU3BPZ, the communications manager of the 29th Indian Expedition at the Antarctic Maitri Base station, as AT10BP. Bhagwati and his team have less than 2 months remaining at Maitri. Activity by AT10BP is SSB only usually on the air around 1700z between 14276-14280 kHz. QSL direct only via I1HYW. For more info, visit the Worldwide Antarctic Program (WAP) Web page at: http://www.waponline.it
Also, Michel/F6DWQ and Mehdi/F5PFP have put together a nice slideshow with music depicting the Maitri Base station at: http://www.french-polar-team.fr/VU_Maitri_Station_Antarctica.php

CE4, CHILE. Operators Pedro/CE3FZ, Roberto/CE4CT, Fabian/LU1AEE, Ramon/ XE1KK and Diego/LU8ADX will be active as CE4CT during the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry. QSL via EA5KB. Look for operations before and after the contest between October 29th and November 3rd by operators CE3/LU1AEE, CE3/LU8ADX and CE3/XE1KK. QSL via their home callsigns (QRZ.com).

CE0Y, EASTER ISLAND. Operators Rolf/DK2ZF and Martin/DK7ZB are now active as CE0Y/DK2ZF and CE0Y/DK7ZB from Easter Island (SA-001) until October 23rd. They plan to focus on the 50 MHz, 144 MHz and 432 MHz EME, but also look for them on 30/20/17/15 meters using CW and SSB. QSL via their home callsigns. After they are done on Easter Island, they will move to main-land Chile and be active as as CE2/DK2ZF and CE2/DK7ZB.

CX, URUGUAY. Dale, N3BNA, will be active again as CX/N3BNA between October 22nd and November 13th. He plans to be active on 60 meters this trip using a sloping dipole off a tall tower. He may also try a half-square wave antenna for more gain. QSL via KA2AEV.

FSDXA ANNOUNCES THEIR PLANS FOR 2011 (Update). Members of the Five Star DXers Association (FSDXA) finally announced their plans for 2011 at the RSGB Convention this past week. The FSDXA will be heading to the Pacific Ocean like they mentioned earlier. Their plans are to activate Christmas Island (T32) using 24 (or more) operators, with 15 FT-5000s and 15 VL-1000 amps. More details are forthcoming. Remember, this is the same group who is well known for their great operations to: Comoros (D68C), St. Brandon Island (3B7C), Rodriguez Island (3B9C) and Spratley Islands (9M0C).

H40, TEMOTU PROVINCE (H40KJ and H40BQ Op Cancelled!). Jacek, SP5DRH, informs OPDX readers: "I regret to inform the DX Community about the cancellation of our Temotu DX-pedition. The cancellation is the effect of a dramatic plane delay that caused total destruction of our trip planner. We have lost all our booked and already paid connections to Solomon and Pigeon Island. Carrier has not been able to establish new and suitable for us booking to continue our trip. What we have been offered was far beyond the time we could spend on this dx-pedition. Therefore, we have decided to go back to Warsaw.
Under these circumstances, we feel obliged to refund the donations that we received, however, as we have suffered substantial financial loss, we suggest to transfer these funds for the expedition to come - Kiribati T30RH/T30AQ. Should any of donators disagree with our suggestion, please email us, and we will try to refund his donation as soon as possible." For more details, see: http://www.sp5drh.com/h40

H40, TEMOTU PROVINCE. German operators Peter/DG1FK and Sigi/DK9FN will once again return to Temotu Province and be active as H40FK and H40FN, respectively, this time from Nendo Island (OC-100) between December 21st and January 3rd (2011). Activity will be on CW, PSK and RTTY. Operations will probably be on 160-6 meters depending on the band conditions. QSL H40FN via HA8FW, and H40FK via DG1FK. More details should be forthcoming.

HQ2, HONDURAS. Dan, HR2DMR, will be active as HQ2W during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. He will be using monobanders and a new 40 meters 2 element beam. He will also be in the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL both contests via HR2DMR (QRZ.com) or LoTW.

IOTA NEWS.....
AS-015. Richard, PA0RRS, is now active as 9M2MRS from Penang Island until April 2011. Activity has been on 20 and 17 meters CW.
QSL via: Richard Smeets, Constance Gerlingsstraat 60,
5121 ZR Rijen, The Netherlands.

AS-154. Operators Pavel/OK1MU/TA2ZAF, Honza/OK2ZAW and Dan/OK1HRA will be active using the special callsign TC03W from the Turkish Island of Giresun in the Black Sea, between October 15-18th.

Activity will be mainly on 30 and 20 meters using CW and SSB.
QSL via OK2GZ, by the Bureau or direct. For more info, updates,
photos and an online log, visit the following Web page at:
http://www.okdxf.eu/expedice/en/tc03w/www
EU-012. Chris, GM3WOJ/ZL1CT, will be active as GZ7V from Shetland
Island during the CQWW DX CW Contest (November 27-28th) as a
Single-Op/All-Band/High-Power entry. QSL via N3SL. For updates,
check the Web page at: http://www.gm7v.com

EU-125. Michael, DL4ABO, is active as OZ/DL4ABO from Romo Island
(DIA NS-001) between now and October 16th. Activity will be
holiday style mostly on 40 and 30 meters CW only, using a
TS-570 w/100 watts into a ground-plane antenna. QSL via his
home callsign, direct or by the Bureau.

EU-171. Mic, DG5LAC, is active as OZ/DG5LAC from Vendsyssel-Thy
(DIA NJ-001, WW Loc. JO47GA) between now and October 15th.
Activity will be holiday style on 80-10 meters SSB using
FT-450AT, an Ameritron AL-811H amp and a DX-Wire Windom 42m
antenna. QSL via his home callsign, the Bureau is preferred.
Logs will be uploaded to LoTW and eQSL.

NA-091. Rob, VE7RSV, will be active as homecall/p from Broughton
Island (CISA BC026) during the W/VE Islands Contest (October
23-24th). Activity will be on all bands, SSB only. QSL direct
to VE7RSV (QRZ.com).

OC-066. Hiro, JI1JKW, will again return to French Polynesia, but this
time to activate Tikehau Atoll (OC-066), Tuamotu Archipelago,
as FO/JI1JKW between October 10-14th. Activity will be on 40-6
meters (mostly 20m) using CW and SSB. QSL via his home
callsign.

OC-172. (Update) Just a reminder that Craig, VK4LDX, will be active
as VK4LDX/P from Fitzroy Island between October 16-22nd. This
IOTA hasn't been on the air since 2003. He will be on the island
with his wife, so his activity will be holiday style. Craig will
be running 100 watts into verticals and/or dipoles for 40/20/15
meters, using SSB, PSK31 and RTTY. He will have a beach side
cabin and will be setting up the antennas right on the beach.
Craig mentions that "considering the high level of activity
with PJ DXpeditions" during his stay on OC-172, he has announced
his operating schedule (on his Blog page) to avoid as much
pile-up QRM as possible and give people the chance to work this
IOTA. QSL info is available on QRZ.com, visit the following Blog
page for more details and updates at:
http://vk4ldxoc172.blogspot.com

KH2, GUAM (Update). Operators Kiyoshi/JA7RPC and Mitsuru/JH7DFZ will be
active as KH2/JA7RPC and KH2/JH7DFZ between November 5-7th. Activity will
be on 80-10 meters using CW and SSB. QSL OK via Bureau or direct.

KH6BZF PROPAGATION FORECAST/REPORT (For October 11-17th)....
Oct 11 HN SOLAR REFERENCE KEYS
Oct 12 HN --------------------
Oct 13 HN BN - Below Normal
Oct 14 HN AN - Above Normal/Geomagnetic Level is QUIET
Oct 15 AN LN - Low Normal
Oct 16 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 17 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

SPECIAL NOTE (Updated) FROM LEE, KH6BZF: On "Radio Havana", there is an
interesting DX and propagation program, hosted by Senor Arie Coro Antich,
CO2KK, every Monday at:
0600 kHz EASTERN North AMERICA from 0100-0500z
9820 kHz CENTRAL North AMERICA from 0100-0700z
9550 kHz WESTERN North AMERICA from 0500-0700z

KP4, PUERTO RICO. Operators James/KH2RU, Rene/NP3O and Javier/NP4JA
will be active as KP4/KH2RU during the CQWW DX SSB Contest (October
30-31st) as a Multi-? entry. QSL via NP3O.

OH0, ALAND ISLAND. Look for OH0Z to be active once again in the CQWW DX
SSB Contest (October 30-31st), but as a Single-Op/All-Band/High-Power
entry. Operator will be Tomi/OH6EI. QSL via W0MM.

PJ STATIONS LIST (UPDATED)
EXPECTED TO BE ON THE AIR NOW AND IN THE COMING WEEKS:
PJ2T - Curacao Island; October 10th-November 2nd; QSL via
N9AG or LoTW.
PJ2/OH1VR - Curacao Island; now through October 13th; QSL via
his home callsign.
PJ4B - Bonaire Island; October 10-22nd; QSL via PA8A.
PJ4D - Bonaire Island; October 10-22nd; QSL via W3HNK.
PJ4I - Bonaire Island; October 10-22nd; QSL via DL9USA (this
may change).
PJ4N - Bonaire Island; October 10-22nd; QSL via W3HNK.
PJ4W - Bonaire Island; October 10-22nd; QSL via W3HNK
PJ4/W9NJY - Bonaire Island; October 16-29th; QSL via W9NJY or LoTW
after the January 1st (2011).
PJ5/K1XM - St. Eustatius; now through October 17th; QSL via KQ1F.
PJ5/AH6DX - St. Eustatius; now through October 15th; QSL via AH6DX,
direct or by the Bureau.
PJ5/AA4NC - St. Eustatius; October 9-15th; QSL via AA4NC direct
only. Logs will be uploaded to LoTW. NO BUREAU QSLs.
PJ6A - Saba Island; October 10-22nd; QSL direct only to N4NX,
or use the online OQRS system for direct and Bureau

QSLing.
PJ6/K4LMY - Saba Island; length of stay unknown; QSL via K4LMY.
PJ7E - Sint Maarten; October 10-20th; QSL via LoTW, OQSL (see
Web page) or direct to: Sint Maarten 2010, Box 333,
Bethlehem, Georgia 30620-9989 USA
PJ7/AA4NC - Sint Maarten; October 15-18th; QSL via AA4NC, direct
only. Logs will be uploaded to LoTW. NO BUREAU QSLs.
PJ7/AH6DX - Sint Maarten; October 15-22nd; QSL via AH6DX, direct
or by the Bureau.

PJ2, CURACAO. Seppo, OH1VR, is now active as PJ2/OH1VR from Curacao
Island (SA-006, WLOTA LH-0942) until October 13th. Activity has been
CW, mainly on 40/15/12 meters. QSL via his home callsign. Visit his
Web page at: http://www.oh1vr.net

PJ4, BONAIRE (Correction). Operators Peter/PA8A, Fred/PA8F and Rob/PA3GVI
will be active as PJ4B (not PJ4N as mentioned in OPDX.979) from Bonaire
(SA-006, WLOTA L1279) between October 10-22nd. Activity will be on all
bands using the regular DX frequencies, if not in use. QSL via PA8A
(SAE+ 2 USDs). The following Web pages will be used during their
operation to update, livestream video and log search:
Web Blog - http://sitekreator.com/pa3gvi/pj4b-weblog.html
Livestream - http://www.livestream.com/pj4b
Online Log - http://www.clublog.org/charts/?c=4b

PJ4, BONAIRE. A USA team and a Dutch team will operate from two different
locations (QTH 5 and QTH 6) on Bonaire (SA-006, WLOTA L1279) using the
callsign PJ4D between October 10-22nd. Operators mentioned are:
QTH 5 (USA Team) - John/K6AM, Ken/W0LSD, Kelly/N0VD and Scott/W4PA.
QTH 6 (Dutch Team) - Bert/PE2KY, Marco/PE2MC, Michiel/PG4M and
Peter/PJ4NX.
The operators listed above are also expected to operate from "Radio
Netherlands" as PJ4W. Listen for the QSL info.

PJ4, BONAIRE. Andy, W9NJY, will be active as PJ4/W9NJY from Bonaire
(SA-006) between October 16-29th. Activity will be on 40-10 meters using
all modes. QSL via WD9DZV. Log will be uploaded to LoTW on January 1st
(2011).

PJ5, ST. EUSTATIUS. Paul, K1XM, is now active as PJ5/K1XM from Sint
Eustatius (NA-145) between now and October 17th. Activity will be on
160-10 meters using CW, SSB and RTTY. QSL via KQ1F.

PJ7, SINT MAARTEN. Team leaders of the PJ7E report that some of their
equipment is stuck on a boat due to tropical storm OTTO, which ended up
becoming a hurricane after turning back into the Atlantic. This made it
impossible for the boat to approach and land on St. Maarten on Friday
due to high seas. The boat had to travel to Barbados, but is expected
to return to St. Maarten on Sunday, Oct 10th. The editor of QRZ DX,
Carl/N4AA, reports that team co-leader Joe, W8GEX, states: "The weather
today (Saturday) is clear and sunny. The boat with our equipment is due
in here at 7-PM SUNDAY (Oct. 11th) evening. We will meet them, off-load

the equipment and separate it for the two operating sites (SSB & CW).
They will deliver the two loads to us early MONDAY morning (Oct. 12th).
Our plan is to set up one station and one antenna as soon as possible
so someone can get on the air right away. As the other stations are
assembled and antennas put up, they will be put on the air as quickly
as possible. As for Saturday night (Oct 10th-0400z), PJ7E will have one
station on SSB (IC706 with a dipole for 40/20m). The CW crew has already
been on the air with CW/RTTY (using PJ7/homecalls). They are running an
IC7000 and a vertical antenna, and have been worked on bands from 40 to
17 today (Saturday)." JUST A REMINDER. Contact made before 0400z, October
10th, will not count for a new one! The PJ7E Web site is expected to be
updated regularly at: http://www.stmaarten2010.com
They also have set up accounts on FaceBook - PJ7E, and a Twitter account
- http://twitter.com/PJ7E. Once they are on the air, they plan to upload
their logs twice daily, around 8 am and 8 pm.

QSLS VIA LoTW: 8P9NX, CR6K, EA6NB, F6GCP, IT9HLR, K5K, MU0GSY, PY3VK,
R6YY, TG9AJR and ZP6CW

QSLS RECEIVED VIA MAIL: 3B8DB, A33A, A41LD, AO5GL, AT10BP, FG8AR, FW5X,
JA1NLX/VK4, JT1DA, KH0/KT3Q, KH2/KT3Q, VP9/N4SF, XU7ATM and XX9LT

QSLS RECEIVED VIA THE BUREAU: NONE reported this week!

SILENT KEY. Rick, NE8Z, informs OPDX that Ken Schang, W8LU, became a
Silent Key (SK) on October 7th, with his family present in the University
of Michigan Hospital ICU Unit. He was admitted to the hospital 2 weeks

ago and his condition progressively deteriorated. Ken was on the top of the DXCC Honor Roll and also operated from many DX locations. He was also a member of the ARRL and SEMDXA. OPDX and its readers would like to send out our deepest sympathy to the family and friends of W8LU.

SU, EGYPT. Gab, HA3JB, who was recently active as SU/HA3JB in September and is now back in Hungary, is expected to return at the end of November for 10 days. However, this may change because he states that his "radio and power supply is ruined". He is looking for a sponsor to help him buy an ICOM IC-7000. If you can help, Gab's E-mail address is: ha3jb@t-email.hu For more details and updates, visit: http://www.ha3jb.com

SU8, EGYPT. Members of the Egyptian Radio Amateurs Society (ERASD) will be active as SU8JOTA from the Cairo International Scout Center between October 16-17th. Activity is to celebrate the 53rd Jamboree On The Air (JOTA) and will be on all amateur bands, 160-10 meters, near the world scout frequencies, using CW, SSB and the Digital modes. The ERASD will be introducing the scouts and girl guides to HF Digital communications (RTTY and PSK31). For more information, visit the new ERASD activities page at: http://erasd.net/activety.aspx

TI0, COSTA RICA. Members of the Radio Club of Costa Rica (TI0RC) and a U.S team plan to be active as TI0RC from San Jose during the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry. Activity will be on 160-10 meters. Operators mentioned are: Carlos/TI2KAC, Juan/TI2JCY, Mauricio/ TI4ZM, Eddie/K4UN, Bob/W4BW and Lex/W4XO. QSL via the Bureau to TI2KAC.

TG, GUATEMALA. Martin, DL5RMH, will be active as TG9/DL5RMH from Guatemala City between December 16th and January 13th (2011). Activity will be on 40-10 meters CW. Martin favors 30m. QSL via his home callsign, by the Bureau or direct.

TY, BENIN. Mario, DL2UX, is now active as TY1JB from Cotonou until October 28th. Activity currently has been mainly on 15 meters, but he is using a Butternut HF9V-X and a ZS6BKW antenna for 40-10 meters. QSL via his home callsign.

V7, MARSHAL ISLANDS. Just a reminder that Yuri, N3QQ, will be active as V73QQ from Enewetak between October 12-15th. Operations from the uninhabited Ujelang Atoll (OC-278), which has never been activated before, will be between October 16-19th. Callsign will be V73RRC from Ujelang Island. Yuri plans to be active on 40-6 meters using CW and SSB. He will use an IC-7600 w/600w amp, vertical dipoles and a 1/4 wave for 40m. QSL via N7RO. For updates and more info, see: http://oc-278.ucoz.com

VK9N, NORFOLK ISLAND (Update). Operators Alan/VK3XPD, Kevin/VK4UH and Mike/VK3KH, will once again be active as VK9NA between January 7-21st, 2011. This is the same group that did a VHF, UHF and Microwave DXpedition earlier this year. The group plans again to be operational on 50 MHz through to 10 GHz using CW, SSB and WSJT. QSL Manager is VK3KH: Michael Coleman, 44 Rosserdale Cres, Mount Eliza Victoria 3930, AUSTRALIA.

Look for more details and updates to be forthcoming at:
http://www.vk9na.com/index.html

VP2M, MONTSERRAT. Operators George, K2DM, will be active as VP2MDG during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via K2DM. He is expected to be there from October 27th through November 2nd. Activity outside of the contest will be on 160-6 meters.

YJ, VANUATU (IOTA Op). Operators George/HA5UK and Pista/HA5AO will be active as YJ0HA from Efate Island (OC-035) between November 1-15th. Activity is planned for 160-10 meters using CW, SSB, RTTY, PSK and SSTV modes. More details, like station setup, antennas, etc. are available on the Web site at: http://ha5ao.novolab.hu
They are also planning a one-day operation from Emae Island (OC-111), in the Shepherd Islands group. They state, "We will do our best to organize this trip, but it highly depends on the local circumstances and possibilities, as well as, the weather conditions. We will keep you informed on our Web site." A survey is available for band/mode needs and also an online log will be available on this site. QSL via HA5UK, direct, by the Bureau and LoTW.

ZD8, ACENSION ISLAND (Change). Tom, K7ZZ, will be active as ZD8ZZ from an elevation of 2300 ft. on Green Mountain between October 12-26th. This will be a "micro-lite" operation on 160-10 meters using CW and SSB. His antennas will be two element phased vertical array. QSL via LoTW or direct to K7ZZ.

ZD9, TRISTAN DA CUNHA ISLAND. By the time you read this, Ulli, DL2AH, is expected to be active as ZD9AH until December 6th. Activity will be "holiday style" (not a DXpedition) and mainly on SSB. However, the last two weeks in November he plans to use RTTY. His equipment consists of a Yaesu FT897 (barefoot) and a simple Windom antenna. Ulli plans to partic-ipate in the WAG, CQWWDX and JADX contests. QSL via his home callsign, by the Bureau or direct (QRZ.com address - He will answer QSLs when he return home in early January). Please be patient and sorry NO eQSL.

ZD9, TRISTAN DA CUNHA ISLAND. Two members of the Chiltern DX Club (CDXC), Rob/M0VFC and Martin/G3ZAY have recently received permission from the "Tristan da Cunha Island Council" for a DXpedition to take place in September 2012 for 2-3 weeks. They are on the provisional passenger list of the "MV Agulhas" (or possibly its replacement by then). The exact dates/bands/etc will be forthcoming.

ZL7, CHATHAM ISLAND. Hiro Miyake, JF1OCQ/W1VX, will once again (after 8 years) be active as ZL1WY/ZL7 from the Chatham Island (OC-038) between December 2-9th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. There will be an emphasis on 160 and 6 meters (for the Pacific). He will operate a breakable Beacon on 50.117 MHz for DX around the clock. QSL via JF1OCQ only: Hiro Miyake, 1-3-6 Asakura, Maebashi, 371-0811 Japan. Do NOT send QSLs to the New Zealand Bureau.

What if gravity, charge, magnetism, etc. are nothing but phase relationships? Include quotes and type "phase coherence" into Google.

Then you will find - - what Einstein couldn't - - the fact that I stated about "phase coherence". It's at many places in Google.

It was at the #1 TOP spot, in Google, from Sept./22/2010 . . . to . . . Oct./04/2010 (Fitz Finds a fact! - - Phase Coherence is the reason...)

Why did it take top spot in Google?

Because this is something Einstein tried to find but never did.

To see it click link:

http://www.amperefitz.com/top.spot.htm

Daniel P. Fitzpatrick Jr. (Fitz)

928. [RAC-Bulletin] RAC Bulletin 2010-022E - IARU R2 Conference closes

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-11 19:22:57 UTC
From: rac-bulletins@eton.ca
Message-ID: <4CB363FC.7020908@rac.ca>

Salinitas, El Salvador
Oct 10, 2010

The XVII Triennial Conference of IARU Region 2 has now ended in
Salinitas, El Salvador and the delegates of the 19 nations present are
just now returning home.

Problems regarding the defence of Amateur Radio, its promotion as well
as regional and local problems faced by Member Societies were
discussed and some action decisions were taken in the interest of all.

An official communiqu&#65533; should be issued by the Region 2 Secretariat in
the next few days giving more precise information on the work done.

RAC President Bawden, VE4BAW, and RAC VPIA Lamoureux, VE2KA, have
split the tasks of attending all the committee works and a full report
should be in an upcoming TCA.

Daniel Lamoureux, VE2KA
Vice President International Affairs
Radio Amateurs of Canada

Canadian Simulated Emergency Test (SET) - October 16 and 17, 2010

This is a reminder to all ARES Groups that the Canadian SET is this coming weekend, October 16 and 17, 2010. This is a great opportunity for ARES groups to practice the delivery of Amateur Radio assistance to Canadian municipalities and served agencies. Please visit the RAC website for details on rules and reporting procedures.

The best of luck to you all. Your support is appreciated!

RAC Bulletin 2010-024E Poll
2010-10-12

Fellow amateur radio operators:
The Board and Executive of the Radio Amateurs of Canada are meeting at the end of October to develop a vision for RAC in the 21st Century. In addition we will be establishing a two year operational plan for 2011 and 2012.

We are asking current, past and future potential members of Radio Amateurs of Canada, amateur radio clubs and associations to provide your thoughts and recommendations on a set of questions found on which will be found on our website. We would appreciate receiving your response by October 20t.h.

We have already received submissions from a number of members, clubs and associations and we wish to thank-you for your input. Feel free to add to your previous comments.
Please visit the RAC website at
http://www.rac.ca/en/rac/strategic-future/survey/ to provide your input

DXNL 1697 - Oct 13, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

C9 - MOCAMBIQUE
David,GI4FUM (C91DJ), Gilli,GI8MIV (C91MV), Tony,G4LDL (C91DL),
Glynys,G8KWD (C91KW), Dave,ZS6AVM (C91AV), Toni,ZS6GF (C91GF), and
Daniel,ZS6JR (C91JR), will become active from Bilene from Oct 15-31.
They will take part in the "Jamboree on the Air" (Oct 16/17) as C91MS
(MS stands for Mocambique Scouts) and also in the WWDX SSB Contest one
week later on Oct 30/31. They will use C91WW in the WWDX SSB Contest
and their individual calls outside of the contests. The team will be
QRV mainly in SSB but also in CW, PSK31 and RTTY.
The QSL routes were not announced yet but C91WW is managed by GI4FUM.
For updates click here: http://www.3da0ss.net

E51 - SOUTH COOK ISLANDS, OC-013
Bill,N7OU, will be QRV again as E51NOU from Rarotonga (OC-013) between
Oct 18 and Nov 13. He is working for the "Global Volunteers",
see: http://www.globalvolunteers.org/cook/default.asp and also
http://www.globalvolunteers.org/1main/cook/volunteer_in_cook_islands.htm
However, Bill is working with 100 watts and a vertical on 40m-10m.
QSL via N7OU, bureau ok.

EA6 - BALEARIC ISLANDS, EU-004
From Oct 16-27 Adrian,EA6/AA5UK, is going to hit the airwaves from
Ibiza (EU-004, DIE E-023, MIA MB-003, WLOTA 0958) "holiday style"
mostly in SSB and digital modes on 160m-10m. Adrian will try his luck
also via some amateur radio satellites.
QSL via homecall, via bureau, direct, LoTW oder eQSL.

GD - ISLE OF MAN, EU-116
Some members of the Isle of Man Amateur Radio Society (IOMARS) will be
QRV as GT1IOM from the city of Douglas (EU-116, WLOTA 0449) during the
"53rd Scout Jamboree On The Air" on Oct 16/17. QSL via GD1MIP.

PJ4 - NETHERLANDS ANTILLES, BONAIRE, SA-006
Andy,PJ4/W9NJY will activate Bonaire (SA-006) on 40-10m from Oct 16-29.
QSL via WD9DZV. The logs will be uploaded to the LoTW on Jan 1, 2011.

SU - EGYPT
Some members of the Egyptian Radio Amateurs Society (ERASD) will sign
SU8JOTA from Cairo in CW, SSB and digital modes on 10m-160m during the
53rd Jamboree On The Air (JOTA) on Oct 16/17.
Unfortunately QSL only direct via SM5AQD.
See also their website: http://erasd.net/activety.aspx

T8 - PALAU, OC-009
Tom,DL2OBO, will start his Asia-Pacific-trip on Oct 15. His first stop
is Japan where he is going to visit 7J4AAL and JA5AQC from Oct 18-22.
His second stop will be the Palau Pacific Resort on Palau (OC-009) from
Oct 24-31. He will use the station there with amplifier and beams,
vertical for 40m and dipoles for 80m/160m. If he gets the permission,
he wants to install additional verticals for the lowbands. His callsign
is not known yet. All information about his trip and any updates can
be found on Tom's website: http://www.dl2obo.com

TY - BENIN
Mario,DL2UX, is active as TY1JB from and stays there until Oct 28.
He has been spotted mostly on 15m using a Butternut HF9V-X and a ZS6BKW
antenne for 40m-10m. QSL via homecall, direct or via bureau.

9M2 - WESTERN MALAYSIA, AS-015
Rich,9M2MRS (PA0RRS), is back on Penang (AS-015) and will stay there
until April 2011. He is working 99.9% CW.
QSL via PA0RRS. If you want to send direct please note the new address:
Richard Smeets, Constance Gerlingsstraat 60, 5121 ZR Rijen, Netherlands

ENGLAND, SPECIAL EVENT STATION
The "First Class CW Operators Club" (FOC) has now the callsign M0RSE
to increase the interest in telegraphy. This call will be aired from
time to time and during special occasions, like the FOC QSO Party on
Oct 23 and the FOC Straight Key Night on Jan 1/2.
QSL to G3SWH via bureau, direct or LoTW.

ITALY, SPECIAL EVENT STATION
The special event station II9CIRM celebrates the 75th anniversary of
the Centro Internazionale Radio Medico (International Radio Medical
Centre) from Oct 16 until Nov 7. QSL via IQ9TP, direct or bureau.

THE NETHERLANDS, SPECIAL EVENT STATION
The members of the Radio Club Kennemerland (PI4RCK) are working as
PA30RCK in all modes on all bands until November 5 to mark the
30th anniversary of their club. This callsign will be used also in
the CQ WWDX SSB Contest. QSL via PI4RCK or via LoTW.

DXCC: The QSLs of following calls are accepted for DXCC credit now:
9Q50AR (all operations) and 9Q50ON (operation from 2010).

SILENT KEYS: Following DXers passed away lately:
Chick Urquhart (GM3JUD), Ken Schang (W8LU, exK8LUU), Eric Cohen (Z21BC)
and the HF antenna pioneer A.J.F. "Frank" Clement (W6KPC), aged 93.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 15: IBFD Contest
Oct 16/17: Worked All Germany Contest (WAG), SSB and CW

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-154, TA, Giresun Islands: Pavel,TA2ZAF (OK1MU), Dan,OK1HRA, and
Honza,OK2ZAW, will be QRV as TC03W in CW and SSB from Oct 14-18.
QSL via OK2GZ. See also: http://www.okdxf.eu/expedice/en/tc03w/www

EU-125, OZ, Jylland West Group: Michael,OZ/DL4ABO, is working from
Romo Island (DIA NS-001) from Oct 9-16. QSL via homecall.

EU-171, OZ, Jylland North Group: Michael,OZ/DG5LAC, is active from the
island Vendsyssel-Thi (aka Nordjylland) from Oct 9-15. QSL via DG5LAC.

OC-066, FO, Tuamotu archipelago: Hiro,FO/JI1JKW, is working from the
Tikehau atoll in SSB and CW on 40m-6m until Oct 14. QSL via JI1JKW.

OC-172, VK, Fitzroy Island: Craig,VK4LDX/p, will show up from Fitzroy Island
working "holiday style" in SSB/PSK31/RTTY on 40m, 20m and 15m from
Oct 16-22. QSL via homecall. See also: http://vk4ldxoc172.blogspot.com

OC-278P, V73, Ujelang atoll: Yuri,N3QQ, is going to become active as V73RRC
from the Ujelang atoll from Oct 15-19, see: http://www.oc-278.ucoz.com
QSL via N7RO (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

C6AEZ LH 1115 N. Providence Oct 11-16
JW/HB9LEY LH 0125 Spitzbergen Oct 10-14

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

October 13, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- 160 Meter Knuckle Cracking - Stew Perry Warmup
- ILIANY QSO Party - IL, IA, NY
- See How They Run - WRTC2010 Selection Criteria
- Scout Out the JOTA and SCR
- From OZ to VK - By Bike!
- June VHF QSO Party - Full Results
- Art's State of the Sporadic E Art
- A Supply of Power Supply Info
- Hope Springs Eternal

NEW HF OPERATORS - THINGS TO DO

Limber up for the fall's major CW contests with the monthly CWops
Mini-CWT Test, the QRP ARCI Fall QSO Party, make a Run for the Bacon,
or see what's up on ten meters with the 10-10 Fall CW QSO Party. All of
these feature more relaxed CW and are a good way to build confidence
and CW savoir faire!

BULLETINS

The Stew Perry Top Band Distance Challenge Warm-Up contest is on the
weekend before CQ WW SSB - October 23rd and 24th. The preceding weekend
was erroneously given as the dates of the contest, but you will be
lonely if you operate then. Plaque manager W7EW reports that prizes
will soon be distributed for the 2009 contest, as well. (Thanks, Tree
N6TR)

BUSTED QSOS

The ARRL EME Contest was listed as Oct 9/10 when it really was on Oct
2/3. The dates for Oct 30/31 are correct.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section
```

October 16-17

- CWops Mini-CWT Test (Oct 13)
- Fall VHF Sprints (Oct 16, 902 MHz)
- Great Pumpkin Sprint--Digital (Oct 16)
- Arucaria VHF Contest
- JARTS WW RTTY Contest
- QRP ARCI Fall QSO Party--CW
- Iowa QSO Party
- New York QSO Party
- Stew Perry Warmup Contest
- Worked All Germany
- Spooky Feld-Hell Sprint
- Asia-Pacific Sprint--CW
- Illinois QSO Party
- Run For the Bacon--CW

October 23-24

- School Club Roundup (Oct 18-22)
- FOC QSO Party--CW
- 10-10 Fall CW QSO Party
- Scandinavian YLRA Contest
- W/VE Islands QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

WRTC is over, let WRTC begin! The Team Selection Criteria <http://www.wrtc2014.org/team-selection> for WRTC2014 have been released, the work of a committee led by three-time WRTC champ, Dan K1TO. Fifty Team Leaders will be selected by using their 12 best scores in up to 49 qualifying events, beginning with the upcoming CW World Wide SSB Contest and continuing through ARRL DX Phone in March of 2013. A Youth Team will also be selected from applicants under age 25, WRTC2010 champs RW1AC and RA1AIP earn an automatic berth, and wild card teams will be available for special invitation. Selection areas have been adjusted from past WRTC events, but if you have been following WRTC for a while, the rules are a further refinement of the qualification process initially created by the Brazilian WRTC2006 team and adapted for WRTC2010 by the Russian sponsors.

CQ WPX Director, Randy K5ZD has been busy taking the pulse of his participants. "Everyone who submitted a log for the WPX RTTY, SSB, and CW contests this year was invited to participate in a survey about the contest. 4555 people from around the world representing all levels of experience completed the survey." You can now find parts 1 and 2 of the results online - "Should Single-Op and Single-Op Assisted by combined into one category? <http://www.cqwpx.com/blog/?p=69>" and "Should Logs and Log Checking Reports be public? <http://www.cqwpx.com/blog/?p=70>" among other topics.

Another online score analysis tool has been announced by Jim W7EJ, better-known as CN2R during contest season. LogQSO <http://logqso.com/>

is a new Web application that allows you to view and analyze your CQ WW contest logs against those of the competition. Made possible by public logs, you can select up to three calls and compare the logs graphically with a number of useful filters. This should be a great strategy planning tool! I compared my score to the competition and decided I should just go to ZD8.

EI8IC's "Mapability <http://www.mapability.com/ei8ic/>" Web site offers a way to tell the location of a Chinese station from the call sign. From the Ham Maps page, select "Prefix Maps 2" and then "China-Interactive". You can also take a close look at the cty_wt_mod.dat file <http://www.country-files.com/cty> your logging software uses. (Thanks, Jim AD1C)

A new DX and contest club has been born in British Columbia - welcome the Orca DX and Contest Club <http://orcadxcc.org/>. Officers of the new club are President, Dave VE7VR; Vice President, Steve VE7CT; Secretary, John VA7JW; Treasurer, David VA7AM; and Membership Chair, Ralph VE7XF. Look for this club for VE7 multipliers in your log this fall. (Thanks, Dave VE7VR)

This will be confusing to the plastic owl facing True North at the top of your tower, but the constellations will be greatly different in 50,000 years! This Discovery News article featuring the work of NASA astronomer Robert Hurt <http://news.discovery.com/space/changing-constellations-50000-years.html> shows how five famous constellations will look five myriads from now. Oops! It looks like Ursa Major sat on the Big Dipper and broke Orion's shield - that had to hurt - I wonder if ol' Ursa saw stars?

Web Site of the Week - The 53rd annual Jamboree On The Air (JOTA) <http://scout.org/en/information_events/events/jota/the_53rd_jota_2010> takes place this weekend. If you can, host a scout or two at your amazing contest station for some world-wide fun. Or just get on and look for scouts making contacts across the bands - support interest in ham radio by these young adventurers! One of the featured exercises this year is Vuvuzela Morse Code - does that sound like fun, or what? There's more about JOTA on this ARRL Web page <http://www.arrl.org/jamboree-on-the-air-jota> and don't forget JOTA's civilian sibling, the ARRL School Club Roundup <http://www.arrl.org/school-club-roundup-scr> from Oct 18-22!

WORD TO THE WISE

Beta: a Greek word meaning "still doesn't work." (Thanks, Bill W9OL)

==> SIGHTS AND SOUNDS

N6AA and N6ZZ worked the CQ WW contest from all forty zones, but here's a contester putting zones in the log by bike. Thomas OZ1AA is pedaling his way from Denmark to Sydney, Australia! Currently as far as Wroclaw, Poland, Thomas is logging a lot of km - you can follow his progress on his blog, "Cycling the Globe <http://www.cyclingtheglobe.com/>".

If you are feeling insignificant or maybe a little big for your
britches, this Web site on the scale of things
<http://htwins.net/scale/> about us should be entertaining in either
direction. (Thanks, Al AD6E)

==> RESULTS AND RECORDS

Extended results for the 2010 ARRL June VHF Contest are in the process
of being posted to the ARRL Contest Branch Web site. The PDF package by
results author, Rick K1DS, expands coverage that will be appearing in
the December issue of QST. Printable line scores and the searchable
database are also open. (Thanks, Sean KX9X)

Results for the 2010 Canada Day Contest
<http://www.rac.ca/en/rac/programmes/contests/files/2010%20Canda%20Day%20Writeup%20V1.0.pd
f>
have been compiled and posted online earlier than usual as a
consequence of changes in the RAC printed publications policy. (Thanks,
Bart VE5CPU, RAC Canada Day Contest Manager)

OPERATING TIP

The ARRL November Sweepstakes is a common first contest for new HF
operators since even small stations can make a lot of contacts around
the US and Canada. For those new contesters, it can be a challenge to
navigate the rules and log submission process. To address those needs,
the ARRL has released a first version at getting all the rules -
contest-specific, general, and HF - into one convenient package. It's
available on the Sweepstakes Web page <http://arrl.org/sweepstakes> as
an "Operating Guide" and includes a "how to play" overview, a number of
references to contest operating information, log sheets and entry
forms, and examples of known-good Cabrillo headers for each operating
category. Eventually, there will be one of these for each ARRL contest.

==> TECHNICAL TOPICS AND INFORMATION

As VHF+ operators know, sporadic E propagation (Es) has a distinctly
cyclic characteristic. Thanks to the PSK31 PropNET community, Art
KA5DWI has documented cyclical-Es phenomena in a study
<http://www.propnet.org/docs/art/KA5DWI_2010_SummaryA.pdf> published on
the PropNET Web site. This is a great example of "advancing the radio
art". (Thanks, Ev W2EV)

I just finished a very interesting book titled, "The Battery - How
Portable Power Sparked a Technological Revolution
<http://www.harpercollins.com/books/The-Battery-Henry-Schlesinger/?isbn=9780061442933>"
by Henry Schlesinger. If you've ever wondered about the origins and
evolution of our cell-ular companions, "The Battery" will fill you in.
The book starts at the beginning - static electricity - and works its
way to the present day. I guarantee some surprising revelations during
the journey. The book doesn't attempt to be a detailed analysis of
battery technology, succeeding at offering an engaging treatment of the
subject that will spur additional investigation. Amateur radio makes an
appearance towards the later chapters, too - no fair skipping ahead!

The book is good as a fast-charge day's read or as a chapter-at-bedtime trickle-charge. Highly recommended.

Three new state-of-the-art 7-element Yagi antenna designs <http://g4cqm.www.idnet.com/2M%20YAGI> have been published by Derek G4CQM. These were optimized for satellite operation, but would no doubt perform well in terrestrial applications. The interesting clamp fixtures at the end of the article might also be of interest in other antenna-building applications. (Thanks, AMSAT Bulletin ANS-283.10)

We all know the solar wind has a lot to do with ionospheric conditions - for example, a southward tack of the solar wind's Bz component bodes ill for HF propagation. Even though tenuous, the breeze flowing past the Earth still carries a lot of energy. How about putting a giant sail <http://www.msnbc.msn.com/id/39441929/ns/technology_and_science-discoverycom/> in space to tap some of it? And we could shunt-feed the tether, too!

More low-cost or free drawing programs surfaced this week. The first is the Open Source inkscape <http://inkscape.org/> - the Web site hosts tutorials and forums. Google Documents includes the Drawing <http://googledocs.blogspot.com/2010/04/introducing-google-docs-drawings.html> program and all of your files are stored on the Google servers - a good thing if you travel and want to access those drawings from any computer. GIMP <http://www.gimp.org/> (GNU Image Manipulation Program) is highly recommended, as well. (Thanks, Chris KG6OMK and Barry KF5GC)

If you're looking at your tiny yard as contest season gets underway and sighing in dismay, take a look at these HF antennas <http://audiosystemsgroup.com/LimitedSpaceAntennas.pdf> for limited space by Jim K9YC. The accompanying file of presentation slides <http://audiosystemsgroup.com/LimitedSpaceAntennasPPT.pdf> sheds additional light on the subject. Being a domestic contest, low antennas are effective and if you take steps to make them efficient, you'll be surprised at the results.

Technical Web Site of the Week - A good introduction to power supplies is available from National Semiconductor as Application Note 556 (AN-556), "Introduction to Power Supplies <http://www.national.com/an/AN/AN-556.pdf>". It covers linear and switching power supplies, highlighting the primary differences and concerns for each type. Additional resources include:
"Power Supply Handbook <http://www.arrl.org/shop/Power-Supply-Handbook>" by John Fielding, ZS5JF
"Switching Regulators for Poets <http://cds.linear.com/docs/Application%20Note/an25fa.pdf>" by Jim Williams, Linear Technology AN-25
"Linear and Switching Voltage Regulator Fundamentals", Part 1 <http://www.national.com/vcm/national3/en_US/resources/app_notes/power/f4.pdf> and Part 2 <http://www.national.com/vcm/national3/en_US/resources/app_notes/power/f5.pdf>,

by Chester Simpson
"Power Supply Design Basics
<http://www.st.com/stonline/books/pdf/docs/1707.pdf>" by P. Antoniazzi
"Linear & Switching Voltage Regulator Handbook
<http://www.onsemi.com/pub_link/Collateral/HB206-D.PDF>", HB206/D from
On Semi (formerly Motorola)
Introductory information on Astron power supplies
<http://www.repeater-builder.com/astron/astron-intro-stuff.html> from
the Repeater Builder Web site
(Thanks, Michael VE3TIX)

==> CONVERSATION

Hope Springs Eternal

Or should that be "Falling In Love Again"? I am referring, of course, to the beginning of contest season as autumn brushes broad its palette across the hills and valleys of North America. If baseball is in the post-season, can CQ Worldwide and ARRL Sweepstakes be far away? I think not.

Here and there, last-minute antenna projects are taking shape in increasing haste as the afternoon shadows lengthen earlier and fingers get a little stiffer in the cooler evenings of fall. The HF bands have vivified a bit and the Top Banders are agog from a good start to the trans-oceanic months, too. October seasons every State, Province, and Country with pinches of prestidigitation for the radio amateur.

Take a few minutes to savor those outdoor hours, whether you are launching a line upwards or resting comfortably in your harness after a climb up the tower. In the warm, yellow light, the bravura of colorful hillsides and thickets make for a memorable view. I have been known to ascend a ways just to get up above the ground and listen to the wind and the rustle of dry leaves that before the hurricane will surely fly, even once surprising a passing flock of geese descending to a landing on their journey south.

You can almost feel the signals in an autumnal antenna, so full of promise and anticipation! I don't know what it is, but the soldering is done a little more thoroughly, the knots tied a bit more ship-shape, and the U-bolts snugged up just right between Labor Day and Halloween. It's a well-known secret fable that volts are just a little juicier after the equinox! Even the electrons know, don't they?

So, here's to those of you out there in the back yard, on the rooftop, and at the top rung, wrestling wire or armstronging aluminum against the coming winter - and to our southern siblings just now getting entering their vernal season - I toast you with a cup of apple cider, inhaling the tang of fallen leaves and squinting skyward at the antenna farm festooning the trees and towers. Is it big enough and high enough? Of course not, but it's ready - and so am I. See you on the bands!

73, Ward N0AX

==> CONTESTS

13 October through 26 October

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CWops Mini-CWT Test--CW, from Oct 13, 1100Z to Oct 14, 0400Z. Bands (MHz): 3.5-14. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Great Pumpkin Sprint--Digital, from Oct 16, 8 PM to Oct 17, 2 AM. Bands (MHz): 1.8. Exchange: RST and S/P/C. Logs due: Nov 16. Rules <http://www.podxs070.com/>

JARTS WW RTTY Contest--Digital, from Oct 16, 0000Z to Oct 17, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and age (YL may send '00'). Logs due: Nov 30. Rules <http://jarts.web.fc2.com/>

QRP ARCI Fall QSO Party--CW, from Oct 16, 1200Z to Oct 17, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T), S/P/C, QRP ARCI number or pwr. Logs due: Nov 18. Rules <http://www.qrparci.org/>

Iowa QSO Party--Phone,CW,Digital, from Oct 16, 1400Z to Oct 16, 2300Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T) and IA county, state/prov, or "DX". Logs due: Nov 9. Rules <http://www.wa0dx.org/>

New York QSO Party--Phone,CW,Digital, from Oct 16, 1400Z to Oct 17, 0200Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--1.820, 3.550, 7.050, 14.050, 21.050, 28.050; Phone--1.870, 3.825, 7.200, 14.290, 21.350, 28.400. Exchange: RS(T), NY county, state/prov, or "DX". Logs due: 14 days. Rules <http://www.nyqp.org/>

Stew Perry Warmup Contest--CW, from Oct 16, 1500Z to Oct 17, 1500Z. Bands (MHz): 1.8. Exchange: 4-char grid square. Logs due: Nov 18. Rules <http://web.jzap.com/k7rat/stew.rules.txt>

Worked All Germany--Phone,CW, from Oct 16, 1500Z to Oct 17, 1459Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial or DOK code. Logs due: 14 days. Rules <http://www.darc.de/referate/dx/contest/wag>

Spooky Feld-Hell Sprint--Digital, from Oct 16, 2000Z to Oct 16, 2200Z. Bands (MHz): 3.5-7,21-28. Exchange: RST, Feld-Hell nr, S/P/C, and 10-10 nr. Logs due: 2 weeks. Rules <http://www.feldhellclub.org/>

Asia-Pacific Sprint--CW, from Oct 17, 0000Z to Oct 17, 0200Z. Bands (MHz): 14-21. Exchange: RST and serial. Logs due: 7 days. Rules http://jsfc.org/apsprint/aprule.txt

Illinois QSO Party--Phone,CW, from Oct 17, 1700Z to Oct 18, 0100Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and IL county or S/P/C.

Logs due: Nov 18. Rules <http://www.w9awe.org/>

Run For the Bacon--CW, from Oct 18, 0200Z to Oct 18, 0400Z. Bands (MHz): 1.8-28. Frequencies: Monthly on the third Sunday local time. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.com/fpqrprun.php>

School Club Roundup--Phone,CW,Digital, from Oct 18, 1300Z to Oct 22, 2400Z. Bands (MHz): 1.8-28, 50+. Exchange: RST, class and S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/school-club-roundup-scr>

FOC QSO Party--CW, from Oct 23, 0000Z to Oct 23, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: RST, name, and FOC number if member. Logs due: Oct 30. Rules <http://www.g4foc.org/>

10-10 Fall CW QSO Party--CW, from Oct 23, 0001Z to Oct 24, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Nov 8. Rules <http://www.ten-ten.org/>

Scandinavian YLRA Contest--Phone,CW,Digital, from Oct 23, 1000Z to Oct 24, 1000Z. Bands (MHz): 3.5-28. Frequencies: See Web site. Exchange: RS(T) and "88" (YLs) or "73" (OMs). Logs due: Nov 30. Rules <http://www.contestclubfinland.com/>

W/VE Islands QSO Party--Phone,CW,Digital, from Oct 23, 1600Z to Oct 24, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RS(T) and S/P/C or island designator. Logs due: Nov 30. Rules <http://www.usislands.org/>

VHF+ CONTESTS

Fall VHF Sprints--Phone,CW,Digital, from Oct 16, 6 AM to Oct 16, 12 PM. Bands (MHz): 902+. Exchange: 6-char grid locator. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

Arucaria VHF Contest--Phone,CW, from Oct 16, 0000Z to Oct 17, 1600Z. Bands (MHz): 50,144. Exchange: RS(T) and 4-char grid square. Logs due: 10 days. Rules <http://www.avhfc.com/>

Iowa QSO Party--Phone,CW,Digital, from Oct 16, 1400Z to Oct 16, 2300Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T) and IA county, state/prov, or "DX". Logs due: Nov 9. Rules <http://www.wa0dx.org/>

New York QSO Party--Phone,CW,Digital, from Oct 16, 1400Z to Oct 17, 0200Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--1.820, 3.550, 7.050, 14.050, 21.050, 28.050; Phone--1.870, 3.825, 7.200, 14.290, 21.350, 28.400. Exchange: RS(T), NY county, state/prov, or "DX". Logs due: 14 days. Rules <http://www.nyqp.org/>

Illinois QSO Party--Phone,CW, from Oct 17, 1700Z to Oct 18, 0100Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and IL county or S/P/C. Logs due: Nov 18. Rules <http://www.w9awe.org/>

School Club Roundup--Phone,CW,Digital, from Oct 18, 1300Z to Oct 22, 2400Z. Bands (MHz): 1.8-28, 50+. Exchange: RST, class and S/P/C. Logs

due: 30 days. Rules <http://www.arrl.org/school-club-roundup-scr>

FOC QSO Party--CW, from Oct 23, 0000Z to Oct 23, 2359Z. Bands (MHz):

Ohio/Penn DX Special Bulletin No. 980.1
The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 980.1
BID: $OPDX.980.1
October 13, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Bill Moore/NC1L and Rich Moseson/W2VU for the following DX information.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports:
"The dissolution of the Netherland Antilles has caused changes to the DXCC List.

As per the DXCC rules, the two Netherland Antilles DXCC entities will be deleted and moved to the Deleted Entities List. Four new entities will be added to the DXCC List : (1) Curacao; (2) St. Maarten; (3) Saba and St. Eustatius; and (4) Bonaire. The event date and time for these changes will be 0400Z, 10 October, 2010. Confirmations for these new entities will be accepted for credit starting 1 January, 2011.

Other administrative changes and actions will be announced as they are finalized..... 73 es DX! Bill Moore NC1L"

CQ COMMUNICATIONS, INC. NEWS RELEASE. Rich Moseson (W2VU), Editor, reports on October 13, 2010, for immediate release:
"Former Netherlands Antilles and CQ Awards and Contests

With several groups operating this week from the "new" DX entities created by the breakup of the Netherlands Antilles, questions have arisen regarding their status for CQ DX awards and contests. This announcement updates and supplements the preliminary announcement that will appear in the November issue of CQ magazine, which is already at the printer.

CQ DX Awards
Each of the five islands involved in the change of status retains its previous PJ callsign prefix (Curacao - PJ2; Bonaire - PJ4; St. Eustatius - PJ5; Saba - PJ6; and St. Maarten - PJ7). According to CQ DX Awards Manager Billy Williams, N4UF, the previous entities of the Leeward Islands (PJ2/PJ4) and Windward Islands (PJ5/PJ6/PJ7) Islands were deleted

as of October 9, 2010. Four new entities - Curacao (PJ2), St. Maarten (PJ7), Bonaire (PJ4) and Saba/St. Eustatius (PJ5/6) - became active on October 10, for a net gain of two DX entities. Confirmations for contacts made with the new entities will be accepted for CQ award credit effective immediately.

New Multipliers in the CQWW
The country multiplier list for the CQ World Wide DX Contest (SSB weekend on October 30-31; CW on November 27-28) is based on a combination of the ARRL's DXCC list and the DARC's WAE (Worked All Europe) list. Since the ARRL has also made the same changes, deleting the old Windward and Leeward Islands entities and adding PJ2 (Curacao), PJ4 (Bonaire), PJ5/6 (St. Eustatius & Saba) and PJ7 (St. Maarten) as four new entities effective October 10, these "new ones" will each count as separate country multi-pliers in the CQWW.

There is no need to worry if your own contest logging software is not updated, according to CQWW Contest Director Bob Cox, K3EST. 'In the end, the log checking software calculates final tallies anyway,' he notes, adding that the software 'is very up-to-date and reflects any status changes.'

DX Marathon Double-Dip
Competitors in the 2010 CQ DX Marathon will have a unique 'double-dip' opportunity in working the islands of the Netherlands Antilles for Marathon points. Those who worked any of the islands before 10/10/10, get credit for either the Windward or Leeward Islands, as appropriate. Hams who work them again on or after 10/10/10 will get additional credit for the new entities, providing a maximum of six country credits for working the islands in 2010."

** DRACONIDS 2011 - ONE YEAR UNTIL THE METEOR OUTBURST **

Every year around Oct. 8th, Earth passes through a minefield of
dusty debris from Comet Giacobini-Zinner, source of the annual
Draconid meteor shower. This year, forecasters expect Earth to
narrowly miss several of the debris streams, resulting in no
appreciable display for 2010. Next year, however, could be
different. On Oct. 8, 2011, Earth will have a near head-on
collision with a tendril of dust, setting off a strong outburst
of as many as 750 meteors per hour. People in Europe, Africa and
the Middle East will have a front-row seat for what could be the
strongest shower since the Leonid storms a decade ago...

** JF1OCQ going to ZL7 **

I will be active as ZL1WY/ZL7 from the Chatham Islands
(OC-038) between 2 December and 9 December. and will operate on
160-6meters CW, SSB and Digi-mode, with an emphasis on 160 and
6 metres for around the Pacific. Especially, a breakable beacon
will be on 50.117MHz around the clock. QSL via JF1OCQ.
SOURCE: Hiro, JF1OCQ / W1VX / ZL1WY via Bill NG3K-DX-News

** K1XM and W8GEX will be qrv from island of Sint Maarten **

Paul, K1XM and Joe, W8GEX will be leading a YCCC group to the
island of Sint Maarten (IOTA NA-105, WLOTA 0711) in early October.
They plan to be active as PJ7E from 0000z on 10 October until
20 October 2010 from the QTH of Mort PJ7UQ, in downtown Philips-
burg (WW Loc. FK88LA). QRV on 160-10m using SSB, CW and RTTY. The
CW station will be located near Cupecoy, while the SSB station
will be located near Dawn Beach. Operators include Craig K9CT,
Joe AA4NN, Franz DJ9ZB, Max I8NHJ, Dave K4SV, John K6MM, Kevin
K6TD, Ralph K9ZO, Bill N2WB, Charlie NF4A, Charles W6KK, Bruce
W6OSP and Joe W8GEX. The group plans to have four stations on
the air 24/7, and will have two additional stations that can be
activated if needed. They will work all bands (160-6m) CW, SSB
and RTTY. QSL manager will be KQ1F.
Website: http://www.stmaarten2010.com/index.html
SOURCE: [NG3K] via ICPO Bulletin (08-15 October 2010)

** W1RT from from Cape Breton Isles on 50 MHz **

John, W1RT is about to embark on a road trip to the Cape Breton
Isles (IOTA NA-010, CIsA NS001, WLOTA 1592), in Nova Scotia, for
a week. It appears that he will be staying on Grid locator GN06,
with the DN96/95/GN06/05 corner close by! John is planning on
bringing along the K3 and a buddipole at the munimum (which
configures as a full-size 6M dipole). He could beavailable for
morning QSOs most days from the 10th through the 17th of October
2010. QSL via home call.
SOURCE: [N8OFS] via ICPO Bulletin (08-15 October 2010)

** KB7ME Grid Trip DN03/DN02 **

I will have bands 50, (6M5X and 800w), and 144, (12ele K1FO and
375w). Should be QRV by early Saturday afternoon and be there
thru Sunday till interest wanes. Working me from here gets you
two grids, DN03aa and DN02ax. I will be qrv this weekend, Sat
10-16 and Sunday 10-17-10. SOURCE: Mike KB7ME via WSJT Reflector

** 9Q50, DEM. REPUBLIC OF CONGO **

Patrick/ON4HIL will once again return but with Theo/ON4ATW,
Marc/ON6CC, Luc/ON4IA, Wim/ON4CIT and Ron/PA3EWP and activate

9Q50ON from Kinshasa between December 3-13th. The special event
callsign is to celebrate the 50th anniversary of the independence
of the Democratic Republic of Congo. Activity will be on 160 -
6 meters using CW and SSB. QSL via ON4BR, by the Bureau or direct

==> + PUBLIC SERVICE: AMATEUR RADIO OPERATORS PROVIDE COMMUNICATIONS SUPPORT DURING CHILEAN MINE RESCUE

As the last of the 33 miners who were trapped 2300 feet deep inside the San Jos&#65533; Mine -- located about 27 miles from the Chilean town of Copiap&#65533; in the Atacama Desert -- rose to the surface at 0055 UTC on October 14, the world cheered in unison. The miners, who were underground for 69 days -- the longest time ever for miners to be trapped and survive -- all emerged relatively healthy. Amateurs with the Radio Club Copiap&#65533;, CE1CPI, provided communication support between the authorities and emergency equipment operators inside the San Jose Mine complex, as well as with family of the trapped miners in the

complex and authorities in Copiap&#65533;. Read more here
<http://www.arrl.org/news/amateur-radio-operators-provide-communications-support-during-chilean-mine-rescue>.

==> + DXCC NEWS: FOUR NEW ENTITIES PLACED ON DXCC LIST

With the dissolution of the Netherlands Antilles on October 10, two now-deleted DXCC entities are now four new DXCC entities, effective October 10, 2010. The island pair of Bonaire and Cura&#65533;ao (PJ2 and PJ4, the Leeward Islands) and the three-island group of Sint Maarten, Saba and St Eustatius (PJ5, PJ6 and PJ7, the Windward Islands) have been deleted from the DXCC list of active entities and replaced with four new entities. Not since the aftermath of World War II -- with so many new European entities -- and the break-up of the French colonies in Africa in the early 1960s -- have so many new DXCC entities come into existence all at once.

On October 10, the US Department of State recognized the dissolution of the Netherlands Antilles, placing the new entities on its Dependencies and Areas of Special Sovereignty List, saying that "Cura&#65533;ao and Sint Maarten (the Dutch two-fifths of the island of Saint Martin) became autonomous territories of the Kingdom of the Netherlands. Bonaire, Saba, and St Eustatius now fall under the direct administration of the Netherlands."

According to the DXCC rules
<http://www.arrl.org/files/file/DXCC/DXCC%20Rules.pdf>, entities may be added or removed from the DXCC List
<http://www.arrl.org/country-lists-prefixes> as a result of political or geographic change. These new entities qualified to be listed on the DXCC List under Section 2, Rule 1(b) of the DXCC rules: "The entity contains a permanent population, is administered by a local government and is located at least 800 km from its parent. To satisfy the 'permanent population' and 'administered by a local government' criteria of this sub-section, an Entity must be listed on either (a) the US Department of State's list of 'Dependencies and Areas of Special Sovereignty' as having a local 'Administrative Center,' or (b) the United Nations list of 'Non-Self-Governing Territories.'"

With so many DXCC entities all coming into being at the same time, many amateurs made their way to Cura&#65533;ao (PJ2T, PJ2/OH1VR, PJ2/PB2T, PJ2A and PJ2MI), Sint Maarten (PJ7E, PJ7MF), Bonaire (PJ4B, PJ4D, PJ4I, PJ4LS and PJ4W), Saba (PJ6A) and St Eustatius (PJ5/AA4NC, PJ5/AH6HY and PJ5/K1XM) to put these new ones on the air. Beginning at 0400 UTC on October 10, the airwaves were filled with those looking to snag these new entities; just days after the entities became "live," stations on the islands had made more than 15,000 QSOs on SSB and CW.

Per the ARRL DXCC Desk, no confirmations for these new entities will be accepted until after January 1, 2011; other administrative changes will be announced as they are finalized. Look for more information on the

ARRL Web site, in upcoming editions of The ARRL Letter and in the December 2010 issue of QST.

==> + INTERNATIONAL SPOTLIGHT: ARRL MARKS 27TH YEAR OF HOSTING USTTI AMATEUR RADIO ADMINISTRATION COURSE

Students from the Philippines, Ethiopia, Ghana, Brazil and Nigeria attended the United States Telecommunications Training Institute (USTTI) Amateur Radio Administration Course at ARRL Headquarters September 27-October 1. ARRL Chief Technology Officer Brennan Price, N4QX, coordinated the session and led the course. ARRL Assistant to the Chief Executive Officer and Meeting Planner Lisa Kustosik, KA1UFZ, coordinated ARRL's participation with USTTI. Read more here <http://www.arrl.org/news/arrl-marks-27th-year-of-hosting-ustti-arac-course>.

==> INTERNATIONAL SPOTLIGHT: DR HAMADOUN TOUR&#65533;, HB9EHT, RE-ELECTED ITU SECRETARY-GENERAL

On October 7 during the morning session of the 18th ITU Plenipotentiary Conference -- held in Guadalajara, Mexico -- Member States of the International Telecommunication Union (ITU) re-elected Dr Hamadoun Tour&#65533;, HB9EHT, of Mali, as ITU Secretary-General. This will be his second four-year term. Dr Tour&#65533;, who ran unopposed, won the position with 151 votes, with 157 countries present and voting.

The next day, Fran&#65533;ois Rancy of France was elected as Director of the ITU's Radiocommunication Bureau <http://www.itu.int/plenipotentiary/2010/elections/results/index.html#br> (BR), capturing 90 of 157 votes. The BR plays a key role in global communications, managing the distribution of international frequency spectrum and the allocation of satellite orbits. According to the ITU, Rancy will face several challenges, including WRC-12. The conference will tackle issues that include a review of the international framework for radiocommunication (including Amateur Radio), the identification of appropriate mechanisms to address what the ITU called "the so-called digital dividend of radio spectrum" freed up by the switch to digital TV and the identification of spectrum resources for maritime, aeronautical, meteorological and climatology. Read more here <http://www.arrl.org/news/itu-secretary-general-deputy-secretary-general-elected-today-by-plenipotentiary-conference>.

==> + ARRL VEC LINKS UP WITH SOUTH POLE TO ADMINISTER TECHNICIAN EXAMS

While much of the United States was enjoying a beautiful autumn day on October 8, those who winter over at the Amundsen-Scott South Pole Station were experiencing a typical day for their clime, a day in the -70s (yes, you read that right -- 70 below 0 degrees Fahrenheit). But though the day was indeed frigid, six men and two women at Amundsen-Scott didn't feel the cold as they were too excited (and maybe just a touch nervous), knowing they were going to be part of the first Amateur Radio license exam session ever held at the South Pole. Read more here

<http://www.arrl.org/news/the-weather-outside-was-frightful-during-first-antarctic-ve-session>.

==> FIFTH ANNUAL ARRL ON-LINE AUCTION BEGINS NEXT WEEK

The Fifth Annual ARRL On-Line Auction <http://www.arrl.org/auction> will be open for preview beginning at 10:15 AM (EDT) on Friday, October 15, and will open for bidding at 10 AM (EDT) on Wednesday, October 20. According to Business Services Manager and Auction Coordinator Deb Jahnke, K1DAJ, there is a large assortment of ARRL Product Review items, donated new and vintage equipment, rare books, one-of-a-kind items and more. "If readers are interested in some great bargains and some great fun, you really need to check this out," she said. Jahnke also encouraged visitors to visit the site to preregister and scope out those "must-have" items. She expressed gratitude to the ARRL Business Partners and individual donors who have contributed items to this event. The 2010 ARRL On-Line Auction runs through 11:59 PM (EDT) October 25, 2010.

==> + ON THE AIR: JAMBOREE ON THE AIR

The 53rd Annual Jamboree on the Air (JOTA) will once agian provide an opportunity for Scouts to get on the air and get a taste of the fun and magic of radio. JOTA is an international scouting event organized by the World Scouting Bureau. While JOTA officially starts at 12 midnight local time Friday night/Saturday morning and goes until midnight Sunday local time, there will be plenty of stations on the air Friday evening. The official Scouting frequencies will be the center of operations. A listing of those frequencies, information about third party traffic restrictions and other details can be found on the ARRL Web site or on the World Scouting site. Each JOTA event provides an opportunity for a local club or Scout troop to get something started that can result in the beginning of a tradition of fun-filled activities. JOTA takes place starting Saturday at midnight local time, Saturday, October 16 and goes to 11.59 PM local time on Sunday, October 17. Some activity continues over from Friday to Monday to take advantage of long distance (DX) time differences Read more here <http://www.arrl.org/news/jamboree-on-the-air-coming-this-weekend-to-a-radio-near-you>.

==> + ON THE AIR: ARRL'S LOGBOOK OF THE WORLD: 300 MILLION QSOS -- AND COUNTING!

Congratulations to Victor Morozov, RD3PQ, for submitting QSO number 300 million to the ARRL Logbook of The World (LoTW)! His QSO with Ivan Gombos, SV2/OM3CGN, on October 5, 2010 did the trick. To date, Morozov has submitted nearly 6300 contacts to LoTW and will receive free DXCC and Worked All States awards for his well-placed log.

"We're very pleased with the high level of use and acceptance of LoTW from operators around the world," said ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N. "January 2011 marks the 10 year

anniversary of the ARRL's announcement of the LoTW system. While it has taken longer than anyone expected to return to building-out the system, progress is being made. ARRL's programmers are working hard to improve usability and to add support for the VUCC award, and we have received valuable assistance from volunteers in the development of the system and software." Read more here <http://www.arrl.org/news/logbook-of-the-world-300-million-qsos-and-counting> .

==> + CLUB NEWS: IRS OFFERS TOOLS FOR SMALL ORGANIZATIONS IN DANGER OF LOSING TAX EXEMPT STATUS

Back in May, we told you that the IRS could revoke the non-profit status <http://www.arrl.org/news/many-radio-clubs-could-lose-tax-exempt-status-in-2010> of small organizations -- including Amateur Radio clubs -- that have failed to file annual returns or reports for three years. According to ARRL Southwestern Division Director Marty Woll, N6VI, many clubs have, at some time in the past, applied for tax-exempt status as charitable organizations under Section 501(c)(3) <http://www.irs.gov/charities/charitable/article/0,,id=96099,00.html>, as civic leagues under Section 501(c)(4) <http://www.irs.gov/charities/nonprofits/article/0,,id=96178,00.html> or as recreational clubs using Section 501(c)(7) <http://www.irs.gov/charities/nonprofits/article/0,,id=96189,00.html>: "Years ago, any club with gross receipts averaging less than $25,000 per year was not required to file annual returns with the IRS; however, after 2006, such clubs had to file a Form 990-N <http://www.irs.gov/charities/article/0,,id=169250,00.html>, a simple 'electronic postcard' with minimal information, by the 15th day of the fifth month after the close of each fiscal year. Some clubs may not have been aware of this new requirement or didn't bother to comply. Even those that filed in a prior year may have neglected to keep up with the required filings as officers changed from year to year." Now the IRS is making several tools available to these organizations to help them maintain their tax-exempt status. Check out this page on the IRS Web site <http://www.irs.gov/charities/article/0,,id=227435,00.html> for links to a series of resources that clubs may find useful.

==> + SOLAR UPDATE

Tad "For tomorrow may rain, so I'll follow the Sun <http://www.youtube.com/watch?v=eq7DGPYzAvg>" Cook, K7RA, reports: Solar activity was down this week, although it is now gradually strengthening. The average daily sunspot numbers dropped nearly 16 points to 11.7, and the average daily solar flux declined more than 5 points to 75.8. Over the next two weeks, the solar flux is expected to gradually increase to 80 on October 14-16, 82 on October 17-21, 80 on October 22-25 and 85 on October 26-29. The increase is expected from

sunspot group 1112 -- emerging on October 9 -- and group 1113 that appeared on October 13, rotating over the Sun's eastern limb. The STEREO mission <http://stereo.gsfc.nasa.gov/> shows a series of magnetically active areas on our Sun's far side, which should rotate into view. Geomagnetic activity is expected to be stable, with the planetary A index moving between 5 and 8. The predicted planetary A index is 5 on October 14-15, 8 on October 16-17, 5 on October 18-20, 8 on October 21-22, 5 on October 23, 8 on October 24-25 and 5 on October 26-29. Over the past week, the geomagnetically active day was Monday, October 11, when the planetary A index was 20 and the planetary K index went as high as 5. Alaska's College A index was 49, based on a College K index as high as 7. This activity was pushed by a strong solar wind. Look for more information -- including a look at some methods for taking these numbers and predicting propagation for yourself from your location to any other worldwide location of interest, on any day or band -- on the ARRL Web site on Friday, October 15. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Paul McCartney's I'll Follow the Sun <http://www.youtube.com/watch?v=eq7DGPYzAvg>.

==> THIS WEEK ON THE RADIO

This week:

- October 16 -- Iowa QSO Party; Feld Hell Sprint; Microwave Fall Sprint (local time)
- October 16-17 -- New York QSO Party; JARTS WW RTTY Contest; ARCI Fall QSO Party; Worked All Germany Contest; PODXS 070 Club 160 Meter Great Pumpkin Sprint (local time)
- October 17 -- Asia-Pacific Fall Sprint (CW)
- October 17-18 -- Illinois QSO Party; Run for the Bacon QRP Contest

Next week:

- October 23 -- FOC QSO Party
- October 23-24 -- Stew Perry Topband Challenge; 10-10 International Fall Contest (CW); W/VE Islands QSO Party; Araucaria VHF Contest; SYLRA Contest
- October 27 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS AND EVENTS

- October 15-17, 2010 -- ARRL Pacific Division Convention
<http://www.pacificon.org/>, San Ramon, California
- May 20-22, 2011 -- Dayton Hamvention <http://www.hamvention.org/>
featuring ARRL EXPO, Trotwood, Ohio
- June 10-11, 2011 -- ARRL National Convention and ARRL EXPO at the
ARRL West Gulf Division Convention <http://www.hamcom.org/>, Plano,
Texas

Communications support for Chile mine rescue

As the world watched via television the rescue 33 trapped miners at San Jose
in Chile, giving its support was the Radio Club de Chile (RCCH) to boost
the availability of communications in the area.

President of the Radio Amateurs of the Region of Atacama, Jose Maldonado
has reported that support was offered to overcome the lack of communications
facilities in this desert region of Chile.

The support enabled links for various authorities with emergency equipment
inside the San Jose site and also with family and authorities in the city
of Copiapo.

According to ARRL, Erico Jos&#65533; Andrade, CE2EPB said Radio Club Copiap&#65533; had a lot of equipment, enabling the club to cover almost all of the Atacama Region: "This helped effectively from the outset after the accident, because the mine complex where the emergency occurred did not have contact with ordinary phones that could coordinate the rescue effort in the shortest time possible."

Some of the 80 members of Radio Club Copiap&#65533; installed amateur equipment in the mine complex, and volunteers from the club have, from the moment the mine collapse occurred on August 5, have taken shifts to provide communication support. "This, together with additional mobile police stations, hospitals and fire battalions, kept everyone abreast of all the needs and urgent requirements," Andrade explained.

While this collaboration continued all shared the common hope for the safe rescue of the miners, trapped 700 metres (2,300 ft) below the ground in the cooper mine since 5 August.

(ARRL and Jim Linton VK3PC, Chairman, International Amateur Radio Union Region 3, Disaster Communications Committee).

... ed Must admit I was glued to the various live feeds for this rescue, but really to see what happened when they brought to the surface that miner if both Wife and Mistress were awaiting him!... vk4bb

WIA Centenary

A look ahead at the VK100WIA roster

The special callsign for the Centenary of Organised Amateur Radio in Australia continues to be in strong demand.

About 40 WIA affiliated clubs with their three-day rostered slots have amassed a whopping 23,000 contacts so far with the six months availability of the callsign to conclude at the end of this month.

The Eastern Zone Amateur Radio Club put the callsign on air today from a hall in Hazelwood with its initial focus being JOTA involving a local girl guides group.

Club President, Peter Freeman VK3PF advises that after the JOTA commitment, the Eastern Zone Amateur Radio Club will use the remainder of its 72 hours to put VK100WIA on the HF and higher bands.

Keep a watch out for it via the online logging facility that will show its activity in real time.

On Wednesday through to Friday the Chifley Amateur Radio Club from its club rooms at Plumpton takes up the reins activating the special callsign 1500 to 2200 local time. Look for it on the 40m, 20m, 15m, 10m bands plus 2m and 70cm.

VK100WIA then moves down to Victoria's second largest city with the Geelong Radio and Electronics Society from its clubrooms in Belmont. Club Secretary, Keith Stickland VK3XKS says operating times will be 9am to 9pm local time on HF, VHF and UHF, Saturday 23 through to Monday 25th of October.

He extends a warm welcome to everyone to visit the clubrooms in High St Belmont.

WIA Centenary - Hobart FM Community Radio 96.1FM

Monday 18 October, sees Justin VK7TW as guest of Historian Reg Watson on his local history program on 96.1FM Hobart.

This program will feature some interesting early Wireless Institute of Australia history and maybe even some Tasmanian amateur radio history!

The program was as a result of the ABC radio program with Chris Wisbey on a weekend which Reg is a regular contributor to and Justin presented some info about amateur radio and the WIA Centenary.

http://www.hobartfm.org.au/

Central Coast Amateur Radio Club (CCARC)

>From all the members of the Central Coast Amateur Radio Club, a very warm welcome to the Amateur Radio fraternity across Australia

Come one come all to the Country Fair and support your hobby on-the-air!!

Central Coast Amateur Radio Club will be celebrating the 100 year anniversary of the WIA at the annual Mangrove Mountain Country Fair -
Saturday October 23rd.

Bring the family - enjoy the country fair while we operate and present our hobby to the general public

There will be animal exhibits, pony rides, crafts and food stalls, car and motorcycle exhibits, wood chopping and lots more.

The Country Fair will be held in the grounds of the Mangrove Mountain Community Hall, corner of Waratah Road and Wisemans Ferry road Mangrove Mountain NSW 2250

The fun starts at 10 am and goes all day

The club will be operating mainly on HF and will be accessing the club repeater VK2RAG on 438.075 and the club's IRLP node 6060

Remember, Tune in to the World and get people talking!

Rod Jarman - Publicity Officer CCARC - vk2fvrj@gmail.com or 02 43402500

The Central Coast Amateur Radio Club this weekend are participating in the annual JOTA at the Scout hall in Wattle Street, East Gosford, if you're in the area pop in!

Another Fest to take place, this time in VK7 but not until December is the Central Highlands Hamfest December 4 at Miena, sponsored by the Central Highlands Amateur Radio Club of Tasmania. This biannual event is centred literally in the middle of Tasmania in the Miena Community Hall.

MERG

With the help of the Media Kit supplied as part of the VK100WIA package, the Maryborough Electronics and Radio Group, Inc, has received publicity via press, television and broadcast radio, in hosting the operations of VK100WIA.

Last Saturday and Sunday, MERG held a mini expo at the Maryborough West Scout Hut. With repeated community announcements being given on radio, the stream of visitors continued through Sunday. Some local amateurs who haven't been active came to refresh their involvement with the hobby. One person came to anonymously donate some pre-loved test equipment. Many thanks from MERG.

Kathy, VK4KJ, the re-broadcaster for WIA news during October, was able to conduct the broadcast and call-ins using VK100WIA to give more stations a contact for the centenary. VK100WIA also called into the Brisbane 40m call-backs and was able to log some more stations despite heavy local QRM.

This weekend, a team from MERG is helping local scouting groups enjoy JOTA from the Aldershot Scout Camp.

And for good measure, MERG, has been granted access to the public space, in The Green, adjacent to the Maryborough Town Hall for the National Field Day, coming up next Saturday.

Hope to meet you on the air waves; for MERG, I'm Geoff, VK4ZPP

FINAL VK2 CLUBS FOR VK100WIA.

The special event finishes this month and the last two VK2 clubs to operate will be Chifley as we mentioned earlier, UTC days of Wednesday 20 to Friday 22. and Westlake's Friday the 29th through to Sunday 31st.

'Arena of Wonder' Wires to Wireless

The Melbourne based Prahran Mechanics Institute 'Throughout History Week' is an annual event held at the groups Prahran offices. The 2010 display will take place over the week of the 25th to the 30th of October and features a WIA Centenary display prepared by well known WIA historian Peter Wolfenden VK3RV.

The display titled 'Arena of Wonder' from Wires to Wireless is advertised as an extraordinary collection of wireless equipment and memorabilia marking the 100th anniversary of the Wireless Institute of Australia. Many of the items included in the display are to be from Peter Wolfenden's own personal collection. You are encouraged to visit and view this most fascinating display.

HAPPY BIRTHDAY IPPY

This year the city of Ipswich is celebrating 150 years since being declared a municipality and the WIA is also celebrating its 100 years in 2010.

To mark this double celebration the Ipswich and District Radio Club is holding a special presentation and BBQ next Saturday October 23rd at 11am which Mayor Paul Pisasale will attend.

Club President Michael Charteris VK4QS said other special guests will include Director of the WIA Ewan McLeod and Ipswich councillors.

Highlights will include the presentation to Mayor Pisasale of the book "HALCYON DAYS", Amateur Radio in Queensland from its earliest days to Pre-World War Two, written by Mr. Alan Shawsmith VK4SS, aged 93.

Also on the day the mayor will be inducted as an "Honorary Vice President of the Ipswich & District Radio Club and receive a special certificate, and there will be the cutting of the "Dual Commemorative Cake
" Ipswich 150 years ~ WIA 100 years.

I'm Allan VK4FABR.

All set for Australia's inaugural national amateur public relations event

A variety of locations and venues have been chosen by radio clubs and groups for the Tune-In To The World - Amateur radio gets people talking, WIA National Field Day.

Some 25 registrations will see 'public' category amateur radio stations operating from 4 museum or technology centres, 3 Bunning's warehouses, a fire watch tower, schools, a beach rotunda, town squares, parks, shopping centre and clubrooms.

So far these are in all mainland states and Alice Springs in the Northern Territory. Hopefully Tasmania and the Australian Capital Territory will come on board during this week to provide nation-wide participation.

More clubs are most welcome to take part in the event on Saturday the 23rd of October. Just submit details via the WIA website online registration facility.

All clubs already registered have been given access to a Marketing & Media Guide, a Template Media Release and a backgrounder on amateur radio.

We know that WIA support resource has been eagerly welcomed and is to result in publicity in local news media promoting the event and likely to boost attendances.

More than two dozen clubs have made the commitment to reach out to the public, provide information about amateur radio, and offer the experience of talking over the airwaves under the guidance of an experienced radio amateur.

It's all about marketing amateur radio to the public to increase awareness and understanding, and recruiting new people into the hobby.

Also undoubtedly it has the potential to reactivate a few lapsed radio amateurs along the way, when they learn about the new era of amateur radio that began five years ago.

And Saturday the 23rd of October is not just for clubs. Thank you to those individual radio amateurs have volunteered to operate their 'private' category station, providing a friendly, welcoming voice for QSOs with the public display stations.

We repeat, this is a golden opportunity, a special day focussed on promoting the hobby of amateur radio to people who have yet to discover the world's best hobby.

Tune-In to the world - Amateur Radio Gets people talking.

HAMS ACROSS AUSTRALIA.

Carine Primary School in West Australia is a hive of industry at present preparing for their ARISS contact due to take place this coming Tuesday afternoon,19.Oct. at 07:06 UTC. 15 students have been selected to ask astronaut Doug Wheelock questions about life on board the ISS.

ACMA NEWS

The Minister for Broadband, Communications and the Digital Economy Senator Stephen Conroy has announced the reappointment of Chris Chapman as Chair of the ACMA and the appointment of a new Deputy Chair, Mr Richard Bean.

Senator Conroy also announced the appointment of three new part-time members, Ms Louise Benjamin, Mr Hugh Marks and Emeritus Professor Reg Coutts. Professor Coutts is the chairman and co-founder of Red Button Technologies, an Adelaide based Telecommunications Start-up

More details at
www.emailhosts.com/ct/ctcount.php?key=009355260099014900001294

Showcasing the ACMA

David Long and David Hay will be going along to REAST in Hobart to give a presentation on what the Australian Communications and Media Authority does.

We as amateurs have linkages, through our licensing with the ACMA however, they do so much more than just licensing.

This should be a fascinating insight into the organisation and why it exists.

It happens on Wednesday November 3rd at 8pm in the Queens Domain clubrooms.

http://reast.asn.au/events.php#ACMAPresentation

(Justin, VK7TW)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

CARS AND PLANES AND BOATS AND THINGS

CAR 54 - WHERE ARE YOU

A car used for the filming of a car chase scene in a Hollywood movie has collided with a Washington DC Police SUV.

The police SUV collided with a yellow Chevy Camaro - known as the character Bumblebee in the Transformers movie series.

The 'prang' was not scripted and the police SUV was not supposed to be there!

The police officer driving the SUV, a veteran bomb technician was taken to hospital with minor injuries.

Sources said the police officer was responding to a call and was apparently using a different radio frequency than the officers who were securing the perimeter for the movie.

(WIA)

THE JUDGE DOES IT WITH FREQUENCY!

Following the arrest and comprehensive prosecution of a plane spotter in South Africa's Gauteng, local aviation enthusiasts have been warned that they will need to write an exam and qualify as a radio amateur to legally possess popular air band receivers.

Until now nobody has been prosecuted for this offence.

Port Elizabeth Amateur Radio Society chairman Ashley Goosen has warned local aviation enthusiasts that they need to be licensed to possess an air band receiver legally.

Plane spotter Julian Swift was arrested earlier this year under the South African Telecommunication Act for the illegal possession of an air band receiver and for listening in on several radio frequencies.

They are not just determined to throw the book at the spotter, they are still writing a telephone directory and War and Peace to throw at him, just last week the state amended the charge sheet to include every frequency on his receiver!

(WIA)

HAS THE SHIP THAT ROCKED BEEN SCUTTLED?

News on that pacific ocean pop pirate ship that was planning to bombard Fiji with news and pop music, reminiscent to the golden oldies days of off shore England broadcast tubs has "dried up".

The President of the Fiji Democracy and Freedom Movement, based in Sydney here in Australia, says the idea was to put an antenna on a ship anchored in international waters, outside Fiji's legal jurisdiction.

It had been suggested in some quarters they had been planning to position a Dutch-registered merchant vessel in the international waters off the coast of Fiji to defy censors in the military dictatorship and fire up on both AM and FM.

(WIA)

==========

NEWS FROM ARNEWSLINE

NEW NEVADA RADIO STATION TO INCLUDE HAM STATION

A tower is in place for a new broadcast radio station that will have a ham radio connection.
Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

The station is KQLN on 91.3 MHz FM and will serve Alamo, Nevada, in the Pahranagat Valley. This, from a site that sits on Nevada Highway 93 with coverage expected to be 50 miles in all directions.

The owner of KQLN is Harvey Caplan, KD7FJJ. Jerry Fuge, KC6ILH the Emergency Coordinator in Nevada's Northern Nye County says that Caplan is a member of the regions ARES/RACES organization that already has a repeater located at another of Caplan's radio stations. That one is located in the town of Pahrump. That's a city made famous by overnight talk show host Art Bell, W6OBB.

In a recent interview, Caplan told the Lincoln County Record that the stations transmitter site will house both KQLN along with an amateur radio station that will have coverage over most of the populated area of the valley. The ham station will be battery-powered and charged by a solar power panel.

Caplan told the newspaper that almost everyone associated with the station called Alamo Radio is not only a licensed amateur radio operator, but also a member of the Amateur Radio Emergency Service. He describes ARES as a national organization trained to respond to community emergencies by setting up two-way radio stations in hospitals, public safety areas, or even on mountain tops.

Kaplan notes that amateur radio can get messages through when conventional public safety radio systems fail, or to help when such systems may become overloaded. He says that some messages can be urgent, to fire or police, or simply relay health and welfare information to relatives of those in a disaster zone. Either way says Caplan, they could be life saving.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

In the newspaper article Caplan added that he hopes that others will want to serve the community and the valley by becoming licensed radio amateurs. He also looks forward to having KQLN-FM operating by the time of the November elections.

CCTV IMAGE PROCESSING TO COUNTER TERRORISM

The VTT Technical Research Centre of Finland is developing image processing technology that will improve surveillance of abandoned luggage in public places.

It's well known that across Europe there are numerous Closed Circuit TV systems in use in public places. These installations have the ability to gather large amounts of image material. But at this time there are no effective ways to analyse the mass of video data automatically and recognize potential risk situations.

Now comes VTT which is involved in a European Union research project called SUBITO. SUBITO is aimed at developing Information Technology or I-T solutions.

An example might be luggage left in a public place which may contain explosives or other dangerous substances. Terror attacks based on this tactic have already claimed taken place. Now, with the help of an application developed as part of the project, cameras recognize abandoned luggage automatically and rapidly identify, locate and track the person who left it there.

VTT says that SUBITO enhances security in a cost-efficient manner, since the new technology can be built on the foundations of existing Closed Circuit TV systems. Individual privacy issues are thus easier to take into account, because the end users must already take note of them in operating the system.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010

Oct 23 WIA WIA National Field Day
nfd@wia.org.au

NOV 20-21 WIA Spring VHF-UHF Field Day
John Martin VK3KM tac@wia.org.au

Good Morning Trent VK4TI here, today we have the 2010 Results of VK Shires

Congratulations are in order for the award winners -

Catherine VK4GH won both the Single op and the Single Rover categories -

VK2IM for the second year has won the VK5NJ Trophy for the most CW contacts.

VK7FWAY put in a stellar performance to take top honours in the Foundation category.

VK4ZD (VK4HH) powered away with the Multi Two category - well done Bill and Dianne.

Mark VK4ADX went bush and set a new activation record for shires as well as second place in the Rover category.

Well Done all and thanks to everyone who entered and submitted a log

See you all in 2011..

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

ZS8M approved for DXCC credit

The RSGB say ZS8M from Marion Island has been approved for DXCC credit. Those who have had cards rejected for this operation can e-mail dxcc@arrl.org for an update to their DXCC account.

Please refer to your LoTW account or the live daily listings for confirmation that an update has been done.

AT10, Antarctica

Time is running out to work Bhagwati, VU3BPZ, the communications manager of the 29th Indian Expedition at the Antarctic Maitri Base station, as AT10BP Bhagwati and his team have less than 2 months remaining at Maitri.

Activity by AT10BP is SSB only usually on the air around 1700z between 14276-14280 kHz.

QSL direct only via I1HYW.

For more info, visit the Worldwide Antarctic Program (WAP) Web page www.waponline.it

Also, Michel/F6DWQ and Mehdi/F5PFP have put together a nice slideshow with music depicting the Maitri Base station

www.french-polar-team.fr/VU_Maitri_Station_Antarctica.php

LOGBOOK OF THE WORLD

It was Victor RD3PQ who uploaded QSO number 300 million to ARRL's Logbook of the World (LoTW), thus confirming a QSO with SV2/OM3CGN the 5th October 2010.

ARRL commenced LoTW in 2001 and in January 2011 it will be 10 years since this initiative of digital log and confirmation of QSO's was first published.

It has probably taken more time and more work than the ARRL had thought to get the system stable and functional, but thanks to a team of dedicated staff and volunteers, they now have a system with high security and stability.

DROP SHORTS

Radio amateurs many radio clubs in South East London will be operating special event station GB2RA located at the Royal Artillery Museum, Woolwich from Saturday 23rd October through to Sunday 31st.

GB2RA will be mainly on the 40m and 2m bands during the Museum opening hours, 10.00 to 17.00.

More info from Lawrie, G4FAA on 07899 855166.

(RSGB)

AWARDS

Attention New VK Hams

Make one of your goals to obtain the WORKED ALL WINNIPEG AWARD

Work 10 Stations Within Winnipeg - "Any mode/any band."

This is a good one to get your toe in the award aspect of your new hobby, achievable to with just 10 VE's in Winnipeg to track down.

(Stations outside Manitoba within North America require 15 contacts and stations within Manitoba require 25 contacts)

Full details/rules are posted on
www.mts.net/~warc//awards.html

Climate satellite 'blinded' by radio interference

The European Space Agency says that it has launched a behind-the-scenes campaign to shut down illicit radio and TV transmissions interfering with a major climate satellite.

The 315-million-euro Soil Moisture and Ocean Salinity probe "has been bugged by patches of interference from radar, TV and radio transmissions in what should be a protected band."

The interference to the probe is as it passes over parts of southern Europe, Asia, the Middle East and some coastal zones, ESA said in a press release.

The intrusion has two causes.

One is a leak into a band of the electromagnetic spectrum (1400-1427 MHz in the L-band) assigned to space astronomy and Earth exploration satellites.

The other cause is illegal transmissions by TV, radio links and networks such as security systems that are blasting into the precious radio band.

"Also, terrestrial radars appear to cause interference," ESA said.

Indonesian Amateur Radio Satellites to launch in 2011

A news report says the Indonesian National Institute of Aeronautic and Space will launch two satellites carrying Amateur Radio, LAPAN-A2 and LAPAN-ORARI, in the second quarter of 2011.

The report could be read as implying the satellites will be launched from a domestic rocket. An earlier report in February 2010 indicated that LAPAN-ORARI would be launched from India.

The article comments on the effect of import restrictions which has led LAPAN to develop local production to enable the country to have an independent rocket launch facility

GET SET - This weekend!

Canadian Simulated Emergency Test (SET) has been taking place this weekend,
October 16, 17 and is proving a great opportunity for ARES groups to practice
the delivery of Amateur Radio assistance to Canadian municipalities and
served agencies.

REWIND

STUDIO: A small bit of Amateur Radio history has been replayed on TV,
as Peter Ellis VK1PE tells it.... (in another of his off-beat tales...)

AUDIO:
On Thursday 7 October I got home late from Lodge.

I turned on the TV and was watching a snippet of "One Antarctic Summer" (1980)
on Prime (i.e. 7 network TV) just after midnight and suddenly saw VK2APQ's
station used as the venue for the Federal Minister for something talking to the
team on a boat in Antarctica. The callsign was even used by the operator
on-air.

A small thing, to be true.

Best wishes to VK2APQ and the team from the boat. They've been remembered, and
replayed, 30 years later.

PS (but not)...
Pierce Healy VK2APQ celebrated his 99th birthday in August 2010.

Ref: http://www.eham.net/articles/24536

That means that Pierce was 68 or 69 when the film was made.

RESCUE RADIO: AMATEUR RADIO PLAYS ROLE IN SUPPORT OF CHILE MINE RESCUE

Amateur radio appears to have played a key supporting role in the
rescue of 33 miners trapped beneath Chilean soil for 69 days. Bill
Pasternak, WA6ITF, is in the newsroom with the latest:

--

Its being called the miracle of miracles. This as the world watched
live as 33 Chilean miners trapped some 2400 feet underground for 69
days were brought to the surface one at a time. This beginning on
October 13th and ending on October 14th using a tiny rescue capsule
dubbed the Phoenix and pulled by a hoist.

The saga began when the mine in San Jose, near the city of Copiapo
collapsed on August 5th and ended on October 14th when the last miner
rose to the surface at 0055 UTC. And while news reports heralded the
success of the rescuers, lost was the small but important contributions
made by that nations radio amateurs.

But Chilian hams were there throughout the entire ordeal doing what
they do best. That being another line of needed communications after
being called upon to provide it.

According to a report posted to the IARU Region 2 website by Ramon
Santoyo, XE1KK, it was the Radio Cub de Chile and the Radio Club
Copiapo that provided communication support between the authorities and
emergency equipment operators inside the San Jose Mine complex. Chilean
hams also provided liaison between the families of the trapped miners
and authorities as the rescue coordination center in Copiap&#65533;.

Perhaps the most important job performed by the Chilean radio amateurs was to establish an amateur radio communication system into the mine complex itself. The ARRL reports some of the 80 members of Radio Club Copiapo installed the equipment and then manned it with club volunteers beginning back on August 5th when the mine collapse took place. This radio system, together with mobile police stations, hospitals and fire battalions, kept everyone abreast of all the needs and urgent requirements of all involved in the rescue work.

No, the hams of Chile were not shown on the front pasge of the New York Time or the Chicago Tribune. Nor were they featured on NBC Nightly news. Their part of the story has been low key until now. None the less it was a job well done by amateur radio volunteers giving of themselves as hams do when their skill and services are needed. And for radio amateurs, that's what public service is all about.

>From the newsroom in Los Angeles, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

Until the news release by XE1KK it was not known that ham radio was involved in this mining rescue. (IARU-R2, ARRL, ARNewsline(tm))

**

RESTRUCTURING: RADIO AMATEURS OF CANADA SURVEY FOR ITS FUTURE

Seemingly following in the footsteps of the Radio Society of Great Britain, the Board and Executive of the Radio Amateurs of Canada is asking current, past and future potential members as well as amateur radio clubs to provide thoughts and recommendations on the future of the hobby in that nation. This, by responding to a set of questions posted to the organizations website by October 20th.

Responses will be considered at a meeting at the end of October to develop a vision for the future of Radio Amateurs of Canada in the 21st century. In addition they will be establishing a two year operational plan for 2011 and 2012. Canadian hams wishing to take part in the survey should take their web browser to tinyurl.com/2c8l8wm and follow the instructions found there.

As reported here last week, the Radio Society of Great Britain has launch a major survey of all United Kingdom radio amateurs. The objective of the survey is to gather as much information as possible on 21st century amateur radio operation in that nation. (RAC)

**
INTRUDER WATCH: NEW WAY TO REPORT HAM-BAND INTRUDERS The latest issue of the International Amateur Radio Union's Region 1 Monitoring System newsletter is asking hams to use its new online 'Intruder Logger' and 'Intruder Alert System' to file reports of unwanted users of the ham radio bands. Those providing input should include source, time in UTC and mode being used. Short time intruders should be sent to the

Intruder Logger. More on this including on-line reporting forms can be found at the following URL's: IARU R1 Intruder Logger: http://peditio.net/intruder/bluechat.cgi IARU R1 Intruder Alert System Email Reflector: http://iaru-r1.org/mailman/listinfo/intruderalert_iaru-r1.org (IARU Region 1)
**
RADIO SCOUTING: GROUP CELEBRATES 20 YEARS OF JOTA

And around the world the 2010 Scouting Jamboree on the Air is underway as we go to air. For one group its the 20th year it has been taking part. Amateur Radio Newsline's Mark Abramowicz, NT3V- has the rest of the story:

--

They call themselves the SPARK Lodge and they're based at the Musser Scout Reservation outside of Green Lane in Montgomery County in suburban Philadelphia.

Rick Blank, WB3BSA, is president of the organization, which actually is a Scouting Venture Crew with its own call sign -K3BSA.

He says it's a special weekend not just because of the 20th anniversary of J-O-T-A operations for the group, but still being around to offer young people a program that uses amateur radio to teach international brotherhood is special.

"A lot of our contacts have been over in Europe or South America and when we get a station that we can talk to and put the kids on in a far-away place that's really a special thing because the kids get a really good charge out of that," Blank says.

He credits the longevity of the group to Philadelphia Scout officials who have been supportive of its efforts over the years and a dedicated group of ham operators.

"Well it really is a combination of all the time and effort that the volunteers have put into the building, the enthusiasm that the Scouts get about radio, and communications," Blank says.

"You know being out there in the camp in the nice facility that we turned that building is really just kind of special. We refer to the building now - it used to be called Cook's Cabin - we now call it SPARK Lodge and SPARK, for us, stands for Scouts Practicing Amateur Radio Knowledge."

Blank says SPARK Lodge has a very functionable set-up.

"We have two high-frequency operating positions, and those two operating positions we can use single-sideband and digital modes, Morse Code, and PSK-31 or Phase-Shift-Keying," Blank explains. "And, some of the other operating positions we have VHF, UHF, where we can use a computer to send and receive email through packet radio."

Wires serve as antennas, he says, and wind and ice storms do occasionally play havoc with those.

In addition to JOTA, Blank says SPARK Lodge also offers a year-round program of radio demonstrations at the camp and on special weekends provides a program for Radio merit badge as well as Computers, and Electricity. And, he even says, it's branching out into Railroading.

But Blank says JOTA will always be the premiere event for SPARK Lodge.

"Those that can participate are Scouts of all ages - Girl Scouts, Brownies, Cub Scouts, Boy Scouts, Venturers, Explorers - they can all come up and take part in the activity," Blank says. "It's an international Scouting event. It's the largest event in Scouting each year with nearly 500,000 Scouts participating worldwide."

You can learn more about SPARK Lodge by going to their website: www.k3bsa.org.

For the Amateur Radio Newsline, I'm Mark Abrams, NT3V, in Philadelphia.

--

And less we forget, if you happen to hear this weeks newscast before the 2010 Jamboree on the Air comes to an end, please get on the air and say hello to the scouts taking part, worldwide. (NT3V, ARNewsline(tm))

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9HSY repeater serving Madison Wisconsin.

(5 sec pause here)

**

ENFORCEMENT: KJ6CEY SENTENCED FOR JAMMING POLICE

An amateur radio operator from San Jacinto, California, who had admitted making a series of transmissions threatening the lives of local police officers and fire department personnel has learned her fate. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

On Friday, October 8th twenty-nine year old Irene Levy, KJ6CEY, pleaded guilty to seven charges involving interference to the Hemet California police and the Riverside County Fire Department. A judge in the city of Murrieta sentenced her to three years probation and gave her credit for the time she spent in jail since her arrest last spring. She was also ordered to undergo psychiatric care.

As previously reported here on Amateur Radio Newsline, last May 3rd police closed in on KJ6CEY just seconds after she made a transmission

on a Hemet police frequency using a commercial H-T. Investigators from the Hemet Police Department as well as Cal Fire said that the unauthorized, random transmissions were made from Levy's mobile home in San Jacinto. Her radio transmissions, which included bomb threats, were monitored on frequencies used by the Hemet police and the Riverside County Fire Department and that they went beyond nuisance calls.

At that time, Hemet Police Sargent Mark Richards was quoted by The Press-Enterprise newspaper in Riverside as saying Levy disguised her voice as a man and made references to the deaths of police and firefighters and made bomb threats. He said some of the transmissions came during a Cal Fire search and rescue call, a major traffic accident, and a brush fire.

Richards report stated the transmissions began May 1stand ended in the early morning hours of May 3rd. He said in the report that direction-finding equipment helped locate Levy, who in one of her transmissions on May 2 suggested "police would never find her." Richards report said that during the raid on her trailer, police seized 11 radios, seven scanners, radio frequency lists, computer equipment and other miscellaneous radio gear. He says in the report they also seized Levy's Technician class amateur radio license, showing it had been issued in September 2009.

On her now removed QRZ.com bio page, Irene Levy had claimed to have a General Mobile Radio Service license, but the call sign attached to it is actually registered to her husband, Michael Levy KE6ALV. She had also claimed to have monitored the Keller Peak repeater as well as the Hemet repeaters. Levy also said in that now gone QRZ bio she was active on Citizens Band radio prior to getting married and described herself as a CB'er at heart.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

But Irene Levy's problems may be far from over. At this point the FCC has not yet entered into the matter. If it does and decides to cite KJ6CEY, she could face a fine, a license suspension or even a hearing to determine if she should be permitted to continue as an FCC amateur radio licensee. (Inland Empire News, Press-Enterprise, ARNewsline(tm))

**

ENFORCEMENT: FLORIDA SHERIFF TAKES UNLICENSED BROADCASTER OFF THE AIR

Listeners of two South Florida radio stations got a surprise when their Christian and classical music stations were was interrupted with what authorities called rap music and profane language. On Thursday, October 7th, authorities found out why.

According to investigators, an unlicensed broadcaster had set up shop on a frequency between to twl licensed stations. The Broward County Sheriff's Office says the illegal signal came from a Lauderdale Lakes home where an aspiring rapper had attached a laptop, audio mixer and computer. This gear in turn ded a transmitter and antenna.

The station called itself Trap Radio was allegedly operated by Mikhaul Rhodd. Rhodd has been charged under Florida state law with unauthorized transmission or interference with public or commercial radio. At airtime, it's not known if the FCC has become involved in this case.

More is on-line at
http://www.azcentral.com/news/articles/2010/10/08/20101008pi
rate-radio-station.html#ixzz11q1BTPWK) (AZcentral.com)

**

ENFORCEMENT: NEW ZEALAND LOW POWER FM BROADCASTER FINED FOR INTERFERING WITH AIR TRAFFIC COMMUNICATIONS A Christchurch, New Zealand man who ran a hobby radio station has been fined $4000 and had his equipment confiscated after boosting his transmitter power to a level that interfered with an air traffic control frequency. According to news reports from down-under, Jeffrey Knowles owned low power non-commercial radio station Sounds FM which has now been shut down. When it was on the air, it legally broadcast music during the day and streamed BBC programs at night to the Shirley, Papanui and Parklands suburbs of Cristchurch. And in the past it had earned Knowles a community service award. Now, the 48 year old Knowles has admitted in Christchurch District Court he interfered with the air traffic control radio frequency. This, by broadcasting with excessive power using equipment that had a fault with its overall frequency stability. Knowles also admitted to a charge under the New ealand Radio Communications Act of transmitting outside the terms of his license. As a result, his broadcasts caused the closure of an air traffic frequency for 24 hours l,ast February by interfering with transmissions between aircraft and the control tower. Under New Zealand law, Knowles station is permitted to run as a low power FM hobby station. But in making its case, government prosecutors argued he increased the power to reach up to 45,000 listeners. The New Zealand Radio Broadcasters' Association reported to the court that they were losing advertising revenue because of Knowles station taking potential listeners away from commercial stations. Defense counsel Clayton Williams said Knowles accepted the equipment was faulty and did not oppose it being forfeited. He did however dispute the concerns about the amount of power used. In rendering his decision, Judge Gary MacAskill said Knowles had been warned that his broadcasting gear was faulty but had done nothing about it. He then imposed a fine of $4000 as well as court costs of $130 and a solicitor's fee of $250. Its unknown if Knowles will appeal. Also while a version of this story circulating on the Internet blogs identified Knowles as being a ham radio operator, a check of licenses shows that this is not the case. NTIA AWARDS $20 MILLION TO UPGRADE EMERGENCY RADIO AND TELEVISION

The National Telecommunications and Information Administration has issued approximately $20.45 million worth of Public Telecommunications Facilities Program grants so far this year. A total of 126 projects have been funded. Of those, 72 grants worth $9.9 million are to replace equipment at public radio and television stations while 30 grants for some $4.6 million will extend new public radio serviced.

Sixteen digital conversion grants were awarded for television, representing just over $4 million. Three digital conversion grants totaling a little over $202,000 were awarded for radio.

With the radio grants, stations in Arcata and San Diego will be able to purchase digital production equipment. Also, a station in Baton Rouge, Louisiana will be able establish an HD Radio multicast service. All together, the new radio service grants will extend service to a potential 500,000 people and provide additional service to almost 1.2 million other listeners.

Thirty-eight projects totaling more than $2.8 million will replace urgently needed equipment at public radio stations. One of these is a $20,407 grant to Cumberland Communities Communications Corporation. It was awarded on an emergency basis to replace an antenna that suffered catastrophic failure as a result of a lighting strike. (NTIA Release via RW)

RADIO TECHNOLOGY: NEW BLUETOOTH BASED TELE-MEDICAL SYSTEM ANNOUNCED

A telemedicine communications system based on a modified version of the Bluetooth wireless protocol can transfer patient data almost four times as fast as conventional Bluetooth. This, without intermittent connectivity problems according to a paper in the forthcoming issue of the International Journal of Medical Engineering and Informatics.

A team lead by two researchers at the PSG College of Technology in India, have devised a dedicated embedded system that uses the short-range Bluetooth wireless networking protocol to connect patient data to the network and then on to the healthcare provider. This avoids the problem of trying to ensure that a viable connection between

monitoring devices and the internet or cellular phone network is maintained constantly.

The team has already demonstrated a specific application of this technology. This one involved the transfer of patient medical images C-T scans to the healthcare provider's personal digital assistant device as an example of how Bluetooth might work for telemedicine. The team says that tests with these images of approximately 1.5 megabytes can be transferred using their modified Bluetooth system in just 120 seconds, as opposed to the 400 seconds for standard Bluetooth connections. (Science Daily, Science OnLine, others)

HAM RADIO TECHNOLOGY: NEW WB4MAK SDR RECEIVER IN ATLANTA GEORGIA

Mack Mc Cormick, WB4MAK, of Atlanta, Georgia, has made available a web-based 80, 40 and 20 meter SDR based receiver. We gave it a try from the Newsline office. Its tuning is very responsive and the first station we came across on 20 meters turned out to be a guest operator at the ARRL Headquarters station W1AW in Newington Connecticut. Take a listen:

-SDR audio. Please download the MP3 version of this newscast at www.arnewsline.org to hear it. -

We also heard W1AW contacting W6RO on board the Queen Mary ocean liner that's docked in Long Beach, California, but due to band conditions, we only heard the W1AW side of the contact.

-SDR Audio. Please download the MP3 version of this newscast at www.arnewsline.org to hear it. -

The WB4MAK SDR receiver can be a handy tool to check out radio propagation to mthe South-Eastern United States by anyone with a hifg speed Internet connection. You will find it on line at http://wb4mak.com. (Southgate)

PRESERVING THE PAST: ELECTRONIC ARCHIVING: YOUR ARCHIVE MIGHT BE FADING - PART II

Last week, Fred Vobbe, W8HDU, reported on a report detailing problems being faced by audio preservationists in keeping alive mans history in sound. This, as digital files corrupt or simply fade away mainly due to the instability of optical storage media. In other words CD's and DVD's that many thought would last hundreds of years are starting to loose data in a decade or less. Now Fred is back to detail the steps that the Library of Congress and other archivists are taking to insure that audios past will not be lost:

-

Audio only. Please download the MP3 version of this newscast at www.arnewsline.org to hear it.

-

If you find this topic of interest, much more on it can be found on-line at www.loc.gov. (W8HDU)

CHALLENGER LEARNING CENTER INAUGURATES HAM STATION In ham radio space related news word that an amateur radio satellite ground station has been opened at the Challenger Learning Center in Oregon, Ohio. According to AMSAT North America the station will stimulate students' interest in math and science and will allow the youth oriented to contacts with the the Astronauts and Cosmonauts on-board the International Space Station. The Challenger Learning Center will provide lesson plans and activities on amateur radio to go along with the new ground station. It will also use the system during camps and workshops to demonstrate ham radio contacts to space. The Challenger Center in Oregon, Ohio is part of a series of space and science education centers around the world. The Challenger Center organization is an international, not-for-profit education group that was founded by the families of the astronauts lost during the last flight of the Challenger Space Shuttle in 1986. The station came at the Ohio location came on line on Monday October 4th. More is on line at tinyurl.com/29ljn7o (AMSAT-NA)
**
HAM RADIO IN SPACE: ARISSAT-1 ENROUTE TO RUSSIA An update on the ARISSat-1 project. Word from Project Manager, Gould Smith, WA4SXM, that the former Suit-Sat 2 flight package was shipped from Orlando, Florida to the Johnson Space Center in Houston and has arrived. From there it goes to Russia where will have the Kursk experiment added to the space frame. It will then be made ready for transport to the International Space Station next January. Deployment into space should take place during a space walk slated for February of 2011. (ARISS)
**
DX

In DX, keep an ear open for Look for W5JON, operating as V47JA, from the Calypso Bay, on St. Kitts, from October 20th to November 10th. His hillside location will overlook the Caribbean Sea and Atlantic Ocean.

He plans to be active on 160 through 10 including 60 meters. QSL to W5JON at his Callbook address.

The planned DXpedition to Jarvis Island has postponed. The Team has announced that due to the time required to establish the rules for amateur radio operation in the refuge, the last selection date, and the lead time required to schedule and prepare the MV Braveheart, the expedition has been postponed one year until 2011 November. Leaders say that November remains the best month to visit Jarvis Island from a propagation standpoint, with the largest combination of openings predicted to Europe on both 160 and 80 as well as on the 12 and 10 meter bands.

ON5JV and ON6AK will be active portable EA8 from Tijoco Bajo, on Tenerife Island between November 26th of this year and February 23rd of 2011. Operations will be on 40 through 10 meters during their evenings using CW and SSB. QSL via their home callsigns, either direct or via the bureau.

PA0RRS is active as 9M2MRS from Penang Island and will be there through April of 2011. Operations so far has been mainly on 20 and 17 meters CW. QSL to Richard Smeets, PA0RRS at his Netherlands Callbook address.

VE7RSV, will be operational from Broughton Island during the W/VE Islands Contest on October 23rd and 24th. His activity will be on all bands using SSB only. QSL direct to VE7RSV at his address on QRZ.com.

Time is running out to work VU3BPZ as AT10BP. He is the communications manager of the 29th Indian Expedition at the Antarctic Maitri Base station. He and his team have less than 2 months remaining on the island. Operations by AT10BP are SSB only and he is usually on the air around 1700 U-T-C somewhere between 14.276 to 14.280 MHz. QSL direct only via I1HYW.

(Above from various DX news sources.)

THAT FINAL ITEM: W7ASU BACK ON THE AIR FROM ASU

And finally this week, Arizona State University radio club station W7ASU is back on the air after a long hiatus. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details.

--

W7ASU dates back to the 1930s, and actually is one of Arizona State University's oldest student clubs. According to Nicholas Radtke, KC7MOD, the current president of W7ASU, there was a station on campus, with some breaks, until about 15 years ago. The clubOs station was in the old Technology Building with two towers and multiple antennas on top of the building. That building is now Psychology North.

Unfortunately, a series of events contributed to the clubOs going into limbo. First, through misunderstandings, the towers and antenna were removed and destroyed during two separate re-roofing projects. Second, most of the club members graduated and the advisers retired, leaving no one to lead the group through change. And finally, because of tight space on campus, the clubOs room was given to an academic department.

Radtke, who is a doctoral candidate in computer science explained that around 1997, a new group of students revived the club, and sponsored one major event per semester. They would put an antenna on the third-floor balcony of the Student Services Building, with the station out in front. They also tried doing a few events at club members' houses, using their personal ham radio stations. Attendance at these events was abysmal, with a common complaint being that members couldn't get to events off campus.

In February 2007, the Student Media offered the club space in Matthews Center, and the hams obtained permission to put up a temporary antenna for several events. But the club still needed a permanent antenna to operate, and that was not to be at Matthews Center.

In June of 2008, University space planners suggested that the club think about using several rooms in the Community Services Building, where they would be able to put up an antenna. Soon after, the family of Richard S. Juvet Jr., WB7CDK, who had been the clubOs faculty adviser in the 1970s and 80s, donated a tower and antenna and other equipment from his estate.

Now, with its shack set up and a tower in place right beside the Community Services Building, W7ASU is as they say (tm) ready to roll.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, not to far away in Scottsdale, Arizona.

--

The club still hopes to keep its room in Matthews Center to set up equipment to remotely control the station in the Community Services Building. The full story of the rebirth of the Arizona State University radio club station W7ASU is on-line at tinyurl.com/w7asu (ASU Newsletter)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline'sT only official website located at www (dot) arnewsline (dot) org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, in Picyune, Mississippi, saying 73 and we thank you for listening.

Try it.

I have had to cut and splice a few times before I would buy Yaesu's 40 dollar part that is really only a dime.

They do that for a reason,,,, it is called greed. Or maximizing shareholder's wealth, or maximizing ROI, or whatever but a few simple cut and splices will save you a lot of money.

GB2RS NEWS

Sunday 17th October 2010

The news headlines

Neil Carr, G0JHC awarded the RSGB's ROTAB Trophy for 2010

New NVIS paper using data from the 5MHz Experiment

New slow Morse transmission near Dartford

Neil Carr, G0JHC, has been awarded the prestigious Royal Order of Transatlantic Brass Pounders trophy that recognises outstanding and consistent DX work. He joins a small group of our elite DX operators. The trophy was first awarded in 1924 and original Members of the Order were from those who operated transatlantic tests in 1921 to 1924. RSGB President Dave Wilson, M0OBW and HF Awards Manager, John Dunnington, G3LZQ will visit Neil shortly to present the award.

Dr Marcus Walden, G0IJZ, recently gave a paper at the 9th Nordic HF Conference held in Sweden, presenting a comparison of measurements and VOACAP predictions for the UK 5MHz beacon network. The paper was well received by professional engineers, academics and HF users attending the conference. For further information and a link to the paper, check out the RSGB website at www.rsgb.org/spectrumforum/hf/5mhzintro.php.

Steve Smith G0TDJ is now undertaking GB2CW Slow Morse broadcasts from Crayford in north east Kent, near Dartford. The transmissions are one hour long from 1830UTC on Thursday evenings on 145.250MHz. At the beginning of each session, licensed radio amateurs are invited to call in and go on a list to be asked to read back practice passages. Speeds start at under 5 words per minute and increase over the hour long session.

Crystal Palace Radio and Electronics Club is holding a Foundation course during November 2010. Information and application forms can be obtained from the course leader Victor, G1PKS, on 020 8653 2946 or by e-mail to victor@jmail.co.uk.

The Midland Amateur Radio Society in Birmingham will be starting a Morse for Beginners class on 27 October at 7pm at the Club QTH. Practice will also be available on Echolink and full details will be given out at the first class. Anyone wishing to take part should contact Martin by e-mail to GX1MAR@live.co.uk. The course will only run if there are five or more taking part. More information can be found on the club website,

www.radioclubs.net/mars.

The next Advanced revision course run by the Chelmsford Amateur Radio Society starts on Thursday, 28 October. This short revision course is aimed at those who have already studied at home or elsewhere. It will be held on Thursday evenings between 7 and 9pm at Danbury Village Hall from 28 October to 18 November. The exam will be held on Monday 22 November. For more details speak to Clive, G1EUC on 01245 224577 or e-mail training2010@g0mwt.org.uk.

Northumbria Amateur Radio Club will be commencing an Advanced course on Monday 8 November in Ellington near Ashington. The cost for the course is ?15 plus the exam fee. Anyone interested should contact David on 01670 513026 or e-mail nld.radio@hotmail.co.uk.

And now for the details of rallies and events for the coming week.

Today, 17 October, Galashiels and District ARS holds its annual Radio and Computer Rally in The Volunteer Hall, St John's Street, Galashiels TD1 3JX. Doors open 11am and admission is ?2.50. There will be traders, Bring and Buy and refreshments. Details from Jim, GM7LUN on 01896 850245.

Also today, Sunday 17 October, the Blackwood and District ARS Rally is being held at Coleg Gwent, Risca Road, Cross Keys NP11 7ZA. Doors open at 10.40am and admission is ?2. There will be trade stands, a Bring & Buy, special interest groups and catering. Details from Dave, GW4HBK, on 01495 228 516.

The Hornsea Amateur Radio Club Rally takes place today, 17 October, in Floral Hall, 7 The Esplanade, Hornsea, East Yorks HU18 1NQ. Doors open at 10.30am. There will be trade stands, a Bring & Buy, special interest groups and an RSGB bookstall.

The G QRP Club Mini Convention, in conjunction with the Halifax Radio Society, takes place on Saturday 23 October at Rishworth School, Ripponden. Doors open at 10am and admission is ?2. There will be a Bring & Buy, surplus and junk, components, kit traders and much more. A full programme of lectures in the purpose built lecture theatre will also take place.

Now for the news of special events

GB5BUS will be on the air from Bangor University's Ffriddoedd site Common Room, Bangor on 16 and 17 October as part of JOTA between 10am and 6pm each day. There will be talk in on 145.550MHz, S22, during these hours.

In October 1910 the Airship America, with Marconi Wireless Telegraph Co operator Jack Irwin on board, set out on an attempt to cross the Atlantic. It was forced to ditch near Bermuda but Jack Irwin managed to send a CQD distress call. This resulted in the rescue of all on board, along with the vital radio equipment. It was the first advertised

airborne wireless operation and the first air-sea rescue involving wireless. To commemorate this historic event the Chelmsford Amateur Radio Society will be operating GB100MWT from Sandford Mill in Chelmsford today, Sunday, 17 October.

Radio amateurs from the Cray Valley, Darenth Valley and Clifton amateur radio clubs in South East London will be operating a special event station located at the Royal Artillery Museum, Woolwich during the school half term holidays. Dates are from Saturday 23 October through to Sunday 31st. The callsign will be GB2RA. Operation will be mainly on the 40m and 2m bands during the Museum opening hours, 10am to 5pm. The venue has a cafe and free car parking is available in Carriage Street, adjacent to the Museum. More info can be obtained from Lawrie, G4FAA on 0789 98 55 166.

Llanelli Amateur Radio Society will be running a 24 hour special event station with the callsign GB1HTW from midday on Saturday 23 October until midday on Sunday 24 October. GB1HTW will be active on most of the bands from 80 to 2m, either on SSB, BPSK31 or CW. The event is being run to support the Golden Grove Mansion Appeal. Full details of this special event can be found on www.QRZ.com.

And now the HF DX news compiled from 425 DX News and other sources

A team of operators will be QRV from Bilene in Mozambique, QRA KG64or, for Jamboree on the Air with the callsign C91MS, Mozambique Scouts. Operators are Tony G4LDL/C91DL, David GI4FUM/C91DJ, Daniel ZS6JR/C91JR, Gillian GI8MIV/C91MV and Glenys G8KWD/C91KW.

Andy, W9NJY will be active as PJ4/W9NJY from Bonaire, which is IOTA reference SA-006, until 29 October. He will operate all modes on 40 through to 10 metres. QSL via WD9DZV. The log will be uploaded to LoTW on 1 January 2011.

N3QQ will operate from Ujelang Atoll, which is OC-278, until 19 October, subject to transportation availability and weather. He will operate SSB and CW with 600 watts, full size vertical dipoles for 20, 15 and 10m and a quarter wave vertical for 40m. QSL via N7RO, direct or via the bureau.

Craig, VK4LDX will be active as VK4LDX/P from Fitzroy Island, which is IOTA reference OC-172, until 22 October. He will operate holiday style on 40, 20 and 15 metres SSB, PSK31 and RTTY. QSL via his home callsign, direct or via the bureau.

Now the contest news

On 19 October the UHF UK Activity Contest takes place between 1900 to 2130UTC. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

.

And now the solar factual data for the period from the 4th to the 10th of October, compiled by Neil Clarke, G0CAS on the 11th of October.

On the 6th and the 7th the solar disc was spotless. The remaining days had only small sunspot groups which were visible. Apart from a small C class solar flare on the 4th solar activity was at very low levels. Solar flux levels remained around the mid 70's every day and the average was 75 units. The 90 day solar flux average on the 10th was 81 units. That's the same level as last week. X-ray flux levels averaged A6.1 units and varied little day to day. Geomagnetic activity was quiet every day. The most disturbed day was the 6th with an Ap index of 8 units. The average was Ap 4 units. Solar wind data measured at the ACE spacecraft saw solar wind speeds vary between a slow 280 kilometres per second to a moderate 390 kilometres per second. Particle densities were low for the entire period. Bz never varied more than minus 7 and plus 6 nanoTeslas during the period.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be looking our way. Solar activity could be up to low levels on some days this week with the occasional C class solar flares occurring on some days. Solar flux levels should be in the high 80's or even possibly the low 90's. Generally geomagnetic activity should be at quiet levels, however, a slight disturbance could take place around midweek with limited effects. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 0800 and 1100 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 18 October Bromsgrove & District Amateur Radio Club has a committee meeting. Contact Chris, M0BQE on 01905 776 869.

On Monday 18 October Gloucester Amateur Radio & Electronics Society is operating on VHF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 18 October South Birmingham Radio Society has a pre-AGM report and committee meeting. Contact Don, on 0121 458 1603.

On Monday 18 October Welland Valley Amateur Radio Society invites members to bring their equipment & test gear. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Monday 18 October Wythall Radio Club continues its Advanced course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 19 October Loughborough & District Amateur Radio Club has an open forum on operating from home. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 19 October Wythall Radio Club is holding its AGM. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 20 October Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 20 October Midland Amateur Radio Society is holding its AGM. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 20 October Telford & District Amateur Radio Society is having a talk on the meaning and measurement of SWR and return loss by G3UKV? Contact Mike, G3JKX, on 01952 299 677.

On Thursday 21 October Cheltenham Amateur Radio Association has the G3JFH Memorial Talk by Tim, G4VXE. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 21 October Salop Amateur Radio Society is holding its AGM. Details on the club website at www.salop-ars.org.uk.

On Thursday 21 October Solihull Amateur Radio Society is holding its AGM. Contact P T Gaskin, G8AYY, on 0121 628 7383.

On Friday 22 October Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777363.

On Friday 22 October Nunsfield House Amateur Radio Group has a shack night and committee meeting. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Saturday 23 October Lincoln Short-Wave Club is putting G5FZ on the air and doing jobs around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Sunday 17 October Chester & District Amateur Radio Society Radio is conducting operations at Chester Motor Boat Club, Sandy Lane, Chester. Details from Barbara Green on 07957 870770.

On Sunday 17 October Hornsea Amateur Radio Club is running the Hornsea Rally at Floral Hall. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Sunday 17 October Otley Amateur Radio Society is taking part in the second 50MHz Contest. Contact Paul, 2E0PAK, on 07768 996370.

On Monday 18 October Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 18 October Macclesfield & District Radio Society has a social night. Details from Roger Bell, M0GMG, on 0771 258 9163.

On Monday 18 October Scarborough Amateur Radio Society is having a talk on the secret life of amateur radio. Contact Jerry Scarr, G6LBL, on 01751 476601.

On Monday 18 October Sheffield Amateur Radio Club is having a social evening, presentation of club awards and trophies. Details from Peter Day, G3PHO, by e-mail to sarc@g3pho.org.uk.

On Tuesday 19 October Chester & District Amateur Radio Society is having a talk at Burley Hall on amateur data transmission by Mark Buxton of Mold & DARC. Details from Barbara Green on 07957 870770.

On Tuesday 19 October Halifax & District Amateur Radio Society is having members' talks on memorable points in their radio activities. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 20 October Paisley YMCA Amateur Radio Club is having a training evening. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Wednesday 20 October West of Scotland Amateur Radio Society has construction projects & licence training by The Solder Group. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 21 October Aberdeen Amateur Radio Society is helping beginners with CW. More information from Lewis, GM4AJR, on 01224 575

663.

On Friday 22 October West of Scotland Amateur Radio Society has presentations, guest speakers, a raffle and quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

GB2RS news readings take place in all the VHF bands, but for some reason this does not apply to the 4-metre band in the Home Counties. Larry, G4OXY and Paul, G1GSN have now volunteered to put out GB2RS on 70.425MHz FM at 10.00 each Sunday in parallel with their existing 2m reading from Biggleswade. This will commence today (Sunday 17th October) at 10am. Listeners are encouraged to call in after the reading with reception reports, as the 4m service will only continue if a demand is clearly demonstrated.

On Sunday 17 October Chelmsford Amateur Radio Society is operating from Sandford Mill Museum, commemorating the centenary of the airship America. Contact Martyn, G1EFL, on 01245 469 008.

On Sunday 17 October Norfolk Amateur Radio Club is taking part in Jamboree on the Air weekend. Details from Chris Danby, G0DWV, on 01603 898678.

On Monday 18 October Basingstoke Amateur Radio Club is having a talk on Tetra by Norman, G8PLL. Details from Clive, G4ODM, on 01256 326050.

On Monday 18 October Braintree & District Amateur Radio Society is having a club history night. For more information contact John, M5AJB, on 01787 460 947.

On Monday 18 October Burnham Beeches Radio Club has a construction evening. Contact Dave, G4XDU, on 01628 625 720.

On Monday 18 October East Kent Radio Society is having a talk on designing and developing a website by Karl Davies. Details from Karl Davies, M1DFM, on 01227 710120.

On Monday 18 October Surrey Radio Contact Club is holding an extraordinary general meeting to elect an Honorary Secretary. More information from Ray, G4FFY, on 01732 357474.

On Tuesday 19 October Andover Radio Amateurs Club is having a workshop and talk on QRP: the extra challenge. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 19 October Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 19 October Bromley & District Amateur Radio Society is holding a quiz. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 19 October Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 19 October Verulam Amateur Radio Club has a lecture on software defined radio by Lee, G3SEW. Details from Ralph, on 01923 265572.

On Wednesday 20 October Chesham & District Amateur Radio Society is having a technical talk on SSTV and data modes by Terry, G0VFW. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 20 October Norfolk Amateur Radio Club is holding a table top sale. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 20 October Worthing & District Amateur Radio Club is holding a surplus equipment sale with Andre, M0RAV. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 21 October Colchester Radio Amateurs has a general meeting. More information from Kevan, 2E0WMG, on 07766 543784.

On Thursday 21 October Cray Valley Radio Society has a quiz night presented by Richard, G8ITB. Details form Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 21 October Horsham Amateur Radio Club is having a social evening at The White Horse, Maplehurs. Details are on the web at www.harc.org.uk.

On Thursday 21 October Shefford & District Amateur Radio Society is having an introduction to antenna modelling by Stewart, G3RXQ. Details from David, G8UOD, on 01234 742 757.

On Thursday 21 October Sutton & Cheam Radio Society is having a talk on coping with weak signals on HF by Stan Rudcenko, G0KBL. More information from John, G0BWV, on 020 8644 9945.

On Friday 22 October Mid-Sussex Amateur Radio Society is holding a surplus equipment sale. Contact Peter, G4AKG, on 01444 239371.

On Saturday 23 October Hastings Electronics and Radio Club has its autumn auction of used & surplus equipment. Details from Gordon, on 01424 431 909.

On Sunday 24 October Loughton & Epping Forest Amateur Radio is having a fish & chips night. Contact Marc Litchman, G0TOC, on 020 8502 1645.

NEWS FOR THE SOUTH WEST

On Monday 18 October Appledore & District Amateur Radio Club is going back to basics, looking at PSU components and operation with G3YGJ and G4CHD. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Tuesday 19 October West Devon Radio Club is having a military night at the VMARS open evening, where you can find out about the attraction of military radio. All are welcome. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 20 October Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 20 October Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 21 October South Bristol Amateur Radio Club is planning contests and events for 2011, led by Fred, G7LPP. Contact Len, G4RZY, on 01275 834 282.

On Thursday 21 October Swindon & District Amateur Radio Club is having a talk. Contact Den, M0ACM, on 07810 317750.

On Friday 22 October North Bristol Amateur Radio Club is having a talk on Bangkok and New Zealand by Dick, G0XAY. Details from Dick on 01454 218362.

NEWS FOR WALES

On Monday 18 October Dragon Amateur Radio Club is having an auction of surplus items, led by GW3VVC. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Tuesday 19 October Wrexham Amateur Radio Society is having a show & tell evening. Details on the web at www.wrexham-ars.co.uk.

On Friday 22 October Newport Amateur Radio Society is holding its AGM. Details from Ross Clare, GW3NWS, on 01633 880146.

SARL NEWS - SUNDAY 17 OCTOBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

SILENT KEY

It is with regret that we have to announce that the key of Ivan Lister, ZS6AUT, became silent on 9 October in the age of 79 years. Our sincere condolences to his daughter Cathy, grand children, great grand children other relatives and friends.

(PAUSE)

In the news today:

THE PRESIDENT'S NET TONIGHT COVERS THE DRAFT RADIO FREQUENCY SPECTRUM REGULATIONS

RADIO AMATEURS PROVIDE COMMUNICATION SUPPORT DURING THE CHILEAN MINE DISASTER

SARL MEMBERSHIP

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

THE PRESIDENT'S NET COVERS THE DRAFT RADIO FREQUENCY SPECTRUM REGULATIONS

The draft Radio Frequency Spectrum regulations will be discussed tonight at 19:30 on the President's Net. The SARL Council discussed the draft regulations meticulously and has identified some areas of concern that will be discussed during the Net.

The draft response by the SARL to ICASA will be available this morning at www.sarl.org.za. The final response will be concluded by 31 October

and submitted to ICASA.

The Net will be transmitted on 2 m from repeaters in Cape Town, the Port Elizabeth repeater network, Durban and Pretoria. There will also be a relay on the Lowveld repeater network. On HF it will be broadcast on 3 718 kHz. It will also be streamed on the Internet and on Echolink by ZS6FCS. For more information visit www.sarl.org.za and click on 'ARMI'.

RADIO AMATEURS PROVIDE COMMUNICATION SUPPORT DURING THE CHILEAN MINE DISASTER

The heroic rescue of the 33 miners who were trapped in the San Jos&#65533; Mine, from more than 700 m deep, captured the imagination of the entire world. The miners, who were trapped underground for 69 days (5 km from the mine entrance), were all in remarkably good health when they were brought to the surface in a specially designed capsule, the Fenix. This is the longest time ever that miners that have been trapped, were rescued alive.

According to the Radio Cub de Chile (RCCH), that country's IARU Member-Society, radio amateurs of the Radio Club Copiap&#65533;, CE1CPI, provided communication support between the authorities and emergency equipment operators inside the San Jose Mine complex, as well as with family of the trapped miners and authorities in Copiap&#65533;. The mine is approximately 43 km from the Chilean town Copiap&#65533; in the Atakama desert.

"There are no other means of communication at the scene," said Radio Club Copiap&#65533; President Jose Maldonado Lazo, CE1RXY, during the rescue mission. "The group is working in the area of the mine with three telephones, while radio amateurs in Copiap&#65533; are covering the needs of SENCO (a construction company), SAMU (ambulances and EMT), and the Interior Administration, the fire and police departments. We do this with pleasure."

Some of the 80 members of the Radio Club Copiap&#65533; installed amateur equipment in the mine complex. Volunteers from the club took shifts from the moment the mine collapsed on 5 August to provide communication support. This, together with additional mobile police stations, hospitals and fire battalions, kept everyone abreast of all the needs and urgent requirements. The specialised drills were provided by the South African firm Murray and Roberts.

SARL MEMBERSHIP

The current membership of the SARL is 1 348 which is still 112 short of our target of 1 460. If you have not yet paid your membership do it now. Contact Mariska on Monday at 011 675 2493.

CORRECTION

In last week's English bulletin it was mentioned, in the item referring to the President's Net and the changes to the radio regulations, that ZR licensees would be allowed 29 dBW of output power. This should have read 20 dBW. We apologise for any misunderstanding that this might have caused.

CLUB NEWS

The Rustenburg Amateur Radio Club has been dormant for quite a while, but slowly they are restoring life back into the club. They would like to get information of all amateurs living in their area. Please log onto their website at www.zs6rtb.co.za and let them know where you are. They look forward to hearing from you, or you can join them by simply sending them your e-mail address via SMS to 072 828 1709.

CONTEST NEWS

The SARL QRP contest will take place on 23 October. Further particulars are available at www.sarl.org.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The new Sunspot 1 113 emerged over the sun's north-eastern limb during the week and immediately announced itself with a towering eruption. This region joins existing Sunspot 1 112 on the visible face of the sun. The effective sunspot number is expected to be less than 20 for the coming week.

20 m will provide the best opportunities for DX followed by 15 and 10 m. Conditions to India will be good from the afternoon till after sunset. During the afternoon conditions will be good towards Europe, firstly on 10 m and followed later by good 15 and then 20 m openings. Early evening 15 m contacts with the USA are at last promising again. Contacts with Australia and New Zeeland are possible at sunrise on 20 m and on 40 m after sunset.

15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is ideal for contacts around the country with 20 and 30 m also being very functional for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

17 October - President's Net at 19:30 on draft radio regulations. 23 October - SARL QRP contest.

We end today's bulletin on a happy note:

The President, the Council and members of the SARL congratulates Bert Howes, ZS6HS, with his 95th birthday today the 17th October 2010.

Bert is no doubt one of the oldest and most active radio amateurs in the world. He was first licensed in 1935 as ZS1AL in Cape Town.

Bert has had unbroken membership of the SARL for 75 years and in 2008 was awarded the President's Award by the SARL.

During his 75 years as a radio amateur, Bert has been most active in the 5 m, 6 m, VHF, UHF and Moonbounce and has been an inspiration, especially to those who are active in the higher frequencies.

As ZS1AL he was the first to pick up the BBC TV sound on 41,5 MHz in 1937 in the Union of South Africa and the longest TV distance at the time as confirmed by the BBC. In earlier days he also pioneered 5 metre transmissions from Table Mountain, and was the first to work a 6 metre DX station when he hooked up with MD5KW in 1947.

Colonel Bert Howes served in the North African campaign in WW2, 1939 to 1945, as the right hand communications man to General Dan Pienaar and only retired as a professional soldier in 1980.

Bert and his XYL Jenny will celebrate their 57th wedding anniversary in December 2010, and still live in their own home.

Bert, our best. wishes to you and Jenny.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

In closing: The editors of SARL news have been struggling for quite a while to obtain an acceptable Afrikaans translation for the word "podcast". If you have any suggestions, please send them to Jannie, ZR6PHD, with email address janniedb@mweb.co.za or any of the bulletins editors.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN. The bulletin editor was Jannie, ZR6PHD.

Thank you for listening, 73.

/EX

****
>From The Business Manager ZL2TDM
NZART ARX. (Amateur Radio Examiner)
Council has appointed a new NZART ARX as my deputy. Warren Harris ZL2AJ from Hastings has officially accepted the position. He replaces Fred Johnson ZL2AMJ.
Warren is also responsible for updating all NZART examination-training material including all that is listed on the NZART web page. If you have any suggestions or queries regarding any technical issue, please contact Warren.
Speaking of ARX and all things SMART related. As from 1 October 2010 it is now mandatory should you wish to apply for a new call sign, special event call or secondary call to include a passport photo for inclusion on your new certificate.

Subscription Reminder Notices
I have produced all subscription reminder letters for those who have yet to pay and wish to take advantage of the $15 rebate before the end of November this year.
If you have paid on or after the 15th October, you will receive a reminder notice, please disregard it.
For those experiencing problems in paying the full rate before this date, perhaps an easy monthly payment plan of $8 could be a better option.
While does mean you will not be entitled to the rebate, it may just give you the opportunity to continue membership with NZART.
Lastly...a very special thank you to all those people who took the time to

ring or write to me over my recent absence. As always, I am truly humbled by the support I receive as your Association's business manager.
Sometimes when you are in a sole charge position, you forget that what you do has far reaching results and while it is only human to only hear about the negatives, there are a considerable number more who remain positive and wish you well. Thank you seems such an insignificant word, but it comes from the heart.

Talk soon...Debby ZL2TDM

FMTAG NOTES FOR OCTOBER(2) 2010
PROPOSALS
ZL2BDI has applied for a 70 centimetre ATV Beacon at Lower Hutt, Topo50 map reference BQ32 575.50 361.93. An engineering evaluation confirms that there will be no interference to other stations and that the Vision Carrier frequency will be 431.250 MHz, in accordance with the NZART bandplan.

FINAL RECOMMENDATIONS TO NZART COUNCIL
None this time.

COMMENTS AND APPLICATIONS
Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz?subject=FMTAG_INFOLINE

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available at: http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to:
fmtag@nzart.org.nz?subject=FMTAG_INFOLINE
END

Chilean Mine Rescue
Public Service: Amateur Radio Operators Provide Communications Support During Chilean Mine Rescue.
As the last of the 33 miners who were trapped 2300 feet deep inside the San Jos Mine -- located about 27 miles from the Chilean town of Copiap in the Atacama Desert -- rose to the surface at 0055 UTC on October 14, the world cheered in unison. The miners, who were underground for 69 days -- the longest time ever for miners to be trapped and survive -- all emerged relatively healthy. Amateurs with the Radio Club Copiap, CE1CPI, provided communication support between the authorities and emergency equipment operators inside the San Jose Mine complex, as well as with family of the trapped miners in the complex and authorities in Copiap.

>From ARRL Weekly Letter 14-OCT-2010 with thanks

The Judge Does it With Frequency
Following the arrest and comprehensive prosecution of a plane spotter in South Africa's Gauteng, local aviation enthusiasts have been warned that they will need to write an exam and qualify as a radio amateur to legally

possess popular air band receivers.
Until now nobody has been prosecuted for this offence. Port Elizabeth Amateur Radio Society chairman Ashley Goosen has warned local aviation enthusiasts that they need to be licensed to possess an air band receiver legally.
Plane spotter Julian Swift was arrested earlier this year under the South African Telecommunication Act for the illegal possession of an air band receiver and for listening in on several radio frequencies.
They are not just determined to throw the book at the spotter, they are still writing a telephone directory and War and Peace to throw at him, just last week the state amended the charge sheet to include every frequency on his receiver!
(WIA)
With Thanks From WIA Weekly Newsletter 17-OCT-2010

A Reminder For Conference Awards
Amateur of The Year AoTY
Award to be made to the radio amateur who in the preceding 12 month calendar year (January to December) has given outstanding service to Amateur Radio.
Details are found at:
http://www.nzart.org.nz/html/2010/amateur-of-the-year-with-rules.html

Arthur (Jumbo) Godfrey
The purpose of this award is to remember one of New Zealand's most well known radio amateurs, who fully supported NZART Inc and branch level activities, in the belief that strong branches meant a strong national organisation.
Details are found at:
http://www.nzart.org.nz/html/2010/arthur-jumbo-godfrey-with-rules.html

Young Amateur of The Year (YAoTY)
To Recognise The Young Amateur of the Year. Last award given out in 2005.
Details are found at:

After using a cheap (chinese) speaker mike on both my ic-t7a , they
both stay silent.. I can see the signal come in but cant hear
anything, its not a tone squelch isue, its totaly hardware..

Any one have the service manual or at least a schematics ogf the radio
so I can fix both..

thanks for your time

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 17th October 2010

IRTS AGM

Limerick Radio Club will host the Rally, Dinner and AGM in early April. Further details soon.

CQIR Contest.

The Committee at their recent meeting confirmed that as part of the 2012 80th Celebrations of the founding of IRTS, a second CQIR International HF Contest will be held over the St.Patricks Day weekend. This will be somewhat similar to the successful 1st CQIR Contest held as part of the 75th Anniversary celebrations. Hopefully with the rising sun spot numbers, HF conditions will be much better for the event.

IRTS Region 8 Rep

Steve Wright EI5DD has taken over as Region Rep for Region 8 from Ronan Coyne EI8HJ who has re located to the midlands. Our thanks to Ronan for all his good work over the years. Region 8 consists of Galway Mayo Leitrim and Sligo. The Committee is preparing a revised job specification for the Regional Representatives which it is hoped to launch at the AGM in Limerick in April.

WAI Revival

There was further activity on the WAI frequency 3.680MHz last Sunday after the Nuacht as Gaeilge. Declan EI9HQ was activating squares in County Down with the callsign MI/EI9HQ/m. Paddy EI7GK in Wicklow was net controller.

Stations taking part were Bernie EI6AX in Co. Cork, EI9GBB, Eddie EI3FFB in Co. Tipperary, EI0Z/p Operated by Charlie EI8JB, on a summit in Co. Cavan, George GI4SRQ in Co. Armagh, Mike EI2EO in Co. Galway, Ray GI8TAX in Co. Armagh, and Tom EI9CJ and Peter EI4HX both in Co. Louth.

All stations exchanged reports, WAI squares, Counties and book numbers as well as Summit on the Air numbers in the case of EI0Z/p.

IOTA Contest

The provisional results for this year's IOTA contest have now been published. These show the Bristol Contest Group, which operated from the island of Jersey, with the highest score - they had almost 3,300 QSOs and just under 600 multipliers, giving a total score of 13 million.

Twenty-six stations operating from Ireland and its offshore islands submitted logs. The top-scoring EI/GI station was Paul EI5DI, followed closely by EJ3Z - the Shannon Basin Radio Club - which operated from Inisbofin. Other offshore stations came in with excellent scores, including Bernard EJ4II on the Saltees and the Dalkey Island Contest Group EJ1DD who were back for a second year on Clare Island.

Other stations with scores in excess of half-a-million points were Mark EI6JK, Max EI6KC and the Northern Ireland DXers Group MI0M.

The results of the EI and GI stations are shown on the IRTS web site, which also includes a link to the full IOTA provisional results page.

Science Week 2010

Science Week is being held from the 7 to 14th Nov. Clubs are encouraged to take advantage of the publicity generated by Science Week to promote their activities, perhaps by putting on a special event station or partnering with some other local Science Week project.

More details on the Website www.scienceweek.ie

AREN Training Event

AREN announces its first ever weekend training and social event. Taking place over the weekend of the 13th and 14th of November on the shores of Lough Derg. This central picturesque location has been popular with other Voluntary Emergency Services for training and social activities.

Saturday's activities will include practical training and a taste of GlobalSET. It will wind down with a tour of the local RNLI station followed by dinner before moving on to the Whisky Still bar for 'craic agus ceoil' with local trad' musicians.

Attendees can arrive on Friday night or Saturday morning ,An afternoon finish on Sunday will ensure you are home early that evening. Our host Declan EI2GE has kindly arranged generous rates for accommodation and meals. Full details will be circulated to members in due course.

AREN also hold a net on the 7th and 21st of the month at 1930 local on 3660 plus or minus. This is a training net for AREN members. However anyone interested in finding out more about AREN activities is more

than welcome to call in once the net is established.

Irish Amateur Television Club.

iatc.ie is the new website which will be fully operational shortly. At present there are links to the old IATC site and repeater information from the Kells repeater site, which has links to all parts of EI on most modes.

A full detailed account of all that is happening on the TV and repeater front will follow soon.

For further information email Ronnie at ei9ed /at/ kells.ie or Charlie Lyons at ei2em /at/ eircom.net

---

Limerick Radio Club News

Limerick Radio Club has been issued with EI0A as a club contest & special events call. The history of this call goes back to the early sixties when it was originally issued to the club. QSL via EI4GXB

Brendan McNamara EI9GHB has been elected club rep to the IRTS. The Club would like to wish Brendan the best of luck in his new role.

The club have also been invited back to Bunratty for Halloween on 23/24 October and will again be activating CASHOTA and WAI

Rallies

Saturday 23rd October 2010

Carrickfergus Amateur Radio Group, Annual Rally 2010

Downshire School, Downshire Road, Carrickfergus BT38 7DA , Doors open at 12:00

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1844 Greenwich Mean Time (GMT) established as a Time Standard.

1910 First air-sea rescue using radio saves the crew of the airship America.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXNL 1698 - Oct 20, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

Four New DXCC Entities:

Curacao, Sint Maarten, Saba & St. Eustatius and Bonaire officially form
NEW DXCC entities. Starting from Oct 10, 2010, the islands Curacao and
Sint Maarten were added to the list of "Dependencies and Areas of Special
Sovereignty" of the US State Department. As per the DXCC rules Sint Maarten
and Curacao officially became new DXCC entities by that (so-called political
entities). Furthermore Bonaire becomes an own entity, while St. Eustatius
and Saba form one single DXCC entity.
The two Netherlands Antilles DXCC entities PJ2/4/9 and PJ5-8 were deleted
and moved to the Deleted Entities List on Oct 10. Confirmations for these
new entities will be accepted for credit starting January 1, 2011.
The weblink to the US State Department is:
http://www.state.gov/s/inr/rls/10543.htm

A2 - BOTSWANA
Scasciafratti,A25ZY (I0ZY), Lor,A25DF (IK1MDF), Frosty,A25CF (K5LBU),
Giannarelli,A25MB (IZ5MMB), Irish,A25BI (K5ZOL), Julian,A25ASL (W5SL),
and Lehman,A25AN (KD5TAN), will be on the air from Oct 20 until Nov 4.
They will work on 6m-160m with three stations simultaneously, each
equipped with an amplifier. Antennas used will be a TET HB433DX beam,
a Tennadyne T8 LogPeriodic, a Butternut HF6V and a 23m high vertical.
They plan to take part in the WWDX Contest as A25HQ (QSL via K5LBU).
Each participant will take care of his own QSLs, direct or via bureau.
More information is available on: http://www.qsl.net/a25-2010

C5 - GAMBIA
Filip,ON4TA (ex-6O0F), will be QRV as C56FR from Kerr Sering between
Oct 21 and Nov 11. This is a private visit and not a DXpedition!
Anyhow you can expect some activity in SSB on 20m/17m and maybe also
on 6m, 2m or 70cm. Filip will use simple wire antennas and 100 watts.
Please QSLs via bureau to ON4TA.

CT3 - MADEIRA, AF-014
Matthias,CT9/DJ8OG, will be active from Madeira (AF-014) on 160m-10m from Oct 26 until Nov 2. He will use a K3 transceiver with amplifier on beams and verticals. He plans to join the WWDX Contest signing CR3L as single OP allband high power.
QSLs for CR3L via DJ6QT, CT9/DJ8OG via homecall.

CY0 - SABLE ISLAND, NA-063
The well planned and also postponed DXpedition to Sable Island (NA-063) is expected to take place from Oct 21-29.
Unfortunately, Murray,WA4DAN, and Ron,AA4VK, have had to withdraw from the DXpedition, due to business conflicts but Gary,VE1RGB, has joined the Sable Island DXpedition team, who has previously operated from Sable Island. The callsigns will be: N0TG/CY0, AI5P/CY0 and VE1RGB/CY0. They will run three stations at the same time in CW/SSB/RTTY on 160-6m. Antennas used will be a "Battle Creek Special" for 40m/80m/160m, three verticals, wires and a yagi. They plan to be active during the WWDX SSB Contest providing the CY0 country multiplier while the other operators work in CW or on the WARC bands (SSB/CW).
All direct QSL cards should be sent to N0TG, bureau QSLs to their homecalls but the preferred QSL route is via the "Online QSL Request Service" (OQRS) on their website: http://www.CY0dxpedition.com

FP - ST PIERRE ET MIQUELON, NA-032
Eric,FP/KV1J, will be QRV again from Miquelon (NA-032, DIFO FP-002, WLOTA 1417) between Oct 25 and Nov 2. Eric is working on 160m-6m, on 70cm (via AO-51 satellite) in CW, SSB, RTTY and PSK31. He will also join the WWDX SSB Contest as single OP/high power.
QSL direct or via bureau to his homecall.
Logs will be uploaded to the LoTW as well and eQSLs can be obtained one week after DXpedition end. See: http://www.kv1j.com/fp/october10.html

HB0 - LIECHTENSTEIN
The Rhein Ruhr DX Association members DF7EF, DG3EX, DJ2YE, DL6EAQ, DL6KAC, DL8DAW, DL8EAQ, DO2RE, HB9DOD and HB9LCW will be active from Triesenberg between Oct 27 and Nov 4.
They will sign HB0/HB9AON (multi/multi) in the CQ WWDX SSB Contest.
Their QSL manager is DJ2YE.

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Mike,JA6EGL (KK6WW/KH0), Take,JA6JXN (AC2BO/KH0), Yu,JE6DND (KH0R), Nori,JA6GLD (WH0AA), and Mune,JR6DRH (KR1V/KH0), will show up from Saipan (OC-086) in CW/SSB on 160m-10m from Oct 21-25.
QSLs direct via their homecalls.

PJ2 - CURACAO, SA-006
Some members of the "Caribbean Contesting Consortium" (CCC) are going to activate the Signal Point station on Curacao (SA-006, WLOTA LH-0942) signing PJ2/homecall before and after the WWDX Contest (until Nov 2).
The team members Geoff,W0CG (PJ2DX), John,K6AM, Gary,K9SG, Bob,N8NR, Wayne,K8LEE, Joe,W9JUV, Helmut,DF7ZS, Sam,DL5RDO, and Bernhard,DL5RDP, will sign PJ2T in the multi/multi category of the WWDX SSB Contest.
QSLs for PJ2T via N9AG or LoTW.

SU - EGYPT
Gab,HA3JB, who was active as SU/HA3JB until recently is now back in Hungary. He will be QRV again from Egypt for ten days by the end of November. Find more information on his homepage: http://www.ha3jb.com

SV5 - DODEKANESE, EU-001
J45PO and J45MW will be the calls of Martin,ON4PO, and Michel,ON4MW, from Rhodos (EU-001) between Oct 26 and Nov 2. They will sign SX5P in the upcoming WWDX SSB Contest.
All QSOs will be confirmed with a QSL card by the end of the year.

T8 - PALAU, OC-009
We have news from Tom,DL2OBO, (see last DXNL) who will be QRV from the "Palau Pacific Resort" on Koror (OC-009) from Oct 24 until Nov 1. Tom received an e-mail stating that thgey have reserved the callsign T88DL for him. Tom and his XYL Julia are on honeymoon and so no activities can be expected during the days - with one exception: the WWDX Contest. Find more information at: http://www.dl2obo.com

V4 - ST KITTS AND NEVIS, NA-104
Jon,W5JON, and his XYL Cathy will spend their holidays once again in Calypso Bay on St. Kitts (NA-104) from Oct 20 until Nov 10. While Cathy prefers the pool, Jon will spend some time for amateur radio. He will sign V47JA on 160m-10m using an Icom IC-7000, KL-400 PA (350 W) and a ZS6BKW allband dipole. He will join the CQ WWDX SSB Contest as SOAB. QSL cards should be sent to W5JON himself.

5R - MADAGASCAR, AF-013
Martti,OH2BH, Pertti,OH2PM, Veijo,OH6KN, Antti,OH7EA, and Juha,OH8NC, are going to the capital Antananarivo (AF-013) from Oct 26 till Nov 10. Their callsign will be 5R8X (also in the WWDX Contest). OH2PM and OH6KN will focus on 80m/160m but the WARC bands won't come short.

6W - SENEGAL
Luc,F5RAV, is going to hit the airwaves from La Somone signing 6V7T from Oct 25 till Nov 1. Luc will use the shack von Jean-Francois,6W7RV, in SSB and PSK31 on 160m-10m. He also plans to join the WWDX Contest. QSLs only direct via his homecall. See also: http://f5rav.free.fr
---
Gerard,F5NVF/6W, announced to show up in CW on HF during the same time. QSLs via his homecall.

8Q - MALEDIVES, AS-013
Jim,G3VDB, wants to become QRV as 8Q7EJ from the Maledives (AS-013) for two weeks starting on Oct 24. If he gets permission to put up antennas in his hotel he prefers working in CW mostly on 20m.
QSL direct or via bureau to his homecall.

9X - RUANDA / 9U - BURUNDI
Sigi,DL7DF, is leader of a DXpedition to Ruanda (9X0SP, Oct 26-Nov 2) and Burundi (9U0A, Nov 2-11). His team includes also Frank,DL7UFR, Wolf,DL4WK, and Rolf,DL7VEE. As usual their pilot station will be Bernd,DF3CB. Activities can be expected in CW, SSB and digital modes

on 160m-10m and they will have a dedicated station only for RTTY, PSK31
and SSTV. Altogether they carry three transceivers (K2), 2x XV600,
1x TY900, 2x 18m lowband verticals, a vertical for 40m, a vertical for
30m, a Spiderbeam for 20m/17m/15m/12m/10m and beverages.
QSLs direct or via bureau to DL7DF.
For more information visit: http://www.dl7df.com/9x_9u

CANADA, SPECIAL EVENT STATION
The Westcumb Amateur Radio Club from Amherst/Nova Scotia has been
granted the callsign VC1J for the special event station celebrating
tge 65th anniversary of the United Nations (UN) and the United Nations
Educational, Scientific and Cultural Organization (UNESCO) on Oct 24.
They will be working from the "Joggins Fossil Cliffs" in the Canadian
province Nova Scotia which became a UNESCO site last year.
The QSL route for the special event QSL card will be announced later.

FRANCE, SPECIAL EVENT STATION
Some members of the Association des Radioamateurs de la Cote d'Emeraude
will be QRV as TM0RDR in SSB/CW/digital modes between Oct 22 and Nov 2.
This call refers to the 9th transatlantic yacht race "Route du Rhum"
from St. Malo (France) to Pointe-a-Pitre on Guadeloupe. QSL via F4FJH.

SILENT KEYS: We are mourning for Antoine Baldeck (F6FNU) and
Robert Thiery (F6CRT) who passed away last week. Robert was active as
5A1FB, FQ8HO, TT8AF and 6W8DI in the 1950s and 1960s.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 23/24: W/VE Islands QSO Party; SSB, CW, digital modes
Oct 30/31: CQ Worldwide DX Contest; SSB

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Teneriffa: Heijo,DJ1OJ, is spending the winter season on
Teneriffa again from mid October until mid April. He will be active
as EA8OM in CW, SSB and digital modes on 6m-80m, especially durin
contests. QSL via homecall (direct/bureau/LoTW).

AS-081, HL5, Kyongsang-bukto/Namdo Group: Ho-jong,DS5ACV, and other members
of the Busan DX Club will be QRV as 6M0V/5 from Suu-Do Island on
Oct 23/24. QSL via DS5ACV (direct/bureau).

NA-091, VE, Broughton Island: Rob,VE7RSV/p, is going to be QRV in SSB on
all bands from Broughton Island (CISA BC026) during the W/VE Islands
Contest. QSLs direct via VE7RSV (see QRZ.com).

NA-151, OX, Greenland's Coastal Islands South East: A German team with
YL Gabi,OX/DF9TM, Heiko,OX/DL1RTL, Frank,OX/DL2SWW, and Ric,OX/DL2VFR,
plan to activate Ammassalik Island in CW, SSB and RTTY from Oct 20-30.
QSLs via homecalls. Their website is: http://www.iota-expedition.com

USI operation: John,KL7JR, and his XYL Claire,WL7MY, will be QRV in SSB on
20-10m signing N7I or KH6/KL7JR from Maui Island from Oct 24-31.
This operation counts for the US Islands Award (USI) and has the
reference number HI-018S.
More info about the USIA can be found at: http://www.usislands.org

Lighthouse activities (WLOTA/ARLHS/ILLW)

EA6/AA5UK LH 0958 Ibiza Oct 16-27
OX/DF9TM LH 2260 Ammassalik Oct 20-30
OX/DL1RTL LH 2260 Ammassalik Oct 20-30
OX/DL2SWW LH 2260 Ammassalik Oct 20-30
OX/DL2VFR LH 2260 Ammassalik Oct 20-30
VK4LDX/p LH 0040 Fitzroy Oct 16-22

Following lighthouses were added to the WLOTA list recently:

LH 2877 I*3 Dell'Amore Island (Faro di Gorino)
LH 2878 UR Berezan Island

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, NJ1Q, W2IJ, NG3K & ADXO, W3HNK, N4AA & QRZ DX, N5UCF, K8YSE, W8GEX (60m News), N0TG, AT International, 4J5T, DK7PE, DL1SBF, DL7MAE & The DX News Letter, DX World.Net, F6AJA & Les Nouvelles DX, G3XAQ, I1JQJ/IK1ADH & 425 DX News, OH2BN, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VK4AN for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th-October, through Sunday, 17th-October there were 237 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7O, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0A, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZL9, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4J6, AZERBAIJAN. Club members of the "Russian Community of Azerbaijan" will activate their callsign, 4J6RO, from Nagorno Karabakh between October 22 -25th. Activity will be on 40 and 20 meters, as well as 30/17/12 meters, using CW and SSB. Their QTH "Russkie Borisi" village,

in the Geranboy district (AzeDA index - GR, QRA Locator • LN30FL).
Operators mentioned are: Boris/4K4K (Team/Club Leader), Alex/4J7WMF,
Serge/4J5A and Igor/4K6OF. QSL via 4K4K. PLEASE NOTE: This is the only
legal callsign permitted by Ministry of Communications of Azerbaijan
for this territory. Any other prefixes, besides 4J and 4K, issued by
other countries for Karabakh have to be strictly considered illegal.

5X, UGANDA. Rudi, DK7PE, will be active as 5X0CW from Kampala for one
week starting October 27th through November 3rd. He plans to use his
K2 radio and jumper beam (40-10m). Activity will be mainly CW. Staying
in downtown Kampala, he expects some local QRM, but he will try some
160 and 80 meters. QSL via his home callsign.

5X, UGANDA. Alan, G3XAQ, will be active as 5X1XA from Kampala between
November 14th and December 1st. Activity will be CW only on the HF bands
using 100 watts and small beam. Alan plans to be in the CQWW DX CW Contest
(November 27-28th) as a Single-Op/Single-Band (possibly 20m) entry. QSL
via G3SWH.

8Q, MALDIVES. Jim, G3VDB, will once again be active as 8Q7EJ starting
October 24th, for two weeks. This time he will be active from Bandos
Island (AS-013). However, operations are subject to hotel permission.
Activity will be an "intermittent holiday" operation during the above
period mostly on 20 meters CW, using an ICOM IC-7000 into ground plane
or other vertical antenna (to be decided). QSL via his home callsign.

9M6, EAST MALAYSIA. Operators Mike/KM9D (ex-V63MY) and Jan/KF4TUG (V63TO)
have been based in Sandakan for the past few months. Mike is currently
active as 9M6/KM9D, and has been on 30/20/17/12 meters CW. THe length
of their stay is unknown. QSL via OM2SA.

9Q5, DEM. REPUBLIC OF CONGO. Christian, CX2CC, is now active as 9Q5OAR
from the City of Goma, near the Rwanda border and is there working for
the United Nations for one year. He hopes to be active on CW (slow),
SSB and the Digital modes. Activity this past week was on 15/12/10
meters SSB. He is using a TS430 transceiver into a Log Periodic or wire
dipole. QSL via his home callsign CX2CC: Christian Cardarello, Avenida
Italia 3319, CP11600 Montevideo, Uruguay, South America. QSLs will not
be answered until his return in December 2011. Please, direct QSL send
a SAE with 2 USDs or a new IRC.

AO8, CANARY ISLANDS (AF-004). Operators Pekka/OH1RY/EA8AH, Juan/EA8CAC,
Manuel/EA8ZS, Salvador/EA5DY, Toivo/ES2RR, Jaakko/OH1MA and possibly
others will be active as AO8A during the CQWW DX SSB Contest (October
30-31st) as a Multi-2 entry. QSL via EA8AH.

BV100, TAIWAN. Members of the Republic of China (Taiwan) Centenary
Foundation will be activating special event station BV100 between now
and December 31st, 2011. Activity is to celebrate the 100th anniversary
of the Republic of China (Taiwan). Operations will be on all bands and
modes. Complete details on a operating schedule and how to earn a BV100
award is available at: http://www.bv100.tw/EN

QSL via BV2KI at: Bruce Yih, P.O.Box 84-609 Taipei, Taiwan 100
ADDED NOTE:Operators BM2AAV, BU2AT, BV2DD, BV2KI, BV2KS, BV2NT and BX9AAA will use BV100 during the CQWW DX SSB Contest (October 30-31st) as a Multi-Multi entry. Also, QSL via BV2KI.

CQ DX MARATHON (Update). John, K9EL, DX Marathon Administrator, reports on October 16th: "As recently announced by CQ Magazine, Competitors in the 2010 CQ DX Marathon will have a unique 'double-dip' opportunity in working the islands of the Netherlands Antilles for Marathon points. Those who worked any of the islands before 10/10/10, get credit for either the Windward or Leeward Islands, as appropriate. Hams who work them again on or after 10/10/10 will get additional credit for the new entities, providing a maximum of six country credits for working the islands in 2010. Version 2010.2 of the DX Marathon scoresheet that incorporates the four new PJ countries is now available on the DX Marathon Web site at: http://www.dxmarathon.com
Instructions to convert version to 2010.1 to the new 2010.2 are available on the Web site. However, participants can also send their existing scoresheet to scores@dxmarathon.com and we will convert it and send it back to you."

CY0, SABLE ISLAND (Update). Randy, N0TG, reports: "We are ready to go; the team will convene in Halifax, Canada, on Tuesday, 19th Oct. Then, Wedneday will be a busy day with final preparations for the charter flight over to Sable on Thursday - 21st October. The goal is to be up and running around 2100 UTC or so on the 21st. The Web page has a few steps listed which will be statused as they are completed. Please check the Web for updates at: http://www.CY0dxpedition.com "

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports: "This information is provided, in advance, to those who use the DXCC assigned country/entity codes for programming software:
Below are what will be the DXCC assigned country codes for the new entities once they are entered into the DXCC system:

517 • Curacao
518 • Sint Maarten
519 • Saba and St. Eustatius
520 - Bonaire

Note, the country codes for what will be the deleted entities will not change, they will just be flagged as deleted entities.
Online, the only place where these codes are posted is in the text version of the DXCC list. Once we officially add the new entities to the DXCC software this list will then be updated to show the official changes to the DXCC list."

E51, SOUTH COOK ISLANDS. Just a reminder that Bill, N7OU, will once again be returning to Rarotonga (OC-013), and will be active as E51NOU between October 18th and November 13th. Activity will be limited to his spare time because of his Global Volunteer work on the island.
http://www.globalvolunteers.org/cook/default.asp

http://www.globalvolunteers.org/1main/cook/volunteer_in_cook_islands.htm
Operations will be on 40-10 meters running 100 watts into a vertical.
QSL via N7OU.

EA8, CANARY ISLANDS. Michael, DL6MHW, will be active as EA8/DL6MHW from the from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the CQWW DX SSB Contest (October 30-31st) as a Single-Op entry. QSL via LoTW.

EA8, CANARY ISLANDS. Mauri, OH2BYS, will once again be active as EA8CMX from Galdar, Isla de Gran Canaria (AF-004, DIE S-005, WLOTA L0969), during the CQWW DX SSB Contest (October 30-31st) and CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (80m) entry. QSL via OH2BYS.

ER, MOLDOVA. Serge, UT5UDX, will once again be active as ER0WW. This time during the CQWW DX SSB Contest (October 30-31st) as Single-Op/All-Band/High-Power entry. QSL via RA4LW.

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, will be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (160 or 80m) entry. QSL K1BV via direct, by the Bureau or LoTW.

FSDXA ANNOUNCES THEIR PLANS FOR 2011 (Press Release #1). Don Field, G3XTT, FSDXA Publicity Officer, sent out the following on October 10th: "The Five Star DXers Association (FSDXA) is pleased to announce its next DXpedition to Kiritimati (also known as Christmas Island, T32) to take place in September/October 2011. FSDXA, closely linked to CDXC (Chiltern DX Club), the UK DX Foundation, is the group which brought you the 1998 9M0C Spratly Islands DXpedition, the record-breaking 2001 D68C DXpedition to the Comoros and, subsequently, the 2004 3B9C Rodrigues and 2007 3B7C St.Brandon DXpeditions. Once again, Yaesu has kindly agreed to be Global Sponsor, and will be providing sixteen FT-5000 transceivers along with a similar number of Quadra VL-1000 linears. UK amateur radio retailers Martyn Lynch & Sons and Nevada are also committed to sponsoring the operation.
It is hoped that the callsign T32C will be allocated. The 'C' in the callsign stands for 'CDXC', the club from which the Five Star DXers Association was formed and is also a reminder of the group's previous successful operations.
As with previous FSDXA expeditions, this will be a major effort, with a target of more than 150,000 QSOs. There will be up to sixteen stations on the air, using amplifiers along with monoband beams and vertical dipole arrays, 24 hours a day, for almost four weeks, including four weekends, around the autumn equinox when DX propagation on all bands is typically at its best.
Our primary objective is to activate Christmas Island T32 with a view to giving as many DXers as possible a first contact with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible. While many experienced DXers have one or two contacts with Christmas Island, our focus, in addition to, making Christmas Island available to less well-equipped DXers, especially in Europe and the US East Coast, both of which are tough paths from the mid-Pacific, will be

to help fill those missing band and mode slots, especially on LF and on RTTY.
Club Log shows Kiritimati as 36th most wanted DXCC entity by European operators and 61st most wanted worldwide. It is even more sought after on the LF bands.
A large number of amateurs from 13 different DXCC entities have already signed up for T32C, some for half the overall period, some for the whole operation. There will be 30 operators on site at any one time. Operator numbers have been determined to ensure that a full complement of stations can be manned whenever bands are open. Many of these operators have been with us before. All bring experience not only of operating (usually multiple modes, often with a contesting background) but in terms of other essential skills. For example, we will have two medical specialists, antenna, RF and software specialists, and a range of other skills which will be essential in mounting a major operation so far from logistical support.
At the time of writing, the team is expected to consist of 40 operators including: Falk/DK7YY, Jens/DL7AKC, Paul/EI5DI, Dave/EI9FBB, Gerard/F2JD, Ian/F5VKT/G3YBY, Michel/FM5CD, Vincent/G0LMX, Tony/G0OPB, Nobby/G0VJG, Don/G3BJ, Neville/G3NUG, Chris/G3SVL, David/G3UNA, Gordon/G3USR, John/G3WGV, Mike/G3WPH, Don/G3XTT, Mark/G4AXX, John/G4DRS, Nick/G4FAL, Mike/G4IUF, Justin/G4TSH, Michael/G7VJR, Clive/GM3POI, Bob/GU4YOX, Kazu/JA1RJU, Jim/KF7E, Bob/MD0CCE, Bill/N2WB, Arnie/N6HC, Bob/N6OX, Ronald/PA3EWP, Pete/SM5GMZ, Maury/W3EF, Paul/WF5T and Jay/WX0B. It is also planned to take a young amateur, to gain valuable DXpedition experience, and sponsorship is already on hand to make this possible.
At this time we are seeking contributions from sponsors to help defray the very significant logistics costs of this DXpedition. For example, there is limited electricity on the island so generators will have to be shipped. Most equipment has to be shipped by container via Tarawa. The team will then fly out to Christmas via Honolulu. All team members will be covering their own travel costs and accommodation on the island, and making a contribution to other (mainly logistics) costs, but there will still be a significant shortfall.
Details of how to donate appear on our website (www.t32c.com) which is now live. PayPal donations may be made directly via the site.....
All donations will be acknowledged.
The logos of all DX clubs etc which have helped to sponsor the DXpedition will be shown on the QSL card, as will the names and callsigns of those who make an individual contribution in advance of the DXpedition (subject, in each case, to a certain minimum amount).
This first Bulletin is intended mainly to alert you to our upcoming DXpedition. More information will be forthcoming in due course, and will be posted on our website (www.t32c.com) as it becomes available."

HB0, LIECHTENSTEIN. Members of the Rhein Ruhr DX Association (RRDXA), from the D&#65533;sseldorf area, will once again be active as HB0/HB9AON, to celebrate their 27th DXpedition to Triesenberg, Liechtenstein, between October 27th and November 4th. Operators mentioned are: Diethelm/DJ2YE,

Uli/DF7EF, Eike/DO2RE, Karl/DL6EAQ, Christian/DL6KAC, Rolf/DL8DAW, Heinz-Willi/DL8EAQ, Wilhelm/DG3EX, Tom/HB9DOD and Silvio/HB9LCW. Their activity will include the CQ WW SSB DX Contest (October 30-31st) as a Multi-Multi entry with 6 stations. Antennas will include dipoles at a height of 25m for the lowbands and monoband beams for 40m and up. QSLs go via DJ2YE, either direct or by the Bureau. Their target is to hit "7000 QSOs" and a score of 10 million points.

HC2/HD2, ECUADOR. Members of the SK6M Contest Team will be active as HD2M from Nobol during the CQWW DX CW Contest (November 27-28th) as a Multi-Multi entry. QSL via SM6FKF. Operators mentioned are Allan/HC2A, Alfredo/HC2SL, Rune/SM5COP, Fredy/SM6FKF, Ben/SM6LJU, Peter/SM6MCW and Mats/SM7BUA. Look for the SM operators to be active as HC2/homecall before the contest. QSL via their home callsigns.

IOTA NEWS.....
AS-018. Look for RC0F to be active from Sakhalin Island during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via RC0F, direct, by the Bureau or LoTW.

AS-081. Look for Ho-jong/DS5ACV and members of the Busan DX Club (6M0V) to activate Suu-do Island, South Korea, as 6M0V/5 between October 23-24th. QSL via 6M0V, by the Bureau or direct.

AS-133. Operators Wim/XU7KOH, Jack/XU7AJV, Wim/XU7ADV and Peter/XU7ACY/NO2R will activate Russei Koh Island, Cambodia, between November 6-9th. Callsign to be used is XU7KOH. Activity will be on the HF bands. QSL via ON7PP.

EU-155. Members of the Modena DX Italia Team will be active as II4PI from Piallazza Island (IIA FE-001, MIA MI-104, WW Loc. JN64ES), near the Gorino lighthouse between October 21-24th. Operators mentioned are Alessandro/IK4ALM, Augusto/IK4RQJ, Luca/IK3AES, Roberto/IK4XCL, Alessandro/IZ4AMS and Sergio/IZ4BBF. Activity will be on 160-10 meters using all modes. QSL via IK4ALM, direct or by the Bureau.

NA-151. German operators Gabi/DF9TM, Frank/DL2SWW, Heiko/DL1RTL and Ric/DL2VFR will be active as OX/homecall from Tasiilaq Island between October 20-30th. Activity will be on 160-10 meters, as far as propagation allows, using CW, SSB and RTTY. The team is very happy/pleased that the German DX Foundation (GDXF), the Nippon DX Association (NDXA) and some individuals, such as JA1BPA, are sponsors of their expedition. For more details visit their Web page at: http://www.na-151.de

SA-099. NEW IOTA GROUP! Roger, G3KMA, announced (edited): "Following today's (October 13th) ARRL announcement of four new DXCC entities in the former Netherlands Antilles, we can now announce IOTA's position. Curacao will, in accordance with IOTA rule E.5.5 (Island DXCC entity group), become a new IOTA group with the reference number SA-099, operative from 0400 UTC, 10 October

2010. Contacts made prior to that time/date will continue to
count for SA-006. Bonaire remains as a valid island within
SA-006, so its IOTA status will not change. There will also
be no IOTA group number change to Sint Maarten NA-105 or Saba
and Sint Eustatius NA-145, islands split from each other long
ago in accordance with IOTA rules.

IR9, ITALY. Members of the ARIPA DX Team will be active as IR9Y from Sicily
during the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry. QSL
via IT9ABY.

KH0, MARIANA ISLANDS. Operators Mike/JA6EGL (KK6WW/KH0), Yu/JE6DND (KH0R),
Take/JA6JXN (AC2BO/KH0), Nori/JA6GLD (WH0AA) and Mune/JR6DRH (KR1V/KH0)
will be active from Saipan Island (OC-086, USI NI002S, WLOTA 1333) between
October 21-25th. Activity will be on 160-10 meters using CW and SSB. QSL
direct to their home callsigns.

KH6BZF PROPAGATION FORECAST/REPORT (For October 11-17th)....
Oct 18 AN SOLAR REFERENCE KEYS
Oct 19 AN --------------------
Oct 20 AN-HN BN - Below Normal
Oct 21 HN AN - Above Normal/Geomagnetic Level is QUIET
Oct 22 HN LN - Low Normal

0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

PACIFIC DXERS TAKE NOTE! Are you planning a DXpedition to the Pacific
in the future? Then you may want to take a look at the the "Pacific
DXers" Web page and become a member. Eddie, VK4AN/3D2A, Pacific DXers
Manager, informs OPDX that the "Pacific DXers" Web page and membership
has started to really grow. The Web page is at: http://pacific-dxers.com
When joining "Pacific DXers", you will receive many benefits. Eddie
mentions, "We already have a well stocked 'Dxpedition Kit' available for
members to use. Consisting of a 5-band Spiderbeam, DX-88 Vertical, Rotator,
10m Mast, coax, wire, SMPSU, and other items...it is currently in Fiji.
It will be made available to members on a 'booking' basis for DXpeditions
in the South Pacific area from 2011 onwards. So far, we have negotiated
a big reduction in price for members at a ham-friendly resort in Fiji
for members staying at least a week... and are continuing negotiations
with other resorts around the Pacific." So, if interested take a look!

PJ ACTIVITY LIST (UPDATED):
PJ2A - Curacao Island; DXCC Code 517; IOTA SA-099; length
of activity unsure; QSL via N5UCF. No online logs.

PJ2T - Curacao Island; DXCC Code 517; IOTA SA-099; October
10th-November 2nd; QSL via N9AG or LoTW. No online
logs.

PJ2/OH1VR - Curacao Island; DXCC Code 517; IOTA SA-099; Now QRT;
QSL via his home callsign. No online logs.

PJ2/W5MPC - Curacao Island; DXCC Code 517; IOTA SA-099; Now QRT;
QSL via his home callsign, direct or by the Bureau.
No online logs.

PJ4B - Bonaire Island; DXCC Code 520; IOTA SA-006; through
October 22nd; QSL via PA8A. As of 10/17/10 (0121z):
Total 8084 QSOs; Unique callsigns 5320.Online log
at: http://www.clublog.org/charts/?c&#65533;4b

PJ4D - Bonaire Island; DXCC Code 520; IOTA SA-006; through
October 22nd; QSL via W3HNK. As of 10/17/10 (1200z):
Total +33,000 QSOs. Online log at:
http://www.bonaire2010.com

PJ4I - Bonaire Island; DXCC Code 520; IOTA SA-006; through
October 22nd; QSL via DL9USA. No online logs.

PJ4N - Bonaire Island; DXCC Code 520; IOTA SA-006; through
October 22nd; QSL via DJ8NK (not W3HNK). No online logs.

PJ4NX - Bonaire Island; DXCC Code 520; IOTA SA-006; resident
on the island; QSL direct to address on QRZ.com or by
the Bureau via PA3CNX. No online logs.

PJ4W - Bonaire Island; DXCC Code 520; IOTA SA-006; through
October 22nd; QSL via W3HNK. No online logs.

PJ4/PG4M - Bonaire Island; DXCC Code 520; IOTA SA-006; Now QRT;
QSL direct to home callsign. No online logs.

PJ4/W9NJY - Bonaire Island; DXCC Code 520; IOTA SA-006; through
October 29th; QSL via W9NJY or LoTW after the January
1st (2011).

PJ5/K1XM - St. Eustatius; DXCC Code 519; IOTA NA-145; now through
October 17th; QSL via KQ1F. No online logs.

PJ5/AH6HY - (not PJ5/AH6DX) St. Eustatius; DXCC Code 519; IOTA
NA-145; Now QRT; QSL via AH6DX, direct or by the
Bureau. No online logs.

PJ5/AA4NC - St. Eustatius; DXCC Code 519; IOTA NA-145; Now QRT;
QSL via AA4NC direct only. Logs will be uploaded to
LoTW. NO BUREAU QSLs. No online logs.

PJ6A - Saba Island; DXCC Code 519; IOTA NA-145; now through
October 22nd; QSL direct only to N4NX, or use the
online OQRS system for direct and Bureau QSLing.

As of 10/16/10 (2224z): Total of 30488 QSOs
Online log at: http://www.saba2010.com

PJ6/K4LMY - Saba Island; DXCC Code 519; IOTA NA-145; Now QRT;
QSL via K4LMY. No online logs.

PJ7E - Sint Maarten; DXCC Code 518; IOTA NA-105; now through
October 20th; QSL via LoTW, OQSL (see Web page) or
direct to: Sint Maarten 2010, Box 333, Bethlehem,
Georgia 30620-9989 USA. As of 10/17/10 (0024z): Total
of 50620 QSOs. Online log at:
http://www.stmaarten2010.com/log.html

PJ7MF - Sint Maarten; DXCC Code 518; IOTA NA-105; resident on
the island; QSL via IZ1MHY, ONLY DIRECT. Online log at:
http://www.iz1mhy.tk

PJ7/AA4NC - Sint Maarten; DXCC Code 518; IOTA NA-105; No QSNs were
reported; Activity was expected to be between October
15-18th; QSL via AA4NC, direct only. Logs will be
uploaded to LoTW. NO BUREAU QSLs. No online logs.

PJ7/AH6HY - Sint Maarten; DXCC Code 518; IOTA NA-105; No QSNs were
reported; Activity was expected to be between October
15-22nd; QSL via AH6DX, direct or by the Bureau. No
online logs.

PJ4, BONAIRE. Peter, PJ4NX, is a resident on Bonaire (SA-006, WLOTA L1279)
and is currently taken in the fun of activating a new DXCC entity. He
has been on 40/20/17/12 meters SSB. QSL via the address on QRZ.com.

PW2, BRAZIL. Operators from Mogi, Sao Paulo, will be active as PW2D
during the CQWW DX SSB Contest (October 30-31st) as a Multi-Single
entry. QSL via PY2VM. Operators mentioned are: Andre/PY2MTV, Fabio/
PY2BK and Tom/PY2ZXU.

LOTW HITS 300 MILLION. The ARRL Letter announced this week that with the submission by Victor Morozov, RD3PQ, on October 5th, the ARRL's "Logbook of The World (LoTW)" hit 300 million QSOs! They also mentioned that January 2011 marks the 10 year anniversary of the ARRL's announcement of the LoTW system.

NEW QSL MANAGER. Jerry, N5UCF, reports: "Effective immediately I will be serving as QSL manager for PJ2A. I will have logs for all PJ2A contacts and will be answering direct and bureau requests. Please send direct requests to my QRZ.com address with SASE or SAE + new IRC or minimum of 1 USD for a direct return. QSL cards are ordered and in queue to be printed so please be patient for a return QSL over the next several months or so. Please pass this to any other QSL route sources you may be aware of not copied on this E-mail."

QSLS VIA LoTW: DL3TD, EA3GHZ, K5K and LU1ICX

QSLS RECEIVED VIA MAIL: 7P8JK, 9X0TL, AT60MY, H40FN, JA7BXS, K4C, S79BWW, V31SJ, V31YY and XT2EME

QSLS RECEIVED VIA THE BUREAU: 8P0P, AO8HQ, C57C, CG3AT, D44TXS, EA7TG, F6GCP, HI3/N3SY, HG0HQ, JD1BIE, KH6/NU1AW, KL7/W1AW, OK1DOL, OP4K, PQ2Q, S40R, S58MU, SE2T, UX1UA, V31WA, V51AS/L, VP9400HW, YL/RZ3BY and ZP6CW

RADIO ARCALA AND THE 2010 CQWW SSB CONTEST (Press Release). Jarmo, OH2BN, sent on the following on October 17th:
"This year Radio Arcala set the target to become internationally focused and extended their ranks to the United States, Japan and Continental Europe, both in their overall expertise and their radio operating resources. Kazu, JK3GAD, has done a superb job of taking many Arcala messages to his homeland. Now it is time to set sail to the United States and introduce another U.S. sound from the Radio Arcala station network.

OH8X from Northern Finland will be activated by Marko, OH4JFN, in SOAB, hoping for improved propagation from the Far North.

OH0B from Aland Islands will be operated by Toni, OH2UA, current EU CQWW SSB and CW record holder, also in SOAB. They will run against each other to gain a Northern European victory and an initial set of qualification points for WRTC 2014.

CR2X from the Azores with Jeff, N5TJ, at the helm will add a new element to the European racing scene. He comes with a formidable WRTC background and with current CQWW World Records for SSB and CW under his belt. As this is the first time Jeff enters the European scene in CQWW, the outcome promises to be interesting, to say the least.

5R8X from Madagascar will see the majority of Arcalians - OH2BH, OH2PM, OH6KN, OH7EA and OH8NC - traveling to this island nation in the Indian Ocean not only to provide a dual-multiplier but to do a variety of things at once. In CQWW they will be multi-op, single-TX while also making sure, with their awesome lineup of LF antennas, to provide a 5R8 on the low bands for those in need. Their low-band activity will last for two weeks, including CQWW, plus the following weekend, with two stations expected to be on at prime hours.

QSL to OH8X via OH2UA, others via OH2BH."

S7, SEYCHELLES. Davide, IW0HLG, will be active as S79AD from Mahe Island (AF-024) between October 26th and November 4th. Activity will be holiday style on the on HF bands and 6 meters using SSB and the Digital modes. QSL via his home callsign, direct or by the Bureau.

T31, CENTRAL KIRBATI ISLANDS. An international team is planning to activate Kanton Island (OC-043) for 9 days starting April 2011. An additional day may be added depending on the sailing time to the island. Transportation has been arranged, all licenses are assigned and the permit is in its final stages. Callsign will be T31A. They plan to have 6 stations operational with 12 operators and activity on 160-10 meters using CW, SSB and RTTY.
A Web page is under construction at: http://T31A.com
More details are forthcoming. Watch the Web page for future updates.
ADDED NOTE: There are a few available spots/berths on the boat. For those interested in joining the team, please contact Jay, W2IJ, for more details at: kanton@T31A.com

T8, PALAU. Tom, DL2OBO, continues his long travels on his honeymoon, and is now expected to be active as T88DL from "Palau Pacific Resort" between October 23rd and November 1st. QSL via his home callsign. Visit his Web page at: http://www.dl2obo.de/pages/japanpalau/japanpalau.html

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the CQWW DX SSB Contest (October 30-31st) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.

TO3, MARTINIQUE. Andreas, DL3GA, is now active as TO3GA from Ducos on the Island of Martinique (IOTA NA-107, DIFO FM-001, WLOTA 1041, DDFM 97) until October 20th. Activity has been on 80-15 meters using CW, SSB and RTTY. QSL via his home callsign.

V7, MARSHALL ISLANDS (IOTA Op Postponed!). The V73RRC QSL Manager Richard, N7RO, reports that the expedition to Ujelang Atoll (OC-278) by Yuri, N3QQ, has been postponed. It is possible a new effort will be made at the end of November/beginning December. For updates and more info, see:
http://oc-278.ucoz.com
VP2M, MONTSERRAT. Operators Larry/K3VX (VP2MVX), Will/K9FO (VP2MFO), Don/K9NR (VP2MNR), Carl/K9CS (VP2MSC) and Bill/K9OWQ (VP2MWP) will be active from here between November 22nd and December 6th. Activity will include entries in the CQWW DX CW Contest (November 27-28th) and ARRL 160 Contests (December 3-5th) as a Multi-2 class signing VP2M. Activity outside the contests will be on 160-10 meters, mostly CW but some SSB,

RTTY and PSK. QSL all callsigns via K9CS.

VP5, TURKS & CAICOS ISLANDS (Caribbean Tour). Cory, N1WON, now active as KP2/N1WON from the U.S. Virgin Island (NA-106) until October 19th, will be active as VP5/N1WON from the Turks and Caicos Islands (NA-002) between October 21st and November 3rd. He will be there to be part of the VP5DX team for the CQWW DX SSB Contest (October 30-31st). QSL VP5DX via NU4Y. The VP5DX contest logs will be uploaded to the LoTW. Also, QSL VP5/N1WON and KP2/N1WON via his home callsign. Cory's logs will also be uploaded to LoTW at a later date. He states, "I have plenty of nice QSL cards that I would like to send to the folks I've worked."

VK9N, NORFOLK ISLAND (Update/Change). After their operation from ZK2A (see ZK2 listed below), operators Andrea/IK1PMR, YL Claudia/PA3LEO, Al/LA9SN, Doug/N6TQS and possibly others will be active from here between December 5-19th. Plans of activity should/probably be the same as their operation from ZK2A. QSL via PA3LEO.

XX9, MACAO. Georg, DK7LX, is now active as XX9TLX until October 26th. His main focus on this trip will be 30/17/12 meters as well as CW, and possibly RTTY toward the end of his activity. Most of this activity so far has been on 30 and 12 meters. He mentions that 80 meters is very unlikely due to environmental issues. QSL via his home callsign.

ZK2, NIUE (Update/Change). Look for 5 operators to be active as ZK2A between November 20th and December 3rd. Operators mentioned are: Andrea/ IK1PMR, YL Claudia/PA3LEO, Al/LA9SN, Doug/N6TQS, Alan/K6SRZ, and possibly Tom/SP5UAF. Activity will be focused on Europe, 160-40 meters, 30/17/12 meters, CW and RTTY using four Elecraft with solid state amps with RX antennas. This is a lightweight DXpedition. They will try to limit their extra baggage expenses. To achieve this (and for efficiency and reliability too) they will mainly use wire antennas. QSL via PA3LEO. A Web site is now available at: http://www.pacificdxpedition.com/index.php?s=tro
ADDED NOTE: Operators of this operation will go on to operate from Norfolk Island; see VK9N listed above.

** MMMonVHF VHF-DATABASE Issue 3.10 - 10/2010 **

Dear VHF-DATABASE-friends, a year is over again and we will be
able to spread around a new issue of the VHF-DATABASE (3.10 -
10/2010) to private USER (fee, see our Forum) as well to all
interested DX-Cluster Sysops (DX-Cluster-Types: CLX, SPIDER,
AK1A and / or DXNet) from up the end of october 2010!
All necessary details you be able to find at the Make More Miles
FORUM www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=3
As well please visit the Visual VHF DATABASE and check your
area - if you find faults please do report to us! The Visual
VHF DATABASE can be found here: http://www.mmmonvhf.de/vdb.php

** FIDJI 2010 - SHORT REVIEW from W7GJ **

Hello! Sorry I have been so slow providing a summary of the trip
As soon as I returned home, I have been extremely busy working
on the re-election campaign of my XYL. I still have not totally
unpacked from the Fiji trip yet! So, I still have not had a chance
to write up a detailed trip report. In the meantime, there are
the daily updates along with a few photos on my website:
http://www.bigskyspaces.com/w7gj/Fiji2010.htm
I have mailed out all the QSL's to everyone who has sent me a card
and an envelope so far. The results were 52 QSO's with different
stations and 17 additional stations copied. Thanks to everyone
who made the effort to get on the air and watch for me. My
moonrises were definitely the best times, and I saw my own echoes
then...in fact, sometimes that is all I saw on my moonrise.
I don't know if people simply were not calling me then, or whether
I was totally locked out because of slow Faraday rotation. I do
know that the Kp index was mostly quite low during the DXpedition

and that does often make for very good cndx, but also very slow change in polarity. There were extended periods where I copied stations very well, or failed to copy them, so I could definitely see that the polarity was not changing very fast. I will update the website with more information as I get more time. I certainly enjoyed the chance to work so many 6m stations and am looking forward to the next outing to a rare DXCC ;-) GL and VY 73,
SOURCE: tnx to Lance, W7GJ, via Magic Band EME

** F/TEP on 50 MHz **

GE - just a further note to say that the F/TEP continues for South EU - and for me I still RX AF TV - 5Z was in last night late on pure TEP III mode for about an hour - but nil on 50. I hope more will look - we have very few indicators to the south - but at long last we can see the very few TV TX's that are on there - so lets use them and report our observations. hopefully Hams will come on & try the band on not be alarmists or tourist

** H40, TEMOTU PROVINCE qrv HF and 6m **

German operators Peter/DG1FK and Sigi/DK9FN will once again
return to Temotu Province and be active as H40FK and H40FN,
respectively, this time from Nendo Island (OC-100) between
December 21st and January 3rd (2011). Activity will be on CW,
PSK and RTTY. Operations will probably be on 160-6 meters
depending on the band conditions. QSL H40FN via HA8FW, and H40FK
via DG1FK. More details should be forthcoming.

** A25HQ - Special call for CQWW-SSB 2010 **

Operators Frosty K5LBU (A25CF), Bob K5ZOL (A25BI), Matt KD5TAN
(A25AN), Gianfranco I0ZY (A25ZY), Lor IK1MDF (A25DF), Pier IZ5MMB
(A25MB) and Jay W5SL (A25ASL) will be active from the Stevensford
Game Reserve, Sherwood Village, Botswana (WW Loc. KG47AC) between
21 October and 3 November 2010. QRV on 160-6 metres, all modes,
with 3 stations running at the same time. They will also partici-
pate in the CQWW DX SSB Contest (30-31 October) using the callsign
A25HQ. The team will also use the call A25HQ for 6 metre EME
activity. QSL via the operators home call, direct or bureau.

AUSTRALIA FOR WEEK COMMENCING OCTOBER 24 2010

WIA Centenary Award - update

So far 269 claims for this limited time operating award have been received
and verified with certificates now issued.

The 200th award went to Monica Crockett VK3FMON of Axedale. It is good to
see the enthusiasm of Foundation Licensees with some 30 having already
qualified for and claimed the award.

The VK2AWA Contest Group is the very latest radio club on the award list.

Some 15 DX stations from Finland, India, Hawaii, Japan, New Zealand, Russia and the USA are also recipients of the award.

For details about the WIA Centenary Award visit WIA website www.wia.org.au

ACMA NEWS

Reappointed as the Chair of the ACMA is Chris Chapman and a new Deputy Chair has been appointed, Mr Richard Bean.

MAPPING UP

Sydney-based developers of Google Maps have been recognised for their contribution to the industry.

Lars and Jens Rasmussen who are Brothers were named NSW's Entrepreneurs of the Year in the information and communications technology field.

The annual Pearcey Foundation award was announced at NSW Parliament on Tuesday, with their achievement being hailed as a coup for Australia, positioning it as a global leader in online services.

Google Maps is now used by around one-third of all Google visitors.

The Pearcey Foundation was established in 1998 to raise the profile of the Australian ICT industry and profession.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

>From time to time people raise their concerns over their perceptions of what the radio club or WIA has or has not done. This is a fair point of discussion amongst amateurs and all organisations try to foster active involvement in growing.

If we see that our metering is indicating a problem with our antenna, do we act to solve the problem or ignore it and just complain and complain and complain?

Some of these well meaning amateurs seem to take the latter path and never join their local affiliated club or pay the subscription and become an Institute member. Without doing something positive to get the message across, they are just baying at the moon.

>From our clubs, input can go to the state Advisory Committee or direct to the Institute. As a member, we get Amateur Radio magazine delivered and anyone can listen to WIA News.

If you believe what you say, please get it into the system to benefit all VK amateurs.

I'm Geoff Emery and that's what I think......how about you?

CLUBBING -

BRARC

Saturday the 2nd of september BRARC members VK4HPW, VK4FGGS, VK4HDE & his trainee junior, VK4HL, VK4VS and me VK2PT initiated our first training day for members and interested hobbiests with the installation of the new Stanthorpe 2 meter repeater approxiemately 10KM West of Stanthorpe.

With rain threatening from the East, we broke into two teams, one to install the masting and antennas, the second to tune the antennas and install the repeater equipment.

This is BRARCs first dual antenna repeater and lifting the masting along with antennas and hard line coax was quite a struggle, with only 40 feet of masting put up. When the weather is better, we plan to lift the final 10 feet. That might not sound like much but in the mountains here, 10 feet can make a huge difference.

With weather setting in later in the afternoon, we postponed the day til next day, were a small group got together finalised the cabling and turned on the repeater, linking into the BRARC repeater network on its UHF backbone.

Coverage was found to be excellant, with covering into Stanthorpe town better than expected. Being with two antennas and no cavity filters, we did experience some desensing but the was better than expected.

It was time to turn to the Amateurs Bible, not the new one, as it was not in there what we were looking for, but the old ARRL handbook and there it was, the why and how to build a cavity filter. The club recently donated several defunct 72Mhz cavity filters, VK4HDE, VK4VS and VK4HL have taken on the task cut this down for 147Mhz operation and turn out a high Q notch filter. This task is still progressing.

So when next down in the Southern Queensland and Northern NSW, drop by and say gedday. Our repeater network is on IRLP node 6683, EchoLink 414994, and you can hear us on 2 meters in Warwick on 147.275, in Stanthorpe on 147.125 and in Tenterfield on 147.375, thats +600 with no CTCSS tone applying.

New members are most welcome and those joining receive a BRARC Club Cap straight away. You can find us also on the web at BRARC.ORG.AU

For those interested, our next club meeting is on the 13th of November at 1PM qld time in the RSL club in Stanthorpe. Thats the 13th of November at 1pm at the RSL club in Stanthorpe.

We look forward to hearing from you. I'm Paul, VK2PT, the President of the Border Rangers Amateur Radio Club.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

The monthly TREC meeting was well attended and some interesting items were presented by club members at the "Show & Tell" Gary VK4FD, known locally as "SNOOPY", showed us his latest toys, a really impressive height acquisition device, the "Big Shot" line launcher for getting those field antennas really high up into trees. We are still looking for the golf ball used to demonstrate the device Hi Hi! Gary also showed his new Powerwerx 30amp switching power supply, a tiny but impressive piece of gear and fitted with Anderson 45 amp Powerpole connectors.

Planning for the upcoming Spring VHF/UHF field day contest on 20/21 November is progressing well and TREC members are looking forward to a fun day working on the higher bands.

TREC is looking for a medium size rotator to fit onto our mobile tower trailer. If you can help out please contact TREC at vk4wat@wia.org.au

This has been Dale VK4DMC and you are listening to QNEWS.

Channel 14 UHF CB call "CQ MERG"

The team from the Maryborough Electronics and Radio Group, Inc, MERG, enjoyed a great weekend with the people attending the Aldershot Scout Camp for JOTA, last weekend.

Between the visit to the camp on Friday and the return of the amateurs on Saturday morning, the forecast storms managed to keep the scouts sleeping under canvass well engaged until after midnight. As a result some of the troops booked to participate did not arrive. However by about 9.00am groups of Joeys were coming through the radio shack on a rolling roster of activities.

Some of the activities were learning about codes and making invisible ink. This went well with the short presentation by Ray, VK4TPT on amateur radio and the use of Morse code.

The scout leaders included Martin, VK4YOI, who joined the crew in the shack on Saturday evening.

The friendliness of the scouts and the provision of meals to the amateurs made this a weekend to look forward to each year.

The Opening Address of the Chief Scout as well as WIA news were broadcast to the camp over the PA system.

At the closing parade of the JOTA 2010 Aldershot Camp, the Area Commissioner presented Bob VK4FNBL, Ray VK4TPT and Geoff VK4ZPP with certificates of appreciation. The JOTA cloth badges that the operators received are also great souvenirs. Numbers of participants expressed their interest in obtaining the Scout Radio Operator Badge... This requires an amateur radio licence!

For QNEWS, I'm Geoff, VK4ZPP.

TARC WIA Exams Information

Exam sessions in the North Queensland region are held on demand with WIA Assessors and assessment packs available for all 3 levels of licensing.

Contact theTARCinc WIA Exams Regional Co-ordinator Roger VK4CD on mobile 0417 638366 to have a mutually suitable date and WIA Assessors assigned to your assessment.

VK5

Adrian Snell VK5ZSN from A.R.E.G.told us through the week that Saturday 23rd yesterday they had another "High Altitude Balloon Borne Repeater" project on their launch pad to co-incide with the WIA National Field Day.

LAUNCH TIME WAS EXPECTED TO BE 01:30 UTC (23/10/10).

This time the payload comprised a cross band talk through repeater and an APRS beacon. At apogee the radio horizon will be in the order of radius 800km from the balloon position.

Input Freq (you transmit on this) 438.900 MHz with CTCSS 123 Hz

Output Freq (you listen on this) 146.450 MHz with CTCSS 123 Hz.

APRS identification will be VK5ZSN-11.

Progress of the balloon may be tracked via the internet http://spacenear.us/tracker/

The balloon may also be tracked using aprs.fi. or other APRS server or via RF APRS network.

Lots of information about how to decode the telemetry packages on the balloon may be found at http://projecthorus.org/

We have asked for a report on this to bring you next Sunday.

Licence Examinations

A class for aspiring Standard Licence candidates has been scheduled to start in VK7 Friday evening next, 29th October. It will run for 4 weeks and cost is expected to be $50.

If you are interested contact Reg Emmett VK7KK on 0417 391 607 or regemm@Ozemail.com.au

SILENT KEY

It is with sadness that we advise the passing of George Thomas Bruce VK2GT.

George passed away peacefully on Sunday morning (17/10/2010) at Carrington Centennial Care after a short illness.

George was first licensed in 1932 at the age of 17 and held that License until his death at 96 years, just two weeks short of his 70th wedding anniversary. He got his License at the same time as his neighbour and life long friend Ross Weeden, VK2PN (SK) of Tumut.

He was very pleased when son Lloyd got his License in 1981 and his grandson Lachlan (VK2LGB) also got his license making three generations.

He was a member of the Mid South Coast Amateur Radio Club for many years, until poor health made it impossible for him to get to the meetings. George was also very involved with the early years of the WIA transmitting station at Dural and worked for the Department of Civil Aviation for most of his working life. He will be sadly missed by all who new him.

(Submitted by his son Lloyd VK2ELB)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

October 8, and those who are "wintering over" at the Amundsen-Scott South Pole Station were experiencing a typical day for their clime, a day in the-70s (yes, you heard that right -- 70 below 0 degrees Fahrenheit).

But though the day was indeed frigid, six men and two women at Amundsen-Scott didn't feel the cold as they were too excited (and maybe just a touch nervous), knowing they were going to be part of the first Amateur Radio license exam session ever held at the South Pole.

arrl.org/news/the-weather-outside-was-frightful-during-first-antarctic-ve-session

SILENT KEYS

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Two major natural catastrophes - floods in Pakistan and an earthquake in New Zealand - again displayed the extraordinary capability of radio amateurs to provide communications when everything else fails or as an efficient backup to existing services. In the latest IARU Region 3 news letter details on these 2 activities are highlighted.

Also from the IARU the assistance of radio amateurs in assisting with the spectacular rescue of miners in Chile is yet another demonstration of the efficacy of amateur radio in exceptional circumstances.

IARU Region 3 Chairman Michael Owen VK3KI and Secretary Jay Oka JA1TRC attended the Administrative Council meeting of IARU in El Salvador and also the Region 2 Conference held at the same location. The Administrative Council is where representatives of all the three regions of IARU meet and decisions taken to effectively coordinate activities which will help promote amateur radio.

All in this latest communication from the IARU, well worth a read!

www.iaru-r3.org/news/r3nl-10-10.pdf

Amateur Radio bands to be used for London 2012 Games

Ofcom has published an updated spectrum plan for wireless communications at the London 2012 Games.

Frequencies in a number of bands allocated on a Secondary basis to the Amateur Service will be used at Olympic venues, among them are 70cm, 23cm and 13cm bands.

Regarding the 430 MHz band the plan says:

"The 430-440 MHz band is managed by the MOD and is used by Radio Amateurs. Ofcom notes RAYNET's support for the St John's Ambulance, Red Cross and other similar users as well as Amateur Special Event Stations for cultural events linked to the London 2012 Games.

At past Games, Amateur radio bands (especially 430-440 MHz) have been used and this remains a possibility for the London 2012 Games if demand requires it.

With regard to the Amateur-Satellite Service the document says:

We do not think it will be necessary to use the frequency bands allocated to the Amateur-Satellite Service, but will retain the option to consider whether there is a requirement to use them as we develop our venue-specific spectrum plans.

A final version of the plan will be published early in 2012.

http://stakeholders.ofcom.org.uk/binaries/consultations/london2012/statement/london2010Update.pdf

But though the day was indeed frigid, six men and two women at Amundsen-Scott didn't feel the cold as they were too excited (and maybe just a touch nervous), knowing they were going to be part of the first Amateur Radio license exam session ever held at the South Pole.

==========

NEWS FROM ARNEWSLINE

KJ6CEY SENTENCED FOR JAMMING POLICE

An amateur radio operator from San Jacinto, California, who had admitted making a series of transmissions threatening the lives of local police officers and fire department personnel has learned her fate. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

On Friday, October 8th twenty-nine year old Irene Levy, KJ6CEY, pleaded guilty to seven charges involving interference to the Hemet California police and the

Riverside County Fire Department. A judge in the city of Murrieta sentenced her to three years probation and gave her credit for the time she spent in jail since her arrest last spring. She was also ordered to undergo psychiatric care.

As previously reported here on Amateur Radio Newsline, last May 3rd police closed in on KJ6CEY just seconds after she made a final transmission on a Hemet police frequency using a commercial H-T. Investigators from the Hemet Police Department as well as Cal Fire said that the unauthorized, random transmissions were made from Levy's mobile home in San Jacinto. Her radio transmissions, which included bomb threats, were monitored on frequencies used by the Hemet police and the Riverside County Fire Department and that they went beyond nuisance calls.

At that time, Hemet Police Sargent Mark Richards was quoted by The Press-Enterprise newspaper in Riverside as saying Levy disguised her voice as a man and made references to the deaths of police and firefighters and made bomb threats. He said some of the transmissions came during a Cal Fire search and rescue call, a major traffic accident, and a brush fire.

Richards report stated the transmissions began May 1st and ended in the early morning hours of May 3rd. He said in the report that direction-finding equipment helped locate Levy, who in one of her transmissions on May 2 suggested "police would never find her." Richards report said that during the raid on her trailer, police seized 11 radios, seven scanners, radio frequency lists, computer equipment and other miscellaneous radio gear. He says in the report they also seized Levy's Technician class amateur radio license, showing it had been issued in September 2009.

On her now removed QRZ.com bio page, Irene Levy had claimed to have a General Mobile Radio Service license, but the call sign attached to it is actually registered to her husband, Michael Levy KE6ALV. She had also claimed to have monitored the Keller Peak repeater as well as the Hemet repeaters. Levy also said in that now gone QRZ bio she was active on Citizens Band radio prior to getting married and described herself as a CB'er at heart.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

But Irene Levy's problems may be far from over. At this point the FCC has not yet entered into the matter. If it does and decides to cite KJ6CEY, she could face a fine, a license suspension or even a hearing to determine if she should be permitted to continue as an FCC amateur radio licensee.

ZL LOW POWER FM BROADCASTER FINED FOR INTERFERING WITH AT COMMS

A Christchurch, New Zealand man who ran a hobby radio station has been fined $4000 and had his equipment confiscated after boosting his transmitter power to a level that interfered with an air traffic control frequency.

According to news reports from down-under, Jeffrey Knowles owned low power non-commercial radio station Sounds FM which has now been shut down. When it was on the air, it legally broadcast music during the day and streamed BBC programs at night to the Shirley, Papanui and Parklands suburbs of Christchurch. And in the past it had earned Knowles a community service award.

Now, the 48 year old Knowles has admitted in Christchurch District Court he interfered with the air traffic control radio frequency. This, by broadcasting with excessive power using equipment that had a fault with its overall frequency stability.
Knowles also admitted to a charge under the New Zealand Radio Communications Act of transmitting outside the terms of his license. As a result, his broadcasts caused the closure of an air traffic frequency for 24 hours by interfering with transmissions between aircraft and the control tower

Under New Zealand law, Knowles station is permitted to run as a low power FM hobby station. But in making its case, government prosecutors argued he increased the power to reach up to 45,000 listeners. The New Zealand Radio Broadcasters' Association reported to the court that they were losing advertising revenue because of Knowles station taking potential listeners away from commercial stations.

Defence counsel Clayton Williams said Knowles accepted the equipment was faulty and did not oppose it being forfeited. He did however dispute the concerns about the amount of power used.

In rendering his decision, Judge Gary MacAskill said Knowles had been warned that his broadcasting gear was faulty but had done nothing about it. He then imposed a fine of $4000 as well as court costs of $130 and a solicitor's fee of $250. Its unknown if Knowles will appeal.

Also while a version of this story circulating on the Internet blogs identified Knowles as being a ham radio operator, a check of licenses shows that this is not the case.

NEW WB4MAK SDR RECEIVER IN ATLANTA GEORGIA

Mack Mc Cormick, WB4MAK, of Atlanta, Georgia, has made available a web-based 80, 40 and 20 meter SDR based receiver. We gave it a try from the Newsline office. Its tuning is very responsive and the first station we came across on 20 meters turned out to be a guest operator at the ARRL Headquarters station W1AW in Newington Connecticut.

We also heard W1AW contacting W6RO on board the Queen Mary ocean liner that's docked in Long Beach, California, but due to band conditions, we only heard the W1AW side of the contact.

The WB4MAK SDR receiver can be a handy tool to check out radio propagation to the South-Eastern United States by anyone with a high speed Internet connection. You will find it on line at http://wb4mak.com

EXCELLENT JOTA AT SARC

An excellent weekend was enjoyed by those attending last weekend With about
50 scouts / guides / cubs etc moved through the system assisted by about
10 or so leaders.

Many contacts were enjoyed throughout Australia and overseas.

An evening campfire was enjoyed via line with 1st Boulder Scouts.

The team from the Maryborough Electronics and Radio Group, Inc, MERG, enjoyed a
great weekend with the people attending the Aldershot Scout Camp for JOTA,
last weekend.

Some of the activities were learning about codes and making invisible ink. This
went well with the short presentation by Ray, VK4TPT on amateur radio and the
use of Morse code.

The Opening Address of the Chief Scout as well as WIA news were broadcast to the camp over the PA system.

At the closing parade of the JOTA 2010 Aldershot Camp, numbers of participants expressed their interest in obtaining their Scout Radio Operator Badge. This requires an amateur radio licence!

For WIA National News, I'm Geoff, VK4ZPP."

This JOTA there were 1013 separate connects from 335 different stations to the JOTA-365 conference. These were only some of the VK JOTA stations on Echolink, but does give a flavour of who was using the system.

Brigade after new recruits

MURPHYS Creek Fire Brigade in VK4 may face cutbacks to their fleet of three fire trucks if no new recruits are signed soon.

Many will remember the horror of the numerous fires in the area, formerly known as the Gatton Shire, in 2002 where more than 1000 fire-fighters battled blazes

that lasted nearly two weeks.

Now due to changes in legislation, rural fire brigades such as Murphys Creek are being forced to recruit more volunteers or lose assets.

Hopefully they will get a lot of young blokes, who are the lifeblood of the brigade," and they are particularly after support members who can help with radio communications.

To find out more about positions at the Murphys Creek Station contact Secretary Margaret Wood on 07 4630 5191.

>From 1 September 2010, Television New Zealand Ltd has chosen to take on responsibility for dealing with interference affecting reception of their analogue television broadcasts.

The Ministry of Economic Development's Radio Spectrum Management branch will no longer provide an interference location service for those broadcasts, which will cease as a result of the digital switch-over during 2013.

Radio Uganda on 7195 kHz - latest results - reported by 5Z4NU

After approaches by Bill, 5X1JM, the Uganda Communications Commission has informed Radio Uganda they are not permitted to use 7195 kHz.

However, the station has continued to use it so far and it may be a little time before they move out. At least the point has been made and action initiated by the authorities.

Good news is that Uganda amateurs have been authorised by UCC to use the band 7100- 7200 kHz.

(Ted 5Z4NU)

PLT Interference to the Fire Service Band

Nige, G7CNF has produced a video showing the effects of a Hi-speed Power Line Adaptor (PLA) on frequencies used by the UK Fire Service.

Following the discovery of the interference to the 4m amateur band by the PLT adapters, he checked on the band used by the UK Fire Service. The result is in this video.

Unlike the other emergency services, the Fire Service in the UK still use analogue radio on 71 MHz and Portugal listeners use this for signs of Sporadic E radiowave propagation.
When they hear UK firemen, they know that the 4m amateur band is open.

(southgate)

Police raid silences Mexican community radio station

Southgate News are reporting that a group signing themselves" Reporters Without Borders" allege police and judicial authorities in Mexico raided Radio Proletaria, a community radio station, in which arrests were made and the station was summarily dismantled.

The raid was carried out at night by around 30 armed and masked members of the police and the Chiapas State Attorney-General's Office (PGJE). Six people are said to have been arrested, broadcast equipment seized, reducing it to silence.

The RWP nor Southgate gave any indication as to why the raid took place.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

VK2ZYZ Charley's "Bucks night"

OK, that subject line might get you excited but this guy has built a receiver that really did cost him about $1 worth of parts out of his junk box, it covers so far 80m to 20m is still working on how far he can stretch it, and it receives SSB, CW, and AM.

This rig will never be you main rig, it is just a novelty but it is a blast, if you have a junk box and an hour to kill one night give it a go!

We did ask Charley to come up on this national news, so hopefully next week we will have a lil more info.

WEIRD AND WONDERFUL

October 2010...

This October is very special.

It has 5 Fridays, 5 Saturdays and 5 Sundays all in 1 month.

This happens only once in 823 years.

London 2012 Olympics radio station DQ'd!

Media regulator Ofcom is pulling the plug on a London-only digital station project which had been planned for "The Games."

It would appear it has been "dis-qualified" due to because of a lack of interest.

Ofcom had said it had expected demand for the new radio service to be "particularly high" during the Olympics and Paralympics. The regulator said it has received just 10 responses to its appeal for "preliminary expressions of interest", a number of which were not suitable and did not meet its digital-only requirements.

REWIND

On October 31, 2010, Capital Stage Broadway will present radio's single most famous broadcast.

The cast will tell the story, exactly as it was told by Orson Welles and his Mercury Theatre on air over 70 years ago.

The true power of live story-telling made itself known on Halloween Eve in 1938 when a story told over the radio terrified a nation. Adapted for radio by Howard Koch and starring Orson Welles, War of the Worlds was presented as a Halloween thriller. But, for those who tuned in late, "normal" programming appeared to be interrupted with the startling news that there were "explosions occurring on Planet Mars." Reports followed stating that a huge flaming object had fallen to earth on a farm near Grover's Mill, New Jersey.

More landings were soon reported and an anxious radio audience came to the frightening (incorrect) conclusion that Earth was the target of a full scale invasion by aliens!

Such is the power of Radio!

SPY V SPY

ASIO Central Office, Canberra have postitions available for IT Communications
Centre Officers

It's no secret that ASIO is here to protect Australia from terrorism and
espionage. Intelligence gathering is their focus. Working within a complex
security environment, you'll soon discover there is something more to this role.

Based within ASIO's Information Division, the Communications Centre team are
responsible for handling and controlling communications traffic within the highly
secure networks. As a member of this team, you'll assist with managing and
maintaining a range of established communication links, and provide secure and
timely transmission of information to ASIO's agency partners, domestically and
internationally.

Take your skills; improve on them; apply them in ways you never thought possible.

Closing date: Friday, 29 October 2010

Eligibility: Applicants must be Australian citizens.

Working conditions: Employment is under the ASIO Act 1979.
Conditions of service are similar to those applying in the
Australian Public Service. Salary packaging arrangements
are available.

Enquiries: If you have any other enquiries please telephone 02 62574916

The Central Coast Amateur Radio Club

They have been extremely busy over the last few weekends, whether it was the
annual JOTA/JOTI event or preparing for the WIA Centenary Field Day, the club

has been out there promoting Amateur Radio to the General Public.

The Central Coast Amateur Radio Club were heavily involved with local scout and guide groups across the Central Coast during the recent JOTA/ JOTI event and assisted scouts and guides talk to the world across the weekend of 16th-17th October 21, 2010.

Many potential AR operators enjoyed the thrill of communicating with fellow scouts and guides from many different parts of the country and the world.

Central Coast Amateur Radio Club and JOTA? Truly an International Event!

Central Coast Amateur Radio Club hold regular education and training sessions from the Foundation licence right up to the Standard and Advanced operators licence.

The Central Coast Amateur Radio Club meets on the first Friday of the month at the Clubrooms in Dandaloo St Kariong.

The clubrooms are also open every Saturday from approx 10.30am - and everyone is welcome, so drop in and say hello

Contact the Club for more information on 02 4340 2500 or visit the club's website www.ccarc.org.au

Please think of the environment before printing this email

==========
WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

949. [RAC-Bulletin] RAC Bulletin 2010-025E - SHARP-1 Launch

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-21 19:10:08 UTC
From: rac-bulletins@eton.ca
Message-ID: <4CC08FA5.2020104@rac.ca>
Source record: 5368
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2010-025E - SHARP-1 Launch
2010-10-20

VIA Derek Hay, VE4HAY

Hi:

All is still GO for a launch on Friday, October 22 at 10 AM. The hardware all looks good except for the camera which is giving us trouble after the kids attempted some firmware and hardware mods. April is going to try and replace it tonight with a similar unit.

The cut down circuit works great. We are still doing some last minute fabrication of the bits and pieces (running kite string/balloon line through NiCr wire inside glass tubing etc. - Alan knows this). We will probably finish this tomorrow evening in Elkhorn. We are bringing (I hope) every conceivable piece of gear with us. The flight radios will transmit at 29 and 31 second intervals as VE4SHS-14 (Garmin GPS 16x LVS) and VE4SHS-11 (Garmin GPS 18x LVS). -11 will show a balloon icon on the map. The former will give about 6 m resolution for the lat and long. The chase car is VE4SHS-10. I'm
the driver. All together there are five vehicles with 5 staff and 20 students.

Today Bruce Feaver predicted the winds to be light and from the west with some northerly component (I sure hope so) on Friday. Alan will e-mail us all his flight predictions using Balloon Track and will be monitoring things from Portage la Prairie. It looks like our payload may be a little over weight but not too much - say 1100 grams instead of the ideal 1050. We will adjust weights accordingly but this may lower our burst altitude somewhat. We do not have much going for us in terms of maps. McNally Robison gets the new edition of Backroad Maps - Manitoba on Friday - too bad for us. I have some decent road maps but not down to section roads like Alan's UI View maps. Bruce Feaver will file the NOTAM and we will give him the time and
position (DMS) of the landing which he will pass on to NavCanada.

We have cell phones. My number will be 995-2767 (my wife's cell - I barely know how to turn it on so if a kid answers you know why). All the other staff have phones and we will e-mail all those details Thursday evening from the resort in Elkhorn. We also have a couple of 2 meter transceivers (ICOM IC-V80). I'm VE4SHS and Bohyun Lee (grade 12 student) is VE4BHL. I've programmed in the WPG repeater as well as Starbuck and Bruxelles. Hopefully that will get us on the repeater system. We have some crazy neon colours to wear while searching so

hopefully none of us attract hunters.

We are not nearly as prepared as I would have liked but we are at a point where we just have to go for it. It has been a lot of work in a short time and we are all starting from scratch. I've been very sick and unproductive the last few weeks but others (especially, April, Bruce, Craig, Alan, Adrian, Mike and Jeff) have really been a big help as we approach launch time. Even if we don't retrieve our package, it will have been a tremendous learning experience and we will just fund raise and start over.

Finally; if the winds do not cooperate, we may try a tracking exercise. One car could take the beaconing cube and drive off. After a twenty minute head start the rest of will try to follow. I'm not sure this would actually work as we will be on the ground and the APRS repeaters/gateways are far and few but we will try to come up with something. I don't like to think it won't happen after all the time and money spent but it could get scrubbed. This is the only time I wish I lived in Saskatchewan.

Keep your fingers crossed and if you can, follow us online at aprs.fi

73

Mike: Please forward this to our SHARP grads.

Thanks

==> + IARU NEWS: INFORMATION EXCHANGE AND CAMARADERIE HIGHLIGHT IARU
REGION 2 CONFERENCE

The 58 delegates and observers who gathered in Salinitas, Sonsonate,
El Salvador for the 17th General Assembly of IARU Region 2 experienced
a busy and enjoyable week. The conference began on October 4 and
concluded on October 8. Twelve IARU Member-Societies in the Americas
were represented in person, with another seven represented by proxy.
President Kay Craigie, N3KN, served as the voting delegate for the ARRL
and was assisted by International Affairs Vice President Jay Bellows,
K0QB, and Executive Vice President David Sumner, K1ZZ. Observers from
IARU Regions 1 and 3 and the International Secretariat were present to
assist and to learn from the conferees. Read more here
<http://www.arrl.org/news/information-exchange-and-camaraderie-highlight-iaru
-region-2-conference>.

==> + ARRL EXECUTIVE COMMITTEE TO MEET THIS WEEKEND
```

At its January 2010 meeting, the ARRL Board of Directors decided to make the agendas of Board and Executive Committee meetings available on the ARRL Web site. The agenda for the October 23 meeting of the Executive Committee is now available <http://www.arrl.org/news/arrl-executive-committee-to-meet-in-st-louis-this-weekend>.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 TOPS AGENDA AT AMSAT-NA'S ANNUAL MEETING

The development and next year's scheduled launch of ARISSat-1 were the main topics of discussion at the 2010 AMSAT-NA Space Symposium and Annual Meeting, held October 8-10, 2010, in Elk Grove, Illinois. ARISSat-1 has been delivered to NASA to undergo final preparations for delivery to the International Space Station. ARISSat-1 is scheduled to be manually released into orbit during an ISS spacewalk early next year. The ARISSat-1 project began when plans for SuitSat-2 had to be shelved for lack of a space suit <http://www.arrl.org/news/suitsat-2-now-called-arissat-1>. The development team undertook the task of housing the payload planned for SuitSat-2 in a more traditional housing adapted for manual deployment. A few units were developed to have on standby for future launch opportunities; one of these units was on display at the Symposium. Read more here <http://www.arrl.org/news/arissat-1-tops-agenda-at-amsat-na-s-annual-meeting>.

==> SUPPORT ARRL: ARRL ANNUAL ON-LINE AUCTION NOW OPEN FOR BIDDING

The Fifth Annual ARRL On-Line Auction <http://www.arrl.org/auction> opened for bidding at 10 AM (EDT) on Wednesday, October 20. According to Business Services Manager and ARRL On-Line Auction Coordinator Deb Jahnke, K1DAJ, there is a large assortment of ARRL Product Review items, donated new and vintage equipment, rare books, one-of-a-kind items and more. "If readers are interested in some great bargains and some great fun, you really need to check this out," she said. She expressed gratitude to the ARRL Business Partners and individual donors who have contributed items to this event. The 2010 ARRL On-Line Auction runs through 11:59 PM (EDT) October 25, 2010.

==> + DEFENDING THE AMATEUR RADIO SPECTRUM: EVERYONE'S RESPONSIBILITY

The second edition of Spectrum Defense Matters -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- has just been released on the ARRL Web site. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. Your financial support is vital to continue the ARRL's work to protect your operating privileges. You can do this by contributing generously to the ARRL Spectrum Defense Fund <http://www.arrl.org/arrl-donation-form>.

"We are facing very real and immediate challenges [to the amateur spectrum]," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Over

the past couple of months, we have addressed FCC spectrum management issues affecting our 430 MHz and 2.3 GHz bands, as well as interference from unlicensed stations operating in the lower part of 10 meters." But Sumner said that opportunities lurk among the challenges: "A possible new amateur band just below the AM broadcast band is on the agenda of the 2012 World Radiocommunication Conference. We face significant hurdles in getting what would be at best a secondary allocation, but we're working hard to persuade the radio services in this part of the spectrum that an amateur allocation is compatible with their future requirements. We recently gained crucial support [for this allocation] in the United States."

Sumner said that it takes what he called "a concerted global effort to protect Amateur Radio's access to the radio spectrum and guard against interference that reduces our ability to communicate." You can take an important step right now to support ARRL's commitment to defending the Amateur Radio Spectrum. According to ARRL Chief Development Officer Mary Hobart, K1MMH, the ARRL is almost $194,000 shy of its Spectrum Defense Fund goal of raising $325,000 by the December 31 deadline.

"Please make a generous contribution to the Spectrum Defense Fund by mail, on the Web <http://www.arrl.org/arrl-donation-form> or by phone," she said. "Perhaps you'll consider a very easy way to contribute by pledging $10 or $20 or $100 a month. Your financial commitment, over and above your annual dues, will ensure that ARRL has the resources to represent you and protect your operating frequencies." To make a donation via mail, please send to Spectrum Defense Fund, ARRL, 225 Main St, Newington, CT 06111. To make a contribution over the phone, or to discuss other giving options, please call 860-594-0397. Read more here <http://www.arrl.org/news/defending-the-amateur-radio-spectrum-everyone-s-responsibility>.

==> + ARRL HQ NEWS: DEWEY RYKARD, KI4RGD, JOINS ARRL STAFF AS INSTRUCTION AND RESOURCE COORDINATOR

The ARRL is pleased to welcome Instruction and Resource Coordinator Dewey Rykard II, KI4RGD, to the Headquarters staff in Newington. Rykard, who will be working in the League's Education Services Department, will focus on developing and identifying resources for ARRL instructors. He also will play an integral role in the annual series of Teachers Institutes in Wireless Technology, sponsored by the ARRL and held every spring and summer around the country.

In his position at ARRL HQ, Rykard will be assisting Education Services Manager Debra Johnson, K1DMJ. His responsibilities will include reviewing and organizing resources needed by instructors, teachers and Scout leaders, developing lesson plans to be utilized by ARRL Registered Instructors and for the ARRL's Education & Technology Program (ETP), providing guidance in the development of ARRL license study manuals and coordinating the ARRL's educational award program. In addition, Rykard will provide support for the ETP, participate in the Teachers Institute trainings, help to provide ongoing resource support

for teachers and assist with administration of the ETP. You may meet him at the ARRL booth at conventions where he will represent ARRL Education Services programs. Read more here <http://www.arrl.org/news/dewey-rykard-ki4rgd-joins-arrl-staff-as-instruction-and-resource-coordinator>.

==> + SOLAR UPDATE

Tad "The Sun is up, the sky is blue; it's beautiful and so are you <http://www.youtube.com/watch?v=M-2lMstw6qs>" Cook, K7RA, reports: The average sunspot numbers for the week were up nearly 44 points to 55.6, but the average solar flux readings were unchanged, at 84.9. A few days ago, the solar flux values rose above 90, but currently the projection from USAF and NOAA for solar flux over October 21-31 is 84, 83, 82, 82, 82, 80, 78, 80, 85, 80 and 80. Seven new sunspot groups arrived since October 9: group 1112 came on October 9; group 1113 on October 13; 1114 and 1115 on October 14; 1116 on October 17, and 1117 and 1118 on October 19. While the average sunspot number for the past week was 55.6, the greatest sunspot activity was over the past few days, with the daily sunspot numbers on October 17-20 at 61, 69, 65 and 61. Look for more information on the ARRL Web site on Friday, October 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Lennon's Dear Prudence <http://en.wikipedia.org/wiki/Dear_Prudence>.

==> THIS WEEK ON THE RADIO

This week:

- October 23 -- FOC QSO Party
- October 23-24 -- Stew Perry Topband Challenge; 10-10 International Fall Contest (CW); W/VE Islands QSO Party; Araucaria VHF Contest; SYLRA Contest
- October 27 -- SKCC Sprint

Next week:

- October 30-31 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; CQ Worldwide DX Contest (SSB); 10-10 International Fall Contest (Digital); 50 MHz Fall Sprint
- November 2 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS AND EVENTS

- May 20-22, 2011 -- Dayton Hamvention <http://www.hamvention.org/>&#65533;
featuring ARRL EXPO, Trotwood, Ohio
- June 10-11, 2011 -- ARRL National Convention and ARRL EXPO at the
ARRL West Gulf Division Convention <http://www.hamcom.org/>, Plano,
Texas

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

952. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-22 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/rec-radio-info/guidelines-1-1287727501@panix.com>
Source record: 5371
Cross-posted to: rec.radio.info,rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.answers,news.answers

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/rec-radio-info/guidelines
Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Amateur Radio Newsline(tm) Report 1732 - October 22 2010

The following is a closed circuit and not necessarily for air. With a report on Amateur Radio Newsline's current finances here is our Producer Bill Pasternak, WA6ITF:

--

OK. Ill just take a second to thank all of you who responded to last months appeal. Thanks to you, we have enough in the account to hopefully hold us through the end of November if we watch our expenses carefully. Your generosity has been overwhelming and we only wish we had a way to thank each of you individually. Unfortunately we can't, so we can only say how grateful we really are via this message. And with that I say 73 and here's Jim Damron, N8TMW, with this weeks news.

--

Thanks Bill. Now, Amateur Radio Newsline report number 1732 with a release date of Friday, October 22 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A wireless conference down-under will discuss the future of communications in New Zealand, more on the break-up of the Netherlands Antillies and its affect on DXing, U-K hams get van update on how some ham radio bands will be used for the 2012 Olympics and ham radio will take part in a major expo in Australia. All this and more on Amateur Radio Newsline(tm) report number 1732 coming your way right now.

RESTRUCTURING: CONFERENCE ON WIRELESS TECHNOLOGIES TO BE HELD IN ZL

The New Zealand Ministry of Economic Development is convening a seminar on Future Wireless Technologies, including Cognitive Radio, Software Defined Radio and Future Mobile and Broadcast Technologies to be held Thursday November 4th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is here with the details:

--

This year's seminar will be held here in the city of Auckland. It will immediately follow the 16th Asia Pacific Communications Conference being held at the same venue from October 30th to November 3rd.

The purpose of the seminar is to share knowledge among wireless equipment manufacturers, research institutions, service providers and government about emerging developments. It will also help in identifying the areas on which to focus future technical and regulatory work.

The program for this gathering will be published shortly on the Radio Spectrum Management website. More information on this event is on-line at apcc2010 dot aut dot ac dot nz.

Reporting from down under, Im Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

A similar event was held in September of 2009. It theme highlighted the importance of sharing information on the progress of such initiatives and developments in this area. (NZART News)

**

WORLDBEAT: BREAKUP OF THE NETHERLANDS ANTILLES AND THE CQ OPERATING EVENTS

With several groups operating from the new DX entities created by the breakup of the Netherlands Antilles ongoing, questions have arisen regarding their status for CQ DX awards and contests. To clarify the matter, CQ Editor Rich Moseson, W2VU, has issued the following statement which we paraphrase in part.

In regard to the CQ DX Awards program, each of the five islands involved in the change of status retains its previous PJ callsign prefix. According to CQ DX Awards Manager Billy Williams, N4UF, the previous entities of the Leeward Islands and Windward Islands Islands were deleted as of October 9, 2010. Four new entities - Curacao (PJ2), Sint Maarten (PJ7), Bonaire (PJ4) and Saba/St. Eustatius (PJ5/6) became active on October 10, for a net gain of two DX entities. Confirmations for contacts made with the new entities will be accepted for CQ award credit effective immediately.

Moseson went on to note that the country multiplier list for the CQ World Wide DX Contests is based on a combination of the ARRL's DXCC list and Germany's Deutscher Amateur Radio Club's Worked All Europe list. Since the ARRL has also made the same changes, effective October 10th, and these "new ones" will each count as separate country multipliers in the CQ sponsored events, Moseson said. (CQ)

NEWSLINE FOLLOW-UP: UK REGULATOR OFCOM UPDATE HAM SPECTRUM USE FOR 2012 GAMES

U-K telecommunications regulator Ofcom has published an updated spectrum plan for wireless communications at the London 2012 Olympic Games. This includes an update on the various demands for spectrum

and how they will be met in part by tapping into the VHD and UHF ham bands. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Frequencies in a number of bands allocated in the United Kingdom on a secondary basis to the Amateur Radio Service will be used at Olympic venues. This according to United Kingdom telecommunications regulator Ofcom who days that the 70 cm, 23 cm and 13 cm bands will be used.

Regarding the 430 MHz band the plan, Ofcom says that the 430 to 440 MHz band is managed by the Ministry of Defense and is used by Radio Amateurs. Ofcom notes RAYNET's support for the St John's Ambulance, Red Cross and other similar users as well as amateur radio special events stations for cultural events linked to the London 2012 Games will be considered.

According to Ofcom, as in past games, amateur radio bands, especially 430 to 440 MHz have been used and this remains a possibility for the London 2012 Games. This, if the demand requires it.

In the statement Ofcom says that it has identified the bands that could be used for land mobile radio, handheld communications and talkback. As such it is now able to provide more technical detail for use of those these bands. With regard to the Amateur-Satellite Service the document says that while Ofcom does not at this time think it will be necessary to use those frequency bands. However, it adds that it will retain the option to consider whether there is a requirement to use them as it develops its venue-specific spectrum plans.

Ofcom adds that it will continue to work closely with key stakeholders as it develops its spectrum utilization plans for the 2012 games.

Reporting from Scottsdale, Arizona, I'm Norm Seeley, KI7UP, for the Amateur Radio Newsline.
--
A final version of the Ofcom 2012 Olympic games radio plan and its impact on amateur radio will be published early next year. The current Ofcom news release is on line at tinyurl.com/33x8zcd (Southgate)

NAMES IN THE NEWS: HAM OPERATOR RE-ELECTED ITU SECRETARY GENERAL

Member states of the International Telecommunication Union have elected Dr. Hamadoun Tour&#65533;, HB9EHT, of Mali as Secretary-General of that organization for a second four-year term. Dr. Tour&#65533; won the position with 151 votes, with 157 countries present and voting.

Addressing the conference after the vote, HB9EHT told close to 1,500 conference participants from around the world that he will put a special emphasis on broadband access, as well as continuing to ensure that cyber-security is high on everyone's agenda.

Tour&#65533; has also pledged to ensure that small island developing states and land-locked countries get special attention. He also said that he will encourage more private sector involvement through public-private partnerships, both within ITU and in the field. (Various)

RADIO LAW: CQ WRITER TACKLES THE DEMISE OF THE FCC INDECENCY LAW

A writer for a major ham radio publication has tackled the recent court ruling that overturned the FCC's regulation on indecency in Broadcasting and what it might mean to ham radio enforcement. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

With the Federal courts having recently struck down the FCC's policy on broadcast indecency, many are wonder what impact if any that decision will have on the prosecution of wayward members of the ham radio community. Now, writing in his Washington Readout column in the October issue of CQ Magazine, columnist Fred Maia, W5YI, confronts this issue head on.

In his article, W5YI notes that in the past, the FCC has held that the indecency rules applying to radio and television broadcasting also applied to amateur radio transmissions. That in making obscenity or indecency determinations that the FCC staff analyzes what was actually said. If the FCC determines that the curse words transmitted actually violate its rules, it can issue a Notice of Apparent Liability or N-A-L which is a preliminary finding that the rules have been violated.

But says Maia, to date the FCC has never issued a citation or a N-A-L to a ham radio operator for solely violating its obscenity or indecency rules. The violation notice usually mentions other accompanying offenses which can be easily proven and do not involve controversial First Amendment issues.

Fred Maia is not an attorney but is a longtime FCC watcher and writer. He also possesses a very good understanding of communications law and has the ability to make it understandable to the general ham radio public. And he does that very well.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in the City of Angels.

--

Fred Maia is best known as the founder of the W5YI V-E-C and was the longtime editor of the highly acclaimed W5YI Report ham radio newsletter. His very insightful commentary on the demise of the FCC's indecency policy and its affect on our hobby begins on page 54 of the October issue of CQ Magazine. It's an article well worth reading by all in the United States ham radio community. (CQ)

**

ENFORCEMENT IN SPACE: EARTH RESOURCES SATELLITE BLINDED BY ILLEGAL TERRESTRIAL OPERATIONS

And speaking about enforcement, here's a story of a different sort. The European Space Agency says that it has launched a behind-the-scenes campaign to shut down pirate radio and TV transmissions interfering with a major climate satellite.

According to ESA, its Soil Moisture and Ocean Salinity probe has been bugged by patches of interference from radar, TV and radio transmissions in what should be a protected band. The interference to the bird is at its peak as it passes over parts of southern Europe, Asia, the Middle East and some coastal zones.

ESA believes that the intrusion has two sources. One is a leak from other services into the spectrum from 1400 to1427 MHz. This is a portion of the so called L-band that has been assigned to space astronomy and Earth exploration satellites. The other source is believed to be illegal transmissions by TV, radio links and networks such as security systems that are operating in this radio band. ESA adds that terrestrial radars appear to cause interference as well.

The Soil Moisture and Ocean Salinity satellite reportedly cost some 315-million-euro's to develop and launch into space. (ESA)

**

HAM RADIO BUSINESS: MORE CHINA BUILT HAM GEAR ON ITS WAY

The sales success of the low priced Wouxon dual band hand held transceivers has aparenty not been lost on the well established ham radio retail trade. This with the announcement by the five member buying group Ham Pros will be selling both the Wouxon and other made-in-China ham radio gear under the banner of nowchinadirect dot com.

In addition to the Wouxon HT, other gear in their full psagre ad in the November QST Magazine include several metered power supplies, a pair of SWR and power meters and two hand held transceivers from TYT. These are the TH-F5 single bander that covers 2 meters and the UV-F1 that covers both 2 meters and 70 centimeters.

The ad notes that all of the H-T's carry Part 90 FCC certification. According to ARRL Counsel Christopher Imlay, W3KD, writing elsewhere in the same issue of QST, Wouxon and presumably other mainland China manufacturers who have obtained Part 90 certification for their

equipment can legally sell these units and hams. Also that hams can use them as long as they are operated strictly in the ham radio bands.

Imlay also notes that Wouxon U.S. has chosen to limit the range in which their HT's can transmit to the ham radio bands. He says that this is akin to good fences making for good neighbors.

You can read the entire text of Attorney Imlay's regulatory interpretation along with a full review of the Wouxon dual band HT beginning on Page 52 of the November issue of QST. More on the new mainland China manufactured equipment from Ham Pro's is on-line at nowchinadirect dot com. (ARNewsline(tm) from nowchinadirect.com, QST, others)

RESCUE RADIO: REBUILDING BROADCASTING FROM GROUND ZERO

An audio recording of the 2003 Audio Engineering Society conference detailing how radio and television broadcasting was returned to the metro New York City area following the September 11th 2001 terrorist attack by al-Quida is now on line at the AES website.

Immediately after the attack, broadcasters, especially TV stations, had to scramble to get back on the air or return their service to full coverage. A common solution was to broadcast from the Empire State Building, where many had been based before moving to the World Trade Center. Nearly two years later, the the 115th AES Convention featured a session titled "Rebuilding of New York Broadcasting." It examined the events from 9/11 through getting broadcasters back up onto the air and exploring ways to make the broadcast systems of the city safer and more secure.

Now, seven years later, audio of that two-hour session is available online at the AES website for anyone to hear. The panel included Joe Giardina of DSI RF Systems, John Lyons of property owner the Durst Organization, Kevin Plumb of WABC and WPLJ, Steve Shultis of WNYC Radio and Tom Silliman of tower builder and antenna installer ERI Inc.

You can hear the entire 2 hour and 18 minute Podcast at tinyurl.com/911radio (RW, AES-NY)

HAM HAPPENINGS" CQ WW WEBINAR ON OCTOBER 24

If you are at all interested in contesting, then mark down Sunday, October 24th for an open to the public free webinar dealing with the CQ World Wide contests.

The session will be moderated by CQ World Wide DX Contest Director Bob Cox K3EST. He along with committee members John Dorr, K1AR and Doug Zwiebel, KR2Q will provide an update on the 2010 CQ World Wide SSB and CW DX contests. A Question and Answer period will follow the

presentation.

The event is hosted by the Potomac Valley Radio Club and begins at 1900 hours UTC. To register go to www.pvrc.org and click the Upcoming Webinars link. (K4ZW)

NAMES IN THE NEWS: RD3PQ UPLOADS QSL 300 MILLION TO LoTW

Some names in the news. First up is Victor Morozov, RD3PQ, of Tula, Russia who had the honor of uploading QSO number 300 million to ARRL's Logbook of the World electronic QSL service. Yhe League commenced operation of Logbook of the World in 2001. January 2011 will be a decade since the first digital log and confirmation of QSO's in this program were first published. As for Morozov, upload 300 million was his way of confirming a QSO with Ivan Gombos, OM3CGN operating portable SV2 that took place this past October 5th. (WIA News)

**

NAMES IN THE NEWS: G0JHC RECEIVES ROYAL ORDER AWARD

And Neil Carr, G0JHC, has been awarded the prestigious Royal Order of Transatlantic Brass Pounders trophy that recognizes outstanding and consistent DX work.

The Royal Order of Transatlantic Brass Pounders trophy was first awarded in 1924. The original Members of the Order were from those who operated transatlantic tests from 1921 to 1924.

As such, Neil Carr, G0JHC joins a small group of elite U-K operators who have earned this honor. RSGB President Dave Wilson, M0OBW and HF Awards Manager, John Dunnington, G3LZQ will visit G0JGC shortly to present the award. (RSGB)

EMERGING TECHNOLOGY: NIST DEVELOPS RHEOMETER ON A CHIP

Its being called a lab on a chip and its purpose is to experiment with elasticity in just about any material that you can think of. Even things found inside of your ham radio station. Amateur Radio Newsline's Jim Davis, W2JKD, has more:

--

Researchers at the National Institute of Standards and Technology, better known in ham radio simply as the NIST have demonstrated a microminiaturized device that can make complex viscosity measurements on sample sizes as small as a few nano-liters. Currently a table-top prototype, the NIST Rheometer could be a particularly valuable tool for biotechnologists studying minute quantities of complex materials that must function in confined spaces.

Viscosity, elasticity and how materials flow when subject to a force is the subject of the science of Rheology. Measurements tell a lot about a complicated material like a gel in determining if it is more like a liquid or a solid and to what degree under what conditions by determining its visco-elasticity. For example, the popular children's toy known as Silly Putty is a classic example of complex visco-elasticity, bouncing better than a rubber ball under a sharp, sudden force but slumping into a puddle when left alone.

NIST's early prototype Rheometers include only the core sliding plate mechanism on a MEMS chip, and rely on a microscope and high-speed cameras for the actual measurements. According to the research team, in their more polished version the necessary sensors could be included on the MEMS chip and the entire instrument reduced to a handheld device.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD

THE CONTEST CORNER: FINLAND GROUP SPONSORS FEMALES IN RADIO

Turning to the contest corner, the Scandinavian Young Ladies Radio Amateurs organization is sponsoring a have a contest to promote activity around the world by female radio amateurs as well as to encourage more amateur radio communication between women and men. This event takes place from 10.00 UTC on October 23rd to 10.00 UTC on October 24th. Rules for this one are on-line at contestclubfinland.com. (RCF)

**

THE CONTEST CORNER: NEXT CQIR CONTEST IN 2012

A Committee of the Irish Radio Transmitting Society or IRTS at its recent meeting confirmed that as part of the 2012 80th Celebrations of the founding of the organization will be in the form of a second CQIR International HF Contest. That event will be held over the St.Patricks Day weekend in 2012. This will be somewhat similar to the successful

1st CQIR Contest held as part of the 75th Anniversary celebrations. Planners say that with the rising sun spot numbers, HF conditions will be much better for the event. (IRTS)

**

ON THE AIR: CANADIAN HAMS CELEBRATE THE UN

On the air, a group of Canadian hams has decided to celebrate the anniversary of an important United Nations agency. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the details:

--

The Westcumb Amateur Radio Club from Amherst, Nova Scotia has been granted the callsign VC1J for the special event station celebrating the 65th anniversary of the United Nations and its UNESCO organization on October 24th. They will be operating from the Joggins Fossil Cliffs in t Nova Scotia which became a UNESCO site last year. A route to obtain the special event QSL card will be announced later. I'm Fred Vobbe, W8HDU

--

UNESCO is an acronym that stands for the United Nations Educational Scientific and Cultural Organization. It's stated goal is to create the conditions for dialogue among civilizations, cultures and peoples, based upon respect for commonly shared values (RAC)

**

ON THE AIR:BV100 CELEBRATES THE 100th ANNIVERSARY OF THE REPUBLIC OF CHINA

Amateur radio operators from the Republic of China Centenary Foundation in Taiwan will be activating special event station BV100 between now and December 31st, 2011. This operation is to celebrate the 100th anniversary of the Republic of China. Operations will be on all bands and modes. QSL via BV2KI. (OPDX)

**

DX

In DX, DK7PE, will be on the air as 5X0CW from Kampala, Uganda, for one week starting October 27th. He plans to use his Elecraft K2 radio and jumper beam on 40 through 10 meters with his activity mainly on CW. QSL via his home callsign.

His operation will be followed by that of G3XAQ, who will be active as 5X1XA from Kampala between November 14th and December 1st. Operations will be CW only on the HF bands using 100 watts and small beam. QSL via G3SWH.

And starting October 24th, G3VDB will be active for two weeks from the Maldives as 8Q7EJ. On this trip he plans to operate from Bandos Island, however operations are subject to hotel permission. His activity will be holiday style mostly on 20 meters CW. QSL via his home callsign.

Operators KM9D and KF4TUG have been based in Sandakan, East Malaysia, for the past few months. Mike is currently active portable 9M6 and has been on 30, 20, 17, and 12 meters CW. The length of their stay is unknown. QSL via OM2SA.

Lastly, CX2CC, is now active as 9Q5OAR from the City of Goma, in the Democratic Republic of the Congo. He will be there for a year performing work for the United Nations and hopes to be active using slow speed CW SSB and the Digital modes. He has already been heard on 15, 12 and 10 meter SSB. QSL via his home callsign of CX2CC

(Above from various DX news sources)

**

THAT FINAL ITEM: ARENA OF WONDER - WIRES TO WIRELESS

And finally this week, word from down-under that ham radio will be part of a major expo at the end of October. Graham Kemp, VK4BB, has the details:

--

The Melbourne based Prahran Mechanics Institute 'Throughout History Week' is an annual event held at the groups Prahran offices. The 2010 display will take place over the week of the 25th to the 30th of October and features a WIA Centenary display prepared by well known WIA historian Peter Wolfenden VK3RV.

The display titled 'Arena of Wonder' from Wires to Wireless is advertised as an extraordinary collection of wireless equipment and memorabilia marking the 100th anniversary of the Wireless Institute of Australia.

For the Amateur radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News reportinbg from Brisbane, Ausatralia.

--

Again, those dates are the 25th to the 30th of October, for the Arena of Wonder expo where its now springtime in Australia. (WIA News)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot)org. More information is available at Amateur Radio

Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again that's arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

Amateur Radio Newsline(tm) is Copyright 2010. All rights reserved.

954. Amateur Radio Newsline(tm) Report 1732 - October 22 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-22 12:20:27 UTC
From: William Pasternak <newsline@ix.netcom.com>
Message-ID: <E1P98uJ-0007vK-FT@elasmtp-banded.atl.sa.earthlink.net>

Amateur Radio Newsline(tm) Report 1732 - October 22 2010

The following is a closed circuit and not necessarily for air. With a report on Amateur Radio Newsline's current finances here is our Producer Bill Pasternak, WA6ITF:

--

OK. Ill just take a second to thank all of you who responded to last months appeal. Thanks to you, we have enough in the account to hopefully hold us through the end of November if we watch our expenses carefully. Your generosity has been overwhelming and we only wish we had a way to thank each of you individually. Unfortunately we can't, so we can only say how grateful we really are via this message. And with that I say 73 and here's Jim Damron, N8TMW, with this weeks news.

--

Thanks Bill. Now, Amateur Radio Newsline report number 1732 with a release date of Friday, October 22 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A wireless conference down-under will discuss the future of communications in New Zealand, more on the break-up of the Netherlands Antillies and its affect on DXing, U-K hams get van update on how some ham radio bands will be used for the 2012 Olympics and ham radio will take part in a major expo in Australia. All this and more on Amateur Radio Newsline(tm) report number 1732 coming your way right now.

RESTRUCTURING: CONFERENCE ON WIRELESS TECHNOLOGIES TO BE HELD IN ZL

The New Zealand Ministry of Economic Development is convening a seminar on Future Wireless Technologies, including Cognitive Radio, Software Defined Radio and Future Mobile and Broadcast Technologies to be held Thursday November 4th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is here with the details:

--

This year's seminar will be held here in the city of Auckland. It will immediately follow the 16th Asia Pacific Communications Conference being held at the same venue from October 30th to November

3rd.

The purpose of the seminar is to share knowledge among wireless equipment manufacturers, research institutions, service providers and government about emerging developments. It will also help in identifying the areas on which to focus future technical and regulatory work.

The program for this gathering will be published shortly on the Radio Spectrum Management website. More information on this event is on-line at apcc2010 dot aut dot ac dot nz.

Reporting from down under, Im Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

A similar event was held in September of 2009. It theme highlighted the importance of sharing information on the progress of such initiatives and developments in this area. (NZART News)

**

WORLDBEAT: BREAKUP OF THE NETHERLANDS ANTILLES AND THE CQ OPERATING EVENTS

With several groups operating from the new DX entities created by the breakup of the Netherlands Antilles ongoing, questions have arisen regarding their status for CQ DX awards and contests. To clarify the matter, CQ Editor Rich Moseson, W2VU, has issued the following statement which we paraphrase in part.

In regard to the CQ DX Awards program, each of the five islands involved in the change of status retains its previous PJ callsign prefix. According to CQ DX Awards Manager Billy Williams, N4UF, the previous entities of the Leeward Islands and Windward Islands Islands were deleted as of October 9, 2010. Four new entities - Curacao (PJ2), Sint Maarten (PJ7), Bonaire (PJ4) and Saba/St. Eustatius (PJ5/6) became active on October 10, for a net gain of two DX entities. Confirmations for contacts made with the new entities will be accepted for CQ award credit effective immediately.

Moseson went on to note that the country multiplier list for the CQ World Wide DX Contests is based on a combination of the ARRL's DXCC list and Germany's Deutscher Amateur Radio Club's Worked All Europe list. Since the ARRL has also made the same changes, effective October 10th, and these "new ones" will each count as separate country multipliers in the CQ sponsored events, Moseson said. (CQ)

**

NEWSLINE FOLLOW-UP: UK REGULATOR OFCOM UPDATE HAM SPECTRUM USE FOR 2012 GAMES

U-K telecommunications regulator Ofcom has published an updated spectrum plan for wireless communications at the London 2012 Olympic Games. This includes an update on the various demands for spectrum and how they will be met in part by tapping into the VHD and UHF ham bands. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Frequencies in a number of bands allocated in the United Kingdom on a secondary basis to the Amateur Radio Service will be used at Olympic venues. This according to United Kingdom telecommunications regulator Ofcom who days that the 70 cm, 23 cm and 13 cm bands will be used.

Regarding the 430 MHz band the plan, Ofcom says that the 430 to 440 MHz band is managed by the Ministry of Defense and is used by Radio Amateurs. Ofcom notes RAYNET's support for the St John's Ambulance, Red Cross and other similar users as well as amateur radio special events stations for cultural events linked to the London 2012 Games will be considered.

According to Ofcom, as in past games, amateur radio bands, especially 430 to 440 MHz have been used and this remains a possibility for the London 2012 Games. This, if the demand requires it.

In the statement Ofcom says that it has identified the bands that could be used for land mobile radio, handheld communications and talkback. As such it is now able to provide more technical detail for use of those these bands. With regard to the Amateur-Satellite Service the document says that while Ofcom does not at this time think it will be necessary to use those frequency bands. However, it adds that it will retain the option to consider whether there is a requirement to use them as it develops its venue-specific spectrum plans.

Ofcom adds that it will continue to work closely with key stakeholders as it develops its spectrum utilization plans for the 2012 games.

Reporting from Scottsdale, Arizona, I'm Norm Seeley, KI7UP, for the Amateur Radio Newsline.
--
A final version of the Ofcom 2012 Olympic games radio plan and its impact on amateur radio will be published early next year. The current Ofcom news release is on line at tinyurl.com/33x8zcd (Southgate)

**

NAMES IN THE NEWS: HAM OPERATOR RE-ELECTED ITU SECRETARY GENERAL

Member states of the International Telecommunication Union have elected Dr. Hamadoun Tour&#65533;, HB9EHT, of Mali as Secretary-General of that organization for a second four-year term. Dr. Tour&#65533; won the position with 151 votes, with 157 countries present and voting.

Addressing the conference after the vote, HB9EHT told close to 1,500 conference participants from around the world that he will put a

special emphasis on broadband access, as well as continuing to ensure that cyber-security is high on everyone's agenda.

Tour&#65533; has also pledged to ensure that small island developing states and land-locked countries get special attention. He also said that he will encourage more private sector involvement through public-private partnerships, both within ITU and in the field.

RADIO LAW: CQ WRITER TACKLES THE DEMISE OF THE FCC INDECENCY LAW

A writer for a major ham radio publication has tackled the recent court ruling that overturned the FCC's regulation on indecency in Broadcasting and what it might mean to ham radio enforcement. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

With the Federal courts having recently struck down the FCC's policy on broadcast indecency, many are wonder what impact if any that decision will have on the prosecution of wayward members of the ham radio community. Now, writing in his Washington Readout column in the October issue of CQ Magazine, columnist Fred Maia, W5YI, confronts this issue head on.

In his article, W5YI notes that in the past, the FCC has held that the indecency rules applying to radio and television broadcasting also applied to amateur radio transmissions. That in making obscenity or indecency determinations that the FCC staff analyzes what was actually said. If the FCC determines that the curse words transmitted actually violate its rules, it can issue a Notice of Apparent Liability or N-A-L which is a preliminary finding that the rules have been violated.

But says Maia, to date the FCC has never issued a citation or a N-A-L to a ham radio operator for solely violating its obscenity or indecency rules. The violation notice usually mentions other accompanying offenses which can be easily proven and do not involve controversial First Amendment issues.

Fred Maia is not an attorney but is a longtime FCC watcher and writer. He also possesses a very good understanding of communications law and has the ability to make it understandable to the general ham radio public. And he does that very well.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in the City of Angels.

--

Fred Maia is best known as the founder of the W5YI V-E-C and was the longtime editor of the highly acclaimed W5YI Report ham radio newsletter. His very insightful commentary on the demise of the FCC's indecency policy and its affect on our hobby begins on page 54 of the October issue of CQ Magazine. It's an article well worth reading by all in the United States ham radio community. (CQ)

**

ENFORCEMENT IN SPACE: EARTH RESOURCES SATELLITE BLINDED BY ILLEGAL TERRESTRIAL OPERATIONS

And speaking about enforcement, here's a story of a different sort. The European Space Agency says that it has launched a behind-the-scenes campaign to shut down pirate radio and TV transmissions interfering with a major climate satellite.

According to ESA, its Soil Moisture and Ocean Salinity probe has been bugged by patches of interference from radar, TV and radio transmissions in what should be a protected band. The interference to the bird is at its peak as it passes over parts of southern Europe, Asia, the Middle East and some coastal zones.

ESA believes that the intrusion has two sources. One is a leak from other services into the spectrum from 1400 to1427 MHz. This is a portion of the so called L-band that has been assigned to space astronomy and Earth exploration satellites. The other source is believed to be illegal transmissions by TV, radio links and networks such as security systems that are operating in this radio band. ESA adds that terrestrial radars appear to cause interference as well.

The Soil Moisture and Ocean Salinity satellite reportedly cost some 315-million-euro's to develop and launch into space. (ESA)

**

HAM RADIO BUSINESS: MORE CHINA BUILT HAM GEAR ON ITS WAY

The sales success of the low priced Wouxon dual band hand held transceivers has aparenty not been lost on the well established ham radio retail trade. This with the announcement by the five member buying group Ham Pros will be selling both the Wouxon and other made-in-China ham radio gear under the banner of nowchinadirect dot com.

In addition to the Wouxon HT, other gear in their full psagre ad in the November QST Magazine include several metered power supplies, a pair of SWR and power meters and two hand held transceivers from TYT. These are the TH-F5 single bander that covers 2 meters and the UV-F1 that covers both 2 meters and 70 centimeters.

The ad notes that all of the H-T's carry Part 90 FCC certification. According to ARRL Counsel Christopher Imlay, W3KD, writing elsewhere in the same issue of QST, Wouxon and presumably other mainland China manufacturers who have obtained Part 90 certification for their equipment can legally sell these units and hams. Also that hams can use them as long as they are operated strictly in the ham radio bands.

Imlay also notes that Wouxon U.S. has chosen to limit the range in which their HT's can transmit to the ham radio bands. He says that this is akin to good fences making for good neighbors.

You can read the entire text of Attorney Imlay's regulatory interpretation along with a full review of the Wouxon dual band HT beginning on Page 52 of the November issue of QST. ON THE AIR:BV100 CELEBRATES THE 100th ANNIVERSARY OF THE REPUBLIC OF CHINA

Amateur radio operators from the Republic of China Centenary Foundation in Taiwan will be activating special event station BV100 between now and December 31st, 2011. This operation is to celebrate the 100th anniversary of the Republic of China. Operations will be on all bands and modes. QSL via BV2KI. (OPDX)

**

DX

In DX, DK7PE, will be on the air as 5X0CW from Kampala, Uganda, for one week starting October 27th. He plans to use his Elecraft K2 radio and jumper beam on 40 through 10 meters with his activity mainly on CW. QSL via his home callsign.

His operation will be followed by that of G3XAQ, who will be active as 5X1XA from Kampala between November 14th and December 1st. Operations

will be CW only on the HF bands using 100 watts and small beam. QSL via G3SWH.

And starting October 24th, G3VDB will be active for two weeks from the Maldives as 8Q7EJ. On this trip he plans to operate from Bandos Island, however operations are subject to hotel permission. His activity will be holiday style mostly on 20 meters CW. QSL via his home callsign.

Operators KM9D and KF4TUG have been based in Sandakan, East Malaysia, for the past few months. Mike is currently active portable 9M6 and has been on 30, 20, 17, and 12 meters CW. The length of their stay is unknown. QSL via OM2SA.

Lastly, CX2CC, is now active as 9Q5OAR from the City of Goma, in the Democratic Republic of the Congo. He will be there for a year performing work for the United Nations and hopes to be active using slow speed CW SSB and the Digital modes. He has already been heard on 15, 12 and 10 meter SSB. QSL via his home callsign of CX2CC

(Above from various DX news sources)

THAT FINAL ITEM: ARENA OF WONDER • WIRES TO WIRELESS

And finally this week, word from down-under that ham radio will be part of a major expo at the end of October. Graham Kemp, VK4BB, has the details:

--

The Melbourne based Prahran Mechanics Institute 'Throughout History Week' is an annual event held at the groups Prahran offices. The 2010 display will take place over the week of the 25th to the 30th of October and features a WIA Centenary display prepared by well known WIA historian Peter Wolfenden VK3RV.

The display titled 'Arena of Wonder' from Wires to Wireless is advertised as an extraordinary collection of wireless equipment and memorabilia marking the 100th anniversary of the Wireless Institute of Australia.

For the Amateur radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News reportinbg from Brisbane, Ausatralia.

--

Again, those dates are the 25th to the 30th of October, for the Arena of Wonder expo where its now springtime in Australia. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again that's arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 24th October 2010

The news headlines

Ofcom updates Spectrum Plan for the London Olympics

Impending changes to the 5MHz beacon chain

RSGB Museum surplus sale starts on Monday

Ofcom published an update to the Spectrum Plan for the 2012 Olympics on 18 October. They intend to issue a more detailed plan in early 2012. >From the plan, 6 and 2m are unlikely to be used and efforts are being made by Ofcom not to use 70cm, as it is accepted that this could be heavily used by amateurs. Likewise, Ofcom is trying to avoid use of the amateur satellite bands. There is also extensive use planned for the lower microwave bands in the greater London area for wireless cameras. The Society meets regularly with Ofcom and was able to discuss this update when they met earlier this week.

During the summer, the 5MHz Working Group reviewed certain aspects of the 5MHz Experiment and agreed a number of changes and improvements. These will be implemented over the next few months. The largest change is that it has been decided to remove the 0.5ms pulse sequence at the end of each beacon transmission. It has also been decided to build a new beacon for GB3RAL. The new design will incorporate a PSK31 transmission in the place of the pulse sequence. The design of the other two 5MHz beacons does not allow this addition. A date for these changes has not been set, but it is hoped to complete the changes before the end of the year.

The RSGB Museum surplus sale is scheduled to start on Monday 25 October. The first items include a vintage Hallicrafters Skyrider 23 receiver, a Tektronix 454A 150MHz oscilloscope and several other items. More information can be found at www.rsgb.org/auction. The actual sales will be conducted via eBay.

With several groups operating from the new DX entities created by the breakup of the Netherlands Antilles, questions have arisen regarding their status for CQ DX awards. Each of the five islands involved in the change of status retains its previous PJ callsign prefix. According to CQ DX Awards Manager the previous entities of the Leeward Islands, PJ2 & 4 and Windward Islands, PJ5, 6 & 7, were deleted as of 9 October. Four new entities of Curacao PJ2, St. Maarten PJ7, Bonaire PJ4 and Saba/St.

Eustatius PJ5/6 became active on 10 October 10. This is a net gain of two DX entities. Confirmations for contacts made with the new entities will be accepted for CQ award credit with immediate effect.

Earlier this year Ofcom announced an exemption for Railway Level Crossings systems to use a part of the 24GHz band where we have secondary status. More recently, on 6 October, the European Union's Radio Spectrum Committee published a review of automotive ultra-wideband short-range radars that currently operate across the entire 24GHz band and which have caused considerable concern. The Society actively participates in consultations on these matters and, along with IARU Region 1, is working to protect and enhance our 24-24.05GHz Primary allocation where innovative DX and Beacon activity is concentrated.

The Six and Ten Reporting Club is an informal group of radio amateurs, mostly from the UK, interested in propagation studies at frequencies around the HF to VHF boundary, mainly the 6 and 10m amateur bands. The club produces a monthly newsletter called the Six and Ten Report that includes analysis of 28MHz propagation based on beacon monitoring, analysis of 50MHz activity reports broken down by propagation mode as well as reports and discussions on unusual propagation events. The Report is usually published online at http://g7kse.co.uk/6and10, about 5-6 weeks after the end of the month. The Six and Ten Report is edited and produced by Steve Reed, G0AEV and Martin Harrison, G3USF and is an activity of the RSGB's Propagation Studies Committee.

In last week's GB2RS News we announced that GB3CM Keeper Andy, GW6JSO was standing down and a new Keeper was needed. Mark, GW8KCY has kindly stepped forward to take over as Keeper and all paperwork has now been submitted to Ofcom.

On 2 November the Institute of Physics is holding an Open Lecture between 7 and 9pm at the Rutherford Lecture Theatre, University of Kent, Canterbury CT2 7NZ. The lecture will be given by Dr Ken Smith and is entitled Dafty and Electromagnetism: What a Revolution. James Clark Maxwell was nicknamed Dafty by his school and college contemporaries yet he not only established the electromagnetic theory of light but triggered off Einstein to establish Special Relativity.

And now for the details of rallies and events for the coming week.

Over the weekend 30 and 31 October the North Wales Rally will take place at John Bright School, Llandudno. There will be trade stands as well as an RSGB Bookstall. Details from Liz Cabban, GW0ETU on 01690 710 257.

The following weekend, 7 November, the Kempton Rally will take place at Kempton Park racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. Doors open at 10am and there will be trade stands, lectures and an RSGB bookstand. Details from Paul, M0CJX, on 0845 165 0351.

Also on 7 November, the Foyle & District ARC Annual Rally will be held at the Best Western White Horse Hotel, 68 Clooney Road, Derry BT47 3PA. Doors open at 12 noon and there will be trade stands, special interest

groups and an RSGB bookstand.

Now for the news of special events

Radio amateurs, mainly from the Cray Valley, Darenth Valley and Clifton amateur radio clubs in South East London, will be operating a special event station located at the Royal Artillery Museum, Woolwich during the school half term holidays. Dates are from Saturday 23 October through to Sunday 31st. The callsign will be GB2RA. Operation will be mainly on the 40m and 2m bands during Museum opening hours of 10am to 5pm. The venue has a cafe and free car parking is available in Carriage Street adjacent to the Museum. More info can be obtained from Lawrie, G4FAA on 0789 98 55 166.

Llanelli Amateur Radio Society will be running a 24 hour Special Event Station with the callsign GB1HTW from midday on Saturday 23 October until midday on Sunday 24 October. GB1HTW will be active on most of the bands from 80 to 2m, either on SSB; BPSK31 or CW. The event is being run to support the Golden Grove Mansion Appeal. Full details of this special event can be found on www.QRZ.com.

The Canadian Coast Guard Radio Station, Thunder Bay MCTS Centre, is celebrating 100 years of radio service. Built by the Canadian Marconi Company in 1910, the new wireless station, MUG Port Arthur, was the first and only Canadian Great Lakes Marconi station ever built. During the November 2010, the Centre's amateurs will be operating special event station CG3MUG, to celebrate the 100th birthday.

And now the HF DX news compiled from 425 DX News and other sources

VK4AN will be active as 3D2A from Viti Levu Island between 27 October and 14 November. Operation will be on 160 through to 10m including 30, 17 and 12m using CW, SSB, RTTY and PSK31. QSL via VK4AN.

5R8X will be active from Madagascar, which is IOTA reference AF-013, from 26 October to 10 November, including the CQWW DX SSB Contest. The operation is primarily targeted to satisfy global demand on the low bands. Two team members will dedicate their efforts to 160 and 80m. Activity on 30, 17 and 12 metres will also be provided.

Now the contest news

On 26 October, the 50MHz UK Activity Contest will take place from 1900 to 2130UTC. Using all modes on the band, the exchange is signal report, serial number and locator.

After that it's the third month of 80m Club Sprints. The SSB leg takes place on the 27th. Don't forget, the sprint events do not require exchanging signal reports, just serial numbers and your name. Activity will be between 1900 and 2030UTC.

The second of this year's CQWW DX Contests, the SSB leg, takes place over the entire 48 hours of 30 and 31 October. The exchange is signal report and your CQ Zone. Britain is Zone 14. Expect the SSB sections of

the contesting bands from 3.5 to 28MHz to be packed and for some rare countries to be activated. With several groups operating from the new DX entities created by the breakup of the Netherlands Antilles, questions have arisen regarding their status for CQ DX contests. The country multiplier list for the CQ World Wide DX Contest is based on a combination of the ARRL's DXCC list and the DARC's Worked All Europe list. Since the ARRL has also made the same changes, deleting the old Windward and Leeward Islands entities and adding Curacao, Bonaire, St. Eustatius & Saba and St. Maarten as four new entities, these new ones will each count as separate country multipliers in the CQWW. There is no need to worry if your own contest logging software is not updated, according to CQWW Contest Director the log checking software calculates final tallies anyway.

The International Police Association Radio Club invites all radio-amateurs of the world to take part in the IPARC-Contest which takes place every year on the first weekend in November. For full details, check out www.mydarc.de/dk3eu.

Friskney & East Lincolnshire Communications Club is running the British Islands Competition starting on 30 October. The rules of the competition are at www.felcc.com.

And now the solar factual data for the period from the 11th to the 17th of October, compiled by Neil Clarke, G0CAS on the 18th of October.

The solar disc had spots visible every day and by the 15th four groups was present. One of the groups remained quiet until the evening of the 16th when without warning produced an M2 impulsive solar flare. Until then solar activity had been very low but increased to moderate with this flare. The 17th was low when two C class solar flares took place. Solar flux levels increased from 75 units on the 11th and the 12th to 87 by the 16th. The average was 80 units. The 90 day solar flux average remained unchanged at 81 units. X-ray flux levels increased from A6.4 units to B1 by the 17th. The average was A8 units. Geomagnetic activity started at unsettled levels with an Ap index of 20 units on the 11th. This was in response to a glancing blow from a coronal mass ejection that left the Sun on the 6th. The remainder of the period was quiet to just unsettled. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase gradually from 280 kilometres per second to 440 by the 17th. Particle densities increased to 48 particles per cubic centimetre on the 11th but then remained below 10 particles per cubic centimetre for the remainder of the period. Bz varied between minus and plus 13 nanoTeslas on the 11th. With a quieter geomagnetic field for the rest of the period the Bz varied no more than minus and plus 7 nanoTeslas.

And now the solar forecast. This week solar activity is expected to be at very low to low levels. A lot will depend on the emergence of new sunspot groups. Within the next few weeks there is the possibility for a surge in solar activity. Solar flux levels are expected to be around the 90 mark for most of the week. Geomagnetic activity is expected to be

quiet every day. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows are expected to be about 9MHz. During the next weekend, that's the 30th and the 31st the CQ SSB worldwide contest takes place. With solar flux levels around the 90's and a quiet geomagnetic field, things are looking good for the contest weekend. Propagation on 28MHz is expected to take place on both days. From shortly after sunrise expect openings to Asia and possibly the Pacific area. The African continent for most of the daylight hours and South and North America appearing from midday. Have fun and good luck to the UK stations.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

NEWS FOR THE MIDLANDS

On Monday 25 October Bromsgrove & District Amateur Radio Club is making plans for the shack. Contact Chris, M0BQE on 01905 776 869.

On Monday 25 October Gloucester Amateur Radio & Electronics Society has an informal evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 25 October Leicester Radio Society is having a talk by Ned Newitt on Slum of Leicester. Details from Alex, G8FCQ, on 0753 120 1640.

On Monday 25 October South Birmingham Radio Society has an aerial working party. Contact Don, on 0121 458 1603.

On Monday 25 October Stratford Upon Avon District Radio Society is having a talk on computer control of receivers by G8UKT. Contact G0CHO, on 01608 664488.

On Monday 25 October Sutton Coldfield Amateur Radio Society is having a visit and talk by Snowdonia Radio Company. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Monday 25 October Wythall Radio Club continues its Advanced course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 26 October Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 26 October Mid-Warwickshire Amateur Radio Society is planning its programme for 2011. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 26 October Telford & District Amateur Radio Society is examining the TDARS website. Contact Mike, G3JKX, on 01952 299 677.

On Tuesday 26 October Wythall Radio Club is having a homebrew evening. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 27 October Gloucester Amateur Radio & Electronics Society is having a skittles match against GARES. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Wednesday 27 October Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 27 October Midland Amateur Radio Society is holding Foundation and Morse classes. Details from Norman, G8BHE, on 01214 229 787.

On Thursday 28 October Brigg & District Amateur Radio Club is having a talk on sun spots and solar activity by amateur astronomer Geoff Tew. Details from John, 2E0III, on 01652 632938.

On Thursday 28 October Salop Amateur Radio Society is having a natter night and begins revision for the Intermediate exam. Details on the club website at www.salop-ars.org.uk.

On Friday 29 October Coventry Amateur Radio Society is having a radio workshop evening. Contact John, G8SEQ, on 07958 777363.

On Friday 29 October Nunsfield House Amateur Radio Group is having a talk on early radar by George, G4EUF. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Saturday 30 October Lincoln Short-Wave Club is putting G5FZ on the air and doing jobs around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Sunday 31 October Midland Amateur Radio Society is visiting the Llandudno Rally. Details from Norman, G8BHE, on 01214 229 787.

On Sunday 31 October South Birmingham Radio Society is visiting the Llandudno Rally. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND

On Monday 25 October Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 25 October Bolton Wireless Club is having a talk by G4MVU on the radio tracking of bees plus honey tasting. For details, send an email to boltonwireless@gmail.com.

On Monday 25 October Macclesfield & District Radio Society is having a talk on homebrew aerials. Details from Roger Bell, M0GMG, on 0771 258 9163.

On Monday 25 October Scarborough Amateur Radio Society is having a talk on quad and low band antennas by G0UVR. Details from Jerry Scarr G6LBL, on 01751 476601.

On Monday 25 October Sheffield Amateur Radio Club is having a talk on software defined radio by Josh, M0JMO. Contact Peter Day, G3PHO, by e-mail to sarc@g3pho.org.uk.

On Monday 25 October South Manchester Radio and Computer Club is holding its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Tuesday 26 October Chester & District Amateur Radio Society is conducting radio operations at Waverton Institute. Details from Barbara Green on 07957 870770.

On Tuesday 26 October Halifax & District Amateur Radio Society continues its Foundation and Intermediate training, and is also looking at developing PSK31 interfaces. Details from Martin, M0GQB, on 01422 341317.

On Tuesday 26 October Otley Amateur Radio Society is taking part in the 50MHz UKAC. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 27 October Hornsea Amateur Radio Club is taking part in the 80m Club Sprint, CW. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 27 October Otley Amateur Radio Society continues its Foundation licence course. Contact Paul, 2E0PAK, on 07768 996370.

On Thursday 28 October Preston Amateur Radio Society is having a construction evening. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 28 October Ripon & District Amateur Radio Society is having a talk on off centre fed antenna designs. Contact Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 28 October South Cheshire Amateur Radio Society is holding its AGM. Contact Chris Wiseman, G0RDK, on 01782 773185.

On Thursday 28 October South Manchester Radio and Computer Club is having a talk on CNC machines by Ged, G8RSI. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 29 October East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 30 October Wakefield & District Radio Society commences its Foundation licence course. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR NORTHERN IRELAND

No news has been received for Northern Ireland this week. Please send any news to GB2RS@RSGB.org.uk.

NEWS FOR SCOTLAND

We start with some sad news. Duncan Archibald, GM0LEW, passed away on Sunday 17 October 2010. Duncan had served as the chairman of the Livingston and District Amateur Radio club for several years and was key to the success of the club and building up the membership.

Due to a fault with the public address system at the Galashiels rally held on 17 October, the organisers were unable to announce the draw results. The winners were, first, Peter, GM4DTH, second, Raymond, G0VLF and third, Michael. G7TWX. The organisers will be contacting the prize winners directly.

On Tuesday 26 October Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 26 October Livingston & District Amateur Radio Society is having Morse code practice. Contact Norman, on 07740 946192.

On Wednesday 27 October Paisley YMCA Amateur Radio Club is having a talk on antennas for small gardens by RSGB Region 1 Manager Len Paget, GM0ONX. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Wednesday 27 October West of Scotland Amateur Radio Society is having construction projects & licence training by The Solder Group. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 28 October Aberdeen Amateur Radio Society is having a talk. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 29 October West of Scotland Amateur Radio Society is having presentations, guest speakers, a raffle & quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Saturday 30 October Cockenzie & Port Seton Amateur Radio Club is taking part in the CQWW SSB Contest. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Sunday 24 October Loughton & Epping Forest Amateur Radio Society is having a fish & chips night. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Tuesday 26 October Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 26 October Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 26 October Dorking & District Radio Society is having a talk by Brian Oakley about behind the scenes at Bletchley Park in WW2. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 26 October Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524844.

On Tuesday 26 October Horndean & District Amateur Radio Club is holding its AGM. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 27 October Chesham & District Amateur Radio Society is on the air. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 27 October Darenth Valley Radio Society is having a talk on printed circuit board construction by Ray, G0FDU. For more information send an email to G0FDU@G0KDV.com.

On Wednesday 27 October Newbury & District Amateur Radio Society is having a talk by Steve, G6ALU, on 80m kit. Details from Rob, G3LMW, on 01635 862737.

On Wednesday 27 October Norfolk Amateur Radio Club is having an informal, construction, workshop and Bright Sparks evening. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 27 October Worthing & District Amateur Radio Club is taking part in the 80m SSB Sprint contest. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 28 October Bittern DX Group is planning development and training events. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 28 October Echelford Amateur Radio Society is having a bring & buy plus CW practice and natter night. Contact John, G4GSC, on 01784 451898.

On Thursday 28 October Edgware & District Radio Society is having a talk on visiting the Galapagos Islands by Mike, G4RNW. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 28 October Reading & District Amateur Radio Club is holding its autumn junk sale. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 28 October Shefford & District Amateur Radio Society is planning for CQWW. Details from David, G8UOD, on 01234 742 757.

On Friday 29 October Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371.

On Friday 29 October Waterlooville Amateur Radio Club is having a talk on the RAF. Details from Rich, G4IBW, on 02392 680852.

On Friday 29 October Wimbledon & District Amateur Radio Society is holding its AGM. Contact Jim, M0CON, on 020 8874 7456.

On Saturday 30 October Shefford & District Amateur Radio Society is taking part in CQWW. Details from David, G8UOD, on 01234 742 757.

NEWS FOR THE SOUTH WEST

On Monday 25 October Bristol RSGB Group is having a talk on the VK9X/G6AY Christmas Island Dxpedition by Phil Whitchurch, G3SWH. Details from Robin, G3TKF, on 01225 420442.

On Wednesday 27 October Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 27 October Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 28 October South Bristol Amateur Radio Club is on the air. Contact Len, G4RZY, on 01275 834 282.

On Thursday 28 October Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Friday 29 October North Bristol Amateur Radio Club is having an electronics evening, looking at the process of populating a board. Details from Dick on 01454 218362.

On Friday 29 October Torbay Amateur Radio Society is having a local newspaper audio visual presentation. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Tuesday 26 October Marches ARS will be holding its AGM at the new club venue. All members are urged to attend. For more information contact Dave, MW0AYM, on 01691 777242.

On Thursday 28 October Aberystwyth & District Amateur Radio Society is on the air with David, 2W0EDW, initially on 145.500 and then 145.550. Details from Ray, GW7AGG, on 01970 611853.

On Friday 29 October Newport Amateur Radio Society is closed for half term. Details from Ross Clare, GW3NWS, on 01633 880146.

956. SARL NEWS - SUNDAY 24 OCTOBER 2010

SARL NEWS - SUNDAY 24 OCTOBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

In the news today:

PRESIDENT'S NET SHAPES SARL RESPONSE TO DRAFT REGULATIONS

RADIO AMATEUR RE-ELECTED ITU SECRETARY GENERAL

CISPR TO START FROM SCRATCH ON PLT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

PRESIDENT'S NET SHAPES SARL RESPONSE TO DRAFT REGULATIONS

A record number of listeners and participants made input to shape the SARL's response to the draft Radio Frequency Spectrum Regulations published in the Government Gazette by ICASA for comment. The SARL has published draft three of the response which is now available on www.sarl.org.za. The final draft is being worked on which entails fine tuning the text and adding explanations and motivations to support the SARL position. The final document will be posted on the web once it has been submitted. Comment to draft 2 can be sent to armi@sarl.org.za before 28 October 2010. Please only post comments to armi@sarl.org.za and not any other email address.

The SARL website has been erratic and at times slow. The ISP is working on the problem and has escalated it to high level support. There is no clarity of what is causing the problem. Some anomalies have been picked up that are being investigated. The SARL apologizes for the inconvenience.

An alternative way to access the second draft of the SARL proposed comment to ICASA visit www.amateurradio.org.za/armi.htm.

RADIO AMATEUR RE-ELECTED ITU SECRETARY GENERAL

Member states of the International Telecommunication Union have elected Dr. Hamadoun Tour&#65533;, HB9EHT, of Mali as Secretary-General of that organisation for a second four-year term. Dr. Tour&#65533; won the position with 151 votes, with 157 countries present and voting.

Addressing the conference after the vote, HB9EHT told close to 1 500 conference participants from around the world that he will put a special emphasis on broadband access, as well as continuing to ensure that cyber-security is high on everyone's agenda.

Tour&#65533; has also pledged to ensure that small island developing states and land-locked countries get special attention. He also said that he will encourage more private sector involvement through public-private partnerships, both within ITU and in the field.

CISPR TO START FROM SCRATCH ON PLT

The CISPR PLT Project Team reached the end of their mandate period of five years, without producing a useful document, which would guarantee the ongoing protection of radio services. This means that work done during the past ten years has not been fruitful. CISPR will have to start from zero.

In the interim workgroup 6 of the SABS Technical Committees 73 and 80 which is chaired by the SARL representative, Hans van de Groenendaal, met during the past week and reviewed the draft regulations that were prepared with the workgroup's input by ICASA. Some minor enhancements were proposed. As part of the regulations, companies intending to install PLT systems have to register all details on a publicly available data base.

The SARL is keeping a close watch on developments. While our wishes to have all amateur frequencies notched were not accepted, there is a clear understanding by the vendors of PLT equipment that taking care of notching of Amateur frequencies is a prerequisite for a successful network. The interference mitigation process included in the draft regulations provide for fast remedial action should interference on HF be experienced.

Limits used in the draft regulation are the same as in CISPR 22. These limits were the reason why the PLT Project Team could not reach agreement as the majority of the CISPR members were not prepared to lower the limits as demanded by the PLT industry. South Africa's representative at CISPR, Eric Winter, did a sterling job putting all his efforts into ensuring that sanity prevailed in favour of protection of HF. Thanks Eric.

RADIO ZS

The back page of Radio ZS is becoming available from the November/December 2010 edition. If your company would like to advertise in this prime position in Radio ZS, please send an email to zs6akv@sarl.org.za with contact details and the person to contact.

CLUB NEWS

YL NET

A group under the leadership of Anette, ZR6D, are starting a YL net to get die YLs more involved with the radio and over the air waves. There are many YLs with licenses but we never hear them. For instance, many YLs took part in the YL Sprint but only 10 sent their logs in. It is now the time to get involved.

The Yl net starts on 31 October 2010 at 15:00 on the Magalies Repeater, frequency 145,750 MHz. All YLs are welcome. If you don't want to talk at first, please attend the call in. If you have any interesting news or suggestions please call Anette at 073 1999032 or e-mail her to zr6d@ymail.com.

During the annual general meeting of the Sasolburg amateur radio club, ZS4SRK, held on the 18th October 2010, members were elected to serve on the club committee as follows:

Chairman: Gideon Jannasch, ZS4GJA Vice Chairman: Frik Wolff, ZS6FZ Secretary: Erich Jannasch, ZS4VW Treasurer: Corn&#65533; Cronj&#65533;, ZU6C Asst. Treasurer: Amanda Greeff, ZR6AGS Newsletter: Riaan Greeff, ZS4PR Media Liaison: Andries Visagie, ZS6VL, Riaan Greeff, ZS4PR, Jaco Greyling, ZS6JCO Technical: Ockerd Taljaard, ZS6LZ, Frik Wolff, ZS6FZ, Riaan Greeff, ZS6PR Technical (acting): Johan Steyn, ZS4SS, Frans Durand, ZS4FD.

Every success the new committee and many thanks the previous committee members for their valuable contributions.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Active Sunspot 1 112 is heading towards the western limb and will soon rotate out of direct earth view. Sunspots 1 117 and 1 118 were both numbered on Tuesday and are located towards the northeastern limb. The effective sunspot number is expected to be less than 20 for the coming week.

20 m will provide the best opportunities for DX followed by 15 and 10 m. Conditions to India will be good from the afternoons till after sunset. During the afternoons conditions will be good towards Europe firstly on 10 m, later followed by good 15 and then 20 m openings. Evening 15 m contacts with the USA are at last possible again. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

28 October - Last day for comments on Draft 2 of the SARL's comments on draft radio regulations; 31 October - Start of YL net at 15:00 on 145,750 MHz in Pretoria.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

957. IRTS Radio News Bulletin, Sunday 24th October 2010

Newsgroup: rec.radio.amateur.misc

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 24th October 2010

Echo Ireland

The October edition of Echo Ireland has now been mailed to members. It includes plenty of news about DX, with the regular "HF Happenings" column by Dave EI9FBB covering recent and upcoming DX activities. There is also an article celebrating Dave's remarkable achievement of 10 band DXCC over a six year period.

DX of another kind is covered in the newsletter, with an account of the Marconi Company's station in Ballybunion which was responsible for the first wireless telephone communication across the Atlantic, in March 1919.

The newsletter also contains another episode on the ATV experiments by Pat EI2HX, updates on amateur satellites, an article on AREN participation in the Burren Walk and news of Worked All Ireland activity on 80 metres.

Contest activities are well covered with a report on the World Radiosport Team Championships and, closer to home, the Galway VHF Group's entry in the recent SSB Field Day. Results for CW Field Day and the June 80 metre Counties Contest is also included.

THEORY EXAMINATION

The results of the theory examination for the Amateur Station Licence held on 6 October were issued during the week by ComReg. Of the 14 candidates who sat the examination 9 passed. Congratulations to those who passed and we hope to hear you on the air soon.

Since IRTS took over responsibility for setting, organising and correcting the theory examination in May 2005, twelve examinations have been held. A total of 234 candidates have sat these examinations and 139 were successful in obtaining the Harmonised Amateur Radio Examination Certificate (HAREC).

The next theory examination will be held in early July 2011.

EI8GQB aka ON4EI - Benneshill 25th-31st October

Oliver will again be QRV from Ireland near Fethard (IO62EL) on top of Benneshill (170m ASL) with his Irish callsign EI8GQB, from October 25th to 31st 2010. He will enter the CQ WW SSB CONTEST as SOAB Low Power Non Assisted (October 30-31).

Reference frequency before the contest is 7.150 MHz +/-QRM. During the week before the contest Oliver will build 2 reflectors East-West for 40m and 2 for 80m on a 5/8 40m vertical, using the SPITFIRE ARRAY concept developed by K1VR and W1FV.

Equipment: 18m vertical top loaded monopole and Inverted V for 160/80/40. Spider beam for 20/15/10. Rig is Elecraft K3 100 W. Oliver will hold a daily expedition blog with all the details of the experimentation, please see www.qrz.com/db/EI8GQB for more details.

Science Week 2010

Science Week is being held from the 7 to 14th Nov. Clubs are encouraged to take advantage of the publicity generated by Science Week to promote their activities, perhaps by putting on a special event station or partnering with some other local Science Week project.

More details on the Website www.scienceweek.ie

AREN Training Event

AREN announces its first ever weekend training and social event. Taking place over the weekend of the 13th and 14th of November on the shores of Lough Derg. This central picturesque location has been popular with other Voluntary Emergency Services for training and social activities.

Saturday's activities will include practical training and a taste of GlobalSET. It will wind down with a tour of the local RNLI station followed by dinner before moving on to the Whisky Still bar for 'craic agus ceoil' with local trad' musicians.

Attendees can arrive on Friday night or Saturday morning ,An afternoon finish on Sunday will ensure you are home early that evening. Our host Declan EI2GE has kindly arranged generous rates for accommodation and meals. Full details will be circulated to members in due course.

AREN also hold a net on the 7th and 21st of the month at 1930 local on 3660 plus or minus. This is a training net for AREN members. However anyone interested in finding out more about AREN activities is more than welcome to call in once the net is established.

CY0, Sable Island update

The Web page will be updated as they are completed. The original flight to the Island on Thursday the 21st had to be cancelled due to a low ceiling of only 200 feet and marginal sea conditions.

Please check the Web for updates at: http://www.CY0dxpedition.com

---

Rallies

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1861 First transcontinental telegraph msg from San Francisco to Washington. The Pony Express completed its last run this same day.

1879 Edison invents the incandescent electric lamp.

1884 Edison patents 2 element lamp. (Diode valve)

1915 First Trans Atlantic speech relay by radiotelephone by AT&T Arlington to Paris.

1922 BBC is formed in Britain.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1AC, K1XN & GoList, KV1J, NC1L, NJ1Q, AA3B, K3GV, NG3K & ADXO, WA3RHW, N4AA & QRZ DX, N4JF, AA5AM, N6PSE, K8MFO, K8YSE, W8GEX (60m News), N0TG, AT International, DK8JB, DL1SBF, DL7MAE & The DX News Letter, DX World.Net, F6AJA & Les Nouvelles DX, FO8RZ, G0IAS, G3SWH, I1JQJ/IK1ADH & 425 DX News, IK5ROS, IK7JWX, ON5NT, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RN7A, RSGB IOTA Web Site, RU6UR, UT5UGR, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VK2HV for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17th-October, through Sunday, 24th-October there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or to IZ8CCW. Read about Ashraf on the following Web

page at: http://www.qsl.net/3v4-002

3W, VIETNAM. Michal, OM2DX, will be active as 3W1M from Hanoi during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (15m) entry. QSL via OM3JW, direct or by the Bureau (see details at QRZ.com).

5X, UGANDA. Graham, 5X1GS, is back in Kampala and is expected to be on the air again soon. He has been off the air since the beginning of the year working in Southern Sudan.

6W, SENEGAL. Mark, AA1AC, will be active as 6W/AA1AC from La Somone, between December 1-7th. QSL direct or by the Bureau to his home callsign.

6W, SENEGAL. A German team made up of Matthias/DL5MFL, Juergen/DL4MAQ and Sven/DF9MV are planning to be active from Senegal between November 8-18th. A 6V7** callsign is being requested and will be released when available. The group will be guests of Francois, 6W7RV, at the "Le Calao" resort and will do a "dedicated holiday style" operation. Look for Juergen/ DL4MAQ and Sven/DF9MV to be active mostly on CW while Matthias/DL5MFL will be on SSB. The team wants to have two stations on the air simultane- ously, the main activity will be on CW and SSB, possibly some PSK31. They will have beams for 20/15/10/6 meters, a 4-square for 40 meters and also a vertical for 160/80/40 meters. For 30/17/12 meters they will use wire antennas. They do mention about possible power outages. QSL via DE0MST. The DXpedition currently has a Blog page running at: http://dl4maq.wordpress.com/category/6w8-2010

7Q, MALAWI. QSL Manager Allan, G0IAS, informs OPDX that Harry, 7Q7HB (G0JMU), has headed to the warmer climates of Malawi and will be there until sometime in January of 2011. Activity will probably be on the Digital modes and CW. QSL as usual is ONLY DIRECT to G0IAS with sufficient funds for return cards (1 USD is no longer sufficient postage). NO BUREAU cards. NO eQSLs. Just old fashioned paper cards DIRECT!

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW DX SSB Contest (October 30-31st) as Single-Op/All-Band/High-Power entry. QSL via NN1N.

9L, SIERRA LEONE. Stephen, G7BXU, will be spending the Christmas and New Year holidays in Freetown between December 19th and January 7th. He hopes to take his radio (FT-897) with him and a G5RV antenna. More details will be forthcoming.

9L, SIERRA LEONE (IOTA Op). Dr. Karl-Heinz Ilg, DK2WV, will once again be active from 9L-land, but this time to activate an IOTA with Heino/DJ9AF. They plan to activate the Banana Islands (AF-037) as 9L0W between November 4-18th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via DK2WV, direct or by the Bureau.

9Q5, DEM. REPUBLIC OF CONGO (Update). Christian, CX2CC, recently visited the Association des Radio Amateurs de la R.D.C. (ARAC, 9Q0AR - Congo's Radio Club) in Kinshasa and met Cyprien/9Q1KS, 9Q1MP and 9Q1MW. Reportedly, Christian has received his relevant license/paper authorization (for the

6th district region) and will return to the City of Goma, near the Rwanda border, on October 26th, where he is expected to be active as 9Q6CC. Just a reminder that he is there working for the United Nations for one year. So look for Christian to be active on CW (slow), SSB and the Digital modes. He is using a TS430 transceiver into a Log Periodic or wire dipole. QSL via his home callsign CX2CC: Christian Cardarello, Avenida Italia 3319, CP11600 Montevideo, Uruguay, South America. QSLs will not be answered until his return in December 2011. Please, direct QSL send a SAE with 2 USDs or a new IRC.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R during the CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry. Operators mentioned are: Toshinobu/JI3ERV, Mikiawa/JR7OMD, JE7HLZ, Nozomu/JE8KKX and Sato/JH7QXJ. QSL via JH7QXJ. ADDED NOTE: They suggest to listen to
7075-7100 kHz. QSL via JH7QXJ.

AH0, MARIANA ISLANDS. Operators Kuniyoshi/7L1FPU (W1FPU), Moto/W1NDE, Danilo/AH0BM, Hajime/AH0BR, Ryutaro/AH0BZ, Makoto/AH0V and Hiroyuki/KW2X will be active as AH0BT during the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry. The team will try to be active on 160/17/12 meters after the contest (November 1-2nd). QSL via 7L1FPU, by the Bureau or direct (w/SAE and 2 USDs) to: Kuniyoshi NAKADA, PMR9292, 3-23-3, Minami-Oi, Shinagawa-ku, Tokyo, 140-0013, JAPAN.

CN, MOROCCO. Operators Ahmed/CN8WK, Stefano/IK2QEI, Matteo/IK2SGC, Flavio/IV3TMV, Maurizio/IV3ZXQ, Tine/S50A, Robert/S57AW, Kristjan/S50XX and Saaid/CN8WW will be active as CN3A from Safi during the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry. QSL via LoTW or via I2WIJ. Visit their Web page at: http://www.facebook.com/pages/CN3A/112969535390789

CQ3, MADEIRA ISLANDS. Walter, DJ6QT, will be active as CQ3L from Madeira Island (IOTA AF-014, DIP MA-001, PIP MD-001, WLOTA 0053, DPRN FF-101, WFF CTFF-030) as a Single-Op/Low-Power entry in the CQWW DX SSB Contest (October 30-31st). QSL via DJ6QT, by the Bureau or direct.

CQ9, MADEIRA ISLANDS. Members of the CT3 Team will be active as CQ9T from Funchal during the CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry. QSL via LoTW. Visit their Web page at: http://www.ct3team.com

CR2, AZORES. Jeff, N5TJ will be active as CR2X from Ribeira Grande during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via OH2BH. For more details, visit the Web page at: http://www.cu2a.com

CR3, MADEIRA ISLAND (AF-014). Members of the CT3 Madeira Contest Team will be active as CR3A during the CQWW DX SSB Contest (October 30-31st) as a Multi-? entry. QSL via LoTW or CQ9K. Operators mentioned are: Joe/CT3BD, Luis/CT3DL, Joe/CT3DZ, Luis/CT3EE, Duarte/CT3EN, Miguel/CT3IA, Tiago/CT3KU, Jose/CT3KY, Jose/CT3NT, Jose/CT1CJJ, Tony/CT1FFU and Filipe/CT1ILT.

CT9, MADEIRA ISLANDS. Darren, G0TSM, will be active as CT9/G0TSM during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via G0TSM. This will be a holiday style operation.

CY0, SABLE ISLAND (Update/Operation Postponed). Randy, N0TG, reports: "Today, prior to our planned departure to Sable Island on Saturday, a major safety issue was discovered with the charter aircraft that requires repair before we can fly. As of this writing, parts have not yet been located and it is estimated that acquiring parts and completing the repairs will extend as much as 3 weeks or longer. Thus, we will be returning to the U.S. to 'regroup' and reschedule a return for another try. Hopefully, a new date can be announced in the near future. Info and details will be posted on the website <http://www.CY0dxpedition.com>, as they develop. Thanks to all for your patience and understanding."

DXCC NEWS.....
* Bill Moore, NC1L, Awards Branch Manager, reports: "The following operations are approved for DXCC credit:
9U1KI – Burundi; 2010 Operation
9U1RSI – Burundi; 2010 Operation
9U1VO – Burundi; 2010 Operation
9U4T – Burundi; 2010 Operation
A51A – Bhutan; 2010 Operation
T6MB – Afghanistan; 2010 Operation

If you've had any of these operations rejected in a recent submission please send a note to dxcc@arrl.org. You can verify the update to your records either by checking your LoTW account, or, you'll see a change in the live daily listing on the DXCC web site."

* Bill Moore, NC1L, Awards Branch Manager, reports: "You may submit all your QSOs with PJ stations to LoTW anytime. There is no need to hold them out of your log or do anything differently from what you already have been doing. You do not need to assign country names or identifiers. After we issue certificates to the PJ license holders, LoTW will make matches and assign the correct entities automatically."

E2, THAILAND. Members of the "Radio Amateur Society of Thailand" (RAST) [under patronage his majesty the King "HS1A"] will be active as E2E for the first time during a major contests - CQWW DX SSB Contest (October 30-31st), as a Multi-Multi entry. Look for activity on 80-10 meters. Please note on 80m - only between 3500-3540 kHz!! Operators mentioned are: Winit/HS1CKC, Champ/E21EIC, Swen/DB3KT/HS0ZFZ, Joe/HS0ZGQ, Aart/PA3C, Baz/ZL1DD and possibly other guests.

FO, FRENCH POLYNESIA. Phil, FO8RZ, from Tahiti Island (OC-046), informs OPDX that he will be active during the CQWW DX SSB Contest (October 30-31st) as Single-Op/High-Power/Assisted (or not) entry. QSL via LoTW or via F8BPN, by the Bureau or CBA. Online log is available at: http://f5phw.hamlogs.net

FP, ST. PIERRE & MIQUELON (Update). Eric, KV1J, will be operating from the Island of Miquelon ((NA-032, DIFO FP-002 WLOTA 1417, Grid GN17)

as FP/KV1J between October 26th and November 2nd. He states, "The dates may shift a bit depending on the weather and available transportation. This is a French territory (Collective) off the coast of Newfoundland. I will be mostly on the low bands but plan to take breaks and work as many of the FM satellite passes that I can. I have AO-51, AO-27, SO-50, SO-67, and HO-68 programmed with Doppler shifts in an FT-817. I will be doing this outside with an Arrow 146/437-10 antenna. The weather can get rough where I am and the winds are high so I will do my best under the conditions. I have a digital audio recorder tied to both the TX and RX audio so I will do the final logging when I return inside. I was on from this spot in November 2009 using the AO-51 bird with good results. This trip, I hope to try other satellites when they are available. Once I am on the island, it gets busy with the setup and the low bands so it is not practical to do scheds, but I will favor the daylight passes since they are easier to operate outdoors. I have a web page at <http://www.kv1j.com/fp/october10.html> for more information, and I will try to put some status information there when I can. I do have internet access but it is not always available. I will be traveling via the Island of Saint Pierre. If I get on from there, I will be grid GN16. Still operating as FP/KV1J."

GJ/MJ, JERSEY (EU-013). Rich, K2WR, will once again be active as MJ0AWR before the CQWW DX CW Contest (November 27-28th). For activity during the contest, look for him to use the callsign GJ2A and be a Single-Op/All-Band/ High-Power entry. QSL GJ2A via K2WR or GJ3DVC. QSL MJ0AWR via K2WR.

IO5, ITALY. The TEN-FIFTY Contest Group will be active as IO5O during the CQWW DX SSB Contest (October 30-31st) as a Multi-One entry. QSL via IK5RLP, direct or by the Bureau. Operators mentioned are: Marco/IK5ROS, Claudio/IK5RLP, Riccaedo/IZ5BRW, Virginio/IZ5EKV, IZ5EFX, Riccardo/IZ5EBL, Marco/IZ5EME and Alex/IV3KKW. Live video and shoutcast audio stream will be available at: http://www.ik5ros.net

IOTA NEWS.....
AF-018. Mauro, IK1ZNM, will be active as IH9/IK1ZNM from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (??) entry. QSL via IK1ZNM.

AF-068. (RARE!). Toufelaz, CN8QY, is currently active from the National Park of the Iles of Mogador (Essaouira, AF-065, CNFF-009), but is expected to activate the National Park off the coast of Dakhla, Sahara, on the Island of Herne (AF-068, CNFF-007), between now and October 28th. Exact dates are not known. QSL via I8LWL.

AS-056. Members of the Sony Kyushu's amateur radio station club (JF6ZNT) will activate the Island of Danjo in the East China Sea as JF6ZNT between November 5-7th. Operators mentioned are: Osamu (Leader), Takato/JH6TKW, Hitoshi/JR0UIU, Ryo/JH5UPS and Atsu/ JA2WBE. The island is one of today's most wanted Japanese IOTA group (JCC No.4211). Activity will be on 80-10 meters using CW,

SSB and RTTY. QSL via the Bureau or direct via each operator's
home callsign.

EU-172. Thomas, DL4VM, will be active as OZ/DL4VM from Fyn Island
(DIA FY-001, WLOTA 2690) between May 28th and June 18th, 2011.
Activity will be on 30/15/6 meters, using CW and PSK. QSL via
his home callsign, by the Bureau or direct.

SA-012. Vlad, UY5ZZ, will be active as YV7/UY5ZZ from Margarita Island
between October 26th and November 7th. Activity will be on the
HF bands, and include the CQWW DX SSB Contest (October 30-31st)
and Ukrainian DX Contest (November 6-7th). QSL via his home
callsign.

SA-039. A group of South American operators will activate Isla de
Lobos (WLOTA 0799, ARLHS URU-002) as CW5R between December
8-13th. Operators mentioned are YL Andreina/YY4AND, Atilano/
PY5EG, Peter/PY5CC, Rick/PY2EL, Hugo/CX1ABB, Lupo/CX6ABC,
Jorge/CX6DAP, Nelson/CX6ACY, Enrique/CX8BBA, Bano/CX3ABC,
Pedro/CX5BW, Julian/CX5BE, Lupo/CX2ABC, Federico/CX7BZ and
Aparicio/CX1BM. Activity will be on 80-6 meters using CW,
SSB, RTTY and PSK31. QSL direct to CX2ABC. Visit their Web
page (under construction) at: http://www.cw5r.net

KG4, GUANTANAMO BAY (NA-015). John, KG4EM, will be active during the
CQWW DX SSB Contest (October 30-31st) as a Single-Op/Low-Power entry.
QSL via KG4EM (see QRZ.com).

KH6BZF PROPAGATION FORECAST/REPORT (For October 25-31st)....
Oct 25 HN SOLAR REFERENCE KEYS

Oct 27 AN BN - Below Normal
Oct 28 AN-HN AN - Above Normal/Geomagnetic Level is QUIET
Oct 29 HN-AN LN - Low Normal
Oct 30 HN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 31 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH7, HAWAII. Once again the members of the "Coconut Wireless Contest
Club" (formerly AH6XX) will be active as KH7CW from Aiea, on the Island
of Oahu (USI HI008S, WLOTA 1227, WW Loc. BL11bj, Honolulu county), Hawaii
(OC-019) in the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry.
Operators mentioned are: Rich/K2WR, Tetsuo/AH7C and Kan/JA1BK (KH6BK).
QSL via LoTW, or direct to K2WR.

KP3, PUERTO RICO. Operator Felipe, NP4Z, will be active as KP3Z during the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via N4AO.

MX0, ENGLAND (Special Group). Team Thunderbox is a group of people who enjoy the lighter side of Amateur Radio and will be active as MX0TBG between October 23-31st. The group states, "We all belong to various radio clubs, and come from very different backgrounds in and around the Wiltshire area, coming together several times a year to enjoy the great outdoors through amateur radio." Visit their Blog page at: http://teamthunderboxactivities.blogspot.com

NEW OFFICERS FOR 2011. At their October 2010 annual meeting, the members of the National Capitol DX Association (NCDXA) (http://www.qsl.net/ncdxa/) elected the following officers to serve in 2011:
Vytas "Al" Cerniauskas, WA1T - President
John Kanode, N4MM - Vice President
George Vincent, K3GV - Secretary
Brian Bayus, N1KC - Treasurer

P4, ARUBA (SA-036). Operators Andy/AE6Y, John/K0DQ, Edmund/N4OC and Jean-Pierre/P43A will be active as P49Y during the CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry. QSL via AE6Y.

PJ ACTIVITY LIST (UPDATED):
PJ2A - Curacao Island; DXCC Code 517; IOTA SA-099; length of activity unsure; QSL via N5UCF. No online logs.

PJ2T - Curacao Island; DXCC Code 517; IOTA SA-099; More activity should start this week through November 2nd, as a team prepares for the CQWW DX SSB Contest; QSL via N9AG or LoTW. Online logs at:
http://www.k8nd.com/Curacao-2010.html
http://www.clublog.org/charts/?c&#65533;2T

PJ2/OH1VR - Curacao Island; DXCC Code 517; IOTA SA-099; Now QRT; QSL via his home callsign. No online logs.

PJ2/PE2B - Curacao Island; DXCC Code 517; IOTA SA-099; resident on the island; No online logs. Bart, PE2B, states on QRZ.com, "When I finally have my resident callsign, I will set up a new QRZ-page. I am not into QSLing right now, but when I receive my callsign I'll have my cards printed and send them out to all the OM's that I worked here, after I received theirs. More info will follow."

PJ2/W5MPC - Curacao Island; DXCC Code 517; IOTA SA-099; Now QRT; QSL via his home callsign, direct or by the Bureau. No online logs.

PJ4B - Bonaire Island; DXCC Code 520; IOTA SA-006; through October 22nd; QSL via PA8A. As of 10/21/10 (0042z): Total 13316 QSOs; Unique callsigns 7949. Online log

at: http://www.clublog.org/charts/?c&#65533;4b

PJ4D - Bonaire Island; DXCC Code 520; IOTA SA-006; now QRT;
QSL via W3HNK. Total about 34k QSOs. Online log at:
http://www.bonaire2010.com

PJ4I - Bonaire Island; DXCC Code 520; IOTA SA-006; now QRT;
QSL via DL9USA. No online logs.

PJ4LS - Bonaire Island; DXCC Code 520; IOTA SA-006; resident
on the island; QSL direct to address on QRZ.com.
Total about 2k QSOs. Online log at:
http://www.bonaire2010.com

PJ4N - Bonaire Island; DXCC Code 520; IOTA SA-006; now QRT;
QSL via DJ8NK (not W3HNK). No online logs.

PJ4NX - Bonaire Island; DXCC Code 520; IOTA SA-006; resident
on the island; QSL direct to address on QRZ.com or by
the Bureau via PA3CNX. No online logs.

PJ4W - Bonaire Island; DXCC Code 520; IOTA SA-006; now QRT;
QSL via W3HNK. Total about 8k QSOs. Online log at:
http://www.bonaire2010.com

PJ4X - See PJ4 below.

PJ4/PG4M - Bonaire Island; DXCC Code 520; IOTA SA-006; Now QRT;
QSL direct to home callsign. Total about 400 QSOs.
Online log at: http://www.bonaire2010.com

PJ4/W9NJY - Bonaire Island; DXCC Code 520; IOTA SA-006; through
October 29th; QSL via W9NJY or LoTW after the January
1st (2011).

PJ5/K1XM - St. Eustatius; DXCC Code 519; IOTA NA-145; now QRT;
QSL via KQ1F. No online logs.

PJ5/AH6HY - (not PJ5/AH6DX) St. Eustatius; DXCC Code 519; IOTA
NA-145; Now QRT; QSL via AH6DX, direct or by the
Bureau. No online logs.

PJ5/AA4NC - St. Eustatius; DXCC Code 519; IOTA NA-145; Now QRT;
QSL via AA4NC direct only. Logs will be uploaded to
LoTW. NO BUREAU QSLs. No online logs.

PJ5/SP6EQZ - See PJ5 below.

PJ6A - Saba Island; DXCC Code 519; IOTA NA-145; now QRT;
QSL direct only to N4NX, or use the online OQRS system
for direct and Bureau QSLing. As of 10/22/10 (2102z):
Total of 57515 QSOs. Online log at:
http://www.saba2010.com

PJ6/K4LMY - Saba Island; DXCC Code 519; IOTA NA-145; Now QRT;
QSL via K4LMY. No online logs.

PJ7/K4UWH - See PJ7 below.

PJ7E - Sint Maarten; DXCC Code 518; IOTA NA-105; now QRT;
QSL via LoTW, OQSL (see Web page) or direct to: Sint
Maarten 2010, Box 333, Bethlehem, Georgia 30620-9989
USA. As of 10/20/10 (2201z): Total of 74412 QSOs.
Online log at: http://www.stmaarten2010.com/log.html

PJ7MF - Sint Maarten; DXCC Code 518; IOTA NA-105; resident on
the island; QSL via IZ1MHY, ONLY DIRECT. Online log at:
http://www.iz1mhy.tk

PJ4, BONAIRE ISLAND (SA-006). Operator Martin/W1MD and possibly others
will be active as PJ4X during the CQWW DX SSB Contest (October 30-31st)
as a Multi-? entry. QSL via W1MD or LoTW.

PJ5, SINT EUSTATIUS ISLAND (NA-145). Wlodek, SP6EQZ, will be active
as PJ5/SP6EQZ between November 17th and December 3rd. Activity will be
active on the HF bands. QSL via his home callsign, direct or by the Bureau.

PJ7, SINT MAARTEN. Charlie, K4UWH, is now active as PJ7/K4UWH until
November 5th. Activity will be sporadic on 40-10 meters CW only. He was
heard this past Sunday on 40 and 20 meters CW. QSL via his home callsign,
direct, by the Bureau or LoTW.

NO LONGER MANAGER. Phil Whitchurch, G3SWH/AD5YS, reports: "Please note
that I am no longer the QSL Manager for James, 9J2CA or 9I40CA and have
no blank cards left."

TS8P QSL STATUS. Fred, IK7JWX, reports that all direct QSLs are in the
mail and he plans to start the Bureau QSLs.

Yura, RU6UR, informs OPDX that anyone needing a QSL for R10KDR, LY10KDR, EM10KDR, DQ10KDR and ER10KDR, send ONLY DIRECT (please w/SAE + 1 USD or IRC) to: Yura Kamenski, Nemova 12-A, 13 Astrakhan, 414028, Russia.

QSLS VIA LoTW: CQ9K, CT3BX, DL3TD, EA3GHZ, LU1ICX, OZ7A, PJ7/K1XM, RA0FF and V44KAI

QSLS RECEIVED VIA MAIL: 3A2LF, 9X0LX, E4X, EA8TB, JY5HX, PJ5NA, R1FJM, S79SAL, S92LX, XT2EME, XV9DT, YK1BA and ZL5CP

QSLS RECEIVED VIA THE BUREAU: AO5YJ, DD7EQ, HG1A, MM0BNN/P and SV8/I3BQC/P

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F during the CQWW DX SSB Contest (October 30-31st) and CQWW DX CW Contest (November 27-28th) as a Multi-? entry. QSL via DK4VW.

SILENT KEYS.....
* Ghis, ON5NT, informs that he recently learned that Marcel, ON4QM, became a Silent Key (SK) some time ago this year. He had been seriously ill for a long time. He had given up his callsign in Belgium since 2007. Marcel will be remembered mainly for his IOTA DXpeditions in the Pacific, such as FO0DEH (from several rare islands in French Polynesia), ZK2XX, ZK3DM and FW5XX.

* Jerry, N4JF, reports that Mike, UA0MF, became a Silent Key (SK) on September 2nd, due to a heart attack. Mike was the first person in Russia to be on "Top of the Honor Roll".

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above Silent Keys (SK).

SOUTH AMERICAN/ANTARCTIC TOUR. Svein, LA6IKA, will be on a three month trip through South America and an Antarctic boat tour beginning October 28th. His activity will start from Tierra del Fuego (SA-008) and other parts of Argentina as LU/LA6IKA. Svein will also be active as LA6IKA/MM from the ship "MS Fram" en route to Antarctica from Buenos Aires between November 1-19th. The ship will visit Falkland Islands and South Georgia. He hopes to get a VP8 licence when in Port Stanley. Svein also plans to be active as LA6IKA/CX from Uruguay in December, and ZP/LA6IKA from Paraguay in December/January (still waiting for ZP licence). Operations will be "holiday style" using an IC-703 and home-made vertical antennas, Activity will be mainly CW and some PSK31. QSL via his home callsign, by the Bureau, direct or LoTW and eQSL.

ST, SUDAN. Robert, S53R, will be active as ST2AR from Khartoum during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/Low-Power/ Unassisted entry. QSL via S53R.

T6, AFGHANISTAN. Paul, N6PSE, sent out the following press release: "The Intrepid-DX Group is pleased to announce our next DXpedition as T6PSE from Afghanistan, to take place during ten days in May of 2011. Due to security concerns, the exact dates and location of the DXpedition will not be given at this time. The Intrepid-DX Group is the same group which

brought you the April 2010 YI9PSE DXpedition from Iraqi Kurdistan.
Once again, ICOM America has agreed to be our Radio Sponsor, ACOM-K1LZ
is providing the very robust Acom amplifiers. Antennas are being provided
by SteppIR Antenna Systems. DX Engineering, The DX-Store and The RF
Connection are also committed to sponsoring the operation.
Our primary objective is to activate Afghanistan with a goal of providing
as many DXers as possible a 'new one' with this rare DXCC entity and, as
a secondary objective, to give as many band-slots as possible. We will
focus on North and South America during those periods when propagation
is possible to those areas.
The team is expected to consist of ten operators including: Co-Leader
Paul Ewing-N6PSE, Co-Leader David Collingham-K3LP, Hrane Milosevic-YT1AD,
Krassy Petkov-K1LZ, John Kountz-WO1S/T6EE, Heathem Sabah-YI1UNH, David
Flack-AH6HY, Jack Ritter-W0UCE and Wayne Rogers-W5KDJ."

T7, SAN MARINO. Members of "Tifariti Gang" will be active as T70A in the
CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry, using the contest
station of the "Amateurs Radio Republic of San Marino" (ARRSM).
Operators mentioned are: Antonio/EA5RM, Flo/F5CWU, Fabrizio/IN3ZNR,
Giorgio/IZ4AKS, Mike/UA9KGH, Valery/UT7CR and Dimitri/UY7CW. QSL T70A
via A.R.R.S.M. Radio Club, P.O.BOX 77, 47890 Rep. San Marino, SAN MARINO.
For more info, see: http://www.dxfriends.com

TE8, COSTA RICA. Carlos, TI8II, will be active as TE8I during the CQWW
DX SSB Contest (October 30-31st) as a Single-Op/All-Band/Low-Power entry.
QSL via TI8II direct.

TO7/FM, MARTINIQUE (NA-107). Dim, UT5UGR, will once again be active as
FM/KL7WA between October 26th and November 3rd. Activity will be on all
bands except 30/17/12m and the Digital modes. His activity will also
include the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-
Band/High-Power entry. During the CQWW DX SSB Contest he will sign TO7A.
QSL FM/KL7WA and TO7A via UT5UGR.

V2, ANTIGUA (NA-100). A team of operators will once again activate the
V26B super station at Gunthroppes, during the CQ WW DX SSB Contest
(October 30-31st) as a Multi-Single entry. Activity will be on all
bands. Operators mentioned are Brian/N3OC, Robert/W2BZR, Robert/NQ3X
and Sal/IK8UND. Please QSL V26B direct to KA2AEV or LoTW.

V2, ANTIGUA (NA-100). Bud, AA3B, will be active as V26K between November
24-29th. His activity will include the CQWW DX CW Contest (November
27-28th) as a Single-Op/All-Band/Low-Power entry. This will be an all
CW operation on the contest HF bands only. Please QSL via AA3B.

V31, BELIZE. Operators Mike/W7ASF and Tom/KB7JAL will be active as V31MH
and V31TS, respectively, from Belize between October 27th and November
4th. Activity will be on 80-20 meters using mostly SSB, with plenty of
PSK. The duo plans to have "lots of fun before, after and during the CQWW
contest." Mike states, "We are 'old guys' and not very good contestors,
but we like the fun of it all and the thrill of being on the other end
of a pileup (with luck)."

VK8, AUSTRALIA. Stuie, VK8NSB, will be active during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via M0URX.

VK9C, COCOS KEELING ISLANDS. Phil, G3SWH, sent out the following press release (edited): "Phil/G3SWH and Jim/G3RTE will be active from West Island in the Cocos (Keeling) Islands between February 22nd and March 5th, 2011. The Cocos (Keeling) Islands count as OC-003 for IOTA purposes. The 2009 'Most Wanted' survey by the DX Magazine shows the Cocos (Keeling) Islands at #75 worldwide for DXCC purposes.
We will both use the single callsign of VK9C/G6AY. Our activity will be on CW only on all bands 80-10 meters. There will be no 160, 6 meters or EME activity.
Propagation permitting, we plan to have two stations on the air for as many hours every day as is possible. Our main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs.
QSL via G3SWH, either direct with SAE and adequate return postage (recommended), via Phil's web site for a bureau reply or via the bureau. This will be a very expensive DX-pedition. We are happy to meet the costs of transport to and from the islands, but are seeking sponsorship and donations from individuals, DX clubs and organizations towards our living expenses on the island, printing QSLs and the like.
There is more information at: http://www.g3swh.org.uk/vk9c-g6ay.html "

VP2V, BRITISH VIRGIN ISLANDS. Peter, G3PHO, will be active as VP2V/G3PHO from Tortola Island (NA-023) between March 11&#65533;18th. Activity will be on 160-10 meters using CW and SSB. QSL via his home callsign.

VP5, TURKS AND CAICOS ISLANDS. Operators Frank/WA2VYA, Tony/W2WAS and Bruce/WA3RHW will be active as VP5T during the CQWW DX SSB Contest (October 30-31st) as a Multi/Multi/DXpedition entry. QSL VP5T via LoTW, or via N2VW (by the Bureau or direct). Their activity will be from Providenciales (NA-002). They will be there between October 26th and November 2nd. Activity outside the contest, operators will sign VP5/homecall. QSL to their home callsigns, by the Bureau or direct.

YB, INDONESIA. Members of the ORARI Daerah Jawa Tengah Contesting Team will be active as YE2R from Semarang on the Island of Java (IOTA OC-021, WLOTA L1660), during the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry. QSL via EB7DX. Operators mentioned are: Djoko/YB1TJ, Hans/YB2DX, Seno/YB2LSR, Jon/YB2ECG, Dani/YB2TJV, Deta/YB2VTO, Buntoro/YB3PXF, Adhi/YB3MM, Bobby/YC2BBY, Thomas/YB3KM and Joni/YB9WZJ. Visit the YE2R Web Blog at: http://www.ye2r.wordpress.com

ZA, ALBANIA. Miroljub, YT1CS, will be active as ZA/YT1CS during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via his home callsign.

ZL7, CHATHAM ISLAND. Seppo, OH1VR, and possibly others will be active from Chatham Island (OC-038) as ZL7VR between November 23&#65533;29th. Activity will be on the HF bands (specific bands and modes not provided). Operations will also include the CQWW DX CW Contest (November 27-28th), using the callsign ZL7V. QSL both callsign via OH1VR.

ZL7, CHATHAM ISLAND (Update). Hiro, JF1OCQ/W1VX, will be joined by Toshi, JE1SYN, to be active as ZL7/ZL1WY and ZL7/W1SY, respectively, from the Chatham Island (OC-038) between December 2-9th. Activity will be on 160-6 meters using CW, SSB, FM and the Digital modes. There will be an emphasis on 160 and 6 meters (for the Pacific). He will operate a breakable Beacon on 50.117 MHz for DX around the clock. QSL ZL7/ZL1WY via JF1OCQ only: Hiro Miyake, 1-3-6 Asakura, Maebashi, 371-0811 Japan. Do NOT send QSLs to the New Zealand Bureau. QSL ZL7/W1SY via JE1SYN.

ZM4, NEW ZEALAND. Members of the East Coast Contesters ZM2M Team will be active using a new callsign, ZM4T, in the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry. Operators mentioned are: Lee/ZL2AL, Stan/ZL2ST, Gary/ZL2IFB, Mike/ZL2CC, Holger/ZL3IO, Peter/ZL2LF, Tom/ZL2MY, John/ZL2QM and Wayne/ZL2WG. QSL via ZL2AL, direct or LoTW. Visit the ZM2M Web page at: http://www.zm2m.com

959. QSL Route Correction in OPDX.982

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-24 23:13:59 UTC
From: "Tedd Mirgliotta (KB8NW)" <kb8nw@barf80.nshore.org>
Message-ID: <760984.93891.qm@smtp104.sbc.mail.re3.yahoo.com>
Source record: 5378
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.info

CORRECTION PLEASE:
Please correct the QSL Route for PJ5/AH6HY under PJ ACTIVITY LIST (UPDATED).
It should read:

PJ5/AH6HY - (not PJ5/AH6DX) St. Eustatius; DXCC Code 519; IOTA NA-145; Now QRT;
QSL via AH6HY, direct or by the Bureau. No online logs.

DXNL 1699 - Oct 27, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

DXNL with attachments: This DX Newsletter has several attachments.
With kind permission of Carl Smith and QRZ DX we are enclosing a list of all
major PJ DXpeditions which was originally sent with the QRZ DX of last week.
It includes the PJ calls, weblinks and QSL routes.
Furthermore we have a list of the new callsign system in Russia and last not
least a list of stations planning to take part in the CQ WWDX SSB Contest.

CY0 - SABLE ISLAND, NA-063
The DXpedition to Sable Island (NA-063) had to be cancelled once again
due to a damage at their airplane. Repairs will take at least 3 weeks.

GU - GUERNSEY, EU-114
Dave,G1OCN (GU1OCN), David,M3IOP (MU3IOP), and Carol,2E1DQZ (2U1DQZ),
will activate the Channel island Alderney (EU-114) on 80m, 40m, 20m,
17m, 10m and 6m between Oct 29 and Nov 5. QSLs direct via G1OCN.

J3 - GRENADA
Harry,AC8G (J37K, QSL via homecall), plans to stay on Grenada (NA-024)
for five days. Activities will start two days before the WWDX Contest
and he will sign J3A in the contest. QSLs for J3A via WA1S.

Wade,J3/AA8LL, will be QRV from Grenada (NA-024) in CW and RTTY mostly
on the WARC bands from Oct 28 until Nov 1. He wants to join the WWDX
in the single OP/allband/high power class. Wade also plans to hand out
some IOTA points from Carriacou Island (NA-147) from Nov 2-5.
QSLs should be sent via bureau, direct or LoTW to AA8LL.

PJ7 - ST MAARTEN, NA-105
Charlie,PJ7/K4UWH, is working from Sint Maarten (NA-105) in CW on
40m-10m between Oct 23 and Nov 5.
QSLs via bureau, direct or LoTW to his homecall.

S7 - SEYCHELLES, AF-024
Davide,IW0HLG, is active as S79AD on HF and 6m from Mahe (AF-024).
He is working in SSB and digital modes from Oct 26 until Nov 4.
QSLs via bureau or direct to his homecall.

David,G3NKC, Fred,G4BWP, Martin,G4XUM, and Mike,G7VJR, will be QRV from
Mahe as well signing S79K (QSL via G3NKC) from Oct 26 until Nov 2.
They will take part in the upcoming CQ WWDX Contest as well.

V3 - BELIZE
Mike,W7ASF/V31MH, and Tom,KB7JAL/V31TS, are going to activate Belize
in SSB and PSK on 80-20m from Oct 27 until Nov 4 (including WWDX).

V6 - FEDERATED STATES OF MICRONESIA
Miki,JJ2CJB/V63CJB, will be active from the "Blue Lagoon Resort" on
Chuuk Island (OC-011) between Oct 29 and Nov 2. He will take part in
the WWDX SSB Contest but works in "holiday style" in CW and SSB on
80m/40m/20m/15m/10m outside of the contest.
QSLs to his homecall, via bureau or LoTW.

Another operation will be conducted by Keiichiro,JA7GYP (V63T),
Sho,JA7HMZ (V63DX), and Masahiko,JA7EPO (V63EPO), from Pohnpei (OC-010)
on all bands and modes between Oct 29 and Nov 4.
They will sign V6B (QSL via JA7HMZ) in the CQ WWDX SSB Contest.
All other QSL cards should be sent via their homecalls.

VP2M - MONTSERRAT, NA-103
VP2MDG will be the callsign of George,K2DM, on 160m-6m from Oct 27 till
Nov 2. He will join the CQ WWDX Contest in the single OP/allband/high
power category. QSLs via his homecall.

VP5 - TURKS AND CAICOS ISLANDS, NA-002
Jack,VP5/N2VW, Frank,VP5/WA2VYA, Bruce,VP5/WA3RHW, and Tony,VP5/W2WAS,
will show up from Providenciales (NA-002) from Oct 26 until Nov 2.
During the CQ WWDX SSB Contest they will use the callsign VP5T.
QSLs for VP5T via bureau, direct or LoTW to N2VW.
All other QSLs should be sent via bureau or direct to their homecalls.

YJ - VANUATU, OC-035
YJ0HA will be the callsign of HA5UK (George) and HA5AO (Pista) on
Efate (OC-035) working in CW, SSB, RTTY, PSK and SSTV on 160m-10m from
Nov 1-15. Maybe they also make a one-day-trip to Emae Island belonging
to the Shepherd Islands group (OC-111). More details and later also an
online log can be found on their website: http://ha5ao.novolab.hu
QSLs via bureau, direct or LoTW via HA5UK.

YN - NICARAGUA
Jeff,N6GQ, announced to be active as YN2AA from Grenada in Nicaragua
between Oct 27 and Nov 1 (including WWDX SSB Contest). Jeff will be QRV
on all bands from 160m-10m using a K3 radio and an amplifier with 1 kW.
Antennas used will be a tribander, a 2ele 40m yagi, wires and beverages
for 80m/160m. QSL via NN3W, via bureau, LoTW or direct.

3B8 - MAURITIUS, AF-049
Gerd,3B8/DG5MMW, will show up from Mauritius (AF-049, WLOTA 0595)
mostly in SSB and PSK31 on 40m-15m from Nov 1-6.
QSL via bureau or direct to his homecall.

3D2 - FIJI, OC-016
Eddie,VK4AN, will stay in the village Navua on Viti Levu (OC-016) from
Oct 27 until Nov 14. Eddie will sign 3D2A in CW, SSB, RTTY and PSK31 on
160m-10m (including WARC) using a Flex-5000A radio, a DX88 vertical,
a 3ele tribander and a sloper for 160m/80m/40m. QSL via VK4AN.
He will join the WWDX SSB Contest as multi/single (low power) together
with Aisea,3D2AA.
Eddie plans some more activities from Fiji and Nauru (C2) in 2011 and
is still looking for other HAMs to join. If you are interested, please
visit his website: http://pacific-dxers.com

5X - UGANDA
Rudi,DK7PE, is going to hit the airwaves from Kampala signing 5X0CW
from Oct 27 until Nov 3. Rudi will be QRV mostly in CW and will also
try to work on 80m and 160m. QSLs via his homecall, bureau ok.

9L - SIERRA LEONE
Heino,DJ9AF, and Karl-Heinz,DK2WV, will stay in Sierra Leone from
Nov 1-21 and on Banana Island (AF-037) from Nov 5-18. They will work
in SSB/CW/RTTY on 160m-6m as 9L0W. QSLs via DK2WV.

9M6 - EAST MALAYSIA
Circumnavigator Mike,KM9D (ex-V63MY), and Jan,KF4TUG (V63TO), have been
spotted as 9M6/homecall lately. Mike was very active in CW on 20m and
the WARC bands. Nothing is known about the length of their stay.
QSL via OM2SA.

9Q - DEMOCRATIC REPUBLIC OF CONGO
Christian,CX2CC, is working for the United Nations in Goma near the
border to Ruanda. He has got the callsign 9Q6CC and wants to work in
SSB, digital modes and slow CW on 80m-10m.
QSL via homecall, Christian Cardarello, Avenida Italia 3319,
11600 Montevideo, Uruguay.
The QSL cards will not be answered prior to January 2012.

CANADA, SPECIAL EVENT STATION
The clubstation VE3VBA of the Canadian Coast Guard will use the special
callsign CG3MUG in November. The OPs are celebrating the 100th anniver-
sary of "Thunder Bay MCTS Centre" (Canadian Coast Guard radio station)
situated near Lake Superior. Activities will take place in CW, SSB,
PSK, RTTY and FM on HF and VHF.
Special QSLs can be requested via e-mail (cg3mug@yahoo.ca) or eQSL.cc.
Also see: http://my.tbaytel.net/va3rom

ITALY, SPECIAL EVENT STATION
The Science Festival in Genua will take place from Oct 29 until Nov 9.
The special event station II1IANS will be activated from the submarine
museum "Nazario Sauro" during this time.

QSL via IQ1CA, eQSL or http://eurobureauqsl.org

SOUTH KOREA, SPECIAL EVENT STATION
Some members of the "Cheonan-Asan Ham Club" and several guest OPs are
going to activate the special callsign D7G20 in CW, SSB and RTTY on
80m-6m from Oct 29 until Nov 28 to mark the G20 summit in Seoul.
More information can be found online at: http://www.seoulsummit.kr
The QSL route is: G20 Seoul Summit 2010 Special Callsign, PO Box 90,
Cheonan, 330-600, South Korea.

DXCC: The QSL cards of following stations are accepted for DXCC credit now:
9U1KI, 9U1RSI, 9U1VO, 9U4T (Burundi, operations of 2010)
A51A (Bhutan, operation of 2010)
T6MB (Afghanistan, operation of 2010)

SILENT KEYS: We are missing Marcel Dehonin (ON4QM) who died after a long
sickness already a few weeks ago. DXers from all over the world will
remember his operations as A35DM, FW5XX, H44QM, ZK1DM, ZK2XX, ZK3DM and
FO0DEH, etc. Other Silent Keys are Clifton D. Swigard (W7NA) and
Makoto Inami (JA6AV), former vice president of the JARL.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
If you are planning a DXpedition to the South Pacific you may find some
useful information at: http://pacific-dxers.com
You can rent equipment or a whole rental QTH there if you like.

More information about the SX2500 special callsigns remembering the
Battle of Marathon (490 BC) can be found at http://sx2500m.blogspot.com

UPCOMING CONTESTS

Oct 30/31: CQ WWDX Contest, SSB
Nov 1-8: 80m HA-QRP-Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:

(2) The OP KE5OG will sign KE5OG/P4 on Oct 28/29. QSL via bureau or direct to his homecall.

The new call sign system in the Russian Federation

Rolf Rahne,DL6ZFG, has provided an overview and writes:
It was a good time when it was easy to identify with whom you were going to deal with. We even got familiar with all those changes after the collapse of the Soviet Union, but once more a reform of the call sign system in Russia might cause some new difficulties. Short call signs may be asked for now and many operators do so. At first sight the new system looks more complicated, but a closer look will help to understand it.
The paper is trying to explain the system which is valid in Russia since mid 2010. Some rules for the formation of call signs are logical, some others are less understandable or less important for us. In Russia callsigns for the amateur radio service are based on the 26 letters of the Latin alphabet and the figures 1-0. The prefix is formed by the letter "R" or by two letters "RA&#65533;RZ" or "UA&#65533;UI" (indicating the affiliation to the Russi
an
Federation), followed by a figure. The suffix is formed by up to four characters, but special callsigns for certain occasions may have more than four. Call signs which are similar to emergency codes, the series QRA-QTZ and those being "vulgar" will not be issued.
It is the figure of the prefix and the first letter of the suffix that indicate the territorial affiliation of the amateur radio station to a certain part of Russia. One has to take into account that the Russian Federation has been re-grouped, e.g. some regional districts (Oblasti) have been merged. Further changes can be expected in the future.
Exceptions from these rules were made for the call RAEM (E.T. Krenkel) and for identifiers used during ARDF activities.
The list can be downloaded from:
http://www.darc.de/uploads/media/russian_callsigns_2010.pdf

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

October 27, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- 48 Hours of Fun - CQ World Wide SSB
- Clean Sweep Anyone? ARRL CW Sweepstakes
- Be Prepared - CTY File Update Reminder
- How To Get Permission
- Brobdingnagian Flinging Machine
- It's In the Mail - Certificates and Plaques
- Sherlock Ohms - It's Elementary
- Thumbed Down Radio
- Living On the Edge

NEW HF OPERATORS - THINGS TO DO

Jump right into the CQ World Wide SSB Contest this weekend and have a
ball! If that wets your whistle, polish up your code capabilities for
the following weekend's ARRL CW Sweepstakes. Two of the biggest and the
best!

BULLETINS

>From a 13 October press release by CQ editor W2VU: "New Multipliers in
the CQWW - The country multiplier list for the CQ World Wide DX Contest
(SSB weekend on October 30-31; CW on November 27-28) is based on a
combination of the ARRL's DXCC list and the DARC's WAE (Worked All
Europe) list. Since the ARRL has also made the same changes, deleting
the old Windward and Leeward Islands entities and adding PJ2 (Curacao),
PJ4 (Bonaire), PJ5/6 (St. Eustatius & Saba) and PJ7 (St. Maarten) as
four new entities effective October 10, these "new ones" will each
count as separate country multipliers in the CQWW. There is no need to
worry if your own contest logging software is not updated, according to
CQWW Contest Director Bob Cox, K3EST. "In the end, the log checking
software calculates final tallies anyway," he notes, adding that the
software "is very up-to-date and reflects any status changes.""

BUSTED QSOS
```

A golden issue (or at least a shiny one) last time.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Oct 30-31

- SKCC Straight Key Sprint (Oct 27)
- CQ World Wide SSB Contest
- ARRL EME Contest
- 10-10 Fall Digital QSO Party
- Fall VHF Sprints (50 MHz)
- ARS Spartan Sprint--CW (Nov 2)

Nov 6-7

- ARRL November Sweepstakes--CW
- Collegiate ARC Championship--CW
- High Speed Club CW Contest (Nov 4)
- Ukranian DX Contest
- Radio Club of America QSO Party--Phone
- DARC 10-Meter Digital "Corona"

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The big news this week is, of course, the CQ World Wide SSB Contest <http://cq-amateur-radio.com/cq_contests/cq_ww_dx_contest/index_cq_ww_dx_contest.html> this coming weekend. Propagation has picked up and not a moment too soon. You'll want to be ready to go, so be sure you have the very latest version of the Country (CTY) Files <http://www.country-files.com/cty/>, updated on 25 October 2010 by Jim AD1C. Used by logging software to determine the location of a station by call sign, this latest update includes all of the recent DXCC changes and "interesting" calls that you'll hear on the bands this weekend. To install the file, follow the link to your software and then follow the instructions <http://www.country-files.com/cty/index.htm#Version> for checking that you have installed the file(s) correctly.

For our Spanish-speaking friends, the CQ WW rules have been translated into Spanish <http://www.ure.es/component/events/?task=view_detail&agid=118> by the URE (Union de Radioaficionados Españoles). (Thanks, Jesus EC1KR)

If you are planning to enter the CQ World Wide Contest's Xtreme category, you must pre-register your entry before the contest with your call sign and a brief description of your station. Send email to Xtreme@cqww.com. Xtreme stations are permitted to use remote transmit and receive locations, multiple operators at multiple remote locations, etc., within the rules and regulations of the country and with all transmitters within the same countryand zone. Last year's Xtreme trophy winners were B1Z (Multi-operator) and OL5Q (Single Operator). (Thanks, Doug K1DG)

The third (and final) installment of the 2010 WPX Survey results <http://www.cqwpx.com/blog/?p=71> are now available, discussing combining the rules for the RTTY contest with SSB/CW and general feedback and suggestions. (Thanks, CQ WPX Director, Randy K5ZD)

In the Where-Are-They-Now department, Esther Schindler tracked down five of the 19 prominent programmers featured in 1986's "Programmers At Work" by Susan Lammers and got their perspective on programming and software today <http://www.itworld.com/development/124541/programmers-who-defined-the-technology-industry-where-are-they-now>.
For those of you that have used more than one of the original "killer apps" on the PC, this will be both nostalgic and forward-looking. Bonus - you can learn the origins of "Hungarian Notation", dig in!

Having just completed the December edition of Contest Corral for QST, I thought you readers might be interested in some statistics. Of the 391 contests tracked this year, 278 (71%) are HF-only, 37 (10%) are VHF+ only, and 76 (19%) run on both HF and VHF+ bands. Mode usage shows digital coming on strong, but CW remains the most popular: Phone 192 (49%), CW 275 (70%), and Digital 149 (38%). It still remains a bit of a struggle to contact the managers of contests, though - only 69% responded to requests for information about their contest!

Web Site of the Week - I regularly receive emails from editors requesting permission to reprint one thing or another from the Contest Update. Here's how to get permission to reprint copyrighted material from any of the ARRL publications: send an email to permission@arrl.org describing what you want to reprint and your organization. You'll receive a response right away with instructions and the necessary wording.

WORD TO THE WISE

Rotator <http://en.wikipedia.org/wiki/Rotor_%28antenna%29> - the thing that turns your antenna. It's NOT a "rotor"! A rotor is an element of a device or system that rotates - for example, the rotor <http://en.wikipedia.org/wiki/Rotor_%28electric%29> of an electric motor, such as the one in your ROTATOR!

==> SIGHTS AND SOUNDS

Is this Paul Bunyan's slingshot <http://www.ac6dd.com/home/> and does Babe the Blue Ox pull it tight? Here are two versions, one made of 2x4's and the other a more portable unit made from EMT. Caution, surgical tubing will deteriorate over time and snapping that rubber band will definitely hurt!

Watch the next Mars Rover being built!
<http://www.wired.com/wiredscience/2010/10/nasa-mars-rover-webcam/>This is just the thing to keep on in the shack while you're tuning the bands.

Who could look at these pictures
<http://www.npr.org/blogs/pictureshow/2010/10/13/130536054/water-balloons?ref=nf>
and not think "antenna radiation patterns"? Of course, there is a "do
it yourself
<http://www.diyphotography.net/edward-horsford-creates-amazing-bursting-balloons-photograp
hs-interview-and-tutorial>"
article, too.

==> RESULTS AND RECORDS

Certificates for the 2009 ARRL September VHF QSO Party are being mailed
and certificates for the 2009 ARRL November Sweepstakes were mailed
last week. Winners should have been seeing them appear in their
mailboxes since the weekend. 2009 Sweepstakes plaques are being
processed and are the next to be shipped. You can track the development
of ARRL contest awards processing online
<http://www.arrl.org/plaques-and-certificates>, too! Look for the
"Contest Awards Processing Status" link. (Thanks, ARRL Contest Branch
Manager, Sean KX9X)

Results for the NA RTTY Sprint
<http://www.ncjweb.com/sprintrttyprelim.php> (2 weeks ago) are now
posted online. The final results article will be in the Jan-Feb 2011
issue of the National Contest Journal <http://www.ncjweb.com/>. LCRs
(Log CheckingReports) can be requested from rttysprintmgr@ncjweb.com.
(Thanks, NA RTTY Sprint Manager, Ed W0YK)

Doug K1DG writes to say, "Last week I shipped the last outstanding
plaques for the 2007 CQ 160 Meter contests. These 28 plaques had been
delayed due to health problems of the previous administrator, but are
now done. With the exception of two much older plaques that were
ordered as replacements, I believe that all plaques for all CQ 160M
contests have been shipped. If you earned a plaque for any earlier CQ
160 Meter contest and have not received it, please contact me with the
details. Plaques for the 2010 CQ 160 Meter contests will be ordered
around the end of the year, after the results appear in print."

OPERATING TIP

Everything you wanted to know about Sweepstakes operating is
available in this great Sweepstakes Handbook
<http://www.madriverradioclub.org/userfiles/MRRC_SS_Handbook.pdf> from
the Mad River Radio Club. You'll have to temper the propagation
discussion to reflect the game in your region, but it will be great
reading from end-to-end. Thanks to MRRC for making their handbook
available to the contesting public.

==> TECHNICAL TOPICS AND INFORMATION

Mobile and Rover operators will be able to identify with these items in
the Design News columns, "Sherlock Ohms - The Case of the Failed
Battery Connections
<http://www.designnews.com/blog/Sherlock_Ohms/39695-The_case_of_the_failed_battery_connect
ions.php>"

and "The Case of the Failed Microwave Shot
<http://www.designnews.com/blog/Sherlock_Ohms/39681-The_case_of_the_dropped_microwave_shot
.php>".
It's always good to learn from the experiences of others!

David K1TTT recommends an alternative to Coax Seal™. "For years I have
been using plain old hardware store duct seal. It comes in big 1-lb
blocks for about $2...(and)...comes off much easier even after years of
being on a connector. I usually just squish a big handful of it on the
joint then add a layer of electrical tape outside to protect it from
the sun and further push it in to the joint." If you're really
concerned about removing the seal cleanly, wrap the connector with a
single layer of electrical tape before applying the seal.

A rolling hitch <http://www.youtube.com/watch?v=vEV0p-QNPTU> is a
pretty handy knot for lifting masts or pulling on cables or ropes, but
might not be a good choice if the rope vibrates because it might shake
loose. Add a half hitch on the bitter end to minimize that problem. For
a permanent installation, get a Kellum grip sized for your bundle of
cables. They are available from 0.25" to several inches in diameter.
(Thanks, Grant KZ1W)

Here's a Web site for determining loading coil inductance
<http://www.see.ed.ac.uk/%7Ejwp/radio/software/loading.html> for
antennas. Placement of the coil is determined by the designer. The Web
site also has links to other pages on how to design the coil. (Thanks,
Jim KG0KP)

A simple kit for a 3 dB power splitter is available from Clifton Labs
<http://www.cliftonlaboratories.com/> as their product Z10050A. They
cover a frequency range of 300 kHz to 100 MHz and are a handy way to
split low-power signals, such as for adding a receiver. No PC board is
required, just supply your own enclosure and connectors. (Thanks, Craig
AC0DS)

Bruce K1FZ has updated his Beverage antenna notes
<http://www.qsl.net/k1fz/beveragenotes.html> Web page with additional
BOG (Beverage On Ground) antenna information.

Here is an interesting discussion of how to balance battery loading
<http://www.smartgauge.co.uk/batt_con.html> in banks of batteries,
contributed by Scott N7SS. With high loads, this could be an issue,
particularly insuring that all batteries supply approximately the same
current.

The November issue of Nuts and Volts <http://www.nutsvolts.com/> has a
nice article on Oscilloscope Probes and Probing, active probe project
by Robert Reed. You'll also find an excellent oscilloscope tutorial
<http://www.nutsvolts.com/index.php?/blog/post/oscilloscope_tutorial>
online there, too.

Transistors made of graphene
<http://www.technologyreview.com/communications/26612/?p1=Headlines> (a

single atomic layer form of carbon) will be - faster, configurable, and be able to act as an N or P type. Prototypes are switching at 100 GHz (about 10x faster than Si-based) - with possibly orders of magnitude of improvement available. Red light's frequency is about 430 THz, only 4300 times higher than 100 GHz. Remember when our radios were faster than the transistors in our computers?

Not really a contest-related technology, but of interest to technically-minded radio geeks (that would be contester-related, instead) is the Department of Homeland Security's report <http://www.safecomprogram.gov/SAFECOM/library/technology/1179_conventionaland.htm> comparing conventional and trunked mobile radio systems. In case you wanted to know about that sort of thing, of course.

Technical Web Site of the Week - We have the thumb drive, why not the thumb radio? From Tree N6TR and the 17 October AMSAT <http://www.amsat.org/> bulletin comes word of the Funcube Dongle <http://www.funcube.co.uk/WP3/>. Progress of its development and photos can be seen on the Funcube Dongle Blog <http://www.funcubedongle.com/>. It certainly has potential for VHF+ SDR applications in rovers and portable stations. It will include (still in development) an integrated front end filter, LNA, quadrature LO, zero-IF quadrature down-converter, and a dual 16-bit ADC and USB soundcard. It's also compatible with software that works for the Softrock <http://www.softrockradio.org/> line of SDR components.

==> CONVERSATION

Living On the Edge

With the big CQ World Wide SSB Contest coming up and the 40 meter band allocations having evolved rapidly over the past couple of years, it's worth taking a few minutes to review some do's and don'ts, particularly for US operators.

First, the lower edge of the US phone band is 7.125 MHz - not 7.100 MHz. The requirement is for you to keep your signal above 7.125 - all of it. If you are using LSB, the frequency display of your radio shows the carrier frequency and that has to be high enough that the sidebands of your signal are all inside the phone band. What does that mean? According to the FCC in Part 97.3a <http://www.arrl.org/part-97-amateur-radio>, everything stronger than 26 dB below the mean power of the signal counts as the signal's bandwidth.

Without getting into a huge derivation of carrier suppression and the effects on bandwidth of audio and RF compression and distortion, let's just say that you should tune no lower than 7.1275 or 7.128 MHz to be sure of "coloring inside the lines." I'm sure some enterprising contest station outside the US will set up shop with a carrier frequency of 7.125 MHz, but just don't call them. If you have a connection to the spotting network, you can always post a spot that

says, "XY0ZZ 7.125 Not Legal for US Phone Band" and perhaps they (and those calling) will see it and move.

A similar problem over the past couple of years has been stations at the top end of 20 meters with their USB carrier frequency above 14.3475 - you're out of the band, folks! Again, just don't call them - these are not the usual frequencies for rare stations.

Another "gotcha" is caused by jumping to that freshly posted spot and giving your call without looking closely at the frequency. DX stations can operate well below 7.125 MHz, 14.150 MHz, and 21.200 MHz - don't call them there! In every contest, you can hear a steady stream of US stations well outside the US band who should know better. If you can program your radios not to transmit outside the US segments or set up your spotting network filters or logging program not to tempt you with out-of-band spots, do so. That way, in the heat of battle, you won't make a mistake. Or be tempted to "make a mistake."

Finally, before sending in your log - make sure it states the right category for your entry. If you receive ANY spots from the spotting networks by any means, you must enter in the Single-Operator, Assisted category (SOA). Most logging programs now automatically connect to the Internet and then to a spotting network, so you have to disable that feature if you are going to enter Single-Operator.

As you get ready for radiosport's Big One, remember to play nice. Have fun, definitely, but be sure to set good examples for good operating and clean signals. The world does listen - especially when you're living on the edge!

73, Ward N0AX

==> CONTESTS

27 October to 9 November

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CQ World Wide SSB Contest--Phone, from Oct 30, 0000Z to Oct 31, 2359Z. Bands (MHz): 1.8-28. Exchange: RS and CQ zone. Logs due: Nov 21. Rules <http://cq-amateur-radio.com/>

SKCC Straight Key Sprint--CW, from Oct 27, 0000Z to Oct 27, 0200Z. Bands (MHz): 1.8-28. Frequencies: Monthly on the fourth Wednesday local time. Exchange: RST, S/P/C, SKCC nr or power. Logs due: 2 days. Rules <http://www.skccgroup.com/sprint/sks>

10-10 Fall Digital QSO Party--Digital, from Oct 30, 0001Z to Oct 31, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs

due: Nov 15. Rules
<http://www.ten-ten.org/Forms/QSOPartyRulesRevised.pdf>

ARS Spartan Sprint--CW, from Nov 2, 0200Z to Nov 2, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

High Speed Club CW Contest--CW, from Nov 4, 0900Z to Nov 4, 1100Z and Nov 4, 1500Z to Nov 4, 1700Z. Bands (MHz): 3.5-28. Frequencies: Multiple operating periods. Exchange: RST and MSC member nr or "NM". Logs due: 6 weeks. Rules <http://www.dl3bzz.de/html/hscconte.html>

ARRL November Sweepstakes--CW, from Nov 6, 2100Z to Nov 8, 0300Z. Bands (MHz): 1.8-28. Exchange: Serial, category, call, check, ARRL sec. Logs due: Nov 23. Rules <http://www.arrl.org/contests>

Collegiate ARC Championship--CW, from Nov 6, 2100Z to Nov 8, 0300Z. Bands (MHz): 1.8-28. Exchange: See ARRL Sweepstakes. Logs due: Nov 23. Rules <http://www.collegiatechampionship.org/>

Ukranian DX Contest--Phone,CW, from Nov 6, 1200Z to Nov 7, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or Ukraine oblast. Logs due: 30 days. Rules <http://www.ucc.zp.ua/>

Radio Club of America QSO Party--Phone, from Nov 6, 1700Z to Nov 7, 0500Z. Bands (MHz): 3.5-21. Exchange: RST, QTH, name, equipment. Rules <http://www.radioclubofamerica.org/>

DARC 10-Meter Digital "Corona"--Digital, from Nov 7, 1100Z to Nov 7, 1700Z. Bands (MHz): 28. Exchange: RST and serial. Rules <http://www.darc.de/referate/ukw-funksport>

VHF+ CONTESTS

ARRL EME Contest--Phone,CW,Digital, from Oct 30, 0000Z to Oct 31, 2359Z. Bands (MHz): 50-1296. Exchange: Both call signs, signal report. Logs due: Nov 30. Rules <http://www.arrl.org/contests>

Fall VHF Sprints--Phone,CW,Digital, from Oct 30, 2300Z to Oct 31, 0300Z. Bands (MHz): 50. Exchange: 4-char grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/2010fallsprintrules.pdf>

==> LOG DUE DATES

27 October to 9 November

October 28 - 222 MHz Fall Sprint
<http://www.svhfs.org/2010fallsprintrules.pdf>

October 30 - TARA PSK Rumble Contest
<http://www.n2ty.org/seasons/tara_rumble_rules.html>

October 31 - New York QSO Party <http://www.nyqp.org/rules.php>

October 31 - German Telegraphy Contest
<http://kontest.de/dtc/DTC-Rules_e.pdf>

October 31 - Washington State Salmon Run

** MMMonVHF VHF-DATABASE Issue 3.10 - 10/2010 **

Dear VHF-DATABASE-friends, a year is over again and we will be
able to spread around a new issue of the VHF-DATABASE (3.10 -
10/2010) to private USER (fee, see our Forum) as well to all
interested DX-Cluster Sysops (DX-Cluster-Types: CLX, SPIDER,
AK1A and / or DXNet) from up the end of october 2010!
All necessary details you be able to find at the Make More Miles
FORUM www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=3
As well please visit the Visual VHF DATABASE and check your
area - if you find faults please do report to us! The Visual
VHF DATABASE can be found here: http://www.mmmonvhf.de/vdb.php

** The new call sign system in the Russian Federation **

Rolf Rahne,DL6ZFG, has provided an overview and writes: It was a
good time when it was easy to identify with whom you were going
to deal with. We even got familiar with all those changes after
the collapse of the Soviet Union, but once more a reform of the
call sign system in Russia might cause some new difficulties.
Short call signs may be asked for now and many operators do so.
At first sight the new system looks more complicated, but a
closer look will help to understand it. The paper is trying to
explain the system which is valid in Russia since mid 2010. Some
rules for the formation of call signs are logical, some others
are less understandable or less important for us. In Russia
callsigns for the amateur radio service are based on the 26
letters of the Latin alphabet and the figures 1-0. The prefix is
formed by the letter "R" or by two letters "RA?RZ" or "UA?UI"
(indicating the affiliation to the Russian Federation), followed
by a figure. The suffix is formed by up to four characters, but

special callsigns for certain occasions may have more than four. Call signs which are similar to emergency codes, the series QRA-QTZ and those being "vulgar" will not be issued. It is the figure of the prefix and the first letter of the suffix that indicate the territorial affiliation of the amateur radio station to a certain part of Russia. One has to take into account that the Russian Federation has been re-grouped, e.g. some regional districts (Oblasti) have been merged. Further changes can be expected in the future. Exceptions from these rules were made for the call RAEM (E.T. Krenkel) and for identifiers used during ARDF activities. The list can be downloaded from:
http://www.darc.de/uploads/media/russian_callsigns_2010.pdf

VK100WIA and WIA Centenary Award - today is the final day

EXAM FEE - THE GOOD NEWS

Tune-In to the World, amateur radio gets people talking

HORUS 9 Launch

CLOSURE OF VK7AX PACKET BBS NETWORK

It is that time of year again when we can order the next Call book.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING OCTOBER 31 2010

WIA Centenary

VK100WIA and WIA Centenary Award - today is the final day

The special callsign first went on air in May, with that entire month
being rostered to the WIA and our President Michael Owen making the very
first contact on the 14th of May.

The remainder of the month saw it put on air, on behalf of the WIA,
including during the WIA Centenary Convention in Canberra.

Since then, under a system of three-day roster slots, around 50 clubs have
activated VK100WIA, working more than 100 DX Entities and amassing close

to 25,000 contacts.

During the week the Geelong Radio and Electronics Society and Adelaide Hills Amateur Radio Society did a fine job.

Tail-end Charlie on the six month roster, by choice, is the Westlake's Amateur Radio Club, operating from its club rooms at Teralba, New South Wales, on air today.

It's also the final day to make qualifying contacts for the limited issue WIA Centenary Award.

To qualify for an award certificate, a VK radio amateur needs to achieve 100 points.

Many had done this by contacting VK100WIA the required ten times - do check the rules - which explain that one qualifying contact is permitted during the WIA period of May, and one with each rostered club.

So on this very last day, what can you do if you don't have 100 points, and still want to get the award?

Provided you have contacted VK100WIA on a minimum of two qualifying occasions, then you can simply top-up your points by contacts with WIA members, who are worth five points each.

It is suggested you have a few extra contacts with WIA members, rather than the bare minimum required, in your log. Remember, today the 31 of October is the final day for award point scoring contacts.

Do check the rules, and remember that today is the final day to qualify for the WIA Centenary Award.

Tune-In to the World, amateur radio gets people talking

The inaugural public relations event for amateur radio in Australia, the WIA National Field Day, occurred right around the country on Saturday the 23rd of October.

Well done to the WIA organising committee, the clubs, groups and individual radio amateurs who made it happen.

We will begin this feature coverage report with Geoff Emery VK4ZPP as he describes the activities that occurred in Maryborough, Queensland.

(Play VK4ZPP audio report. Outcue ... National Field Day 2011)

The Maryborough Electronics and Radio Group (MERG) set up its portable station on The Green, Chifley Place, Adelaide Street, Maryborough.

The WIA-supplied media materials did their job with MERG scoring mentions on ABC local radio, in the Fraser Coast Chronicle, and the filming of activities by Channel 7.

Geoff Emery VK4ZPP reports that the local SES Controller visited the MERG display and discussed amateur radio support in emergency operations.

The MERG experience certainly supports the WIA aim of showing amateur radio to the community. The club is looking forward to National Field Day 2011.

Melbourne's Eastern & Mountain District Radio Club activated club station VK3ER from the foyer of the Scienceworks Museum at Spotswood, a science and technology museum very popular with young people and families.

The club gained three enrolments for its next Foundation licence training course, while also putting many young voices on the amateur airwaves. This included Erin, the grand-daughter of WIA President, Michael Owen VK3KI.

The Adelaide Hills Amateur Radio Club had around 15 members set up a station a station at the Eden Hills Primary School Strawberry Fair. The display generated interest in training courses.

The Member for Davenport, Iain Evans, assisted by Club President, John Elliott VK5EMI, went on air to experience amateur radio.

In Perth's southern suburbs, the Hills Amateur Radio Group located itself at Wireless Hill Park, a very popular picnic and BBQ spot, and also has a telecommunications museum.

A totally solar powered station set-up. It created interest with members of the public stopping by for a chat.

At Ulverstone Tasmania, the Cradle Coast Amateur Radio Club chose "Otto's Grotto", a very popular BBQ site and part of the HMAS Shropshire Park, a naval memorial reserve.

Strong support was received from eight club members and the day was a success.

The Oxley Region Amateur Radio Club VK2BOR was set up under annexe of the club's communication caravan in Port Macquarie's Town Green.

A great deal preparation went into ensuring the event presented amateur radio in a most interesting way to the public as possible.

Amateur Radio Victoria VK3WI reports that the aims of the day were fully achieved, and it provided a learning experience for all.

A team of seven set-up at Point Gellibrand Coastal Heritage Park, Williamstown, and proved that amateur radio does get people talking.

In the national field day rules the 'Public' category stations gain bonus points for having invited government officials attend. A number of clubs achieved that goal.

Amateur Radio Victoria had the presence of Marsha Thomson, the Member for Footscray and State Minister for Information and Communication Technology.

We will now have a listen to part of her participation, with the first voice being Jim Linton VK3PC, explaining how to operate the microphone.

(Play audio ends with Minister's voice '...yes she is' chuckle)

Also heard in that audio clip was the Southern Peninsula Amateur Radio Club Secretary, John Ross VK3BJR, at the Field Day station on the foreshore of Rye beach. He handled his end of the five minute-long contact with the Minister, very well indeed.

The Minister certainly found the portable amateur radio station display interesting, and stayed to see video of her involvement being beamed all over Melbourne and Geelong, via the digital amateur television repeater VK3RTV.

Over to the northern suburbs of Adelaide now, where the Elizabeth Amateur Radio Club set up a field day station in Salisbury Square.

Pedestrian traffic between nearby shops resulted in visitors to the amateur radio station. It was an enjoyable day that helped to put our hobby in the public eye.

The Elizabeth Club, along with EMDRC and the Adelaide Hills club both mentioned earlier, monitored or made contact with the cross-band voice repeater launched by high altitude balloon (horus 9) from Mt Barker by Adrian Snell VK5ZBR. It generated a lot of interest.

(Play audio ends with thanks to all those vk5's)

Horus 9 audio etc in the History pages at http://www.wiaq.com
Short documentary on flight Horus 8 for interest.
http://vimeo.com/16241165

And many of the clubs have made mention of the WIA press pack, and how it helped them gain media coverage, plus they had praise for the WIA posters and clothing that added the necessary professional look to their displays.

There's universal support for the event being repeated, perhaps, annually.

A 'Private' category portable station, totally battery powered, was operated by Gail Lidden-Sandford VK4ION and Daniel Aitken VK4MAX, at Avondale north of Bundaberg.

Apparently 'Bundy' does not have a suitable public place to display amateur radio, so Gail set up outdoors at her home QTH.

That station contributed to the national field day, while also turning out to be an emergency communications preparedness exercise. There were other 'Private' stations involved too, thank you all for your support.

Now in closing this feature report on today's VK1WIA broadcast, highly recommended is a more detailed coverage, plus a magnificent slide-show power point presentation that is now available on the WIA website.

It is that time of year again when we can order the next Call book.

There are financial advantages to clubs and their members. Even small clubs can benefit if they combine with adjacent friendly club.

Once again the call book comes with a searchable CD and there are bulk prices for clubs.

Order 2 to 5 books price $20-00 ea plus $12-00 post and handling
Order 6 to 10 books price $20-00 ea plus $22-00 post and handling
Order 11 to 15 books price $20-00 ea plus $25-00 post and handling

Order a full box of 25 books and price is $20-00 each with free delivery.

The clubs order form is on wia.org.au go to members area, affiliated club benefits,

Please note that the WIA does not apply ANY restrictions on the price that clubs charge their members. You can use it as a fundraiser or a service to your members, it is your choice.

(Ted Thrift VK2ARA WIA Clubs Co-ordinator).

EXAM FEE - THE GOOD NEWS

Changes on and after 1 December 2010 include:

A Practical Assessment taken alone: drops from $67.00 to $65.00.

A replacement certificate of proficiency: drops from $14.00 to $10.00.

Callsign Recommendation Level 2:
a three, four and two letter call sign in any state or territory except New South Wales, Queensland and Victoria, where the individual can select two preferences for a particular call sign shown as an available call sign from the website daily list drops from $20.60 to $20.00.

Callsign Recommendation Level 3:
a two letter call sign in the states of New South Wales, Queensland and Victoria drops from $48.85 to $48.00.

Callsign Recommendation Level 4:
a special event callsign drops from an hourly rate of $67.80 to a flat fee of $25.00.

Double celebration at Ipswich

Last weekend a special double celebration was held to mark Ipswich's 150th year as a municipality and the centenary of the WIA.

Ipswich and District Radio Club President, Michael VK4QS officially welcomed the mayor Paul Pisasale and WIA Director Ewan McLeod VK4ERM to the clubhouse, along with a large crowd made up of members and guests.

Everyone enjoyed a BBQ lunch, the cutting of a very large chocolate cake, and presentations, which included the Mayor being made an Honorary vice president Vice-President of the club.

A special thanks to those members and friends who helped to make the day
a huge success.

(Allan VK4FABR)

Sunday November 7th the Adelaide hills Amateur Radio Society will be holding
its Annual Hamfest. The venue is the Goodwood Community Centre Rosa St
Goodwood.
Doors open at 9, Selling commences from 9.30. $5 entry and $10 a table for
sellers. Plenty of commercial vendors in attendance, with the usual quality
catering by ALARA and the North East Radio Club. Peter Wolfenden will present
his AGM talk on the history and beginnings of the WIA. Michael Owen and
Jeff Atkinson will be present on the day, after hosting an all clubs
get together on the previous Saturday afternoon. A big weekend in Adelaide for
Amateur Radio. This has been David VK5KC.

THE Sydney Chapter of Model Engineers are in the middle of hosting the 11th
Tethered Car World Championships at Model Park, Luddenham this weekend.

Tether cars have been raced in VK2 since 1940 and the international event comes
to Australia only once in 12 years.

This weekend sees 28 international competitors and about 35 Australians, from
NSW and Queensland.

The modern tether car weighs under 4kg. They are raced one at a time on a
circular concrete track about 20m in diameter and can reach speeds of more than
340 km/h.

For more details
modelpark.org.au

All Clubs who participate in the WIA/QBE joint policy, or would like to, the
renewal date of 1 April 2011 may seem a long way ahead but many clubs are going
into holiday mode and may not meet again until some time in February.

Some points to consider before your Christmas break:

Has there been a change in office bearers and has the current email
address been passed to vk2ara@wia.org.au within the last six months?

If not or doubtful a brief message will help.

Who is the best person for Ted VK2ARA to contact with details about the 2011
renewal, and associated paperwork.

Your various secretaries should have already heard from Ted, but as he says "It
is not an easy job communicating with 100 clubs, AND meeting all the
deadlines".

SO if you are in a position to do so, contact the officials in your club
straight after today's news and call-backs and make sure they have complied
with Ted's request! Don't leave it for someone else to do,
your club MAY miss the boat!

vk2ara@wia.org.au

Looking over your back fence.

There is a new internet based map system covering Australian capital cities and some selected country regions. It is achieved by aerial photography and there are regular updates of most areas.

The resolution of the images is excellent and as an example, Tim VK2ZTM for Amateur Radio NSW says, "it is possible to see the wire in the various dipole antennas at VK2WI!"

Unfortunately the company involved flew through lots of cloud the day they flew over South East Queensland, so be prepared to use your imagination as to what lies below the masses of "cotton wool" covering maybe your QTH!

Redcliffe Radio Club gets new repeaters

The Queensland Government's Gambling Community Benefit Fund is proud to provide $26,000 funding for the Redcliffe and District Radio Club to go towards new repeaters and associated gear.

2 repeaters for two metres and seventy centimetres, along with a commercial grade set of VHF cavity filters, new lengths of LDF4-50, a UHF folded dipole array, kVA Yamaha genset, electrical works to facilitate generator connections to the club house, solar panels and a Codan Land Mobile radio with high speed HF modem. The Codan allows the Club to use the WIA 5 MHz allocations as well as participating in the HFLink Global ALE network.

The Club was fortunate to have member VK4YJV John design and build a purpose designed directional array for the two metre repeater.

(Peter Schrader, VK4EA, Treasurer)

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

As the calendar year draws closer to its end, there is one activity coming up that should involve as many radio clubs as possible.

I have suggested previously that we let each other know when a job has been well done. Give an amateur a hug.

Likewise I have suggested that people become part of the whole game and join in their club and WIA activities in order have an effective voice in the hobby.

This year, the President's Lunch is being hosted by QAC and the RADAR club. Rockhampton is one of our largest regional cities and hopefully this venue will allow participation by more clubs from throughout the state.

The guest of honour will be Michael Owen, VK3KI, President of the Wireless Institute of Australia. Along with members of our Queensland Advisory Committee, this is the chance for face to face discussions with the people who carry the administrative responsibility for our hobby for us. This is where the face on the magazine page or the voice on the club net becomes your fellow amateur across the table.

If your club hasn't already organised a representative for 14th November, now is the time to act.

I'm Geoff, VK4ZPP, and that's what I think....how about you?

CLUBBING -

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
http://ipswichdistrictradioclub.webnode.com/

Hello this is Allan VK4FABR with news from the Ipswich and District Radio Club.

Ipswich is going to get the jump on the Christmas party season again in 2010.

Next Saturday November 6, members and guests are welcome to the club's Christmas lunch at Ipswich Workers Club in Bell Street from 11am. We may even have a Santa!

A 2 course lunch for $15 is great value. But we do need to know numbers now. Please email John VK4IE - atjohnedw@powerup.com.auby this Wednesday to book and make payment arrangements.

That's all the news from Ipswich, until next time.

I'm Allan VK4FABR.

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

During the JOTA activities, weather forecasts suggested that it would be raining for the inaugural National Field Day. Last Saturday was the sunny perfection that Queensland can supply with clear bright sunlight and a gentle breeze.

In these conditions, the team from Maryborough Electronics and Radio Group, Inc, set up a working amateur station on The Green, also known as Chifley Place, in Adelaide St, Maryborough. Once again the support from the WIA with media materials saw the Field Day mentioned on ABC Local Radio, the Fraser Coast Chronicle, over 2 days, and the filming of activities by Channel 7.

The local SES Controller visited the MERG (pronounced merge) display and discussed amateur radio support in emergency operations with the amateurs. Helen posed for a photograph and entered her details in the station log.

Both local parliamentarians sent their apologies and would you know it the "firies" were on call out.

Some visitors to the area made a point of coming along after seeing the press coverage; some locals with professional backgrounds in radio came by to meet the amateurs and one person left with a newly purchased copy of the Foundation manual.

The MERG experience certainly supports the WIA aim of showing amateur radio to the community and this club is looking forward to National Field Day 2011. In the mean time remember that "amateur radio gets people talking".

>From MERG, I'm Geoff VK4ZPP reporting for WIA National News.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from the Rockhampton and District Amateur Radio Club, the RADAR club.

This is Les VK4VIL reporting.

Last weekend, as well as working our site at the Rockhampton Heritage Village as a public station for the National Field Day, testing our brand new 5 element triband yagi allowed us to really carry out the motto on the day "tune into the world".

A good number of club members participated, with seasoned DXer, Mike VK4LMB, ably assisted by our youngest member, Cory VK4FCMP operating the radios with callsign VK4CHV or VK4 Capricorn heritage Village as we know it.

Others fielded questions from a good number of visitors, some of whom were wrapped to actually make contact with other stations. Of particular interest were a couple from Switzerland who were keen to know if they could ever call their home country on these rigs.

The yagi works a treat and contacts were made on all bands, 20, 15 and 10m and included a number of overseas calls.

Yes, amateur radio certainly gets people talking.

And now, another big event.

14th November -- the WIA National President, Michael Owen VK3KI visits Rockhampton and will attend the State Presidents Lunch. Invitations have been forwarded to all Queensland clubs and the register now has almost 90 attending from far and wide. Michael is looking forward to the trip.

If you have not confirmed a booking yet, it is not too late. Call Clive VK4ACC on 0429632815, that's 0429632815 or email Clive at vk4acc@wia.org.au

Should be a great weekend.

I'm Les VK4VIL on behalf of the Rockhampton and District Amateur Radio Club.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

At last week's TREC meeting one of the items discussed was the final installation of the six metre beacon. John VK4TL and Chris VK4YCG are finishing off the antenna and it is hoped that we will have the beacon finally up and running from the VK4RHT site located on the Hann Tablelands Northeast of Cairns. The frequency is 50.281.

We have ordered a new 2m/70cm antenna for the clubrooms and this will be installed as soon as it arrives.

This has been Dale VK4DMC and you are listening to the WIA news.

VK7

CLOSURE OF VK7AX PACKET BBS NETWORK

After approx. 35 years of operation, Tony VK7AX has decided to close the Packet Radio BBS known by the SSID of VK7AX-6.

This decision was not taken lightly, however the time has eventually come according to Tony to close the BBS.

Due to the decline of RF users in recent times to ZERO and increasing running costs, he has reluctantly come to the conclusion that it is not worth continuing to maintain a system purely to act as a Bulletin Forwarding machine only.

He takes the opportunity to thank the many sysops and friends (world wide) that have helped or contributed in one way or another over many years. Without the true Amateur Spirit and encouragement shown to him by many, he feels that he would not have continued maintaining and operating the BBS for as long as he has.

The BBS will be turned off on Saturday 30 October 2010.

This follows the closure of the Tnos packet Gateway machine VK7AX-8 which was decommissioned approx. 3 months ago for the same reasons.

Once again many thanks to everyone for their support and valued friendships.

Finally, for those still interested in packet, please support the only remaining BBS in VK7 [VK7HDM] (email: ddm@lnx-vk7hdm.dnsalias.org)

LATE BREAKING NEWS:-

1 Global Simulated Emergency Test (GlobalSET)
2 Communication support for dual disasters in Indonesia
3 SERG news on Sunday 7th Nov will not go to air but the Monday night will.
4 Afghanistan DXpedition

Read "all about it" in the Final Final at the conclusion of this text news.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART and the WW sources of the WIA.

CISPR TO START FROM SCRATCH ON PLT

South Africa's CISPR PLT Project Team reached the end of their mandate period
Of 5 years, without producing a useful document, which would guarantee the
ongoing protection of radio services. This means that work done during the past
ten years has not been fruitful. CISPR will have to start from zero.

SARL's Hans van de Groenendaal, during the past week, reviewed the draft
regulations that were prepared with the workgroup's input by ICASA. Some minor
enhancements were proposed. As part of the regulations, companies intending to
install PLT systems have to register all details on a publicly available data
base.

The SARL is keeping a close watch on developments.

While South Africa's wishes to have all amateur frequencies notched were not
accepted, there is a clear understanding by the vendors of PLT equipment that
taking care of notching of Amateur frequencies is a prerequisite for a
successful network.

Irish Science Week 2010

Science Week is being held from the 7 to 14th Nov. Irish Clubs have been
encouraged to take advantage of the publicity generated by Science Week to
promote their activities, perhaps by putting on a special event station or
partnering with some other local Science Week project.

More details on the Website www.scienceweek.ie

DEFENDING THE AMATEUR RADIO SPECTRUM: EVERYONE'S RESPONSIBILITY

The second edition of Spectrum Defence Matters -- a newsletter aimed at
keeping ARRL members updated on issues related to the protection of
Amateur Radio frequencies -- has just been released on the ARRL Web
site. This newsletter covers both USA domestic and international topics
related to the Amateur Radio spectrum.

RSGB NEWS FROM G4NJH

Impending changes to 5MHz beacon chain

During the summer, the 5MHz Working Group reviewed certain aspects of
the 5MHz Experiment and agreed a number of changes and improvements.
These will be implemented over the next few months.

The largest change is that it has been decided to remove the 0.5ms
pulse sequence at the end of each beacon transmission. It has also
been decided to build a new beacon for GB3RAL. The new design will
incorporate a PSK31 transmission in the place of the pulse sequence.
The design of the other two 5MHz beacons does not allow this addition.

A date for these changes has not been set, but it is hoped to
complete the changes before the end of the year.

OPERATIONAL NEWS -

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010

NOV 20-21 WIA Spring VHF-UHF Field Day
John Martin VK3KM tac@wia.org.au

AWARDS

Al Katz K2UYH has made DXCC on 70cms - Only the 3rd in the world to do so!

Al, K2UYH writes:

"I operated the EME contest with the K1JT's team, the highlight this month was
of course completing 432 DXCC after more than 30 years of trying.

DXCC was made possible by JT65B QSOs on 5 Oct CE0/DK2ZF DXCC 99,

and on 18 Oct TI2AEB DXCC 100.

I had a partial with Armando on 4 Oct TI2AEB and worked PY4AJ.

During the following two weeks Armando doubled his array making QSOs with him
relatively easy. I worked a second time on 19 Oct when his signals peaked to
22DB."

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Charley, VK2ZYZ here, I built this simple little receiver one night after
reading an article by PA2OHH describing it.

The coil is simply 30 turns of 1.5mm wire wrapped around a piece of garden
stake with a tap every few turns, a variable capacitor, 1 resistor, 1 fixed
capacitor, and a 230v to 12 volt transformer that's used for impedance
matching for the headphones, that's the entire parts list, and none of it
is critical.

The only active component is a MPF102 J-FET that cost me one dollar, everything
else is recycled parts from the junk box.

Band selection is done by selecting different taps on the coil, the
Variable cap is used for coarse tuning and fine tuning is accomplished by
slowly moving your hand towards the coil. Short wave stations are easily tuned
in and SSB and CW stations require a bit of a steady hand. Audio is very good
through head phones or you can plug in an old set of PC speakers for room

filling audio. Fine tuning is very easy if you run through an antenna tuner and use the tuner for fine tuning of CW and SSB stations.

The little rig works surprisingly well for what it is, receives 1.8mhz to 20mhz.

Current draw is 500 micro amps and sensitivity is approximately 4 microvolts. Some Short wave stations don't even require an external antenna.

It is a really fun receiver to build and only takes an hour to throw together.

If anyone is interested in more details feel free to contact me

WW SPECIAL INTEREST GROUPS --- DIGITAL
Australian Coordinator for TCPIP domains is Indy vk2xb@wia.org.au

DSTAR (VK1RWN)

CRARC are waiting for the Licensing to be sorted out with the WIA, so in the meantime the repeater is on test running 5w from Isabella Plains.

If you have a DSTAR radio please fell free to have ago at using the repeater (remembering you have to be registered on the DSTAR system to use the gateway),

DSTAR (HOTSPOT)

There is now a DSTAR HOTSPOT running on 438.900Mhz from Isabella Plains, it is running approx 25W into a Diamond X50 connected to Reflector 3C so there is plenty of stations to chat with during the day.

So if you have a DSTAR rig just set your call sign's to the following:

MYCALL to (YOUR OWN CALLSIGN)
YOURCALL to CQCQCQ

And that will get you onto the reflector.

Be aware it will be using the CRARC's Callsign for gateway access so mind your P's and Q's

YL NET

A group of South African YL's under the leadership of Annette, ZR6D, are starting a YL net to get YLs more involved with the radio and over the air waves. There are many YLs with licenses but never heard.

For instance, many YLs took part in the YL Sprint but only 10 sent their logs in. It is now the time to get involved.

All YLs are welcome.

If you have any interesting news or suggestions please call zr6d@ymail.com

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Amateur radio operators in the flood-stricken areas of Thailand are helping authorities coordinate rescue and relief efforts, Thailand's Bangkok Post reports.

An Amateur Radio coordinating centre using the call sign HS3AN, located at the provincial hall, has been working closely with government agencies, relaying details about the emergency situation and explaining problems to officials and relief workers so appropriate action can be promptly taken.

The IARU member Radio Amateur Society of Thailand (RAST) on its website reports that the communications talents and capabilities of radio amateurs are being put to good use.

In the middle of this year Thailand's National Disaster Management Centre under the Interior Ministry, had requested RAST to nominate radio amateurs to join a disaster response planning working group.

Nakhon Ratchsima is Thailand's biggest province, which has a population of 2.7 million in 32 districts with 3,700 villages.

The natural disaster has destroyed more than 80,000 hectares of rice paddies, most just weeks away from harvest time that provides many farmers with their annual source of income.

The Nakhon Ratchasima Amateur Radio Association (NRARA) has set up a coordinating centre using the call sign HS3AN.

Located at the provincial hall, it has been working closely with government agencies, relaying details about the emergency situation to officials and relief workers.

NRARA President, Charnchai Siriamornpan HS4XU, said amateur radio operators had also pitched in to help soldiers, volunteers and foundation workers get food to flood victims and ferry women in advanced pregnancy women to hospital.

The Bangkok Post said that government licensed amateur radio users are allowed to communicate with one another using VHF and HF (short wave) radio communications. They often operate in areas where mobile phone signals can't reach.

Jim Linton VK3PC, Chairman, IARU Region 3 Disaster Communications Committee.

www.bangkokpost.com/news/local/202957/amateur-radio-operators-answer-call-for-assistance

November 6th is the BMSC's annual National Capital (NatCap) Rally.

This rally will have 8 stages consisting of 2 stages in the
Bluetts / Greenhills area (near Mt Stromlo) and then 3 stages out in
Kowen Forest with each of those run twice.

Canberra Region Amateur Radio Club need to support 13 field stations and
at least 4 people in HQ over the day, at present they have 10 people
who have put their hands up!

This event is the largest single source of financial dollars to the club now
the Rally of Canberra is no more and so they do need to make sure they get
enough people to support the event properly.

PLEASE contact Phil VK1PL by email to committee@crarc.ampr.org
if you can assist with any of these events.

FINAL FINAL (TEXT EDITIONS ONLY)

Global Simulated Emergency Test (GlobalSET)

This emergency communications exercise is held twice a year, the next GlobalSET is on Saturday the 13th of November.

The main change this time is that it will run 1100 to 1500 hours local time, of the stations taking part.

The operation will take place on and near the emergency Centre-of-Activity (CoA) frequencies on 80, 40, 20, 17 and 15 metres.

The objectives of GlobalSET are to:
Increase the common interest in emergency communications. Test how usable the emergency Centre-of-Activity frequencies are across the three ITU regions. Create practices for international emergency communication and Practice the relaying of messages using all modes.

IARU member radio societies, and emergency communications group stations intending to participate are requested to register through their IARU Regional or National Emergency Communications Coordinators.

(Jim Linton VK3PC, Chairman, IARU Disaster Communications Committee)

Communication support for dual disasters in Indonesia

Following two natural disasters, an earthquake triggered tsunami, and separately an erupting volcano, radio amateurs are providing their help as the enormous response effort continues.

ORARI (Organisasi Amatir Radio Indonesia) International Affairs Coordinator, Wisnu Widjaja YB0AZ has provided initial information about the involvement of radio hams in the dual disasters that hit the Indonesian archipelago this week.

He said that the ORARI Communication and Rescue Task Force has joined the team of the Disaster Management of Directorate General Post and Telecommunications, Ministry of Communication and Informatics Republic of Indonesia.

They has been operating in the field and provide communications support to the government and communities in the area where the eruption of Mount Merapi catastrophe at Yogyakarta province and the earthquake also followed by tsunami at Mentawai of West Sumatra, said Wisnu YB0AZ.

Media reports that at least 170 died, mostly drowned after the tsunami triggered by a 7.7 magnitude offshore earthquake struck the Mentawai islands late Monday off the west coast of Sumatra. Up to 400 others are missing.

While on the island of Java, several hundred kilometres away, 29 were killed when the volcano, Mount Merapi, erupted on Tuesday releasing clouds of hot gas, rocks and laver into the air. almost 42,000 people had fled to temporary shelters around the nearby city of Yogyakarta as the area is covered in volcanic ash.

The remoteness of the affected areas, poor communications, and the ongoing disaster response and relief efforts are likely to see the OARI Communication and Rescue Task Force involved for some time yet.

(Jim Linton VK3PC, Chairman, IARU Region 3 Disaster Communications Committee.)

Good afternoon Graham

I just sent off an email to SERG members. The mail is notice that the news session on Sunday 7th Nov will not go to air (but the Monday night one will go as usual).

Reason is that club resources, including our b/cast team, will be stretched to the limit providing a big and diverse communication network and other inputs to the "Legends of the Lake" hillclimb, an annual CAMS event held in Mount Gambier.

Afghanistan DXpedition

Paul, N6PSE, has just sent out the following press release:

"The Intrepid-DX Group is pleased to announce our next DXpedition as T6PSE from Afghanistan, to take place during ten days in May of 2011.

"Due to security concerns, the exact dates and location of the DXpedition will not be given at this time. Our primary objective is to activate Afghanistan with a goal of providing as many DXers as possible a 'new one' with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible."

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 "SUITS UP" FOR FEBRUARY 2011
LAUNCH

Earlier this year, astronauts living on the International Space
Station had to discard two surplus Orlan space suits. With the loss of
the suits, those involved with AMSAT and Amateur Radio on the
International Space Station were at a loss. One of these suits was to
be used to house the electronics for the upcoming SuitSat-2 mission:
the batteries were to be mounted inside the suit, solar panels attached
to the extremities with the electronics, with video cameras and an
antenna mounted on the helmet. But even though the removal of the space
suits took away the "Suit" component of the deployment, AMSAT and ARISS
forged ahead, changing the configuration of the satellite and Amateur
Radio experiment and giving it a new name: ARISSat-1/RadioSkaf-V. Read
more here
<http://www.arrl.org/news/arissat-1-suits-up-for-february-2011-launch>.

==> + ON THE AIR: NO "MAYBES" ABOUT IT -- ARRL SWEEPSTAKES IS FUN!
```

ARRL Sweepstakes has been part of Amateur Radio in the US and Canada for more than 75 years. In 2010, the tradition continues with the 77th running of the best domestic contest in all of Amateur Radio: CW will be the weekend of November 6, while the Phone portion of the contest runs the weekend of November 20. The 2010 ARRL November CW Sweepstakes runs from 2100 UTC Saturday, November 6 through 0300 UTC Monday, November 8. The SSB portion of Sweepstakes runs from 2100 UTC Saturday, November 20 through 0300 UTC Monday, November 22. Why not make plans now to join thousands of other radio amateurs across the continent and get in on this year's fun in the ARRL November Sweepstakes! Read more here <http://www.arrl.org/news/no-maybes-about-it-arrl-sweepstakes-is-fun>.

==> + PUBLIC SERVICE: THE 2010 GLOBAL AMATEUR RADIO EMERGENCY COMMUNICATIONS CONFERENCE

The 2010 Global Amateur Radio Emergency Communications (GAREC) Conference was held October 10-12 in Cura&#65533;ao (PJ2). At the time most conference attendees arrived in Cura&#65533;ao, it was a part of the Netherlands Antilles along with Bonaire, St Maarten, Saba, and St Eustatius. By the time the attendees headed home, independence had been declared and Cura&#65533;ao was its own nation within the Kingdom of the Netherlands. Read more here <http://www.arrl.org/news/the-2010-global-amateur-radio-emergency-communications-conference>.

==> IN THE SHACK: TWO NEW ARRL KITS COMING SOON

Two new ARRL kits are in the final throes of production. The first is a Morse code oscillator, produced for ARRL by MFJ Enterprises. The project is a good "beginners" electronics kit. We expect the kit will be popular with members, particularly newcomers, and with clubs, instructors and teachers seeking a classroom kit-building experience. A supplementary resource guide for students and educators will be made available by the ARRL Education and Technology Program. The guide helps cover the fundamentals of the working circuit and its components.

<http://www.arrl.org/shop/ARRL-Morse-Code-Oscillator-Kit/> A second kit is a PIC programming lab and project, produced for ARRL by Cana Kit (Canada). This more substantial kit is intended to be used with ARRL's PIC Programming for Beginners <http://www.arrl.org/shop/ARRL-s-PIC-Programming-for-Beginners/> book (revised first edition). The kit includes all the necessary components, parts and boards, and follows the book's step-by-step exercises and tutorial. The kit also includes all the necessary parts to build a microprocessor-controlled CW keyer, which is the book's culminating project.

"We're excited about these new projects, which help emphasize kit construction, basic electronics, and the extraordinary potential of microcontrollers," said ARRL Marketing Manager Bob Inderbitzen, NQ1R. "There's no better way to advance the radio art than by introducing more hams to project building and homebrewing." Order your ARRL Morse

Code Oscillator
<http://www.arrl.org/shop/ARRL-Morse-Code-Oscillator-Kit/> and ARRL PIC
Programming Kit <http://www.arrl.org/shop/ARRL-s-PIC-Programming-Kit/>
today in the ARRL Online Store <http://www.arrl.org/shop>.

==> + INTERNATIONAL SPOTLIGHT: ARRL VISITS BRITISH HAMS, RSGB AT
NATIONAL HAMFEST

Earlier this month, ARRL Marketing Manager Bob Inderbitzen, NQ1R,
represented the League at the National Hamfest in the United Kingdom.
Billed as the biggest convention in the UK, the National Hamfest
"kicked off" Ham Week UK, October 1-10. Now in its second year, the
hamfest is sponsored by both the Lincoln Short Wave Club and the Radio
Society of Great Britain. Ham Week concluded with the RSGB Convention
-- formerly the HF Convention -- held October 8-10. According to
Inderbitzen, the RSGB Convention is a smaller event than the National
Hamfest, and includes lectures and presentations for HF and VHF
interests, but no exhibits. Read more here
<http://www.arrl.org/news/arrl-visits-british-hams-rsgb-at-national-hamfest>.

==> SOLAR UPDATE

Tad "The rain exploded with a mighty crash as we fell into the Sun
<http://www.youtube.com/watch?v=oM6auGQ2VGo>" Cook, K7RA, reports:
Although this week saw a high daily sunspot number of 74 on October 26,
the average sunspot number for the week dropped more than five points
to 50.3. One new sunspot group, numbered 1119, emerged this week, but
1117 -- which has been visible since October 19 -- has become huge. On
Wednesday, October 27, it measured 450 millionths of a solar
hemisphere, larger than any single sunspot group this year. Look for
more information -- including some information from Stu Phillips, K6TU,
on how to calculate signal strengths for SSB and CW signals over the
same paths shown in WSPR data -- on the ARRL Web site on Friday,
October 29. For more information concerning radio propagation, visit
the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by Paul McCartney's Band on the Run
<http://en.wikipedia.org/wiki/Band_on_the_Run_%28song%29>.

==> + DX NEWS: ARRL DXCC DESK APPROVES SIX 2010 OPERATIONS

ARRL DXCC Manager Bill Moore, NC1L, reports that six 2010 operations
-- Afghanistan (T6MB), Bhutan (A51A) and Burundi (9U1RSI, 9U4T, 9U1KI
and 9U1VO) have been approved for DXCC credit. "If you had cards that
were recently rejected for this operation, please send an e-mail
<dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Results will
appear in Logbook of The World (LoTW
<https://p1k.arrl.org/lotwuser/default>) accounts, as well as online on
the daily listings <http://www.arrl.org/dxcc>."

==> THIS WEEK ON THE RADIO

This week:

- October 30-31 -- ARRL EME Contest <http://www.arrl.org/eme-contest>;
CQ Worldwide DX Contest (SSB); 10-10 International Fall Contest
(Digital); 50 MHz Fall Sprint
- November 2 -- ARS Spartan Sprint

Next week:

Amateur Radio Newsline(tm) Report 1733 - October 29 2010

Amateur Radio Newsline report number 1733 with a release date of
Friday, October 29 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio assists in the wake of severe
weather in both Thailand and the United States, a last minute delay in
the Sable Island DX'pedition due to aircraft safety concerns, Radio
Uganda refuses to leave the ham radio only portion of 40 meters and
lead free electronic components may soon be a reality. Find out
the details on Amateur Radio Newsline(tm) report number 1733 coming
your way right now.

RESCUE RADIO: AMATEUR RADIO ASSISTS IN THAILAND FLOOD RELIEF

Ham radio has come to the aid of flood stricken Thailand. Norm Seeley,
KI7UP, has more:

--

Thailand's amateur radio society R-A-S-T reports that amateur radio
operators in two flood-stricken areas of Thailand have been putting
their communications capabilities to good use, with members helping
authorities setting up a communications center using the call sign,
HS3AN.

It, has been working closely with government agencies. Relaying details
about the emergency situation and explaining the problems being faced
to officials and relief workers so that action to assist them can be
taken.

The president of one of the flood-stricken Amateur Radio Association,
HS4XU, relates that radio amateurs have pitched in with soldiers,
rescue volunteers and workers from various foundations, by helping
flood-stricken people with food and to ferry expectant mothers to
hospitals.

The club station HS3AN has also been coordinating relief work with the
help of other amateur radio communications centers based in three other
cities. The operators at these locations have also been providing
information to people traveling to and from flood-stricken area.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, following this story from Scottsdale, Arizona.

--

There are over 100,000 ham radio operators in Thailand. Many are involved with providing emergency communications. Updates on this story are on-line at www.qsl.net/rast

RESCUE RADIO: SKYWARN HAMS ASSIST THE NEWS IN SEVERE WEATHER ALERT

Amateur radio operators across the mid-western United States went on alert on Tuesday, October 26th to report on severe weather and damage conditions. This as a severe early autumn storm pounded the area.

According to an ARRL press release, most of those providing service were part of the National Weather Service's Skywarn program. This is a group of highly trained radio amateurs nationwide who provided eye witness reports of ground conditions and verification of radar assessments.

>From Michigan to Kentucky, hundreds of Amateur Radio volunteers quickly turned their hobby into radio networks allowing emergency responders to have accurate information of conditions.

Mike Corey is the Emergency Preparedness Manager for the ARRL. According to Corey, there was great need for the hams with Skywarn, especially around Indiana. Their giving the National Weather Service real-time, ground level confirmations was definitely appreciated.

As severe weather continues in some areas, hams in those venues remain on alert. On Wednesday, October 27th, Alabama weathercaster James Spann, WO4W, reported via Twitter and Facebook that a new tornado watch had been issued for many counties south and east of the city of Birmingham. These included Autauga, Bibb, Chambers, Chilton, Talladega and Tallapoosa to name only a few. That warning was to be in effect until 07:00 PM in the evening. When alerts such as this are issued in the Birmingham area, activation of Skywarn is a usual part of any severe weather watch. According to WO4W, Skywan was active all day on Tuesday the 26th well into the evening hours. (ARRL, ARNewsline(tm), Facebook, Twitter, other reports)

BREAKING NEWS: SABLE ISLAND DXPEDITION DELAYED DUE TO AIRCRAFT SAFETY ISSUE

Some breaking news on the D-X front. This with word that the long awaited Sable Island DXpedition has been postponed due to transportation problems.

According to Randy Rowe, N0TG, just prior to the teams planned departure to Sable Island, a major safety issue was discovered with the

charter aircraft that requires repair before it can fly. Rowe says that as of this writing the needed parts have not yet been located. Also, it is estimated that acquiring these components and completing the repairs could take as much as 3 weeks or longer.

Rowe says that as a result, the operators will be returning to the United States to regroup and reschedule a return to Sable for another try. He adds that hopefully, a new date can be announced in the near future.

In the meantime, breaking news will be posted at the operations website at www dot CY0dxpedition dot com. We will have more DX news later on in this week's Amateur Radio Newsline report. (CY0 DXpedition)

**

INTRUDER WATCH: RADIO UGANDA ON 7.195 MHZ

A shortwave station on the African continent is playing hardball and is refusing to leave the amateur only portion of 40 meters. This, even after notification from the government, Radio Uganda continues to operate on the amateur radio frequency of 7.195 MHz.

Following notification by 5X1JM, the Uganda Communications Commission informed Radio Uganda the broadcaster is not permitted to use the frequency within the amateur radio exclusive spectrum. So far, the station has continued to use the frequency and its believed that it may be some time before they move out.

Observers say that at least the point has been made and action initiated by Ugandan government telecommunications authorities against the now unauthorized use of the frequency.

One other note. Uganda radio amateurs have been authorized by Uganda Communications Commission to use the band 7.1 to 7.2 MHz. (5Z4NU)

RADIO RECORDS: G3XBM ACHIEVES 1733 KM ON 500 KHZ USING LOW POWER WSPR

A new 500 KHz distance record may have been set on Thursday, October 21st. This when Roger Lapthorn, G3XBM, in Cambridge, England was heard some 1733 km away in Finland by Paul Henrik, OH1LSQ.

According to Lapthorn, he was operating on 500 Khz using the digital mode W-S-P-R commonly called wisper in the ham radio world. Lapthorn says that quite unexpectedly, he began receiving a string of reports from OH1LSQ in grid square KP03sd at an astounding distance of 1733 km.

Lapthorn said that to him these were amazing reports pushing his best DX on the band to new levels. This is because he runs only a few milliwatts effective radiated power on that band. He also notes that his transmit antenna is a very simple vertical loop made with wire only 1 millimeter thick. (Southgate)

**

HAM HAPPENINGS: SCIENCE WEEK IN IRELAND

Meantime, November 7th to the 14th marks Science Week in Ireland and that nation's amateur radio clubs are being urged to take part. According to the I-R-T-S weekly news, clubs are encouraged to take advantage of Science Week to promote the hobby by putting on a special event station or partnering with some other local organizations in a Science Week project. More details are on-line at www.scienceweek.ie. (IRTS)

**

AWARDS CORNER: WIA CENTENARY AWARD UPDATE

Turning to radio honors, so far 269 claims for the limited time Wireless Institute of Australia's Centenary Award operating award have been received and verified with certificates now issued.

The 200th award went to Monica Crockett, VK3FMON, of Axedale. According to the award sponsor, it is good to see the enthusiasm of entry level Foundation Licensees with some 30 having already qualified for and claimed the award.

The VK2AWA Contest Group is the very latest radio club on the award list. Some 15 DX stations from Finland, India, Hawaii, Japan, New Zealand, Russia and the USA are also recipients of the award.

For details about the WIA Centenary Award visit WIA website www dot wia dot org dot au. (WIA News)

CONTEST CORNER: RULES CHANGES FOR CQWW

The CQ World Wide DX SSB Contest is this weekend of October 30thand 31st, and with this, Contest Director Bob Cox, K3EST, is highlighting the expanded award program for the assisted categories. Specific changes include the following:

First, all Low Power and QRP assisted entrants will be specifically listed and eligible for awards as is already the case for unassisted entries. Second, a band-by-band breakdown for all band assisted World, Europe and USA will be provided within the 2010 results. And Lastly, the number of plaques available to assisted entrants will be increased to include a Europe Assisted All Band and all World Assisted Single Bands operations.

Cox notes that this applies to both the SSB and CW weekends. He also reminds contest participants that the log submission deadlines have been changed. SSB logs must be submitted by November 21st and CW logs by December 21st. We say, good luck in the contest. (CQ)

ENFORCEMENT: FCC ISSUES $10000 NAL TO UNLICENSED NY BROADCASTER

The Federal Communications Commission has issued a $10,000 Notice of Apparent Liability to monetary forfeiture to New York State resident Vicot Chery. This on charges that of allegedly operating an unlicensed radio transmitter on the frequency 90.5 MHz in the city of Spring Valley, New York.

In the notice issued on October 22nd. The FCC says that in response to a complaint. its agents from the Enforcement Bureau's New York Office monitored the frequency 90.5 MHz on October 26, 28, and 29, 2009. On each of those days, the agents observed a radio signal on 90.5 MHz and used direction-finding techniques to locate the source of the transmissions to a business in Spring Valley. The agents also took field strength measurements on each of the three days and determined that the signal being broadcast exceeded the limits for operation under Part 15 of the Commission's rules.

October 29, 2009, the agents entered the premises where two businesses were located. The agents proceeded to the offices of P.C. Taxi and spoke to the dispatcher regarding the unauthorized transmissions. The dispatcher said she would contact Vicot Chery, who she identified as the owner of P.C. Taxi. Subsequently, Chery arrived and the agents asked him about the unauthorized transmissions and asked to inspect the station. In response, Chery led them to an adjacent room where the agents observed a radio station in operation. Next, Chery led the agents to the roof where the FM broadcast antenna for the station was located. Finally, Chery took the agents to the upstairs attic where the station's transmitter was located behind a stack of car tires and hidden from plain view.

Chery told the agents that he was allowing a friend to use the space to operate the station. At the agents' request, Chery turned off the transmitter and also agreed to remove the antenna.

On November 4, 2009, the New York Office issued a Notice of Unlicensed Operation to Chery for the transmissions on 90.5 MHz. The New York Office received a reply from Chery's attorney asserting that Chery had no knowledge of the events which the FCC had charged him. The attorney went on to state that during the two months prior to the agents' inspection, Chery had allowed an unidentified person to use the space in his businesses where the radio station was located but the letter failed to identify the friend by name.

But the FCC did not buy the response. In issuing the $10,000 N-A-L, the regulatory agency noted that taken together, the facts show that Chery had control of the station and was involved in its general conduct or management. Also, the fact that someone else also may have been involved in the station's operation does not make Chery any less of a participant in its operation.

The Commissin then stated that pursuant to the Forfeiture Policy Statement and section 1.80 of the FCC Rules, it concluded that Vicot Chery is apparently liable for a forfeiture in the amount of $10,000. Cherry was given the customary 30 days to pay or to file an appeal

SAFETY IGNORED: COPPER THIEF ELECTROCUTED IN LOS ANGELES SUBURB

A man allegedly trying to steal copper wire from a vacant building in Los Angeles, California, neighborhood was electrocuted on Saturday, October 23rd. This after he tried to cut through a power distribution site he apparently thought was deactivated but was still alive.

The incident took place at an electrical vault on a lot at 3064 Firestone Blvd., at the corner of South Gate Avenue. The lot was the former site of the Liberty Cable Company but has been unoccupied for more than a year.

According to police reports, the unidentified man was electrocuted and died at the scene. His female partner tried to pull him away from the vault when it caught fire and exploded, but the electrical current traveled through her body and she received severe burns. South Gate police spokesman Lt. Keith Huff said she was taken to the nearby St. Francis Medical Center for emergency treatment and then transferred Saturday night to the Grossman Burn Center.

The couple's two small children were found in a truck about fifteen feet from the incident but were not injured. They were being held in protective custody by Childrens' Services until other family members can be found and notified.

According to Lt. Huff, the explosion that took place at 4:14 p.m. knocked out power across the west side of South Gate. Electrical service was largely restored by the evening.

With the economic slide due to the recession continuing and California having one of the nations highest unemployment rates, cooper wire theft for resale to he scrap metal market remains a major criminal activity, state wide. (Published news reports)

WORLDBEAT: EME STATION STOLEN IN NORWAY

Anders Thorrud, LA8LF, in Drammen, Norway reports over the VHF reflector that most of his Earth-Moon-Earth station equipment and all instrumentation was stolen in a recent burglary at his EME site. Also

taken was most of his documentation including his EME logs from 1987 onward and his log from the last ARRL 23 CM EME contest during which he worked some 20 new stations. He is requesting that those who worked him as a new initial contact to please contact him with their QSO information. (VHF Reflector)

**

WORLDBEAT: KOLN RADIO MUSEUM REPORTS THEFT OF VINTAGE GEAR

Meantime reports that some prized vintage radio equipment was stolen in a burglary at Germany's famed K"ln Radio Museum. Among the pieces taken was a Otek Darling horn-type speaker dating back to 1926 and a Telefunken Arcolette receiver from 1927.

Details of the stolen equipment can be found in this Google English in a PDF file at tinyurl.com/museumradiotheft. The museum asks that anyone seeing this equipment for sale on Ebay or elsewhere should contact them immediately. You can reach the K"ln Radio Museum by e-mail to info (at) radiomuseum-koeln (dot) de. (Southgate)

WORLDBEAT: NIGERIAN PRESIDENT APPROVES AUTOMATIC LICENSING FOR COMMUNITY RADIO

Nigerian President Goodluck Jonathan has empowered the National Broadcasting Commission to approve licenses for the establishment of community radio stations. This, without recourse to the office of the presidency.

President Jonathan gave the directive while declaring open the eighth biennial conference of Africa Broadcasters. Represented by Vice President Namadi Sambo, the President stated that already, the Federal Executive Council had considered and approved the guidelines proposed by the National Broadcasting Commission for the licensing of Community Radio in Nigeria.

In making the announcement, President Jonathan also urged journalists to maintain professional integrity, by ensuring truth, balance and fairness in their coverage of political activities. (MN)

NAMES IN THE NEWS: K2UYH MAKES DXCC ON 70 CM

Some names in the news. First up is Allen Katz, K2UYH, of West Windsor, New Jersey. This, on becoming only the 3rd operator worldwide to make DXCC on the 70 centmeter band.

According to Katz, this feat was made possible by QSOs on October 5th when Katz worked DK2ZF portable C-E-Zero followed by TI2AEB on October 18th. Both of these QSO's were made using the JT65B digital low noise mode. (VHF Reflector)

**

NAMES IN THE NEWS: ARNEWSLINE ANCHOR KQ6FM NAMED PACIFIC DIVISION HAM OF THE YEAR

And congratulations to Newsline's own Don Carlson, KQ6FM. This on his being named as recipient of the ARRL Pacific Division's 2010 "Ham Of The Year Award." And as Don told our producer Bill Pasternak, WA6ITF, it all came as a big surprise:

--

KQ6FM: "Well, I was sitting at the back of the room at the end of the banquet and Bob Vallio, our Pacific Division Director, W6RGG, called an old friend of mine whom I used to work with in the Santa Clara Valley Section, Glen Thomas, WB6W to the front of the room.

"Well, it had been a very long day and I was batting eyes in the back of the room, though I the to admit it. All the sudden I start hearing my resume and I go `eesh, here we go' and - you know - heart goes up in throat.

"The next thing I know I am standing up there getting the Amateur Radio Operator of the Year Award for the Pacific Division. Its an honor that just blew me away. I was very humbled but very elated and I thank the ARRL and the Pacific Division for this award."

--

KQ6FM received the surprise honor at the recent Pacificon 2010 ARRL Pacific Divison Convention held in San Ramon, California. The award recognizes his many years contributing to the betterment of amateur radio both nationally and in the Pacific Division. (ARNewsline)

PROPAGATION: CHANGES COMING TO 5 MHZ BEACON CHAIN

Changes are coming to the 5 MHz beacon chain. Jeremy Boot, G4NJH, is here with the details:

--

During the summer, the 5 MHz Working Group reviewed certain aspects of the 5MHz Experiment and agreed a number of changes and improvements. These will be implemented over the next few months.

The largest change is that it has been decided to remove the 0.5ms pulse sequence at the end of each beacon transmission.

It has also been decided to build a new beacon for GB3RAL. The new design will incorporate a PSK31 transmission in the place of the pulse sequence. The design of the other two 5MHz beacons does not allow this addition.

The pulse sequence was included in the beacon transmission sequence to allow the propagation paths to be studied.

Peter Martinez, G3PLX wrote an article for the January 2006 issue of RadCom, " 5MHz beacon sounder experiment". The article included some interesting scattergrams of the different paths taken by the signals from the beacons.

I'm Jereamy Boot, G4NJH

--

A date for these changes has not been set, but it is hoped to complete the changes before the end of the year. For further information about the 5MHz beacons, you're your web browser to tinyurl.com/25ulj75 (GB2RS)

**

PROPAGATION: THE SIX AND TEN REPORTING CLUB

The Six and Ten Reporting Club is an informal group of radio amateurs, mostly from the UK, interested in propagation studies at frequencies around the High Frequency to VHF boundary. Mainly, those who operate on the 6 and 10 meter amateur radio bands.

The club produces a monthly newsletter called the Six and Ten Report that includes analysis of 28 MHz propagation based on beacon monitoring. Also included is an ongoing analysis of 50 MHz activity reports broken down by propagation mode as well as reports and discussions on unusual propagation events.

The Six and Ten Report is edited and produced by Steve Reed, G0AEV and Martin Harrison, G3USF and is an activity of the RSGB's Propagation Studies Committee. The Report is usually published online at g7kse dot co dot uk stroke 6and10 about 5 to 6 weeks after the end of the month. (GB2RS)

**

HAM RADIO IN SPACE: FO-29 OPERATING SCHEDULE AFFECTED BY ECLIPSE PERIODS

Mineo Wakita, JE9PEL, reports that the Japan Amateur Radio League has been making necessary adjustments to the Fuji Oscar 29 satellites operating schedule. This as the satellite enters a period of eclipses.

These eclipses have reduced the power budget requiring frequent analysis of available power aboard the satellite. As such, FO-29 will be enabled only when the power budget allows.

Meantime, the Japan Amateur Radio League requests that satellite operators access FO-29 with as little power as necessary to maintain communication. To assist in this, JE9PEL has posted calculations of the FO-29 eclipses on line at tinyurl.com/267jmq7 (ANS, JE9PEL)

**

DX

In DX, an international team of amateur radio operators are planning to activate Kanton Island for 9 days starting April of 2011. An additional day may be added depending on the sailing time to the island. Transportation has been arranged, all licenses are assigned and the permit is in its final stages. Callsign will be T31A. They plan to have 6 stations with 12 operators with activity on 160 through 10 meters using CW, SSB and RTTY. More is on-line at t31a dot com.

Members of the Sony Kyushu's Amateur Radio Club will operate from the Island of Danjo in the East China Sea using the club call JF6ZNT. This, between November 5th to the 7th. Activity will be on 80-10 meters using CW, SSB and RTTY. This island is one of today's most wanted in the Japanese Islands on the Air group. QSL via the Bureau or direct via each operator's home callsign as directed on the air.

And heres a true rare one to listen out for. OM2DX says that he will be on the air as 3W1M from Hanoi during the CQ WW DX SSB Contest on October 30th and 31sst. He will operate as a Single-Operator Single-Band 15 meter only entry. QSL via OM3JW, direct or by the Bureau.

UY5ZZ will be on the air stroke YV7 from Margarita Island between October 26th and November 7th. His activity will be on the HF bands, and include the CQ WW DX SSB Contest and Ukrainian DX Contest. QSL via his home callsign.

DL5MFL, DL4MAQ and DF9MV are planning to be active from Senegal from November 8th to the 18th. The group will be guests of 6W7RV at the Le Calao resort and will operate dedicated holiday style. A 6V7 callsign is being requested and will be made public as soon as its available. QSL via D-E-Zero-M-S-T.

Lastly, G7BXU says that he will be spending the Christmas and New Year holidays in Freetown,m Sierra Leone. He will be there between December 19th and January 7th and hopes to take his FT-897 and a G5RV antenna with him. More details will be forthcoming in the next few weeks.

(Above from various DX news surces)

**

THAT FINAL ITEM: DEVELOPING A LEAD FREE PIZEOELECTRIC

Researchers in Europe may have found a way to make a lead free piezoelectric that could pave the way to lead free electronic components. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

Research published October 4th by materials engineers from the University of Leeds could help pave the way towards 100% lead-free electronics. The work, carried out at the United Kingdom's Diamond Light Source synchrotron facility, reveals the potential of a new artificial material to replace lead-based ceramics in countless electronic devices, ranging from digital cameras to hospital ultrasound scanners.

European regulations now bar the use of most lead containing materials in electronic and electrical devices. Ceramic crystals known as piezoelectrics are currently exempt from these regulations but this may change in the future, owing to growing concerns over the disposal of lead based materials.

Piezoelectric materials generate an electrical field when pressure is applied, and vice-versa. The most common piezoelectric material is a ceramic crystal called lead zirconium titanate, or PZT. Using a high intensity X-ray beam at the Diamond Light Source, the University of Leeds researchers have now shown that a simple, lead-free ceramic could potentially do the same job as PZT.

Tim Comyn, lead investigator on the project noted that with the extreme conditions beamline at Diamond Light, his team was able to probe the interior of the lead-free ceramic known as Potassium Sodium Bismuth Titanate to learn more about its piezoelectric properties. He noted that the researchers could see the changes in crystal structure actually happening while they applied and electrical field to the chemical structure. And that's a giant step forward in eliminating lead as a component in electronic components, worldwide.

For the Amateur Radiuo Newsline, I'm Bill Pasternak, in the Newsroom, in Los Angeles.

--

The Leeds team says that it will continue to work at the Diamond facility to study the transformation induced by an electric field at high speed and under various conditions using state of the art detectors. Meantime, the results of the work so far has been published online in the journal Applied Physics Letters. (ScienceOnLine)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all

from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

RSGB President to address RAYNET Convention

RSGB Museum Surplus Equipment Sale

Voting started in RSGB Elections

RSGB President Dave Wilson, M0OBW and Charlie Morrison, GI4FUE, the Public Service portfolio holder, will be attending the RAYNET Convention and AGM. They will be giving a presentation on RAYNET and the RSGB. The RAYNET Convention and AGM takes place next Saturday, 6 November, in the Council Chamber, County Hall, Durham. RAYNET members of all affiliations are welcome to attend.

The first sale of RSGB Museum surplus equipment ends today, Sunday 31 October. There has been lots of interest in the sale and all items have received bids, particularly the Icom IC-720 and the Hallicrafters Skyrider SX-23. If you are interested in any of the equipment, check out www.rsgb.org/auction. Please note this auction finishes today just after 7pm. Next week's sale of RSGB Museum surplus equipment will include an Eddystone model 960 solid state HF receiver and a Microwave Modules MML432/100 100 watt 70cm linear amongst the twenty or so items. Information on these items can also be found at www.rsgb.org/auction.

Voting is under way in the RSGB Board and Region 4 elections. All RSGB members are entitled to vote in the Board election and members in Region 4 for the regional election. RSGB members can vote online at www.votebyinternet.com/rsgb10, that's rsgb one zero. You will need your callsign and membership number to vote, as shown in November's RadCom. Members may also vote by post using the envelope that came with that magazine. Voting closes at noon on 2nd December. The election results will appear online and in the January RadCom.

Along with a wide variety of books, the RSGB will be taking some of the equipment from the RSGB Museum surplus sale to the Kempton Rally on Sunday 7 November. This will give visitors to the rally chance to buy some of the items without the postage fees. Items will include some unique and rare homebrew items, commercial kit and some items that have not been listed on the RSGB website or elsewhere. This is your chance to see and examine these items in person and buy on the day, without entering into competitive bidding on eBay.

Would you be interested in restarting the RAYNET group in Doncaster? The local council is anxious to further contact with local amateurs to add to the help it already receives from the Sheffield and Rotherham group. Particularly welcome would be those with previous RAYNET experience, but anyone willing to take part would be welcome to discuss this further. If you're interested in finding out more, please email your details to drm44@rsgb.org.uk.

On 2 November the Institute of Physics is holding an Open Lecture between 7 and 9pm at the Rutherford Lecture Theatre, University of Kent, Canterbury CT2 7NZ. The lecture will be given by Dr Ken Smith and is entitled Dafty and Electromagnetism: What a Revolution. James Clark Maxwell was nicknamed Dafty by his school and college contemporaries yet he not only established the electromagnetic theory of light but triggered off Einstein to establish Special Relativity.

Northumbria Amateur Radio Club will be commencing an Advanced course on Monday 8 November in Ellington near Ashington. More students would be welcome. The course is ?15 plus the cost of the exam. Contact David on 01670 513026 or by email to nld.radio@hotmail.co.uk.

The next Sheffield Amateur Radio Club Foundation course starts on Monday 24 January 2011. It begins with a two week general taster sessions to introduce students to amateur radio and Sheffield Amateur Radio Club. For further details and tutor contacts please email the club chairman, Peter G3PHO, by email to sarc@g3pho.org.uk.

Places are still available on the Wakefield & District Radio Society's latest Foundation and Advanced Licence Courses that start on Saturday, 30 October, although students can join the following week and catch up. For further details, visit the Society's website at www.wdrs.org.uk. Alternatively, contact the chairman, Ken 2E0SSQ by email to 2e0ssq@wdrs.org.uk, or phone 07 900 563 117.

And now for the details of rallies and events for the coming week

Next weekend, 7 November, the Kempton Rally will take place at Kempton Park racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. There will be a talk-in station on 145.550MHz using the callsign GB2KRT. Doors open at 10am and there will be trade stands, lectures and an RSGB bookstand that will include select items from the RSGB Museum Surplus Sale. Coulsdon Amateur Transmitting Society will be running a Bring and Buy stand. Details from Paul, M0CJX, on 0845 165 0351.

Also on 7 November, the Foyle & District ARC Annual Rally will be held at the Best Western White Horse Hotel, 68 Clooney Road, Derry BT47 3PA. Doors open at 12 noon and there will be trade stands, special interest groups and an RSGB bookstand.

Now for the news of special events

Coventry Amateur Radio Society will be operating GB70CBC for the Coventry Blitz Commemoration from Coventry Cathedral during November. Operation will be on an 'as available basis' on 2m and the HF bands

between 80 and 10m. Further information from G8GMU on 0247636 4235 or by email to info@andrewphotgraphic.co.uk.

Other special event station around at the beginning of November are GB2EWW for Easthams' World War and GB0AD for Armistice Day.

And now the HF DX news compiled from 425 DX News and other sources

Rich, 9M2MRS is back on Penang Island, which is IOTA reference AS-015. He will be there until April 2011. He usually operates CW. QSL to PA0RRS, the new address can be found at qrz.com.

Celebrating its 30th anniversary, PA30RCK will be active on all bands and modes until 5 November including activity during the CQ WW DX SSB Contest. QSL via PI4RCK or Logbook of the World.

Ulli, DL2AH will be active as ZD9AH from Tristan da Cunha, which is IOTA reference AF-029, until 6 December. This is not a DXpedition and he plans to operate mainly SSB on 40, 20, 17, 12 and 10 metres with some RTTY activity during the last two weeks of November. QSL via DL2AH, direct or via the bureau.

Now the contest news

Today, 31 October, sees the final hours of the CQWW DX Contest SSB leg. The exchange is signal report and your CQ Zone. Britain is Zone 14. Expect the SSB sections of the contesting bands from 3.5 to 28MHz to be packed and for some rare countries to be activated.

The International Police Association Radio Club invites all radio amateurs of the world to take part in the IPARC Contest which takes place every year on the first weekend in November. For full details, check out www.mydarc.de/dk3eu.

On 2 November the 144MHz UK Activity Contest takes place between 2000 and 2230UTC. Using all modes on the 2m band, the exchange is signal report, serial number and locator.

The RSGB Marconi CW Contest takes place on 6 and 7 November. Depending on the amount of time you can devote and whether you are a single operator fixed station or not, there are four categories to enter. Between 1400 and 1400, the contest take place on the 144MHz band, CW only, and the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 18th to the 25th of October, compiled by Neil Clarke, G0CAS on the 25th of October

The latest smoother sunspot numbers are now available and are for January, February and March and are 9.3, 10.6 and 12.3 respectively.

The solar disc had several sunspot groups visible every day. Solar activity was low on the 18th, 19th and the 20th when small C class solar flares took place. These had very little effect on propagation. Activity was at very low levels on the remaining days. Solar flux levels declined

from 91 units on the 18th to 82 by the 22nd. The average was 85 units. The 90 day solar flux average on the 24th remained at 81 units for another week. X-ray flux levels declined from B1.3 units on the 19th to A5.9 by the 21st. By the 24th levels had increased to A8.5. The average was A8.6 units. Geomagnetic activity started at quiet levels, for example on the 21st the Ap index was only 3 units. By the evening of the 22nd a coronal hole disturbance had arrived and the Ap for the 23rd was 23 units. The disturbance continued into the 24th when the Ap was 14 units. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds 340 kilometres per second on the 18th to 720 by the 23rd. Particle densities remained low except for a brief rise to 13 particles per cubic centimetre around midday on the 22nd. Bz varied between minus 4 and plus 5 nanoTeslas on the quietest day and between minus 9 and plus 8 nanoTeslas on the 23rd which was the most disturbed day.

And now the solar forecast. This week the more quiet side of the Sun is expected to be rotating into view. With that comes the possibility that solar activity will remain at very low levels. Even though, no solar flares are expected, this can change rather rapidly without any warning. Solar flux levels, given a quiet Sun should be around the 80 mark. Geomagnetic activity should be quiet right up to next weekend when there is a chance that activity could increase slightly. MUFs during daylight hours at equal latitudes should be around 26MHz for the south and 23MHz for the north. Darkness hour lows are expected to be about 9MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 23MHz. The optimum working frequency with a 90 per cent success rate will be about 18MHz. The best time to try this path will be between 1300 and 1800 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 1 November Gloucester Amateur Radio & Electronics Society is having a lantern show by David Bailey. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 1 November South Birmingham Radio Society is having a contest planning meeting. Contact Don, on 0121 458 1603.

On Monday 1 November Wythall Radio Club continues its Advanced course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 2 November Friskney and East Lincolnshire Communications Club is having a shack night. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 2 November Loughborough & District Amateur Radio Club is having a mini talk by Art, G3KWY. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 2 November Wythall Radio Club is taking part in the 2m UKAC. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 3 November Bolsover Amateur Radio Society is having a natter night. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 3 November Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 3 November Midland Amateur Radio Society is on the air and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 3 November South Birmingham Radio Society is holding its AGM. Contact Don, on 0121 458 1603.

On Wednesday 3 November Telford & District Amateur Radio Society is on the air and holding a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 4 November Salop Amateur Radio Society has its Chairperson's Forum. Details on the club website at www.salop-ars.org.uk.

On Thursday 4 November South Birmingham Radio Society has Foundation training classes with G8OWL. Contact Don, on 0121 458 1603.

On Friday 5 November Bromsgrove & District Amateur Radio Club is looking at the design and construction of filters. Contact Chris, M0BQE on 01905 776 869.

On Friday 5 November Coventry Amateur Radio Society is having a bangers & mash evening. Contact John, G8SEQ, on 07958 777363.

On Friday 5 November Nunsfield House Amateur Radio Group is having a shack night. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 5 November South Birmingham Radio Society has a construction evening. Contact Don, on 0121 458 1603.

On Saturday 6 November Lincoln Short-Wave Club is putting G5FZ on the air and doing work around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 6 November Loughborough & District Amateur Radio Club is having a talk on RV Jones by George, G4EUF and Ian, G8SNF. More

information from Chris, G1ETZ, on 01509 504 319.

On Sunday 7 November South Birmingham Radio Society is visiting the Martlesham microwave round table. Contact Don, on 0121 458 1603.

On Sunday 31 October South Birmingham Radio Society is visiting the North Wales Rally at Llandudno. Contact Don, on 0121 458 1603.

On Sunday 31 October Midland Amateur Radio Society is visiting the Llandudno Rally. Details from Norman, G8BHE, on 01214 229 787.

NEWS FOR THE NORTH OF ENGLAND

Fort Perch Rock Marine Radio Museum has announced its new website covering its wireless museum and other activities at New Brighton, Wirral. The site is at www.fortperchrockmarineradiomuseum.co.uk and includes details of its wireless room and special event station GB4FPR.

On Monday 1 November Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 1 November Macclesfield & District Radio Society is on the air. Contact Roger Bell, M0GMG, on 0771 258 9163.

On Monday 1 November Scarborough Amateur Radio Society is having a talk on amateur radio in the new millennium. Contact Jerry Scarr, G6LBL, on 01751 476601.

On Monday 1 November Sheffield Amateur Radio Club is having a talk on linear amplifier design and misuse by Peter Day, G3PHO. Contact the club by email to sarc@g3pho.org.uk.

On Tuesday 2 November Chester & District Amateur Radio Society is having a discussion on the questionnaire sent to members. Details from Barbara Green on 07957 870770.

On Tuesday 2 November Halifax & District Amateur Radio Society is meeting to plan the club's on-air activities during 2011. Details from Martin, M0GQB, on 01422 341317.

On Wednesday 3 November Hornsea Amateur Radio Club is having a selection of radio hints and kinks by G3XYF. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 4 November Ripon & District Amateur Radio Society Club is on the air. Contact Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 4 November Wakefield & District Radio Society is attending the Scouts' bonfire, fireworks and barbecue at HQ, for which there is a charge of ?4. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 5 November East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 6 November Wakefield & District Radio Society continues its Foundation and Advanced licence courses. Contact Ken, 2E0SSQ, on 07900 563117.

On Monday 1 November GEARS is having a vintage HF/VHF radio night at Knockagh Lodge, 236 Upper Road Greenisland, Co. Antrim. All are welcome. Details from Peter Lowrie, MI5JYK, by email to MI5JYK@rsgb.org.uk.

NEWS FOR SCOTLAND

On Tuesday 2 November Livingston & District Amateur Radio Society is having a Club Evening. More information from Norman, on 07740 946192.

On Wednesday 3 November Ayr Amateur Radio Group is having a talk on computerised rotator control. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday 3 November Paisley YMCA Amateur Radio Club is having a training evening. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Wednesday 3 November West of Scotland Amateur Radio Society has construction projects & licence training by the Solder Group. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 4 November Aberdeen Amateur Radio Society is holding a junk sale. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 5 November Cockenzie & Port Seton Amateur Radio Club has a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 5 November West of Scotland Amateur Radio Society is having presentations, guest speakers, a raffle and a quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Monday 1 November Basingstoke Amateur Radio Club is having an informal meeting. Details from Clive, G4ODM, on 01256 326050.

On Monday 1 November Braintree & District Amateur Radio Society is holding a junk sale. For more information contact John, M5AJB, on 01787 460 947.

On Monday 1 November Burnham Beeches Radio Club has project testing. Contact Dave, G4XDU, on 01628 625 720.

On Monday 1 November East Kent Radio Society is having a holiday photos evening and invites all members to bring along their photos. Brian, M0DCO will be speaking on how to take photos when sight impaired). Details from Karl Davies, M1DFM, on 01227 710120.

On Monday 1 November Verulam Amateur Radio Club is having a committee meeting. Details from Ralph, on 01923 265572.

On Monday 1 November West Kent Amateur Radio Society is having a presentation on Kent Repeater Group by Martin Stoneham, G4RVV. More information from Les, G6UBM, by email to westkentars@googlemail.com.

On Tuesday 2 November Andover Radio Amateurs Club is having a club night. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 2 November Chelmsford Amateur Radio Society is having a talk on SPR Mode and 500kHz, 136kHz and 8.97kHz VLF operating by Roger Lapthorn, G3XBM. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 2 November Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 3 November Chesham & District Amateur Radio Society is having a general meeting and CW training session. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 3 November Norfolk Amateur Radio Club is having a visit from RSGB President Dave Wilson, M0OBW. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 3 November Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Wednesday 3 November Worthing & District Amateur Radio Club is holding its annual construction contest. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 4 November Cray Valley Radio Society is having a surplus equipment sale. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 4 November Horsham Amateur Radio Club is having a talk on light bulbs by John Narborough. Details are on the web at www.harc.org.uk.

On Thursday 4 November Lowestoft & District Amateur Radio Club is at the shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 4 November Shefford & District Amateur Radio Society is having a talk by Don, G4LOO, on voltage control on the National Grid . Details from David, G8UOD, on 01234 742 757.

On Thursday 4 November Verulam Amateur Radio Club is having an informal social at the Queens Head, Sandridge. Details from Ralph, on 01923 265572.

On Friday 5 November Cambridge & District Amateur Radio Club is having a talk on the life and adventures of Marconi by Peter, M0DCV. Details from Lawrence Micallef, M0LCM, on 07941 972724.

In order to avoid Bonfire Night, the Friday 5 November meeting of Crystal Palace Radio and Electronics Club is postponed until next Friday, 12 November. Contact Bob, G3OOU, on 01737 552 170.

On Friday 5 November Loughton & Epping Forest Amateur Radio Society is having a night on the air using data modes. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 5 November Wey Valley Amateur Radio Group is having a talk on Morse frivolity by Andrew Vine, M0GJH. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 6 November Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

NEWS FOR THE SOUTH WEST

On Tuesday 2 November West Devon Radio Club is having a bring and buy night, to which all are welcome. Refreshments are available. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 3 November Callington Amateur Radio Society is having a talk on the Four Square antenna by Steve Pridham, G4BVB. More information from Chris Harris, G7UDX, on 07973 418 371.

On Wednesday 3 November Thornbury & South Gloucestershire Amateur Radio Club is re-visiting narrowband TV. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 3 November Trowbridge & District Amateur Radio Club is judging entries for the G2BQY and G4UNU Constructor's Cup. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 4 November South Bristol Amateur Radio Club is holding a committee meeting. Contact Len, G4RZY, on 01275 834 282.

On Thursday 4 November Swindon & District Amateur Radio Club is having a talk by James, M1DST entitled You Are Being Tracked. Contact Den, M0ACM, on 07810 317750.

On Thursday 4 November Yeovil Amateur Radio Club is having a talk on the RSGB by G0XAY. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

DX Bulletin No. 983
BID: $OPDX.983
November 1, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, N3SW, NG3K & ADXO, N4AA & QRZ DX, K8PT, K8YSE, W8GEX (60m News), AT International, DL1SBF, DL7MAE & The DX News Letter, DX World.Net, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA1HZ, TA2RX, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

*** EDITOR'S SPECIAL NOTES (by Tedd, KB8NW): This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 23rd-October, through Friday, 29th-October there were 235 countries active. Countries available: 3A, 3B6, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T33, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (Update). Gerd, DG5MMW, will be active as 3B8/homecall from Pereybere, Mauritius Island (AF-049, WLOTA 0595), between October 30th and November 6th. Activity will be possibly holiday style on the HF bands working PSK31 and RTTY on 40-20 meters during his afternoons. QSL via his home callsign, by the Bureau or direct.

5W, SAMOA. Rudi, ZL2KBR, will be active as 5W0BR from Apia, Upolu Island (OC-097) between November 5&#65533;13th. Activity will be on all HF bands using SSB and PSK31. He plans to use a FT857D w/100 watts into a dipole or vertical antenna. QSL via his home callsign. For more details, visit his Web page at: http://www.zl2kbr.tk

9K, KUWAIT. Operators Hamad/9K2HN, Faisal/9K2RR, Yaser/9K2YM, Ahmad/9K2QA and Andy/SP4R will be active as 9K2HN during the CQWW DX SSB Contest (October 30-31st) as a Multi/Single entry. QSL via 9K2HN, by the Bureau, direct or LoTW.

9M8, EAST MALAYSIA. Steve, 9M6DXX, is currently active from Sarawak (OC-165) as 9M8Z. He is expected to be in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. He will go QRT at the end of the contest and return to Sabah a couple hours later. QSL via M0URX.

B7, CHINA. An international team of operators will activate B7P from Foshan City (WW. Grid OL63NA), nearby Guangzhou City, during the CQWW DX SSB Contest (October 30-31st) as a Multi-Multi entry. The team hopes to set a new country record. The operators mentioned are Terry/BA7NQ (leader), Jose/EB5BBM, Vincent/F4BKV, Andrea/IK7YTT, Jyrki/K9JKA, Jussi-Pekka/OH6RX, Esa/OH7WV, David/VR2YDC, Nelson/VR2AAW, Wong/VR2KW, Lam/VR2XZK, Eric/VR2YTK, and local Chinese operators Yang/BA7JA, Terry/BA7NQ, Guo/BA7IN, JinQuan/BA7JC, Samir/BD7MLY, Yang/BD7IXG, BD7IBS, Yan/BA7JG, Paul/BA7JS, Wu/BA7IA, Rumei/BD7LMD, Lv/BD7MFB and Shiyu/BD7KSF. All QSLs will be sent via Bureu. For direct cards, please QSL via their manager BD7IXG.

C6, BAHAMAS. Pete, K8PT, will be active as C6APT from Treasure Cay (NA-080 - Little Bahama Bank IOTA Group) between November 27th and December 10th. Activity will be on 40-10 meters with concentrating on the 30/17/12 meter bands, using mostly CW with some RTTY. QSL via K8PT.

CO, CUBA. Luis, CO6LP, will be active during the CQWWide DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (15m)/Low-Power entry. He QSL via CO6LP.

CQ NEWS (CQWW Contest Expands Recognition for Assisted Categories). CQ Communications, Inc, reports on October 27th: "The SSB weekend of the CQ World Wide DX Contest is this coming weekend, and CQWW Contest Director Bob Cox, K3EST, is highlighting the expanded and strengthened award program for the Assisted categories, as of this year's running of the CQWW Contest. This applies to both the SSB and CW weekends. 'The CQ WW Contest Committee would like to inform you,' says Cox, 'that the ASSISTED CATEGORY award program has been greatly expanded.' Specific changes include the following:

- All Low Power and QRP assisted entrants will be specifically listed and eligible for awards as is already the case for unassisted entries.
- A band-by-band breakdown for all band assisted World, Europe and USA will be provided within the 2010 results.
- Lastly, the number of plaques available to assisted entrants will be increased to include Europe Assisted All Band and all World Assisted Single Bands.

'We hope that this action provides an incentive for entrants using a QSO spotting system to join the assisted category,' Cox explains. K3EST also reminds CQWW participants that the log submission deadlines have been changed. SSB logs must be submitted by Nov. 21, 2010 and CW logs by Dec. 21, 2010."

CY0, SABLE ISLAND (Update/Operation Postponed). Randy, N0TG, reports:
"Dear Clubs and Foundations who have generously supported the Sable Island Dxpedition: Thank you for your support and the opportunity for us to work with you. Unfortunately, as perhaps you have heard, a problem with the special equipped aircraft in preparation for our flight has caused a delay for an unknown extended amount of time. It is expected that the delay is going to be extensive as the problem is a major safety related issue and the aircraft cannot fly.
Thus, due to the uncertainties of the delay and that a reschedule of the DXpedition, if possible to do so, would likely need to be next Sept/Oct. It is therefore very appropriate for us to refund the support you have provided, as well as, to individual supporters. I cannot express how disappointed we are in not being able to carry on with a definite plan. Perhaps we will try again in the future, but for now.... it is impossible to project when or if it will be possible. A description of the issue the best we understand is provided below:
A superficial dye-penetrant test indicated the presence of cracks. Clearly the aircraft cannot fly in a condition in which there are visible cracks, but of unknown extent, in the axles. Therefore this aircraft is no longer airworthy and it is grounded indefinitely until the axle can be removed from the aircraft (no small job) and subjected to additional NDT testing to determine the extent of the cracking. Whether the aircraft can legally remain in service with some known amount of cracking is possible but highly unlikely. The aircraft owner will need to either develop a repair scheme (also highly unlikely), or they must find a replacement axle in new or certified re-conditioned state, all of which parts require FAA documentation to validate them. Since the aircraft is of British design, there may be other airworthiness documentation considerations regarding part certification.
The aircraft the axles are on is a Britten-Normal Islander which has been out of production for decades. Finding a qualified major part for an aircraft of that age is so challenging a business that special companies exist solely to do that on behalf of aircraft owners. Our charter aircraft operator is being very honest with us. He has solid grounds for stating that he cannot put a date upon when our transportation will be airworthy again.

There are other aircraft of this type in Canada but no-one with both
the necessary modified undercarriage for landing on beach sand and the
willingness to use it on Sable. A replacement fixed-wing aircraft is
therefore a non-option."
NOW FOR THE GOOD NEWS.... Randy states, "As of recent days Al Wilson
 VE1AWW/CY0 is assigned as a worker on Sable Island. His schedule is
3 months ON and 3 Months OFF. Currently he is on the Island and will
be active as work schedules permits through DECEMBER. This is a new
development/new ham and may help the 'need'. He is beginning to show
up on the Spotting Clusters...."
"Thank you again; we will be refunding in the near future. Updated
information will be posted on our web site as to final decisions related
to any potential reschedule as details become available. Web site is:
http://www.CY0dxpedition.com
73, again, we appreciate the support and encouragement during the planning
phase..... Randy N0TG"
ADDED DETAILS THANKS TO DX-WORLD.NET. Reportedly, Alan, VE1AWW, is a
new operator, licensed since July 2010. It was Randy, N0TG, of the CY0
DXpedition, who made the suggestion that he give amateur radio a try.
Alan works on the island 5-6 days a week. He is not on the air 1100-1900z
(1200-2000z once Canada switches from Daylight Savings to Standard Time)
Monday-Friday, and sometimes Monday-Saturday. He plans to do his best to
operate at different times on the weekends so as many different areas as
possible get an opportunity to work him. Alan states, "While I am a fan
of the lower frequencies, there is a lightning hotspot southwest of
Sable Island. I am often affected by static crashes, especially on 80m."

EY8, TAJIKISTAN. Zaur, EY8CC, will be active during the CQWW DX SSB
Contest (October 30-31st) as a Single-Op/Single-Band (15m)/Low-Power
entry. QSL via address on QRZ.com.

EY8, TAJIKISTAN. Zamir, EY8DD, will be active during the CQWW DX SSB
Contest (October 30-31st) as a Single-Op/Single-Band (15m)/Low-Power
entry. QSL via address on QRZ.com.

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, will be active during the
CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (80m)
entry. QSL K1BV via direct, by the Bureau or LoTW. Visit his Web page
at: http://www.ey8mm.com

EY8, TAJIKISTAN. Yuri, UA4LCQ, will be active as EY8/UA4LCQ during the
CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (10m)
entry. QSL via UA4LCQ.

GW9, WALES. Steve, MW0ZZK, will be active as GW9T during the CQWW DX SSB
Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via LoTW.

H22, CYPRUS. Spyros, 5B4MF, will be active using his special callsign
H22H for the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Low-
Power entry. QSL via address on QRZ.com, or by the Bureau or LoTW.

IOTA NEWS.....
AF-018. Giacomo, IH9GPI, and a team operators (I2YSB, IK2HKT, IK2DIA and IK2CKR) will be active as IH9GPI from Pantelleria Island (Africa Italy) during the CQ WW DX CW Contest (November 27-28th) as a Multi-Multi entry. QSL via IH9GPI.

AF-019. Operators Tony/IK1QBT and Emilio/IZ1GAR will be active as IH9/IK1QBT and IH9/IZIGAR from Pantelleria Island (IH9 African Italy - WLOTA 0041), between November 23-30th. Their activity will include the CQWW DX CW Contest (November 27-28th). Tony will be a Single-Op/Single-Band (80m) entry signing as IH9X. Emilio will be a Single-Op/Single-Band (40m) entry signing as IH9R. Pantelleria counts a multiplier Zone 33 Africa Italy for the CQWW DX rule (island is located over the African continent platform). Prior to the contest, they will be putting an emphasis on the lower bands. QSL via their home callsign.

AF-065. Some of the operators from the recent TS7TI and TS8P operations are planning a DXpedition to Herne Island, Morocco, in 2011. This island is a rare IOTA (14.1 %). The group is hoping to receive permissions. They state that their friend Kacem, CN8LR, secretary of ARRAM, is helping them obtain a license and special callsign. For update, watch: http://www.i8lwl.it

NA-008. (Update) Jay, VY0JA, is now active daily from the CFS Alert Arctic base on Ellesmere Island until on or before early morning November 17th. Activity is limited to 2200-0100z during the weekdays, but anytime during weekends. Suggested frequencies are (+/- QRM): 1827, 3507, 7007, 10107, 14007, 18072 and 21007 kHz. This operation is valid for the Arctic Challenge program. Mehdi, F5PFP, provides an interesting slideshow and music depicting the Canadian Arctic station at:

http://www.french-polar-team.fr/VE_Polar_Stations_North_Group.php

OC-171. Craig/VK4LDX and his XYL Michelle enjoyed themselves so much during their holiday on Fitzroy Island (OC-172) and activating VK4LDX/P in mid-October, that they have now decided to activate another IOTA. Look for VK4LDX/p to be on air for a 3 day operation from Magnetic Island between December 10-12th. Craig will be using a multiband vertical close to the beach. For more details, read the following Web page at: http://vk4ldxoc171.blogspot.com

OC-244. Vincent, F4BKV, will be active as DU1/F4BKV from Mindoro Island, part of Luzon Coastal Islands group, between November 4-7th. Activity will be on 40/20/17/15 meters using SSB and PSK31. He plans to use a FT-857 with monoband dipoles on 20m, and either 17 or 15m, and a vertical for 40m. QSL via his home callsign or LoTW. For more info and an online log search, visit F4BKV Web site at: http://www.f4bkv.net

K4, UNITED STATES (USI Op). Scott, N3SW, will activate the special event callsign, K4I, for the USI Award on his vacation from Holden Beach, NC, between October 31st and November 5th. Holden Beach reference number is NC008S. Activity will be on 40/30/20 meters QRP using CW and SSB. Scott will be using a Tentec Argonaut V and an Elecraft KX1. Antennas will be an End Fed Half Wave and a Black Widow Vertical. Watch for QSN spots on http://www.qrpspots.com
QSL via N3SW. For more details on the USI Award, see:
http://www.usislands.org

K7, UNITED STATES (Special Event). Members of the Yavapai Amateur Radio Club (YARC) in Prescott, Arizona, will operate a special event station K7NRA on November 17th. Activity is in celebration of NRA's 139th birthday. The amateur radio station will be operated from the Gunsite Academy's 2,000-acre campus north of Prescott. The operation will take place between 1500-2300z on the following suggested frequencies: 7250, 14250 and 21335 kHz. For more information, visit YARC's Web site at: http://www.w7yrc.org

KG6, GUAM (OC-026). Joel, KG6DX, will be active as KG6DX in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (10m)/High-Power entry. QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

KH2, GUAM (Update/Cancelled). Operators Kiyoshi/JA7RPC and Mitsuru/JH7DFZ have cancelled their KH2/JA7RPC and KH2/JH7DFZ operation between November 5-7th.

KH2/NH2, GUAM. Dave, N2NL, will be active as NH2T from Guam (OC-026) during the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/Assisted entry. He is expected to be here until the summer of 2013. Dave will be active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or via W2YC.

KH6BZF PROPAGATION FORECAST/REPORT (For November 1-7th)....
Nov 1 AN SOLAR REFERENCE KEYS
Nov 2 AN --------------------
Nov 3 AN BN - Below Normal
Nov 4 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 5 AN LN - Low Normal
Nov 6 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 7 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP2, U.S. VIRGIN ISLANDS. Operator Jaime, WP3A, will be active as KP2B from St. Croix, Virgin Island, during the CQWW DX SSB Contest (October 30-31st(as a Single-Op/All-Band/Low-Power entry. QSL via K2DER. Visit his Web page at: http://www.wp3a.com

PJ2, CURACAO. Some of members of the Caribbean Contesting Consortium (CCC) will once again activate Signal Point Station on Curacao (SA-099, WLOTA LH-0942) as PJ2T during the CQWW DX SSB Contest (October 30-31st) as a Multi-Multi entry. Operators mentioned are Geoff/W0CG (PJ2DX), John/K6AM, Gary/K9SG, Bob/N8NR, Wayne/K8LEE, Joe/W9JUV, Helmut/DF7ZS, Sam/DL5RDO and Bernhard/DL5RDP. QSL PJ2T via N9AG or LoTW. Look for the above operators to be active before/after the contest as PJ2/homecall or their own PJ2 callsign.

PJ2, CURACAO. Operators Bill/K2TQC, Brian/N2MF, Ken/W1NG and Tony/K2NV will be active as PJ2/homecall from Curacao (SA-099) between November 4-11th. Activity will be on the lower bands and RTTY. QSL via their home callsigns.

PJ2, CURACAO. Karl, OE3JAG, will be active as PJ2/OE3JAG between January 30th and February 11th (2011). Activity will be holiday-style on 40/30/ 20/17/12 meters using mainly CW. QSL via LoTW or direct to his home callsign (w/IRC), by the Bureau, or E-mail request by Bureau. E-mail address is: karl@oe3jag.com

PJ2/OH1VR ONLINE LOG now at: http://www.oh1vr.net

PJ2/W5MPC ONLINE LOG now at: http://www.clublog.org/logsearch/pj2/w5mpc

QSL ROUTE FOR PJ5/AH6HY is AH6HY (not AH6DX). QSL direct or by the Bureau. No online logs.

PJ7E ONLINE QSL SYSYTEM NOW READY! Joe, W8GEX, reports that John Miller, K6MM, their PJ7E Webmaster/Operator has activated the "Online QSL System" for PJ7E at: http://www.stmaarten2010.com/index.html http://www.stmaarten2010.com/qsl.html

NOT THE MANAGER FOR the RECENT PJ7E OPERATION. Kyle, WA4PGM, reports: "I have received cards for the latest PJ7E and PJ4E (I think BUSTED) operations. I am only manager for PJ4E during 2006, 2007, and 2008

CQWW SSB contest. Don't worry if you've sent me a card I will forward the small stack I have to their QSL manager." PJ7E cards go to: Sint Maarten 2010, Box 333, Bethleham, GA 30620-9989.

QSLS VIA LoTW: 2I0GWA, 6V7X, 9M2CNC, A51A, A65BK, A92GE, CE3FZ, CN8KD, CR3A, CR6K, CT1JOP, D4C, DL3TD, DT8A, E74A, EA5GL, F5UTN, GW4BLE, HA5BSW, HA5UK, HB9CRV, HB9CVQ, HG7T, HI3TEJ, IS0GQX, J39BS, KP4JFR, KP4JRS, LA1J, LN9Z, LX7I, LY5E, NH2T, NP4G, OE8SKQ, OK3R, P40L, PJ2S, PJ5/K1XM, PJ7/K1XM, RA1AOB, RV3LO, S58N, ST2AR, SV2BFN, TC098A, UT7UJ, VK4KW, VK5NPR/3, VK7GN, VQ9LA, WP2B, YB8FL, YJ0VK, YO9HP, Z21BB and ZS2DL

QSLS RECEIVED VIA MAIL: 3C0C, 8Q7SO, 9K2YM, 9X0TL, NQ4I/am, KG4WV, KP4YI, PJ2/OH1VR, R1FJM, V51B and ZG2FK

QSLS RECEIVED VIA THE BUREAU: NONE reported this week!

S7, SEYCELLES. Luca, I5IHE, will be active as S79LC between now and November 5th. Activity will be holiday style, but he will be in the CQWW DX SSB Contest. QSL via I5IHE.

TC87, TURKEY (Special Event). Members of TCSWAT (TC Special Wireless Activity Team) will activate special event callsign, TC87TC, during the CQWW DX SSB Contest weekend (October 29-31st) from the TA2KN Scout Camp Grounds. Activity is to celebrate the 87th anniversary (on October 29th) of the founding of "Turkiye Cumhuriyeti" (Republic of Turkey). Operations will be on the HF bands, mainly on 80/40-20 meters. QSL by the Bureau or direct to: POB 73, Karakoy 34421 ISTANBUL, TURKEY. Information about the TCSWAT QSL policy is available on their Web site at: http://www.tcswat.org

TO3, ST. BARTHELEMY (Update). Nikola, VE3EY, will once again be active from St.Barthelemy Island (NA-146, DIFO FJ-001, WLOTA LH-0377), but this time as TO3A between November 22-30th. Activity will be on 160-10 meters using CW, SSB and RTTY. He will also be in the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via VE3EY.

TR, GABON. Vincent, F4BXW, will active as TR8GV from Libreville between November 3-23rd. Activity will be on the HF bands using SSB. QSL via his home callsign.

V4, ST. KITTS (NA-104). Andy, N2NT, will be active as V47NT from the QTH of V47KP during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via W2RQ.

VP2, MONTSERRAT. Nigel, G3TXF, will be active as VP2MXF from Gingerbread Hill, Montserrat (NA-103), during the BERU 2011 Contest in March.

VU, INDIA. Bharathi, VU2RBI, from New Delhi, will be on during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Low-Power entry. QSL only direct (see QRZ.com for address).

VU2, INDIA. Pai, VU2PAI, in Mangalore, will be active during the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. Activity will be on 160-10 meters. QSL via VU2PAI direct (QRZ.com address).

ZD9, TRISTAN DA CUNHA. Dieter, DJ2EH, will be active between November 20th and December 8th. Callsign was not mentioned. Activity will be on CW, SSB and RTTY on all bands.

ZS2, SOUTH AFRICA. Donovan, ZS2DL, will be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via NI5DX. Look for online logs to be posted at: http://www.zs2dl.co.za

ZS9, SOUTH AFRICA. Members of the Bloemfontein Defence Amateur Radio Club will be active as ZS9X from Bloemfontein during the CQWW DX SSB Contest (October 30-31st) as a Multi-2 entry. Operators mentioned are: Bernie/ZS4TX, Shane/ZS4TW, ZS4C, John/ZS4S, Christian/ZS6RI, Ronnie/ZS4RY and Denis/ZS4BS. QSL only via K3IRV or LoTW. Read the interesting write-up at: http://www.qrz.com/db/ZS9X

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 30-31st, 2010)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2010 CQWW DX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

RAC Bulletin 2010-028E 2010-10-30 - 10:00 a.m.

This weekend, the Radio Amateur of Canada Director's, executive and key resources have gathered in Ottawa to plan the future of RAC. These individuals are almost all volunteers, and we are committed to the future of RAC.

Today we are looking at what RAC needs to look like in the future. We are reviewing the feedback received, the future of The Canadian Amateur magazine and what our physical presence needs to be in the future. We are building a vision of what RAC needs to look like in

the future, in order to attract and retain members, and ensure the future of Amateur Radio in Canada.

Further bulletins to follow.

Signed:
Directors and Executive
Radio Amateurs of Canada

973. SARL NEWS - SUNDAY 31 OCTOBER 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-30 19:00:15 UTC
From: website@sarl.org.za
Message-ID: <20101030190007.25F2533C37@panix2.panix.com>
Source record: 5392
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 31 OCTOBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

In the news today:

BURSARIES FOR MAY 2011 RAE

RADIO UGANDA ON 7 195 KHZ RELUCTANT TO MOVE

SARL MEMBERSHIP

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

BURSARIES FOR MAY 2011 RAE

The South African Amateur Radio Development Trust is making bursaries available for students under 25 years of age who are planning to write the May 2011 Radio Amateur Examination

Each bursary pays for the examination fee, student membership of the SARL for one year and contributes to the tuition fees. The bursary is valued at R1 000.

The bursaries have been made available by the family of Tony Reumerman, ZS6AOG, from the proceeds of the sale of equipment. Tony is incapacitated and is no longer operational on Amateur Radio. The bursaries are in recognition of Tony's contribution to innovation in Amateur Radio.

Application forms are available on www.amateurradio.org.za. Applications close on 15 January 2011 and successful applicants will be informed by 20 January and receive their bursary by electronic transfer.

The SA Amateur Radio Trust bursary fund is financed for donations. For more details who you can contribute to the fund go to www.amateurradio.org.za.

RADIO UGANDA ON 7 195 kHz RELUCTANT TO MOVE

An Ugandan broadcaster is playing hardball and is refusing to leave the amateur only portion of 40 metres. This, even after notification from the government, Radio Uganda continues to operate on the amateur radio frequency of 7 195 kHz.

Following notification by 5X1JM, the Uganda Communications Commission informed Radio Uganda the broadcaster is not permitted to use the frequency within the amateur radio exclusive spectrum. So far, the station has continued to use the frequency and its believed that it may be some time before they move out.

Observers say that at least the point has been made and action initiated by Ugandan government telecommunications authorities against the now unauthorized use of the frequency.

Fred Scheepers, ZS1FCS, is requesting your participation in monitoring the 40 metre amateur band and report any intrusion by unauthorised stations to the SARL - IARU monitoring service by email to intruder@sal.org.za. Please include as much information as possible such as time of operation, station identification and, if available, an mp3 recording of the station identification which can normally be heard on top of the hour and on the half hour.

SARL MEMBERSHIP

This week the membership of the SARL stands at 1 382, just 78 members short of this year's target of 1 460. If your renewal is still outstanding please make a payment this weekend or call Mariska on Monday at 011 675 2393 for details. If you are not a member yet, please join now and support your hobby with membership of the SARL. Application forms are available on www.sarl.org.za or call Marika on Monday morning 0n 011 675 2393.

CONTEST NEWS

CONTEST RESULTS

2009 CQ WW CONTEST

During the 2009 CQ WW DX CW Contest, Bernie van der Walt, ZS4TX, participated in the single operator, all band, high power category and made 8 167 500 points. This placed him in the 6th place in the world in this category. Well done, Bernie!

2010 SARL HF CW Contest.

Nine logs were received for the HF CW Contest, representing five clubs and three call areas. The complete results have been published in HF Happenings 426. Occupiers of the first three places, with point scored

are as follows:

Single Operator 1st Vidi la Grange, ZS1EL, 94 points 2nd Hans Kappetijn, ZS6KR, 84 3rd John Kramer, ZS5J, 64

Multi-operator 1st West Rand ARC, ZS6WR, 100 points

Bruce Dunn, ZS5XT, achieved the highest score on a single band with his 48 points on 40 metres.

The combined scores of the HF Phone and CW contests: 1st West Rand ARC, ZS6WR, 262 2nd Jan Botha, ZS4JAN, 226 3rd Hans Kappetijn, ZS6KR, 223

Club Competition results are:

Phone: 1st ZS Contest Group, 451 points 2nd West Rand ARC, 325 3rd Highway ARC, 305

CW: 1st Boland ARC, 146 points 2nd West Rand ARC, 126 3rd Pretoria ARC, 84

Phone and CW combined: 1st West Rand ARC, and ZS Contest Group, 451 points 3rd Pretoria ARC, 383 points 4th Highway ARC, 305 points

Results of the 2nd leg of the UHF/VHF Contest on the 18th-19th September 2010.

Winner, Field station, Multi operator ZS6PTA/4, 113 210 points

Single operator, Home Station 1st, ZS6OB 30 252 points 2nd, ZS6BB 9 584 points

Winner, Single operator, Home Station Digital ZS2ACP, 70 805 Points

NEXT CONTEST

The second RaDAR Contest will take place on Saturday 6 November from 12:00 UTC to 18:00 UTC. It is a multi mode contest on all the amateur bands but excluding the WARC bands and including satellite.

The contest is for everyone, at home, in your car, in the field. Any mode, CW, SSB, FM or digital modes. Support your friends in the field, you never know, you may work a really rare grid in the process!

The event is aimed at promoting the use of Rapid Deployable Amateur Radio stations and antennas preferably without relying on normal mains power (Eskom).

The exchange is your call sign, name, QTH and grid locator. The points system is so structured as to encourage portable operation. Score multipliers are used to reward and favour the portable stations and stations using temporary antennas and alternative power supply sources.

Read the complete set of rules on page 27 of the 2010 SARL Contest Manual or visit www.nwinternet.za.org/zs6bne/RaDAR/. Please use the logbook format available as links on the websites.

There may be International participation (The RaDAR Concept has been adopted in other countries too), please look out for the DX stations. Most important, enjoy the contest!

YL NET

Young ladies are reminded of the YL net that starts at 15:00 CAT this afternoon on the Magalies 145,750 MHz repeater. All YLs are welcome. If you do not want to talk at first, please attend the call in. If you have any interesting news or suggestions please call Anette, ZR6D, at 073 199 9032 or e-mail her to zr6d@ymail.com.

YLs in the Western Cape who would like to set up an YL net can contact Corrina, ZS1CC, by e-mail to corinna@lpt.co.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Big Sunspot 1 117 has produced C-Class flares thus far and may produce an M-Class event. This region continues to grow but is unfortunately turning away from the Earth. The effective sunspot number is expected to be less than 25 for this week.

20 m will provide the best opportunities for DX followed by 15 and 10 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be good towards Europa, firstly on 10 m, later followed by good 15 and then 20 m openings. Late afternoons and early evenings 15 m contacts with the USA are at last possible again. Contacts with Australia and New Zealand are possible at sunrise on 20 m and on 40 m after sunset. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings, late afternoons and early evenings as well as over the shorter distances.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

31 October -YL net gets off. the ground at 15:00 on 145,750 MHz in Pretoria; 6 November - RaDAR Contest from 12:00 UTC to 18:00 UTC. 20 January 2011 - Closing date for submission for application for May 2011 RAE bursaries, visit www.amateurradio.org.za for application forms.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

RAC Bulletin 2010-026E GlobalSet 2010 - November 13, 2010
2010-10-30

A reminder that the next GlobalSet runs from 1100 until 1500 local
time November 13, 2010. This is a great chance to practice your
emergency +traffic passing skills. For a full list of frequencies and
rules, please visit the IARU Region 2 website.

During GlobalSet, the Radio Club Peruano (RCP) will celebrate it's
80th anniversary, and will be the Region 2 HQ station with the special
+call sign OC80A. Look for them on the IARU Center of Activity
frequencies on 15,17,20,40 and 80 meters.

Don't forget, to participate you must register with the VPFS.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 31st October 2010

Echo India Four Lima re-issued

John Kelly - formerly EI4HS - has recently been issued with the callsign EI4L, which was previously held by his grandfather. EI4L was issued originally to John Scanlon in 1936. He was one of the true pioneers of radio in this country, he experimented with television in the years after World War 2 and was also a very active HF DXer.

John Scanlon became a silent key in 2004. His call sign lives on, however, with his grandson John Kelly. As EI4HS, John has been very active on the bands and is a regular participant in the two metre counties contests, so expect to hear plenty of activity from EI4L over the coming months.

EI8GQB aka ON4EI - Benneshill 25th-31st October

Oliver will again be QRV from Ireland near Fethard (IO62EL) on top of Benneshill (170m ASL) with his Irish callsign EI8GQB, from October 25th to 31st 2010. He will enter the CQ WW SSB CONTEST as SOAB Low Power Non Assisted (October 30-31).

Reference frequency before the contest is 7.150 MHz +/-QRM. During the week before the contest Oliver will build 2 reflectors East-West for 40m and 2 for 80m on a 5/8 40m vertical, using the SPITFIRE ARRAY concept developed by K1VR and W1FV.

Equipment: 18m vertical top loaded monopole and Inverted V for 160/80/40. Spider beam for 20/15/10. Rig is Elecraft K3 100 W. Oliver will hold a daily expedition blog with all the details of the experimentation, please see www.qrz.com/db/EI8GQB for more details.

Science Week 2010

Science Week is being held from the 7 to 14th Nov. Clubs are encouraged to take advantage of the publicity generated by Science Week to promote their activities, perhaps by putting on a special event station or partnering with some other local Science Week project.

More details on the Website www.scienceweek.ie

Time running out for VK100WIA and WIA Centenary Award

The special callsign for the Centenary of Organised Amateur Radio in Australia, VK100WIA, will go QRT at 2359 hours Canberra time, Sunday 31 October.

It first went to air on 14 May, with the initial operator being the WIA President, Michael Owen VK3KI, then for the rest of that month it was operated by, or on behalf of the WIA.

Since then, under a system of three-day roster slots, around 50 clubs have activated VK100WIA, working more than 100 DX Entities and amassing close to 25,000 contacts.

The final slot on the roster goes to the Westlakes Amateur Radio Club, New South Wales.

Contact with VK100WIA was also required for the limited issue WIA Centenary Award.

DAR News

This weekend Thos has kindly opened up his shack to DAR Members for participation in the CQ WW Contest. DAR will be using the Contest call of EI0W.

The EI2CCR repeater live steam is now back on line after being off the air for maintenance.

E2E - Special call issued to RAST in HS/E2

RAST - Radio Amateur Society of Thailand - Under Patronage His Majesty the King 'HS1A'

The new call 'E2E' will be active for the first time this weekend in the CQ WW.

E2E will be active from 80-10m and enters the contest in the Multi-operator category.

News from Lough Erne ARC

Building on a 350% growth in membership that includes 26 new Foundation licensed members, Lough Erne Amateur Radio Club AGM has elected three of them to its seven strong Committee.

They include the new Secretary, Ciar&#65533;n Mi6OFN. The Chairman, Michael Mi5MTC declared - 'we are determined to involve, and progress these valuable members'.

A dozen are already enrolled on the Club's Intermediate course starting this Tuesday. Club activities will happen every Tuesday evening in the Share Centre, near Lisnaskea in County Fermanagh.

Share will also be the venue for the Club's thirtieth rally and conference weekend on 16 & 17 April 2011, just before Easter.

For more, email sec /at/ learc.eu or website www.learc.eu

Wicklow Radio Club

The Wicklow Radio Club meeting will be at 19.45 PM on Thursday 4th Nov in the Glebe National School in Wicklow Town.

Tipperary Radio Group

The Annual General Meeting of the Tipperary Amateur Radio Group will take place on Thursday next the 4th of November 2010 at Raheen House Hotel, Raheen Road, Clonmel at 8.00 pm. All are welcome.

Rallies

Thursday 4th November Bangor and District ARS Annual Surplus Sale Venue: The Boathouse, Groomsport, for more information see www.bdars.com

Sunday 7th November 2010 Event: Foyle and District ARC Rally Venue: White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA Doors open at 12 noon Information: See www.mn0aku.co.uk

Sunday 21st November 2010 Event: Mayo Radio Experimenters Network Annual Rally Venue: Welcome Inn, Castlebar, Co. Mayo Doors open at 11:00 a.m. Information: Rally Director: Padraic Baynes, EI9JA See www.ei7mre.org

For further details on Rallies please see www.irts.ie/rallies

---

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

976. ZL Ham Band Scope November 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-10-31 20:38:31 UTC
From: Peter Bennett ZL1UPB <news-nospam@zlham.geek.nz>
Message-ID: <iakk4adbj1@posting.glorb.com>
Source record: 5395

Greetings All

I have launched a new web site in New Zealand.

http://www.zlham.geek.nz

As part of my effort to promote Ham Radio in ZL land, I have started publishing a monthly newsletter.

Feel free to download Novembers Issue of ZL Ham Band Scope from the ZL Ham web site. Enter the URL below into your browser or ftp client.

ftp://zlham.geek.nz/Bandscope/bandscope-2010-2.pdf

Items of special interest to ZL radio hams are always welcome and of course overseas members are always welcome to join our little community down under.

977. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2010-11-01 06:00:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1288591200@panix.com>
Source record: 5396
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

DXNL 1700 - Nov 3, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

CY0 - SABLE ISLAND, NA-063
Maybe a little compensation for the cancelled CY0 DXpedition:
Alan,VE1AWW, holds a license since July and is working as a government
representative on Sable Island (NA-063) until Dec 29. He is active as
CY0/VE1AWW in SSB on HF with 100 watts and a vertical during his rare
spare time, mostly at the weekends. He is not QRV from 1100-1900 UTC.
QSL via homecall, direct or via the VE bureau.

Latest information state that the large-scale CY0 DXpedition, led by
Randy,N0TG, may take place in September/October 2011.

DU - PHILIPPINES, OC-244
For Nov 4-7 Vincent,F4BKV, is planning an activity as DU1/F4BKV from
Mindoro (OC-244/Luzon's Coastal Islands). He will work in SSB and PSK31
running 100 watts into dipoles for 15m and 20m and a vertical for 40m.
Vincent prefers to work during his evening hours.
QSL via F4BKV, via bureau, direct or LoTW. He has an online QSL request
system for bureau QSLs at: http://www.f4bkv.net

PJ2 - CURACAO, SA-099
PJ2/K2TQC, PJ2/N2MF, PJ2/W1NG and PJ2/K2NV are going to activate the
new DXCC entity Curacao (SA-099) from Nov 4-11. They favour RTTY and
the lowbands. QSL cards should be sent to their homecalls.

PJ4 - BONAIRE, SA-006
Hennie,PJ4/PE1MAE, will be active again from Bonaire (SA-006) for about
four months starting on Nov 8. After sprucing up his station there he
will work on all HF bands with his TS50 and a delta loop. This will not
be a "59 operation" since he has enough time for our hobby.
QSL cards should be sent via bureau or direct to PA2NJC.

TR - GABON
Vincent,F4BXW, will stay in the capital Libreville from Nov 3-23 and

plans to work as TR8GV in SSB. QSL via homecall.

V5 - NAMIBIA
Klaus,V5/DJ4SO, is going to hit the airwaves again from Namibia from Nov 3-30. He plans to take part in the upcoming WAEDC RTTY Contest and the CQ WWDX CW Contest on all bands. He will work mainly in CW, RTTY and PSK31 (only little SSB) on 160m-6m. Like in last year his QTH will be the farm "Heimat" southeast of Windhoek.
QSLs via bureau (an e-mail to klaus@dj4so.de is enough), direct or LoTW, no eQSLs!

VK0/M - MACQUARIE ISLAND, AN-005
Kevin,VK4KEV, will arrive on Macquarie (AN-005) some time between the end of October and the beginning of November to work there for about 18 months. During his spare time he will sign VK0KEV in SSB und digital modes mostly on 40m-20m.
Kevin was active as VK4KEV/VK7 from Hobart/Tasmania before where he prepared for his stay on Macquarie.

VP8/A - ANTARCTICA, AN-016
Karel,ON5TN, will stay on the Belgian Antarctic station "Elizabeth" again from Nov 10 until Feb 24, 2011. He will use the callsign OR4TN but it is very unlikely that he shows up before December because he is expecting much QRL during the begin of his stay.

Lars,SM4TUV, is working for the Norwegian polar institute which will bring him to the Norwegian polar research station "Troll" on Dronning Maud Land from November 2010 until December 2011. His call is 3Y8XSA. QSL via SM4TUV.
More information about the Antarctic station "Troll" can be found at: http://npweb.npolar.no/plattformer/troll and http://npweb.npolar.no

YS - EL SALVADOR
The callsigns YS1YS, HU1YS and YS1FRACAP will be activated during the exhibition FRACAP (Federacion de Radio Aficionados de Centro America y Panama) which takes place in San Salvador from Nov 5-7.
The QSLs for all three calls should be sent to YS1GMV.

6W - SENEGAL
Matthias (DL5MFL), Juergen (DL4MAQ) and Sven (DF9MV) are planning a DXpedition to Senegal from Nov 8-18. They are going to visit the resort of Francois (http://www.le-calao.com) and think of a "dedicated holiday style operation". A callsign for the team (6V7xx) has been applied for and more information will follow as soon the licence is available.
They will use yagis for 6m/10m/15m/20m, a square for 40m, a vertical for 40m/80m/160m zur and wire antennas for the WARC bands. They plan to work with two stations at the same time mainly in CW/SSB, maybe PSK31.
They have a survey on their website to find out which bands and modes are most needed and promised to focus on them:
http://dl4maq.wordpress.com/category/6w8-2010
QSL cards should be sent via bureau or direct via Fredy, DE0MST.

7Q - MALAWI
Harry,7Q7HB (G0JMU), is drawn to warmer climes and stays in Malawi
again until January 2011. He is working in CW and digital modes on HF.
His QSL manager G0IAS accepts QSL cards only direct.

CYPRUS, SPECIAL EVENT STATION
Alan,5B4AHJ, made his first HAM radio exam 50 years ago which is a
good reason to activate the special callsign 5B50J for one year.
Alan is working in SSB and CW until Oct 25, 2011. QSL via 5B4AHJ.

GERMANY, SPECIAL EVENT STATION
The festivities of the 20th anniversary of the German reunification
are taking place in Bremen this year. Thus the amateur radio club in
Bremen (I04) activates the special callsign DL20Y2DM until Aug 31,2011.
The special DOK is 20DEI04.

SOUTH ATLANTIC/SOUTH AMERICA TRIP
Svein,LA6IKA, started a three months trip to South America and the
South Atlantic on Oct 28. He starts from Tierra del Fuego (SA-008) and
uses the callsign LU/LA6IKA from there. Onboard the "MV Fram" he is
heading towards Antarctica from Nov 1-19. The ship will anchor at the
Falklands and South Georgia and Svein hopes to obtain a VP8 licence in
Port Stanley. He will also sign LA6IKA/CX from Uruguay in December and
ZP/LA6IKA from Paraguay during December/January (he is still waiting
for the licence here). Svein works "holiday style" mostly in CW and
some PSK31 with an IC-703 and homebrew verticals.
QSLs via homecall, bureau, direct, LoTW or eQSL.

SILENT KEY: Mike,UA0MF, died after a heart attack on Sep 2. Mike was the
first Russian OM who reached the "Top of the Honor Roll".

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

You can watch another video about the discovery of the ice floe of
SP-38 about 280 nautical miles north of Wrangel Island on:
http://www.vesti.ru/doc.html?id98953&tid&#65533;013

Another video about the discovery of the ice floe of SP-38 about
280 nautical miles north of Wrangel Island can be found on:
http://www.vesti.ru/doc.html?id98953&tid&#65533;013

The Portuguese amateur radio club A.R.V.M. organizes the Ham Fair in
Lissabon which will take place on Nov 28. Find more information at:
http://www.arvm.org/index.fr2010.html

UPCOMING CONTESTS

Nov 6/7: 35th IPA Radio Club Contest
Nov 6/7: Ukrainian DX Contest

Nov 7: DARC 10m Digital Contest "Corona"
Nov 7: HSC Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-056, JA6, Danjo Islands: Members of the Sony Kyushu's Amateur Radio Club
will sign JF6ZNT from Danjo Island from Nov 5-7. QSL direct/bureau.

AS-133, XU, Cambodia Group: XU7ACY, XU7ADV, XU7AJV and XU7KOH will be QRV
from Koh Russei Island from Nov 6-9. QSL via ON7PP (bureau/direct).

EU-020, SM1, Gotland County Group: Stephan,SM5YRA, will sign SM1YRA from
Faro Island from Nov 7-19. QSL via homecall and eQSL via SM1YRA (L).

OC-097, 5W, Samoa Islands: Rudi,ZL2KBR, will stay in Apia from Nov 5-13.
He will work as 5W0BR in SSB and PSK31 on all bands using a FT-857D
with 100 watts and dipoles or a vertical. QSL via homecall.
